SATURDAY, JANUARY 4, 1908.

Subscription—\$3.00 Per Year

CITATION 2:03 $\frac{1}{4}$, BAY MARE BY NORVALSON.
Unbeaten Pacer of 1907. Winner of 13 Races.

DID YOU EVER HEAR OF AN
OFFER LIKE THIS?

Useful and Beautiful

No other firm could offer this but us.

This is the first time we have ever made this offer—this beautiful four-piece set of Silverware (guaranteed), full size for family use, packed in case.

For Only 97c

It is done solely to advertise our product and only one set will be sent to each family, with **positively no duplicate orders**. The plate is heavy and the pattern one of the latest and most fashionable—the famous "Rose." The pieces are **FIT TO GRACE ANY TABLE AND WILL LAST FOR YEARS**. **ORDER TO-DAY** This price includes all packing, shipping and delivery charges prepaid to your door. Send cash, money order, or 2c stamps to Dept. E.,

Rogers Silverware Co., No. 114 Fifth Avenue
NEW YORK

CAPITAL \$3,000,000

SURPLUS \$3,200,000

The First National Bank OF SAN FRANCISCO, CAL.

A General Banking Business Transacted. Travelers Letters of Credit issued, available in all the large cities of the world.

Steel Safe Deposit Boxes for Rent

In vaults that successfully withstood the fire of April, 1906. Trunks, Silverware and Packages Containing Valuables taken on storage in fire and burglar proof steel vaults.

The ROSS McMAHON Awning and Tent Co.

Tents, Hammocks, Awnings and Covers. Camping Outfits for Hunting and Fishing Trips.

The Stallion Number

OF THE

Breeder and Sportsman

Will be issued February 15th, 1908. It will have a handsome cover in colors, contain many illustrations and be replete with matter interesting to breeders and horsemen.

If You Own a Stallion

Don't fail to advertise him in this issue, as an advertisement of your horse in this number will reach every man on the Coast who owns a good mare.

If You Own a Mare

You will find this number very interesting, as it will contain the stallion announcements giving particulars as to description, pedigree, terms, etc., of all the best horses on the Coast, and from these announcements you can decide on what stallion will nick best with your mare.

ARE YOU INTERESTED IN HARNESS HORSES?

If so, you will be interested in reading this number, as it will contain statistics and news that will be valuable and entertaining.

In place of getting out the usual large Christmas number of the BREEDER AND SPORTSMAN last month, it was decided to make a special effort and get out a handsome stallion issue, and the date of February 15th was selected as Christmas comes too early for an issue of this description. Owners of stallions who wish illustrations of their horses to appear in this issue should have photographs prepared without delay and send in their orders for space. A specially low price has been decided on for advertising in this issue, placing it within the reach of all. Write for price and particulars.

BREEDER AND SPORTSMAN

SAN FRANCISCO, CAL.

THE WEEKLY BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICE: 616 GOLDEN GATE AVENUE,
SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco
Postoffice.Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCEMoney should be sent by Postal Order, draft or letter
addressed to F. W. Kelley, P. O. Drawer 447, San Francisco,
California.Communications must be accompanied by the writer's
name and address, not necessarily for publication, but
as a private guarantee of good faith.

A SPECIAL STALLION NUMBER of the Breeder and Sportsman will be issued on Saturday, February 15th, 1908. It has been the custom of this journal to issue a large illustrated edition of the paper during the Christmas holidays, which was made the medium of advertising stallions that would be in service on the Coast during the ensuing season, but as that date has been found to be a little too early for many stallion owners to know just where their horses would be kept during the season, terms, etc., it was decided to issue our big annual edition this time on February 15th. Breeders and horsemen generally will endorse this change of date and will readily recognize the especial value of an edition that will be able to give accurate information as to the whereabouts and service fees for 1908 of all the leading stallions on this Coast. A large number of owners have already engaged space in this special issue, and we believe it will be the most valuable edition ever issued by this journal. Our Mr. J. R. Fronefield has already visited several localities and secured many advertisements and will visit Los Angeles and other southern points in the interest of this journal during the coming week. Every stallion that will make the season of 1908 on the Pacific Coast should be represented in the Special Stallion number, out February 15th.

GOVERNOR HUGHES OF NEW YORK, who is being prominently mentioned as the candidate of the Republican party for President, recommends in his annual message to the New York Legislature, that laws be passed which will completely suppress all race track betting. Governor Hughes, in his message recites the New York constitutional provision forbidding lotteries, pool selling, book making or any other form of gambling within the State and empowering the Legislature to fix penalties therefor and urges the amendment of the Penal Code which prescribes the punishment for pool selling at race tracks, forfeiture of the money paid by the bettor to be recovered. The message continues: "The Constitution makes no exception of race tracks. I recommend that the Legislature carry out the clear direction of the people without discrimination. In conclusion with the repeal of the existing exceptions I recommend that the offense described in the Penal Code should be punished by imprisonment and that the alternative of fines should be abolished." It is not often that a man who is a Presidential candidate has the courage to take such a decided stand on a question that will array against him such powerful influences as the New York racing associations, but the growing evil of race track gambling is such that statesmen in all parts of the country are now openly asking for its suppression. It is not harness racing which has aroused this antagonism, but the prostitution of the thoroughbred to a mere gambling machine that has done it.

A HARNESS RACE PROGRAM should fit the conditions which exist in the section of country where the meeting is to be held. If there are two or three horses that outclass all others of a particular class, and it is known that they will be raced, it is almost useless to offer a race for that class with the expectation of getting a dozen entries. Horsemen who have horses in training generally know what the other fellows have, and will refuse to enter in races where they have no chance for anything better than fourth money in the race. Secretaries

should study the Year Book, visit the training tracks and post themselves thoroughly in regard to the horses in training and then they will be prepared to arrange programs that will fill. Early meetings, those that are held during the first two or three weeks of the circuit, can generally get a pretty generous lot of entries for any old program, as there is always a host of green horses and those with slow records whose owners desire to try them out in early races just to see if they will do, but later on when the horses begin to show, a program must be arranged with some intelligence and judgment to "fill to the satisfaction of the board," and to get enough starters to make it interesting. There are horses that have no record, but are known to be cracker-jacks that must be provided "against", or other owners will stay out of that race, while there are dozens of 2:30 trotters that can be brought together in what will probably prove the hottest kind of a contest, if the Secretary is only wise enough to know it and make the conditions agreeable to their owners. If California had a regularly organized circuit, the associations could afford to pay an expert to ascertain all the facts about the horses in training each year, and make programs for them that would furnish good racing at every meeting. Without such organization, however, little can be done unless an association is fortunate enough to have a Secretary that knows the business.

THE HORSE BOOK is a recent publication from the pen of J. H. S. Johnstone, assistant editor of the Chicago Breeders' Gazette, and published by that journal. It is a well printed work of 400 pages, and is a treatise on horse breeding, written more particularly for the farmer and student. Part I treats of the origin of the horse, heredity as a force, embryology, management of stallions, broodmares and foals, fitting for market, sale and show ring. Part II treats of the breeds, chapters being devoted to all known breeds of the horse. Part III is devoted to hygiene, unsoundness and disease. There is an appendix which gives the stallion lien laws of all the States and Territories which have enacted such legislation. The book has many fine illustrations and is written in an entertaining manner. It is sold at \$2, sent prepaid by mail or express. Address Sanders Publishing Co., 358 Dearborn street, Chicago.

THE CHICAGO HORSE REVIEW has made new conditions for its popular Futurity, which should make it still more popular. In this new stake every subscriber to the paper at \$2.50 per year has the privilege of nominating without cost every mare bred in 1907 that he owns. On November 1, 1908, when the foals will be weaned, a payment of \$5 will be made on each weanling, and on May 1, 1909, another payment of \$5 will be due on each yearling. There are no other payments except starting payments. As the stake is guaranteed to be worth \$12,500, it should be a very attractive one to breeders. The fact that by the payment of \$2.50 a person can get a yearly subscription to the Horse Review and nominate every mare he owns in a \$12,500 Futurity should appeal to every horseman who knows a good thing when he sees it.

THE NORTH PACIFIC RURAL SPIRIT of Portland, Oregon, issued a splendid holiday number of close to 100 pages that we think lays over anything this excellent journal has previously gotten out. It is chock full of matters of interest to all breeders of live stock and has been elaborately illustrated with fine half-tones.

TROTTERS AND PACERS FOR AUSTRALIA.

On the steamer Kelvinbank, which sailed from San Francisco last Tuesday for Melbourne, Australia, were twenty-one head of trotters and pacers, which is without question the best consignment in breeding and individuality that ever left California for the land of the mid-summer Christmas.

Eighteen of these horses were purchased by Mr. Andrew Robertson for Allendale Stock Farm, Mentone, near Melbourne, and the remaining three were consigned by Thomas Bonner to Mr. W. B. Viers of Melbourne, who is an American of several years' residence in Australia, and who already owns a number of California bred trotters and pacers.

Mr. Robertson has been in California for the past two months selecting the horses for Allendale Farm, and has most favorably impressed all who have had dealings with him, as being a fair-dealing gentleman, who is an excellent judge of a horse, as well as a close student of breeding. He has selected stallions and broodmares that will be valuable acquisitions to the trotting-horse breeding ranks of Australasia,

and it is perfectly safe to predict that from them will come many future fast performers and race winners on the Australian tracks.

The complete list of the horses taken by Mr. Robertson on his trip is as follows:

Stallions.

Marvin Wilkes 2:12½, bay stallion, 15.3½, foaled 1901, sired by Don Marvin 2:22, dam Nora S. by Sable Wilkes 2:18. Bred by Walter Mastin of Sacramento.

Medium Direct, black stallion, 15.3, foaled 1904, sired by Rey Direct 2:10, dam Missie Medium by Rampart. Bred by Geo. A. Davis, Pleasanton. This colt was called Little Rey by his breeder, but has never been officially named.

Tertius, black stallion, 15.2, foaled 1903, sired by McKinney 2:11¼, dam She 2:12½ by Abbotsford. Bred by Chris Smith, San Mateo, sold by W. A. Clark Jr., of Los Angeles.

Hal Zolock, brown stallion, foaled 1906, sired by Zolock 2:05¼, dam Belle Pointer by Sky Pointer, brother to Star Pointer 1:59¼. Bred by Mrs. L. J. Hastings, Los Angeles.

Lou Doble, bay stallion, foaled 1906, sired by Kinney Lou 2:07¼, dam Marguerite by Tom Benton. Bred by Mrs. J. L. McCord, Sacramento, sold by Henry Delaney.

Brown colt, foaled 1905, sired by Chas. Derby 2:20, dam Tone, dam of Agitato 2:09, by Ferguson. Bred by Oakwood Park Stock Farm; sold by W. C. Helman.

Bay colt, foaled 1907, sired by Bon Voyage 2:12¼, dam Bessie McKinney by McKinney 2:11¼, second dam Stewinder, dam of Directum 2:05¼. Bred by Geo. A. Davis, Pleasanton.

Mares.

Christobel 2:11¼ (registered as Rosario) by Chas. Derby 2:20, dam Algerdetta, dam of Thornway 2:05¼, etc., by Allandorf. Bred by Oakwood Park Stock Farm. In foal to Star Pointer 1:59¼. Sold by W. A. Clark Jr.

Bay filly, foaled 1906, by Hal B. 2:04¼, dam Christobel 2:11¼ as above. Sold by W. A. Clark Jr.

Bessie McKinney, black mare by McKinney 2:11¼, dam Stewinder, dam of Directum 2:05¼ by Venture. Bred by Geo. A. Davis.

Florence McKinney, bay mare by McKinney 2:11¼, dam Mission Belle. This mare is an own sister to John Rowan's stallion Mechanic. Sold by John Rowan.

Biddy, gray mare by Re-Election, dam Irish Lady by Wilkes Boy. Bred to Star Pointer 1:59¼ in December, 1907. Sold by Thos. Bonner.

Directess, brown mare by Direct 2:05¼, dam Dusk by Dawn. In foal to Bon Voyage 2:12¼. Sold by M. C. Delano.

Elsie Downs, brown mare, foaled 1898, by Boodle 2:12¼, dam Lynda Oak 2:18¼, dam of Dr. Frasse 2:11¼, etc., by Guy Wilkes 2:15¼. Bred by J. W. Rea. Sold by W. W. Mendenhall.

Babbie 2:13, bay mare by Welcome 2:10¼, dam sister to Cricket 2:10 by Steinway. Babbie is own sister to Cavalier 2:11¼. Bred and sold by H. W. Meek.

Babe McKinney, black mare by McKinney 2:11¼, dam Babe by Ferdinand.

Bay mare, foaled 1904 by Stam B. 2:11¼, dam Elsie Downs by Boodle 2:12¼. Sold by W. W. Mendenhall.

Bay mare by Falrose, bred by Walter Mastin, Sacramento.

Nearly all the above mares are in foal to first-class stallions.

The Veirs Consignment.

The three mares purchased by Thos. Bonner of this city and shipped to Mr. W. B. Veirs of Melbourne, are the following:

Chestnut mare, own sister to Robert I. 2:08½, and three others in the list. Sired by Hambletonian Wilkes, dam Anna Belle 2:27 by Dawn 2:18¼.

Palomita, black mare foaled 1904, sired by Arner 2:17¼ (own brother to Don Derby 2:04½, Diabolo 2:09¼), dam by Rustic. Bred by H. Busing.

Reta B., brown mare foaled 1900, sired by Boodle Jr. 3:48¾, dam Gabilan Girl by Gabilan 19932.

ARABIANS MOSTLY GRAY.

In a most interesting article in Harpers Monthly for January, Dr. Henry Van Dyke tells of a trip he recently made from the Springs of Jordan to Damascus. On the way he saw many Arabian horses and thus describes them: "There is something very attractive about these Arabian horses as you see them in their own country. They are spirited, fearless, sure-footed, and yet, as a rule, so docile that they may be ridden with a halter. They are good for a long journey, or a swift run, or a 'fantasia.' The prevailing color among them is gray, but you see many bays and sorrels, and a few splendid blacks. An Arabian stallion satisfies the romantic ideal of how a horse ought to look. His arched neck, small head, large eyes wide apart, short body, round flanks, delicate pasterns, and little feet; the way he tosses his mane and cocks his flowing tail when he is on parade; the swiftness and spring of his gallop, the dainty grace of his walk—when you see these things you recognize at once the real, original horse which the painters use to depict in their 'Portrait of General X on his Favorite Charger.' I asked the guide what one of these fine creatures would cost. 'A good one two or three hundred dollars; an extra good one four hundred; a fancy one—who knows?'"

THE LEADING SIRE.

The year 1907 will go down into horse history as the one season during which the compilation of racing statistics was most difficult. The telegraphers' strike during the summer prevented anything but the most meagre reports from the smaller meetings, and our readers all know how incomplete were the returns sent in from the Grand Circuit to the press of San Francisco. For this reason the compilation of statistics has been a very difficult matter during the year, and until the Year Book is printed it will almost be impossible to prepare them with any pretense at accuracy. The eastern horse papers, notably The Horse Review of Chicago, have expended a great deal of labor and money in an effort to get full reports of the thousands of harness meetings held in the United States during the year, and the tables in their holiday editions are as complete as they could be made under the circumstances.

One of the most interesting of these is the list of leading sires of the country, from which we have taken the following facts of particular interest to Pacific Coast readers.

The leading sire of new standard performers for the year is Allerton 2:09½, who has no less than twenty-one new ones to his credit, but of this long list but three have records of 2:20 or better and but one is in the 2:15 list, his fastest new one being the trotter Todd Allerton 2:12½, that had a previous record of 2:13 at the pacing gait. Allerton at twenty-one years of age has a total of 178 standard performers to his credit.

Next to Allerton in the number of new performers is Prodigal 2:16, with nineteen to his credit, giving him a total of 89 standard performers all told. Five of the new ones are in the 2:20 list and four are in the 2:15 list, the fastest being the pacer Moy 2:07½.

Fourteen-year-old Bingen comes next with thirteen new performers, six of which are of the 2:20 class and two in the 2:15 list. Bingen's fastest new one is the four-year-old trotter Codero 2:09¾. Bingen has a total now of 37 standard performers.

The pacer Galileo Rex has the same number of new ones that Bingen has—thirteen—but he has only three in the 2:20 list, and his fastest new performer only took a record of 2:17½. His total list to date numbers 27.

McKinney 2:11½ has an even dozen new standard performers to his credit, and of these seven are in the 2:20 list and six in the 2:15 list. McKinney is rapidly approaching the list of century sires, having now a total of 97 standard performers, and outranks all other stallions by having 17 in 2:10, 44 in 2:15, and 62 in 2:20. He is twenty years old.

Arion 2:07¾ also has twelve new performers this season, of which two trotted in 2:20 or better and one took a record of 2:13½. Arion now has 44 in the list at the age of eighteen.

In the entire list of sixty-two stallions that had five or more new performers in 1907, but two will be in service on the Pacific Coast in 1908. These two are Zombro and Redlac. Zombro stands thirteenth in this list, with nine new ones to his credit, of which seven are in the 2:20 list, four in the 2:15 list and two in the 2:10 list. Redlac has five new performers, of which El Red 2:10½ is the fastest. Of the sixty-two stallions in this list of leading sires, thirty-one are direct descendants of Geo. Wilkes and twelve of Electioneer.

WHAT ABOUT THE CIRCUIT.

During the summer season of 1907 California had a harness-racing circuit that was quite a success. Starting at San Diego with a two days' meeting in June, there was a long jump to Salinas, where an excellent four days' program was given. Thence the horses were shipped to Pleasanton for four days' fine racing; then came in succession the Pacific Coast Trotting Horse Breeders' meeting at Santa Rosa, the Stover meeting at Petaluma, the Woodland meeting and the California State Fair. There was excellent racing and fast time at all these tracks, and the attendance was generally good everywhere. After the State Fair, many of the fastest horses were shipped to the North Pacific Circuit, but some were taken south to Fresno, Hanford, and Tulare, where some good racing was given for smaller purses than had ruled on the main circuit.

The season, on the whole, was a most successful one and furnished pretty conclusive evidence that California can take high rank as a harness-racing State if the associations giving meetings will only announce dates and programs early and arrange a circuit that will enable owners to race their horses in the classes where they belong.

It is not too early for the dates for 1908 to be claimed and published, and by March 1st every association that proposes giving a meeting during the year should have its program ready. By unity and progressive action, all the best horses and most prominent trainers can be induced to remain at home this year, and we believe it is the duty of our leading associations to make an effort in that direction. Let all get together and see if the California Circuit of 1908 cannot be made the greatest in the history of the State.

Daye McClary has sent two green pacers by Star Pointer 2:59½, to Mr. Geers at Memphis. One is a full sister to Alice Pointer 2:05½.

AMERICAN HARNESS HORSES IN DEMAND BY FOREIGN OWNERS.

[J. L. Hervey in Chicago Record Herald.]

Commenting of the recent New York auction sale—whose very remarkable results will afford material for discussion for some time to come—it was said at a time when the early returns were coming in that, while there was an unusually large number of foreign buyers in attendance at Madison Square Garden, they did not appear to be buying to the extent expected.

This, however, turned out to be a condition which was apparent, but not real, due to the fact that none of the foreigners made their purchases in their own names, but through agents. As a matter of fact, they bought more heavily than for years past, and a large number of our best and most highly bred trotters are now on their way to the Old World, or soon will be.

Among some of the trotting stallions that go abroad are Directum Kelly 2:08¾, Lecco 2:09¾, The Phantom 2:10½, Captain Bacon 2:10¾ and St. Valient Vincent 2:11¾. Among the mares are Goldust Maid 2:07¾, Bi-flora 2:09¾, Fanny P. 2:09¾ and Directum Lass 2:09¾. Among the geldings are Tom Axworthy 2:07 and Tommy H. 2:07½. Along with these there are scores of others, many with slower records, or else young and promising ones of high breeding but without marks.

These horses go chiefly to Austria—or Austro-Hungary—and to Russia; a few go to France, and the two geldings named go to England. The continental purchasers invariably buy stallions or mares, as geldings are not raced in those countries, and such animals as they buy are in many instances destined for breeding purposes and not for the turf. In Austria, Russia and Italy the breeding of trotters is fast assuming extensive proportions, and it is also making headway in Denmark, Holland and Belgium. France is also interested in it, but she refuses to buy American trotting stock for breeding purposes and sticks to her own breed, as a consequence of which she is constantly falling behind in the procession, her trotters, neither individually nor in point of speed comparing with those of Austria, Italy or Russia, the three countries where American blood has been largely used in improving the breed, and is still being used.

As is well known the oldest breed of trotting horses—that is, of distinct type, possessing natural trotting action and speed as a part of their family inheritance—are the Russian Orloffs, which date back to the eighteenth century and had been established long before the American trotter was so much as dreamed of. They were at one time supposed to be the best trotters in the world—but the rapid evolution of the American has placed them far in the back-ground and now, for twenty years past, Russia has been importing American blood for the purpose of improvement. Its success in this respect has been extraordinary.

About 2:18 is said to be the best rate of speed that a pure bred Orloff has attained, but since the use of American stallions was begun, the Russian trotting record has kept falling at a rapid rate, and this past season saw it placed at 2:08¾. This performance was made by the son of an American stallion and an Orloff mare.

This method of cross breeding has proved so extremely successful that Russian breeders have begun to discard Orloff sires except for getting carriage stock, as their get have no chance with the get of the American sires. But, as Russia's is a strongly paternal government, it is the desire to incorporate the Orloff strain as a permanent constituent element of her racing breed. Hence rules have been passed prohibiting the racing of American horses, or horses of strictly American blood; all performers must have either Orloff sires or Orloff dams.

As above described, the cross of American sires on Orloff mares has been productive of record-breaking results, but there seems reason to doubt if a reverse of this cross will be equally successful. However, the Russians are buying the very best mares procurable in America and are breeding or will breed them to their native sires. In the past two years they have purchased Susie J. 2:06½, Anzella 2:06¾, and Goldust Maid 2:07¾, three of the best of latter-day trotting race mares, beside a number of others with records of 2:10 or better. To the American turfman it seems a pity to see such grand mares as these consigned to the harems of Orloff stallions. It will, however, be interesting to see what they will produce, thus mated.

It will be observed that the Europeans are very partial to fast-record horses. When, something like a quarter of a century ago, they first began buying trotters here they seldom invested in any of the best class, but gradually the tendency has changed until now the demand is for the best. The highest price, so far as I know, that has been paid by any of them is \$21,000, paid for that great stallion Onward Silver 2:05¾, by an Italian connoisseur.

This does not, of course, take into account the purchases of the Winans brothers, Louis and Walter, of Brighton, England, for the very good reason that they are not foreigners, but Americans resident abroad. Most of their purchases are made privately, the two most recent having been Siliko 2:11½ and Icon 2:10, which have not been as yet shipped across. Siliko is probably the costliest trotter ever sold for export. Just what sum was paid for him is not authentically known, but it is known that the colt's former owner, John E. Madden, repeatedly refused \$25,000 for him.

The Messrs Winans are also liberal buyers of pacers, for which there is absolutely no market on the continent, and Louis Winans has for several years been the owner of the champion pacing gelding, Prince Alert 1:59½, which he drives on the road, there being no opportunity to race him.

Many of the great trotters that are going abroad are of the sort which those who are interested in the improvement of our own breed regret to see depart owing to their value for breeding purposes. In the case of the Messrs. Winans, however, this is not always true, as they have returned a number of horses to this country after having tried them in Europe. Only recently they have sent back several, one of which is Susie N. 2:09¾ at three years, a double Futurity winner, that should be of great value for a brood mare.

It is sincerely to be hoped that if Siliko succeeds in doing what he has been bought to do—wins the European championship at Baden next August—he will eventually be restored to us.

AMERICAN TROTTERS FOR ENGLISH COACH.

When coaching men of the Old World come to recognize the trotting bred harness horses of America as the fastest and stoutest of them all, thanks will be due to Alfred G. Vanderbilt more than to any other amateur or professional whip for having brought the trotter into prominence on European roads and show rings, says New York Herald. By his purchase last week of eighty picked trotters to horse the Venture coach on its daily runs between London and Brighton next season, Mr. Vanderbilt set on foot a sporting enterprise which promises to be of inestimable benefit to American horse interests abroad. Other American amateurs have put public coaches on the roads in England and on the Continent and have demonstrated their skill in horsemanship by making some of the fastest runs on record, but always with horses of foreign breeds. It remained for the owner of the Venture to buy his horses here and ship them across the Atlantic in order to show English coaching men what American trotters can do in heavy harness.

It was quite a compliment to Fiss, Doerr & Carroll that Mr. Vanderbilt should have commissioned them to furnish all the fast trotters he is taking abroad to represent the native breed of coach horses. The order is one of the most important and difficult of fulfillment that any dealer has ever received. Extraordinary speed in addition to other qualities which go to make a high class coach horse is demanded of every animal among the eighty to be supplied. To assemble so many exceptional horses of a special type in so short a time as Mr. Vanderbilt has given them to supply the Venture teams is an undertaking which few if any dealers in the trade could successfully carry out.

On the day that the contract was closed J. D. Carroll telegraphed to James S. Connolly, Willie McKinty, A. W. Johnson and half a dozen other expert buyers stationed in the West to look out for every fast trotter of the right stamp and quality for road coaching that came into the markets and not to let the price stop them when they saw the right horse.

"Mr. Vanderbilt intends to break all coaching records, and every horse must have plenty of step," were the words that went over the wires to Chicago, Kansas City, East St. Louis, Indianapolis and other horse buying centers recently.

As fast as the horses are assembled, inspected and accepted by Mr. Vanderbilt they will be sent out to Fiss, Doerr & Carroll's training farm, at Teaneck, N. J., to be put in condition for their ocean trip early in February.

STATE FAIR BOARD MEETS.

At the annual meeting of the Oregon State Board of Agriculture held in Salem last week, the following officers were elected for the ensuing year: W. F. Matlock, Pendleton, president; M. D. Wisdom, Portland, vice-president; A. Bush, Salem, treasurer; Frank Welch, Salem, secretary.

The report of the retiring officers revealed a profit of over \$6000 on this year's fair, of which about \$3000 was used in payment of warrants issued against the 1906 fair, which were not reported by Secretary Durbin in his annual report last year. The balance of the money was used in completing the stock barns that were built this year, the State having appropriated \$20,000 for this purpose which amount was insufficient to complete them.

The board decided to build a new grandstand next year with a seating capacity of 5000 people.

The Board declared against selling liquor on the ground next year during the fair.

The two \$5000 stakes will be a feature of the speed program again in 1908, one for trotters, the other for pacers. The classes for these rich stakes will be determined by the speed committee at a later date.

W. F. Matlock was elected a delegate to the North Pacific Fair Association, which meets in Portland some time in January to fix dates for the various fairs for 1908.—Rural Spirit.

Direct Hal 2:04¾, has been sold three times, twice for \$10,000 and once for \$11,000.

Tuna 2:08¾, and Czarina Dawson 2:11½, will be driven to pole by their owner, Oliver H. Bair, of Philadelphia.

A BREEDERS' BUREAU.

Capt. Tom Merry Endorses Mr. T. H. Williams' Project.

Los Angeles, Dec. 22, 1907.

I am told that Mr. T. H. Williams Jr., president of the New California Jockey Club, contemplates organizing a thoroughbred breeding bureau in this State, presumably on lines similar to those already formulated in New York and Kentucky. If those lines are followed, there will be at least one thoroughbred stallion placed in each county of the State, for the use of farmers, at a service fee of \$10 for the season, the money to go to the man who takes care of the horse. I see where some of the stallions placed by the bureau for public service in New York have been allowed to cover between eighty and ninety mares in the past season. This is all wrong, and will have a deteriorating effect upon the horse for next season. That no stallion should accept over fifty mares in any one season, is the best of my belief; and even that limitation is more than excessive where the horse is over thirteen or under seven years of age. In the season of 1860 the chestnut horse Owen Dale, by Belmont, out of Maria Downing by American Eclipse, served 104 mares and got eighty-three foals, the largest number (within my knowledge) ever born in any one season to the cover of one stallion. Of these 104 mares Mr. Williamson's book made a somewhat curious showing:

Served once	19
Served two times	21
Served three times	17
Served four times	22
Served five times or more.....	25
Foals from single leaps.....	13

His foals for 1861 were mostly large and upstanding horses like himself, and Clint Melone was as fast a horse as ever had been foaled in this State up to that time. They kept holding the watch on him until they broke him down without ever getting him to a race. Copperhead, owned by the emaciated Jim McCue, was another of his foals in that year and could trot in 2:33 to harness, and better than 2:37 to a 250-pound wagon. Then the late Simon G. Reed started his breeding farm, near Portland, with Hambletonian Mambrino and Autocrat as his sires. I tried to get him to buy Copperhead and use him for a broodmare sire, but he could not see it in those lamps.

Owen Dale's second season was characterized by service of eighty-nine mares, and his third one by eighty-two, about which time Judge Williamson sold him to Joseph W. Johnston of San Jose, who let him to seventy-eight mares. At the close of that season the game old horse, whose vitality had become wholly exhausted, died in a pasture lot from absolute neglect. I hope no breeder in California will allow his horses, or any one of them, to repeat the history of Owen Dale. My own idea of the number of mares to be served by any stallion is as follows:

Four years	35
Five years	50
Six years	60
Seven to eight years	65
Nine to ten years	60
Eleven to twelve years	45
Thirteen to fourteen years	40
Fifteen years	35
Sixteen to seventeen years	25
Eighteen years and up	25

If a horse shows himself to be of value as a getter of performers, it would be far better to limit him to fifty mares from five years old to fourteen, in consequence of which his vitality would be better preserved. Even better than that would be to increase his service fee from year to year and decrease in like ratio the number of mares to be served. Milton Young has fourteen stallions at his farm, near Lexington, Ky., and told me in 1902 that he never let any of them serve over thirty at any age, with a still smaller allowance to Lamp-lighter and old Pirate of Penzance. General W. H. Jackson of Belle Meade, at whose palatial home I was a frequent visitor, told me that his one greatest mistake was letting Iroquois serve sixty-two mares in 1893, that horse having been premier sire of America in the year previous. I am a big believer in high fees, and as few services as possible where a horse has once established his excellence. In Australia their very best race horses seldom get a fee in excess of £7 for the first two seasons, but if they make good as sires of performers, then their services go up to twenty or thirty guineas, and often are to be obtained only by private contracts, and then only to mares of approved conformation and pedigree. In that way they husband the breeding powers of a good horse and make him valuable in his old age.

I certainly favor Mr. Williams' project, fully believing that it will prove to the general good of California breeding interests. If it does not make faster trotters and pacers than we have been breeding (and I deem that exceedingly doubtful), it will lead up to a higher class of saddle horses and a great degree of quality in our roadsters. Williamson's Belmont got the only thoroughbred stallion (Venture 2:27½), that ever broke into the 2:30 list, and it is a far cry from dear old Belmont to any stallion now standing for public service in this State. I am a believer in thoroughbred blood in

the harness horse, but I want it not nearer than the third generation. Palo Alto, Jay Eye See, Alcayone, Alcantara, Allendorf and Lady Thorne were all out of thoroughbred mares, registered in Bruce's American Stud Book, while Maud S., Nutwood and a dozen others I could name had thoroughbred mares for their grandams. But when you come to look at the vast number of thoroughbred mares that have been mated with trotting sires in the hope of getting a 2:10 trotter, the proportion of successful matings seems infinitesimally small.

Another thing to be considered in this matter is the chance of getting, occasionally, a handsome and useful farm stallion by mating a coarse mare, of no determined breeding, with a handsome and substantial thoroughbred stallion. Believing that it is a poor rule which will not work both ways, I will cite an example within my own personal knowledge.

Col. William Buford of Kentucky was the man who went East and purchased the great stallion Medoc from John C. Stevens, who was the principal backer of Robert Fulton, inventor of the "cross-head" steam engine. Col. Buford kept Medoc for three seasons, at the end of which time he was killed in his pasture by the falling of a tree. Medoc got a great many female foals, and Buford had over a dozen of them. One of these mares never could be gotten in foal by any of the thoroughbred sires in that neighborhood and the irascible old Kentuckian said, finally:

"By—, I'll breed that devilish mare to a jack-ass." Before the old gentleman could select a "Knight of Malta" to suit him along came a man one day with an imported Suffolk Punch horse, called Gilbert, a bright red chestnut. Gilbert served this mare but once, but that sufficed to bring forth a sorrel colt, that was called John Kerr. This horse stood for six or seven years on an Alameda circuit, beginning with Haywards and ending up at Alamo. He got more high grade farm horses than any stallion I ever saw or heard of, and I have seen several of his get that were above the average as livery horses. If such results could be attained by mating a thoroughbred mare with a cart sire, why not others as good by breeding coarse mares to a thoroughbred stallion? My own idea is that the six prerequisites for a stallion to be used in a breeding bureau are as follows:

1. A big body on short legs, avoiding everything "weedy."
2. Good back and loins of more consequence than excessively large stifles and driving power.
3. Good hocks, rejecting everything with a tendency to curb.
4. A good temper. There are in this world enough "bad actors" already.
5. Nothing over five years old, except such horses that have never been trained. Any stallion over six years old is liable to have had "the hop" thrown into him, to such an extent as to entirely destroy his vitality.
6. A clean and bony head, with intelligent expression from the eyes. At the same time keeping in mind the axiom that a horse does not run or trot with his head.

I hope Mr. Williams will be able to make the thing go from the start. I am not sure that I shall be in the State after the middle of April, for I am seriously considering a flattering offer to return to my old home in Oregon. But if I do remain in California from April to November of next year, Mr. Williams can have my services, free of charge, as secretary of his breeding bureau, if he so elects. I am satisfied that he is actuated solely by motives that are for the very best interests of California as a breeding State.

THOS. B. MERRY.

HOW TO JUDGE HORSES.

Horses are by all odds the most difficult of all classes of stock to judge, and systematic methods of work are now essential. This is especially true in show ring judging, where there are a large number of entries and a limited amount of time. The judge usually has horses moved when they first come out; any lameness will easily be noticed. He next has them arranged in line and then begins at one end and examines them as they come.

It is well to approach the horses from the front. Standing at a reasonable distance, he scrutinizes his general bearing and proportion of parts; also notices the straightness of his forelegs and his width of chest and spring of rib. He now approaches closer and observes the head more carefully; noticing the size of the nostrils, and the length of the head, the width of the forehead, and the shape, size and brightness or clearness of the eyes. He next steps back a little and drops down so that he can look back between the forelegs at the hocks, and he also views them from a position in front, yet a little to one side of the fore limbs. From these two positions any abnormality of the hock can easily be detected, and in making this survey the judge is careful to compare one hock with the other. He next observes the fore limbs closely, and if he notices an enlargement on the inside of the cannon bone, he examines it with his hand for splint. He next notices the feet at the hoof heads, and in hairy legged horses it is always well to examine with the hand for sidebone. The foot is also lifted and its general shape and texture is observed, as well as the size of the frog.

Having completed the inspection from the front, the judge next steps to one side and makes a critical examination of the animal, noticing his length of neck, chest, carriage of the head, slope of shoulder, depth of body, filling of fore flank, shortness of back, and shortness and strength of coupling. He also notices the letting down of the hind flank, and compares the length of the upper and lower lines. He also observes the length and levelness of the croup, the set of legs from the side, and the muscling of the forearm and gaskins. Next passing to the rear, he takes the spring of the rib and general width of the barrel; judges width and muscling of the crouch, haunch and thighs and raises the tail to notice the depth of the muscling in the hind quarters between the legs, and also notices the hock at the same time. The straightness of the legs is also observed, and the inspection of form is finished.

The judge now has the horse moved straight away from him at a walk. This allows him to observe the straightness of movement, and the snap with which the horse picks up his feet; and as the horse is led back toward the judge the straightness of movement is again observed, and the judge then steps to one side and allows the horse to pass. As he does so the length and balance of stride and the freedom of knee and hock action is noted. The horse is moved again, this time at the trot, and the same points observed as at the walk. Any tendency toward going wide behind or to throw the front feet out in the manner known as winging, is readily noticed as the horse moves straight away; and from the side view, overreaching, a short stilted stride, or any tendency to drag the limbs is revealed. Besides observing the details of action, the judge watches the general carriage, the freedom and buoyancy with which the animal moves off. There should be a spring and snap to the action that arises from an exhilaration of spirit, and which reflects the happy poise and vigor of the animal.

Having finished the inspection of the first, he should be sent to the other end of the line and the inspection of the next taken up in the same manner as before. After all have been inspected in this manner, and successively sent to the foot of the line, the judge has a few picked out for a short leet, and makes a more minute examination and comparison of those he has chosen as likely prize winners, until he has definitely decided between them. Good judgment in balancing points is very important just here, for many judges are able to see differences but go astray in their attempt to estimate the relative importance of these differences.

In actual work in large rings, it is often advisable to move all of the horses. In such cases the judge passes rapidly over the line, picking out those that by reason of unsoundness or deficiencies in conformation are not entitled to be considered. The rest he sends to the head of the line and makes a complete examination of them. This sometimes arouses some protest from exhibitors, who hold that every horse has a right to be shown in action; but in all large rings there are a goodly number that are so clearly lacking in top qualifications that it is a waste of time to stop to move them.

In conclusion it should be noted that the most successful judges follow some definite method of procedure in judging horses, and the plan used by some of the best judges has been roughly outlined in the sketch. The department of agriculture believes that the present tendencies indicate that the range stock industry of the future will be confined to those regions that are too rough for cultivation or too arid for the successful growth of crops. Except in the high mountain regions, where the grazing season is very short, or in the desert areas where on account of the scarcity of water, grazing can be carried on during the winter months, the grazing will eventually be carried on in enclosed fields or on definitely assigned tracts. The stockmen will endeavor to get bodies of land large enough to support their stock, either by purchase, leasing or in case the homestead act should be amended to fit range conditions, by homesteading. Many living in close proximity to forest reserves will secure permits allowing them to run stock in these areas during the summer season. Wherever possible, these men will raise enough feed to carry their stock safely through the winter season.—Prof. J. W. Kennedy.

The officers of Madera county are gradually accumulating evidence regarding the wholesale thefts of stock from the Miller & Lux ranches. It is now apparent that an organized system of horse stealing has been going on for more than a year, during which time at least 200 animals have been taken from the ranches. These horses and mules were driven off the pastures by employees of the ranches and received by confederates. Then they were sold or traded to other confederates or to innocent people, being disposed of as rapidly as possible. How far the chain of crime exists is for the officers to determine. It is known that some of those who received some of the animals got them in good faith. But the dividing line between the innocent and the guilty is for the officers to prove. They are positive that they have evidence to establish this in a number of cases.

Clay Pointer 2:19¼ is another son of Star Pointer 1:59¼, to sire a 2:10 pacer, as his son, Point Burglar, took a record of 2:09¼ in 1907.

The best hot weather drink is Jackson's Nal

NOTES AND NEWS

An Arizona advertiser wants a trotting bred stallion. See advertisement.

Two pacing colts, one by Star Pointer, the other by Zombro, are wanted. See particulars in advertisement.

It is said that the Breeders' Association will probably hold its stake meeting at Santa Rosa again this year.

The fast pacer Seymour M. 2:23, winner of the two-year-old pacing division of the first Breeders' Futurity, is for sale by J. E. Montgomery of Davisville. See advertisement.

There is considerable local talk already about the May-day races, which will be held at the Dixon half-mile track as usual, this year. Some good colts will be "preped" for these races.

There are some very fine young horses at the Woodland Stock Farm for sale, and buyers will do well to look them over. Several now on hand can step fast and are very handsome.

Several owners are complaining that they paid entrance fees on purses at the Tulare Fair, last Summer, that were declared off and the money not returned. The National Association is to be asked to take the matter up.

There has been a slight hitch in the matter of securing property for the proposed Chico fair grounds and race track, but the outlook is now good for the deal to be completed and a track built in time for horses to train on this Spring.

It is time Marysville came into the circuit again. It is quite a horse town and is one of the most thriving places in Northern California. There used to be great racing on the Northern California Circuit, when Chico, Red Bluff, Marysville and Willows held agricultural fairs.

Mrs. Sadie L. Bunch, wife of the well-known trainer C. F. Bunch, of Pleasanton, but formerly of San Jose, died at Pleasanton on Tuesday, December 24th. Besides her husband she leaves two sons and a daughter, all of whom will have the sympathies of a very large number of friends.

E. D. Waffle of Santa Ana, sends us a photograph of his bay filly Zoe by Zombro, dam Leah by Secretary, that shows her to be a beauty. Zoe is now fifteen months old and has been a mile in 2:57 and a quarter in 3½ seconds. She is entered in Breeders Futurity No. 6.

James Marshall of Dixon, owner of the great three-year-old Aerolite (3) 2:11¼, public trial 2:05½, will probably permit this grand young horse to serve a few mares in his four-year-old form. Aerolite was bred to a very few mares last spring, among them the great mare Bertha, dam of four in the 2:10 list, and that other good brood-mare Cricket 2:10, dam of six standard performers. With such a start he will be a producing sire before he is six years old, in all probability.

William G. Layng, who has been in Philadelphia all winter, expects to leave there for California on January 5th. Mr. Layng, while in Philadelphia, met Capt. William McCloy, who gave him a letter he had received many years before from John Wickham, breeder of the thoroughbred mare Fanny Wickham, grandam of the great brood-mare Katy G., dam of Chas. Derby 2:20, Klatawah 2:05½, etc. Mr. Layng thereupon wrote a very interesting story about the mare Fanny Wickham, which is printed in the Holiday Number of the Chicago Horse Review, and which we will re-publish in the near future, as it will be of particular interest to those who have any of the Chas. Derby blood on their farms. Mr. Layng expects to reach California some time in January.

Pleasanton will be in line again with a good harness race meeting this year. The Driving Club made a big success of its first meeting last July, and better racing was never seen anywhere, while the record of the track was broken twice in the first race. President Lee Wells will soon call the directors' together to prepare for the big meeting of 1908.

We advise every owner of a mare to send her to a good stallion this year. If you cannot afford patronizing a high priced horse, pick out the best at the price you can afford. Our special stallion edition, to be issued February 15th, will contain a list of stallions that any State could be proud of.

Here's a tip. Breed a mare to Kenneth C. 2:13¼ this year. He is as certain to trot below 2:10 as he lives, and he will sire colts that will be fast trotters and race horses. When his record is lowered his value will doubtless be raised. The time to breed her to him is now.

Henry Helman has the only son of Jay Bird in California, we believe, and the colt will be in the stud this season to a few mares. The Jay Bird strain is one of the very best.

The consignment of eighteen head of trotting bred mares and stallions that were shipped from San Francisco to Melbourne, Australia, on New-year's Day, should lead to other consignments to the same country. Australia wants good American trotters and pacers at a fair price, the only drawback to a big business in this line being the long sea voyage.

One or two protests have been filed by owners who were suspended by Harry Stover for failing to pay entrance at his Petaluma meeting last August. The next meeting of the Pacific District Board of Appeals will be an interesting one, as there are several cases to be heard that will be of much interest to those who raced on the California Circuit of 1907.

E. Stewart & Co. sold 57 head of "double square" brand, small chunks at auction last Saturday. Some of the tops brought as high as \$135 and the average was \$75 for the entire consignment. A guarantee that these double square horses from the Button ranch are good users, is the fact that the San Francisco Fire Department has just contracted for a car-load and the Police Department for 35 head.

Beside doing a big business in boarding and livery, Wilson & Rooker, of the Van Ness Stables, San Francisco, ship a large number of horses, mules and cattle to foreign countries. On the Steamer Catherine they loaded several head of full-blood Norman mares, brought in from Iowa and Illinois, 32 head of Hereford cattle, and 23 head of mules, and on the Steamer Enterprise they loaded a nice bunch of Hereford bulls, several Kentucky jacks and a lot of heavy draft mares, all bound for Hilo, Hawaii.

"Colonel" Marks and Lewis Charlton will not have it so easy in heading the list of road riders at Ukiah, as Otis Redemeyer with Amazonian (trial 2:15) will now have to be reckoned with. This fine, big mare was bought by Mr. Redemeyer at Chase's December sale, and as she has size and finish, and can brush fast any day, or spot in the road, will suit his needs exactly and be a nice addition to the many good road horses owned about Ukiah.

The belated report of the Thanksgiving races at Red Bluff which reached us gave the race won by Leta Dillon, daughter of Herbert Dillon, as a race for two-year-olds. Leta Dillon was a yearling when she won this race, which was half-mile heats, best two-in-three, and her two heats in 1:32½ were pretty fair for a yearling. She trotted a full mile over the same track in 2:51, and her owner states that Herbert Dillon, her sire, is the only horse in Tehama county that has sired a yearling to beat three minutes trotting, and that Leta Dillon is his only foal of 1906, Herbert Dillon having been bred to but two mares the year previous.

Mr. E. R. Dunn of Seattle, Wash., has been spending several days at Pleasanton. During his visit there he has put in some of his time behind his two colts in training in the stable of Henry Helman. Having driven the two-year-old by Searchlight a quarter in 34 seconds at the pace and Rose Lecco, a two-year-old filly by Lecco, a full mile in 2:41 at the trot, he is well pleased with both, and has just reason to be.

Stockton should be on the circuit this year. There is no grandstand at the track there, but a temporary one could be erected at small expense that would answer every purpose, and the Stockton people would attend in large numbers.

Zephyr 2:07½ by Zombro 2:11 is a producer of standard speed, as her daughter, Zelma, has taken a record of 2:28½ trotting. Zelma is a two-year-old and is by Beauseant 2:06¼, son of Bow Bells.

Major P. P. Johnston, president of the National Trotting Association, has been appointed adjutant general of Kentucky.

In Australia, where harness horses are handicapped by their showing in races instead of by their records, a horse that finishes second in fast time is not permitted to start in the slow classes thereafter. Thus a horse that starts in the 2:30 class and finishes three lengths behind the winner when the heat is in 2:18 is not counted a 2:30 class horse any longer, but must race with 2:20 class horses, where he belongs. Such a rule would be a good thing in this country, to the writer's way of thinking.

Sir John S. 2:04½ will be well patronized this year. He is the only unbeaten stallion of 1907 that raced on any circuit. If any Pacific Coast association will arrange a race for 1908 that will bring together Sir John S. 2:04½, Zolock 2:05¼, Sherlock Holmes 2:06½, Copa de Oro 2:07¼, Miss Georgie 2:08½, Delilah 2:08, Mona Wilkes 2:06½ and two or three more of our fastest pacers, it can afford to make the purse a big one, as it will draw a tremendous crowd. Inferlotta is expected to be attending to maternal duties next summer, or she would be strictly in such a race with plenty of money behind her at any odds.

Helena 2:11¼ by Electioneer has a new standard performer to her credit this year in the trotter Orlean 2:27.

The Park Amateur Driving Club will resume its regular matinees at Golden Gate Park in April. Until then the weather cannot be depended upon for a dry track to race over.

It has been suggested that a race for four-year-old trotters of the 2:30 class, and another for four-year-old pacers of the 2:25 class might give a number of owners who have paid out a lot of stake entry fees without getting much return a chance to race their colts again this year without being compelled to meet those that outclassed them in 1907.

Palita (2) 2:16½ and Pasonte 2:13, both by Palo Alto 2:08½, have new standard performers to their credit, the first named being the dam of McCutcheon (3) 2:27½ and the other dam of Palo Earl 2:30.

Budd Doble is already beginning to receive letters from owners who intend sending their mares to Kinney Lou 2:07¼ this season. The colts by this, the fastest trotting son of McKinney, are such magnificent individuals and show so much natural speed that wise breeders desire to own some of this great horse's get. Kinney Lou was never in finer shape than he is right now.

Those who arrange programs for the California associations this year must remember that meetings which are held late cannot give the same classes as the early meetings and close them early, as the list of starters will be so small late in the season that the entrance money collected will only amount to a very small proportion of the purse. The 2:20 pace of the California Circuit of 1907 was on nearly every program advertised, and no association offered less than \$1,000 for it. Entries to all these purses closed before the circuit opened, and all received large lists. But after Inferlotta and Copa de Oro had beaten 2:10 every time they started there were several owners who could see no reason why they should pay transportation and other expenses all the way through when their horses were not fast enough to get even fourth money when those two whirlwind pacers were sure starters, so they shipped home and the fields in the 2:20 class grew "small by degrees and beautifully less" until those given on the San Joaquin Valley Circuit had to be declared off. Such a thing should be avoided this year.

A LIBERAL FUTURITY.

The American Horse Breeder of Boston, which made a great hit with its dollar Futurity last year, securing 2480 nominations, a world's record, announces another Futurity, its fifth renewal, for foals of 1908, on an even more liberal basis. The nomination fee will remain, as last year, at \$1 a mare, but the second, or November payment, has been reduced from \$10 to \$5; with another \$5 payment in May of the colt's yearling form. This should prove a popular move with breeders, and undoubtedly will result in a bigger list of entries than was received last year.

The purse is for \$10,000, of which \$7,000 goes to trotters, \$5,000 to the winner; \$3,000 to pacers, \$2,000 to the winner, and \$700 to nominators of dams of winners, and entries close on March 2d.

This is the fifth renewal of the Futurity. It was won in 1907 by the world's champion three-year-old trotter, General Watts, in one of the keenest and most thrilling contests ever witnessed between colts, and the two heats in 2:09¼ was the world's race record for three-year-old colts at the time it was made.

The Futurities are the very backbone of the harness horse industry, and this liberally conditioned Futurity deserves the hearty support of every breeder, big and little, in the country.

CITATION 2:03¼.

The queen of pacers during the past season was the unbeaten Citation 2:03¼, owned by Judge Marcus Cartwright of Chicago and driven by Dick McMahan. Her campaign was, to most people, one of the sensations of the year, but to her owner and driver it did not come as a great surprise. They knew that for two years previous to 1907 Citation had been one of the fastest pacers before the public. Time after time she had been miles around 2:04 and was always a consistent winner. But a strange fatality seemed to pursue her. She was always doomed to meet the best pacers of her class. In 1905 she was up against The Broncho 2:00¼, and it was Citation that made that fleet little mare step most of her fastest miles that year. In 1906 Citation went down the Grand Circuit and met Gratt 2:02¼; Bolivar 2:00¼; Ecstatic 2:01¼, and others of that class. And it was the Chicago mare that was the runner-up of the races. Still the only time she was ever unplaced in her life was at Readville in 1906, in the race in which Bolivar 2:00¼, and Gratt 2:02¼, lowered the world's record for a three-heat race. So while the casual observer who merely glanced at the form of the various trotters and pacers was somewhat astounded by her wonderful record of the season just ended, those who were intimately acquainted with her past performances were not at all surprised.—Horseman.

THAT SPEECH OF NORMAN J. COLMAN'S.

This and other papers have given a short telegraphic report of the speech delivered by Hon. Norman J. Colman of St. Louis at a banquet given members of State Fair Associations, held at Chicago, December 5th. The entire speech is so good and so apt at this time, when an effort is being made to revive fairs and race meetings all over the country, that we give it in full from the columns of the Rural World:

Speed Contests at State Fairs.

At a banquet of representatives of State Fair Associations convened at Chicago, December 5th, the subject of how to make the State Fairs successful was discussed, and under the head of "Amusements," Hon. Norman J. Colman was unexpectedly called upon to speak, and the stenographic report of his speech is as follows:

Mr. President and Gentlemen: When I sat down to the table to-night I felt quite relieved, because nobody had said anything to me about having to make a talk; I have frequently been drafted into making speeches on occasions like this, and when I knew that I was going to speak, I ate very little of the feast, as I was cudgelling my brain in reference to what I should say, and I am up here totally unprepared to say anything to you upon the subject which has been proposed.

As to visiting the Pike, Mr. President, I must plead guilty. Like all boys of my tender age, I desire to see all that I can going on in the world. (Applause and laughter.)

But we have not adopted the Pike system in our Missouri State Fair. We had it in full blast at the great World's Fair at St. Louis, and you had it in full blast here at Chicago; and I saw it in full blast at Paris, France. But as a rule everything which is intended to come under that head, I think would prove more detrimental to the fair than beneficial. (Applause.)

We have got to conduct our fairs on a high moral plane if we expect to get the support of the people of our respective States; and anything which makes an unfavorable impression upon our minds or upon the minds of our wives, daughter or sons, ought to be banished from all State Fairs. (Applause.)

In reference to amusements, we do have some innocent amusements in the afternoon, which entertain the crowd and which have no detrimental effects. But one of the objects that the managers of State Fairs have and should have is to draw the people, to draw the dollars, the sinews of war, and anything which can be done, that is honorable and legitimate and attractive and unobjectionable, ought to receive the support of the managers of State Fairs.

Perhaps, unfortunately for myself, I was born a great lover of the horse. I believe that there is no amusement which draws so large a concourse of people from one's own State and from adjoining States, as legitimate harness racing. (Applause.) I have had a good deal of experience with fairs. I am the oldest fair director, I suppose, there is here. I was the father, really, of the St. Louis Fair. I sat side by side with the present King of England at the table on the St. Louis Fair Grounds, fifty years ago, when he was the Prince of Wales, attended by the Duke of Newcastle, and a number of others of the royal family. I witnessed, with extreme delight, the great attention which he and the members of his party paid to the contests of speed in that great amphitheater which many of you will recall.

I met with a good deal of opposition as a director of that fair, in urging that large purses and prizes be offered for horses, for the best horses, that could be brought together throughout the United States; and it was the attraction and contests those horses afforded in a very large degree that made the St. Louis Fair one of the most magnificent fairs during its existence that the world has ever seen.

As I heard the advertising talk about the Minnesota State Fair, or as it is sometimes called, the Hamline Fair, I didn't hear much said about the magnificent purses which were offered by that institution, which drew together the greatest speed aggregation that the world probably has ever witnessed. It is those contests of speed that some way or other appeal to people, to moral people, to religious people, ministers of the Gospel as well; that draw them there. While they would not attend a race meeting proper they will go to a fair, and when it comes to great contests of speed, they will witness them.

My friend N. H. Gentry—I don't see him here—now, he is out in "committee meeting," a brother director of our State fair, you all know him. He was opposed somewhat to the Missouri State fair offering such large purses for horses, and taking the brass bands out to the grand stand and drawing the people there. You know he is the Berkshire king, we might say, of America, and he is as much wrapped up, nearly, in Shorthorns as he is in Berkshire swine. I had the honor of being president of the Missouri State Fair for the first two years of its existence. He said to me, "We have got a tent from Kansas City to exhibit the cattle in, and I can demonstrate to you that cattle will draw as large an attendance as horses if you will give me a brass

band." I said, "You shall have a brass band." He had a tent there covering nearly half an acre of ground; all the fine cattle were brought in there. When the speed contests were taking place out on the fair grounds track that vast grand stand was filled to its greatest capacity. Along the lines of the fences almost to the quarter pole, people were there in dense crowds watching with eyes and mouths open, the contests of speed. Up the stretch nearly to the seven-eighths pole another dense mass of people. While this was going on I could hear the bass drum beating in the tent; I could hear the fine music of the band in that tent, and I concluded to go and see whether or not Gentry with his brass band is drawing as many people as are to be found out here. I went in there, and lo and behold, there was Mr. Gentry, there was the band and there was the man with his bass drum, and he was beating it for all that was in it, and I counted the audience and found that there were just forty people inside of that great tent viewing the cattle. (Laughter.)

I went to the Administration Building; I thought I would walk up-stairs on the porch, that we have there, and see who were present. There I found Mrs. Gentry and her daughters and her friends watching with the greatest admiration the spirited contests of speed. (Laughter.) I am sorry Mr. Gentry is not here, but I have thrown it up to him many times, and he has never asked for a band to compete against horse racing from that time to this.

That is an illustration of the drawing power of contests of speed, but I don't want to be misunderstood here. I am in favor of bringing to the fair the best products of the State, whatever state it may be, in every branch of industry. I want to see the best cattle and the best horses, the best jacks and mules and the best sheep and the best swine, the best fruit; the best products of our fields and orchards and gardens and vineyards. I want them brought there and exhibited to the people, but they frequently will not attend unless there are other attractions. And if the state fairs had only them to show they could not have, in my estimation, one-half of the attendance that they do have if they give large prizes for contests of speed for the best horses—we have had constant demonstrations of this.

There is another thing in reference to it. There is a very consoling reflection when managers of fairs offer large purses for contests of speed. They contest not for the state fair money, but for their own money, and the entry fees paid by them frequently exceed the purses by large amounts. Where you have sixteen entries—and many times you have twenty, thirty, forty or fifty of those entries, they will pay the complete purse, it doesn't make any difference whether it is \$10,000 or \$5,000, or \$500, or whatever it may be; for every man before he can enter his horse has to pay his 5 per cent entry upon his horse to get him in, and the winners have to pay 5 per cent additional, which for the four winning horses makes 40 per cent. So that these races in nine cases out of ten at the state fairs cost the fair not a farthing, but add considerable money to the fair's receipts, for the poor horsemen have to contribute their own money and race for it. So you need not be afraid of offering these large premiums. It is this plan which has made the Illinois State Fair so successful. It is this which has made the Hamline Fair so successful. It is this which has helped out the Indiana Fair; the Missouri State Fair and every state fair that has offered large premiums for speed.

So if you want amusements encourage the breeding of horses; they will draw the people. God has so made man that he loves to see contests. I don't care what they are; if it is a dog fight he will stop to see it. (Laughter.) If it is a fight between two boys, he will stop to see it—and so with every contest whatever it may be. We all have an innate love for the horse. Why, our first President, the father of our country, was the greatest admirer of a horse, the race horse. Jefferson and Monroe and Jackson, not only owned them, but raced them. The love of a fine or fleet horse is implanted in man's breast so deep that it cannot be wiped out. You want to use every magnet that you legitimately can to draw people to your fairs in order that you may get money for other purposes—to pay premiums in other directions. I don't want to be misunderstood; I am entirely opposed to the pool selling system. (Applause.) I am opposed to gambling on the track or anywhere else. It should not be allowed on any fair grounds. (Applause.) We must have clean racing, legitimate racing for the money which is put up, and not help along gambling; and I think at none of our state fairs is this gambling system allowed. It is not allowed in some of the eastern states and many of them are doing better than if the pool system prevailed.

We want everything clean and pure about the state fair. It is a great educational institution. A young man's education is not complete now in the college. He wants to see what his State can produce; he wants to know something about its great resources, agriculturally, horticulturally, in dairy matters, in the breeds of live stock and methods which have produced them, and who is offering the best. The people will come and see them. But after they have been around in the morning, seeing all of these magnificent productions of your state, in the afternoon give them some dessert, some entertainment, some amusement; give them clean, fine racing, and they will enjoy that, and it will be a magnet which will draw more people to your state fair than any other amusement, and it generally costs you nothing. (Applause.)

PRACTICAL TRAINER'S ADVICE.

A. J. Feek has the following to offer on the cooling out of horses on his book, "Every Man His Own Trainer":

"Watch your horse closely in the process of cooling out between heats. I have never yet had a groom so good that I thought it would do any harm to watch him while cooling out his horse, and I believe I have had as good men as were ever in the business. I always thought that I could form a better opinion as to how my horse was going to trot the next heat if I could see him cooled out, as many times the men working about the horse are thoroughly heated up themselves and are not competent to judge of the weather; the day might be cool, but they would think it warm, and when starting to walk the horse they would not put covers enough on him; and again they might put on too much which would be just as injurious to the horse; and, as I said before, it is no harm to look after them, and I always feel this a duty and just as necessary as to drive the heat. I might not have occasion to dictate in cooling out a dozen horses, and again might with one word of advice win the race, as often two heads are better than one; as no one is perfect; we are liable to err or forget some important point. I have had some horses that in warm weather would, in cooling out, dry all up if a heavy wrapper was thrown over them, and would puff and blow and seem to be distressed when if the heavy blanket were replaced with a light lindsey and walked about they would break out and sweat nicely and quit blowing and when the bell rang they were ready to go out and go another heat. If the day is hot and dry, see that the soles of the feet are bathed in cold water after each heat. I have seen grooms wet down a strip of grass alongside of the walking ring, leading the animal over the strip each time. I have seen horses throw shoes after going the better part of a fast mile, and, on picking it up, found it so hot I could not hold it in my hand. This taught me that it was as necessary to bathe the feet as it is the head.

"If you are trying to get the money with one of the sort that is inclined to become sore-toed after its race, there is an old-fashioned remedy that might be tried with good results. Remove the shoes so as to rest the feet as much as possible, and put on the poultices, viz.: Two quarts of wheat bran; scalding thoroughly, place it in a couple of rubbings; take three or four common raw onions for each foot; after pounding them to a pulp, place them over the bran and place the horse's foot in the center of the poultice, bring up the corners of the rub-cloths and tie them about the ankle and leave them on till morning. When they are taken off it will be found that there is no soreness nor fever in the feet, and aside from a walk in the early morning dew, it will be as well to let him alone to rest out as to hitch and jog him. If a paddock is handy and the animal has been used to being turned out at home the relaxation and good he will get from such treatment will be inestimable in many cases. There are a lot of horses that want to be let alone after they have had a hard race, and if fussed with and pothered around will become nervous and thin as wood. Some horses will rest out in one day, while others do not recuperate so quickly and require three or four days. This latter sort should not be asked to race twice a week, and it is questionable if any of them should be raced more than once.

A LESSON FOR DRIVERS TO FOLLOW.

Have you ever noticed that a silent man usually has the best broken horses? Drive with him and it will be a matter of wonder how he manages his horses with no management visible, where the horse goes where he is wanted without apparent effort on the part of the driver.

Ed. Geers, the famous turfman, is known as the "silent man," who has been noted for his success in the art of driving a horse to his utmost limit of speed without speaking a word or making an effort while his rivals were whooping and yelling and whipping and coming out generally behind.

Probably there is a lesson in this. The average horse understands only a few words, signs or commands. The silent man gives only a few and he does not confuse his horse. The horse is made to know them thoroughly, he understands the man who understands him. It is a pleasure to drive a horse that understands—few pleasures in life can equal it if the horse is a good, cheerful driver. There would be more of this kind if they were made to know a few things thoroughly—the right things. The great difficulty is that many horses have more sense than their drivers.—Stock Farm.

CONEY ISLAND JOCKEY CLUB STAKES—\$25,000.

This event received seventy-six entries for 1907 and a field of eleven went to the post. This stake bids fair to be one of the most popular stakes in the United States, on account of the very reasonable amount (\$25) which is required to make a horse eligible, and it is expected that this year's entry list will exceed last. The conditions of the stake are advertised in this paper and entry blanks will be forwarded on application to the Coney Island Jockey Club, Windsor Arcade, New York, or to the Breeder and Sportsman, 616 Golden Gate Ave., San Francisco.

cannot be blamed for low scores.

The Outlook. Relative to the future there is very little to say except to repeat what has been said over and over from year to year in the past. The Interstate Association continues to be to trap shooting what base-ball leagues are in the game of base-ball, keeping alive interest in the sport and keeping the interest unflagging among local clubs which have become as thick as stars in the sky. This interest is especially noticeable in the vicinities where sportsmen's journals circulate. Thus membership keeps pace with growth of population which is all that the most optimistic can ask.

The 1907 Handicap Committee. As Chairman of the Handicap Committee I feel a delicacy in taking a part in the discussion sprung on its management the past season, but as Secretary-Manager of the Association I feel it obligatory to record my views.

The Handicap Committee of 1907 was undoubtedly one of the best and most competent committees ever appointed for the work; it was fully in touch with trap shooters in general and abundantly qualified to appreciate individual merit. I am not biased in my views by the fact that I was chairman of the committee, but I cannot refrain from saying that the committee in allotting handicaps was unswayed by personal feeling, and uninfluenced by any consideration save that of merit. The results tell their own story, and the records show that the committee's arduous and not altogether pleasant task was well and faithfully done at each and every tournament.

In dismissing the subject it is pertinent to remark that if a handicap committee is to be bound by hard and fast rules it ceases to be such committee and becomes a superfluity. It may also be pertinent to state that if handicaps are so arranged that professionals stand but little chance of winning, there is a wide-spread feeling that it would be more honorable to bar them altogether. But I think all has been said that honor demands and it is necessary to cast a glance at other features.

Next Year's Grand American. The Grand American Handicap Tournament is recognized as the event of the year and the greatest care should be exercised in its management. The place to be selected for holding it should be carefully considered. We have applications from Columbus, St. Louis, Indianapolis and Chicago. A general discussion may be of vital importance. At the same time the very best of everything should be provided. On these much of our past success has hinged.

It will be conceded by all that the Grand American Handicap cannot continue to grow indefinitely. It must in the nature of things reach limit. In fact, if that limit has not already been reached, it will tax human ingenuity to conceive a means to extend it satisfactorily. Lookers-on in the excitement of a contest may regard the management as simple, but they fail to consider the magnitude of preparation which is the ground work of success. Only those in immediate contact with the work know of its nerve-racking intensity. The detail, which is immense in amount and complexity, must be mastered and laboriously worked out prior to the actual time for holding the tournament. When all has been accomplished the final engagement may seem simple enough to those who do not understand that the greater part of the work is not visible.

While not wishing to appear as dictatorial, I think the Great American Handicap has reached that point where it cannot be the ambition of any to make it the largest, but the best in existence.

In Conclusion. I deem it but just to repeat what I have so frequently said regarding the obligations under which our Association rests to the sportsmen's journals. They have satisfied the demands of the most exacting in reporting our tournaments and in publishing matters of general and particular interest to our subscribers, keeping the work well before the public. As honorary members of the Association they are entitled to unstinted praise for their efficiency and courtesy. I wish to renew my expression of obligation for the many unsolicited marks of appreciation they have bestowed upon me personally.

I cannot close without a renewal of my thanks to our subscribers for the urbanity with which they have treated me in all our relations, public and private, and in this connection I wish to include the members of the various committees whose aid, advice and gettlemarly treatment I appreciate at full value. Very respectfully submitted,

ELMER E. SHANER, Secretary-Manager.

CONVENTION OF OREGON SPORTSMEN.

Unless the plans of many Portland sportsmen miscarry, that city, sometime during themonth of February, will be the meeting place of all the prominent lovers of the rod and gun from every point in the State of Oregon. This big gathering is being called by the sportsmen of Portland for the purpose of discussing the present game laws and of planning the kind of legislation that will take out of the hands of politicians the framing of Oregon's game laws.

It is the boast of sportsmen that no state in the Union furnishes so many kinds of shooting and fishing as can be found in the State of Oregon and in order to keep it so, and to add to the uplands more game birds, and to give them the proper protection, both in and out of season, will be the purposes of this meeting. It has been estimated by men who are sportsmen and not merely hunters, that with properly framed game laws and with the money

that is poured into the State Treasury from hunters' license fees, and to this the money paid for dog licenses, the state would have at its disposal for the protection of game and for prosecution of those who violate the laws, something like \$50,000. It is the purpose of the men who have called this gathering to take the kinks out of the present thing that is called Oregon's game law and frame one that will be worthy of the name.

The movement looking forward to this meeting of sportsmen was started some time ago. Mr. Lipman has written to some of the best-known sportsmen throughout the state and he has received replies favoring the movement and, promises to be on hand when the present hunting season closes. Local sportsmen will defray the expenses of the meeting and when the date has been set a hall will be rented. Under the present lack of game laws, it would not be many years before deer, elk, Chinese pheasants and other game birds will be a thing of the past and the trout streams barren. The game hog, of course, will howl at such legislation, but, as he is in the minority, his howl will not count for much.

When it is considered that there are in Portland alone something like 3,000 shooters who during the season for upland birds, tramp over field and hills and spend their Sundays in the duck-blinds and spend annually almost \$100,000, some idea can be gained as to what it costs each man a year for his sport. And when you, who have no liking for a gun or a fishing rod, or would enjoy the sport if you had a place to shoot, are enjoying a duck dinner, the remembrance of some friend, just also remember that each bird that is on the table before you cost the man who tramped over the fields, or stood in the chilly drizzling rain in a duck-blind, and paid his expenses in good, hard coin of the realm, all the way from 80 cents to \$1.

Taking the big duck-shooting preserves and the little ones that are dotted along the sloughs of the Willamette and the Columbia rivers from Portland almost down to Astoria, there are perhaps 150 clubs. Almost every one of them is rented from the farmers, and in many instances it is necessary for the sportsmen to build their own cabins, and always they must furnish their own bedding and meals. This is the first cost. Then comes the salary of the keeper. The biggest item of expense is the feeding of wheat, which costs all the way from \$30 to \$32 a ton. Some of the big clubs feed as much as a ton of wheat a month. Take such clubs as the Deer Island, the Black Jack, the Honeyman Club, the H. & R. Club, the Dead Willow, those who shoot at the Adams farm and several other clubs, feed on an average a ton of wheat a month throughout the sixteen weeks of the duck-shooting season. Fifty of the clubs will feed on an average of half a ton a week and perhaps 100 other clubs will feed a quarter of a ton a week. Just figure the wheat at \$30.00 a ton and see what amazing figures you will have. After you have done this, figure that each hunter will shoot 250 shells a week.

Shells cost about \$15 a case and there are 500 in a case. This also runs into the thousands. Having reached this stage, just figure the cost of railroad and boat transportation and the food bought, and before you are through you will see for yourself that the sportsmen spend \$100,000 a year.

Yet this fortune is freely and happily spent, for there is not a man among them that does not enjoy his weekly holiday to the utmost. The majority of them are all "hail fellows well met." With a day in the duck blinds, the business cares of the week and the financial depression are forgotten as completely as the Winter snows of long ago. Once in their shooting togs and on board the boat or train, all things that worry are left behind not to be taken up until Monday rolls around. Bankers, lawyers, doctors, business men and the day laborer or office clerk meet on a common level and the talk runs to stories of the field or blinds. Take any one of the boats that leave down the river on Saturday afternoon or night and you will find your banker, or your lawyer, or your doctor, dressed in his shooting clothes, laden with bundles and with gun and dog. The greetings are whole-souled, for they come from the throats of men through whose veins course the red corpuscles.

There is an old saying which runs, "A man on a horse is twice a man." If he is, a man with a gun, a place to shoot and a good dog, and merry companions is indeed a king.

It is a trip worth a lifetime. They say you don't know a man until you have lived with him. Maybe not, but spend a day at his side shooting with him and you know him forever and a day. If he has any oats in him they will stand out like Mount Hood on a clear, sunlight day. There are some men who go shooting out of Portland who are not fit for association, but take them as a whole and they are the best fellows on earth. It is the love of the sport, his love for his dog and gun that makes him a man among his fellows.

It is a treat worth while and something that adds years to life, to spend the night as a guest at almost any of the clubs. Once inside the cabin. After the meal has been eaten and smoking is in order, just get one of the old-timers to talking. Hear the stories told of the patriarch who hunted in the long ago when Portland was in its swadling clothes. Get Frank Thorn, the dean of the duck-shooting brigade, and unquestionably one of the best wing shots in all Oregon, to tell of duck preserves and before the law said you may kill 50 ducks and no

more. To hear him tell of the times when such men as Sim Reed, Judge Whalley, Jack Holman, H. Green and others who have passed to their final reward, used to shoot their ducks, is a rare treat. Thorn has been shooting ducks along the two rivers for 35 years. He is a student of the game and no one knows more about the habits of ducks and other wild fowl than he. Thirty-five years with gun and dog; just think of it! It's just a glorious record, that's all. Thorn is as keen an observer of men as he is of the birds of the field and water and in those thirty-five years he has witnessed the serious and humorous sides of the hunting game. He is a splendid story teller and they are the clean yarns of the hunting cabin, scores of hunting feats and funny things that happened in a day's hunt.

Thorn has shot on almost every duck lake on the two rivers. He can tell you when the flight of the sprig is due; when the mallards will come, and as far as he can see a bird in the air he can tell you whether it is sprig, widgeon, mallard or canvasback.

CARIBOU SHOOTING IN BRITISH COLUMBIA.

G. C. Cowan contributes to Rod and Gun in Canada the following interesting article on "Caribou Shooting in British Columbia."

As the last glow of the sun faded away in a British Columbia sky, E., his guide, myself, and our Chinese cook, dismounted from our horses, unloaded the pack ponies, and pitched camp. We did this well in the centre of some small pines, a shelter particularly welcome, as the clouds hung low over the hills, and the signs in favor of snow or rain descending before very long. After traveling two days and some hours from Kelowna, in the valley of the Okanagan, we were within a mile or so of the mountain upon which we hoped to find a small herd of caribou ranging. To the west from where our tents were pitched we could see our hunting ground of the morrow. Its bald top covered with a recent fall of snow, standing out coldly white upon the sky line. In the background, between us and the mountain, there were some gloomy firs. The country was undulating, and thinly dotted with spruce trees, clumped more or less together, and between the clumps there were innumerable open spaces, covered sparsely with a growth of white moss, on which the caribou feeds. It was here we were to look for our quarry.

We had already seen the fresh tracks as we entered the valley, and as night settled over us and we lay down, I cannot but imagine all our thoughts ran in the same direction. With myself, at all events, it was a night of wakefulness—one of those nights the hunter occasionally experiences, when he can do nothing but shift from side to side, and listen to the usual sounds of the forest after dark; it may be the weird yelp of the coyote, or the somewhat dismal cry of the loon, as it echoes across the waters of some lonely lake, sunk deep in the forest—whatever it is, there you lie, sleep is impossible, and you long for the first flush of dawn. At last the morning broke fine and clear, the sun shone out beautifully, and the snow that fell through the night clung to the gloomy trees, turning them into a scene of dazzling brightness. Crisp and sharp was the air as we started out after I made off in another direction. I tramped quickly over the snow, which was still dry and powdery, until I reached the summit of a small hill, where I struck the tracks of three caribou, which had gone off down the other slope. I followed them till the middle of the day was past, and I felt quite tired. Just as I was about to give up the hunt, there suddenly appeared some 200 yards in front of me, standing in an open space on a side-hill, a fine buck (Columbian deer). Should I shoot him, or should I still pursue the caribou? My mind was soon made up, and I decided on the former course. Taking steady aim at the deer, I killed him instantly with a well-directed shot through the shoulder. His horns were small and light, but they were regular and measured well in spread. I skinned his neck, severing it from the shoulders, and with his head, and a small additional pack of fresh meat, liver and kidney, I started back for camp. At this time it must have been about three p. m., for the sun was sinking, and I was quite two miles away. Realizing the position, I pushed on hastily, walking for several hours without a stop, except for a few moments to fix my pack. As it was, daylight had vanished before I reached my camp, and the moon was at its full, shining softly over the forest.

As I made my way to the fire, I could see two great skins hanging over poles near the tent, and as I approached I was told of my friend's good luck. Shortly after we parted in the morning, E. and his excellent guide had quite suddenly run across a small herd of caribou, closely hidden in the thickest of green timber. At first they saw only a cow; then they heard a bull snorting and stamping, and finally caught sight of the tops of his horns behind the bushes. Some further exercise of patience was rewarded with a view of his magnificent head, as he forced his way slowly through the spruces and stood quite in the open. Apparently the animal had not observed either E. or his guide, and offered the hunters a most excellent shot. Availing himself of such an unlooked for opportunity, E. took aim, hastily fired, and brought the great beast down. When they approached they found it quite dead, and were preparing to skin it, when suddenly four cows and three more bulls hove in sight. None of the latter were carrying very large

horns, but they were fine young stags, and in splendid condition. What a splendid time E. must have had as he stood in the midst of these noble beasts! Fortunately, he was a sportsman of the right type, and was satisfied with shooting a second bull and allowing the others their lives and freedom. Such sport as this within a comparatively short distance of mines, where blasting work was going on is hardly credible, but all that is here set down is fact. It was too dark for me to examine my friend's trophies that evening. The following morning, however, I was greatly pleased when I saw what a beautiful pair of heads he had secured.

Both of us went out again, E. after a buck and I to look for a caribou. As the day advanced and I trudged on, crossing valley after valley, climbing and descending hills, fording creeks, and making my way through many patches of dense undergrowth, I began to realize that I had covered many miles, and must be a great distance from our tents. All this time I had not seen a fresh track, or caught a sight of the kind of animal I was after. Finally I gave up, and struck back towards camp, taking a circuitous route in a direction that I thought might bring me better luck.

I was so far right that I did see several deer, none of which I felt justified in shooting, as their horns were smaller than those already in my possession. Once again it was evening when I arrived in camp, and with the exception of a short rest on a dead log, where I sat for a few minutes to eat my lunch of bannock and bacon, I had been on the move all day. E. was in camp when I arrived, and in the green timber he had killed a baby goat. What this lonely creature could be doing in this part of British Columbia, far away from goatland, or high mountains, such as they generally range over, is an unexplained mystery to me. It can be inferred that its mother, tiring of her accustomed feeding grounds, had ventured across country in search of richer pasture, taking the offspring with her. In his journey she had probably met with an untimely fate, leaving her baby to wander and get lost. In addition to the goat, E. had seen three deer and a porcupine, but none of the former were big enough to warrant E. shooting at them.

The next two days we spent traveling, and cutting a trail through a roughish bit of country to the headwaters of the Kettle river. In the mountains near the source of this stream we hunted several days without securing any further trophies. Caribou tracks were plentiful, but try as we could we couldn't come up to them. They seemed to be traveling, not feeding, and though we followed the tracks of several bands for miles, we never caught even the most distant sight of them. They seemed to do without feed, or if they did do a little, it was only for a moment to nibble carelessly at the black moss hanging from the pine trees.

Two more buck, numerous grouse, and one or two smaller quadrupeds were added to our bag before we began our ride towards the Okanagan. On the whole, we were more than satisfied with our hunt, and not the least disappointed at seeing the waters of the Kettle, a river alone well worth the trouble of going to British Columbia to visit; and draining a country that every sportsman should see for himself.

DOINGS IN DOGDOM.

The total number of entries for the Del Monte show is 155, which will make us show a two-point count for championship honors.

The entries by breeds are as follows: American Foxhounds 6, Pointers 3, English Setters 9, Gordon Setters 3, Irish Setters 5, Irish Water Spaniels 2, Field Spaniels 2, Cocker Spaniels 14, Dachshunds 3, Collies 13, Poodles 2, Dalmatians 1, Bulldogs 9, Airedales 3, Bull Terriers 12, French Bulldogs 5, Boston Terriers 16, Fox Terriers (smooth coats) 14, Fox Terriers (wire hairs) 9, Toy Terriers 1, Pomeranians 3, Pekinese Spaniels 2, Japanese Spaniels 1, Italian Greyhounds 2, Toy Poodles 2, Ladies Variety class 8.

Glen Tana Collie Kennels' Glen Tana Sybil and Glen Tana Squire, both by Ch. Squire of Tytton, were each first in winners, open and limit and also annexed several specials at the Butte, Mont., show, December 19-21. G. W. Clayton judged, the show counted two points.

George Cranfield had the ill luck to lose his good Bull Terrier bitch Hawthorne Betty two weeks ago. Betty was in whelp to John Cawkwell's Silkwood Surprise. Mr. Cranfield's Woodcote Ditto, a Ch. Woodcote Wonder bitch, is in whelp to Miss Jennie Crocker's Silkwood.

Queenie, a Pointer bitch belonging to Mr. A. L. Holling, and a winner at the last San Mateo show, has joined the canine majority. The bitch was being trained for field shooting and gave promise of becoming a fine worker to the gun.

Ch. Anfield Model is at stud in the Valverde Kennels, located near Yountville, Napa county.

How could a Foxhound find his way home over a rough country and with his head enveloped by a large milk can? Such, however, is the remarkable feat accomplished by a dog according to the following account, taken from Antioch Ledger. The dog, Spark, is owned by Bert Whitman of Los Angeles. Spark went hunting, recently, with his

master, and when it became dark he was still running a crafty old fox up on the side of the Pico mountain. There was no catching the hound and no calling him off, so Whitman left him to return when he got ready. Frequently he had packed his gun down the mountain while the hound was still baying on a hot scent, and he had no fear as to his showing up in the night.

At ten o'clock, when there were no signs of Spark, Whitman left the kitchen door ajar, placed a big pan of mush and soup bones on the floor, and went to bed. Three hours later he was awakened by a clattering in the kitchen, and a moment later the hound, with his head stuck into a two-gallon milk can, waddled erratically into the bedroom.

To say that the animals master was surprised is putting it mildly. At first he was not sure that it was his dog, but after he spoke, Spark thumped his tail and tried to climb into bed.

It was necessary for him to use a can opener to free the dog, and this took some fifteen minutes. All this time Spark stood perfectly still, but the moment he was released he made for his supper, and ate as if famished.

The animal probably found the can near some camp, for it was covered with rust. Doglike, he investigated the interior with hopes of finding food, and could not remove his head.

Just how he found the way home, for he could not see through the bottom of the can, is the problem.

Sir Henry Howorth, who wrote "A History of the Mongols," met at an afternoon reception a young woman who, after surveying him with interest, launched into a discourse on dogs, telling him she had three, and had always been pleased that each of them had such a good pedigree. "Though I don't know that it counts for much," she said at last. "Some of yours are cleverer than any of mine." "But I have no dogs," said Sir Henry, bewildered. "Oh, well I mean those you've written about," said the young woman, quickly. "But I've never written about any," said Sir Henry. "You haven't?" exclaimed the young woman. "Why, I'm sure somebody told me you had written a book on mongrels!"

THE MEXICAN HAIRLESS DOG.

Darwin, Huxley and Spencer in all their excursions into the theory of evolution have never been able to account for the Mexican hairless dog. Wise savants have pondered on this deep subject in vain. Now comes Theodore McKenna, a well-known trainer of trick dogs and breeder as well, and in the columns of the Los Angeles Herald he tells the real secret concerning the cause of the Mexican dog's similarity to David B. Hill's pate.

According to McKenna the Mexican hairless dog bears a prouder pedigree than most other breeds, and records show that this strange little creature extends back into the very dawn of history, thousands of years before the Caucasian established his system in civilization in the new world.

Heretofore, authorities on dogs have flatly stated their ignorance concerning the Mexican hairless dog, claiming that little is known as to the origin of this breed or as to its history since that period. Elroy Foote refers to the Chinese crested dog, so called from having a crest of hair running along the top of the head from front to back. In addition to this, he says, the dog has a tuft of hair at the end of his tail, but otherwise with the exception of a few scattering hairs around the head and just above the feet, the dog is perfectly hairless, the skin being more or less mottled in some specimens.

There is another hairless dog, said to come from China, considerably smaller than the one mentioned above, weighing from eight to ten pounds, and without any hair at all. The head is like an apple headed toy terrier, with large bat ears standing out from the head, a very fine tail, and the skin of a uniform dark color. Other hairless dogs are referred to as being native to Africa, Brazil, Buenos Ayres, Turkey, India, and China. But there is only one Mexican hairless dog. He is in a class all by himself and is easily distinguishable from other so-called hairless dogs.

Elroy Foote says: "Whether these various strains of hairless dogs found in the various hot climates are of common origin, whether they have been distributed from some one country to the others, or whether they are the result of the so-called law of evolution, we can only conjecture. Whether in some quarter of the globe a breed of dogs has always existed none of which had hair, because they did not need it, or whether they were once clothed with hair which gradually disappeared because they did not need it, who can say? If a strain of Pugs or Fox Terriers were colonized in Central Africa and bred there twenty-five, fifty or 100 years, would their hair gradually disappear? Such a supposition seems to be hardly plausible, since the wild dogs of India, many of whom live almost under the equator, are thickly coated with hair, as are nearly all other quadrupeds in hot countries.

"Why, then, should one breed of small dogs exist entirely hairless? Will some Tyndall kindly investigate and give us the why and the wherefore?"

"In Mexico, among the natives, these dogs are used externally for the treatment of rheumatism, and internally to assuage the pangs of hunger. There would necessarily be more virtue in their warm little bodies as a natural substitute for the hot-water bags than as an article of diet, at least judging from our civilized standpoint.

"The hairless dog is a pet and house dog only, and as such has some good qualities that his hairy brethren have not. He is naturally clean, a peculiarity not possessed by any other native Mexican, nor leaves hair about on furniture or clothes, does not have fleas or any odor other than that of the soap with which one can keep his skin as sweet and pleasant to the touch as one's own.

"Puppies are at birth much lighter in hue than when older, many of the white spots becoming by degrees smaller and beautifully less, and some entirely disappearing."

Theodore McKenna has made a special study of the Mexican hairless dog, and is qualified to explain the mystery surrounding that marvelous animal.

He says: "Clavigero describes a large hairless dog found among the Mexicans by the Spanish conquerors, whose puppies were esteemed as an edible delicacy, and others are reported to have occurred in ancient Peru and on various of the West Indian islands.

"Relics of the Mexican hairless dogs are found in the vast stone buildings of the Aztecs and Toltecs of the Nahuatl nation, most of them being minor statuettes, carvings, amulets and ornaments in stone, besides many elaborately carved gold ornaments in the shape of this dog.

"Much of the ancient, richly colored pottery is beautifully ornamented with elaborate signs and figures of the Mexican hairless dog abound in gorgeous profusion. Although each of the separate ancient tribes and nations possesses its distinctive and individual ware, the pictures of the Mexican hairless dog appear on all without exception.

"All these relics bear mute testimony to the customs, habits and religious rites of the native races, showing the high esteem held by the Mexican hairless dog in the estimation of the people of that time.

"Prof. Carl Lumholtz, the eminent ethnologist, is said to have witnessed this among the primitive Huichols, or Virarikos, a little known tribe of Indians in the State of Jalisco.

"The age of the species of hairless dog in Mexico is indicated by the fact that mention of it is frequently mingled with the carefully preserved traditions of the Huichols, which include a version of a flood which lasted five years and an ark which rested on a mountain in Mexico, instead of Mount Ararat. The representations of this ark and the tradition that the Mexican hairless dog was the chief of the animals saved by it and Grandmother Growth, who predicted the flood, are among the objects of veneration that are used in the ceremonies.

"Impressive carvings of the Mexican hairless dog are found in the ruins of monuments, temples and cities scattered throughout the land, notably among the cliff ruins and deserted pueblos of the Casas Grandes and other localities in the State of Chihuahua in the north; those of Quemada in Zacatecas farther south; of Tula, the northernmost center of Toltec culture, and in the remains of chambers carved out of the solid rock on the hill of Texcoco, a few miles beyond Texcoco.

"Actual documents of native Aztec history in their ideographic writing, which have been deciphered and published, devote long stories to the Mexican hairless dog.

"Fernando-de-Alva-Ixtlicochitl, the royal Texcuan chronicler, Tezozomoc, son of Cuicuilam, the last Mexican Emperor, and others after the Spanish conquest, drew up interpretations of many of these tales of the ancient and honorable race of Mexican hairless dogs.

"This is the reason for the Mexican dog being hairless, according to the old Indian tradition: Once upon a time there lived a God named Gugumat, who was a wonderful nagual, or magician. He aroused the wrath of the other gods by refusing to exert his powers to conjure the clouds when there was danger of hail, so that the crops might not be injured. Besides this offense he terrified human beings by making a stick look like a serpent, a mat like a centipede, a piece of stone like a scorpion, and other strange things. So the other gods determined to capture him, and although they could not kill him, as he was endowed with immortality, they resolved to get the best of Gugumat by trickery.

"Now, Gugumat was wont to turn himself into different animals to scare his enemies, but it was the law that he could not turn himself back unless he was intact. The other gods caught him, and he turned first into a tiger, then into a weasel, then into an owl and finally into a dog. The other gods threw him into the fire, and the hair was burned off his body, except a few hairs on the top of his head and under his legs. Gugumat, having lost his hair, was not intact, and lost his power of transformation, so he remained a dog.

"And so he is to-day, and that is why the Mexican dog is hairless. This old myth is interesting, because hair cannot be made to grow on a Mexican dog to this day, no matter how much artificial hair grower of other medicaments are rubbed into the flesh."

A gun club has been formed at West Riverside, called the "Horse Shoe Gun Club," of which W. A. Hudson is secretary. The club has leased Horse Shoe Lake from the Rogers Development Company, and the general public is now warned to stay out.

DISEASE OF THE TENDON.

[C. R. Wood, V. S., in American Horse Breeder.]

Inflammation of the flexor tendons is very frequent in the horse, and generally occurs in the fore limbs, on account of their being much more exposed to the violent strains which form the general cause of the disease.

Horses with weak flexor tendons, heavy bodies and powerful muscles, are predisposed to tendonitis. The structure of the tendon, and consequently its powers of resisting strain, is of the greatest importance. Its absolute thickness bears no direct proportion to its strength. On the contrary, tendons of considerable size and surrounded by abundant paratenium suffer more frequently than the sharply defined and those which are firm to the touch. The latter peculiarity shows that the tendons are well provided with firm fascicular tissue, whilst in the first case they consist more of connective tissue. Rupture and inflammation following severe diseases, are in fact, at least, to be referred to this fact. Further, all conditions which increase the load on the limb and the strain on the flexor tendons favor tendonitis.

Long, weak and slender fetlocks are especially liable to it. The strain on the tendons is increased by increased length and obliquity of the fetlocks. The more slender the fetlock joint appears when seen from the animal's side, the greater the mechanical disadvantage at which the tendons are placed. For a similar reason, horses with "tied in" knees are disposed to tendonitis, this formation being generally accompanied with small size of the fetlock. Further, everything which favors dorsal flexion of the joint increases risk of inflammation of the flexor tendons. Low heels and long toes are, therefore, apt to cause it. Long toes throw a powerful strain on the flexor tendons during the latter phase of movement, just before the limb is lifted from the ground.

The kind of work required of the horse is also important. Thus, race horses and horses required to trot a sharp pace for long periods are the most general sufferers. Animals with considerable powers of endurance suffer most. The greater the muscular development of the hind-quarters, the greater the shocks produced in the fore-limbs by the violence with which the weight of the body is thrown forward on them. Spirited animals suffer more than phlegmatic ones. For similar reasons cart-horses show strain more frequently in the hind limbs. Such strains of flexor tendons are produced either by the body weight falling on the front limbs, when the horse is jumped or suddenly pulled up—passive strains, or by continued violent action of the flexor muscles—active strains.

In the first instance the flexor perforatus is principally involved. Its length causes it to suffer first from forced dorsal flexion of the phalanx. The flexor perforatus is less likely to be injured. The effective length must be reckoned as the distance between the lower insertion and the upper one, and in the perforatus and perforatus tendons from the upper insertion of the so-called cheek ligaments.

Inflammation of tendons, produced by excessive muscular action (acteris sprains), have, with few exceptions, their seat in the flexor perforatus, because the muscular head of this tendon is by far the stronger, and its tendon is therefore exposed to the greater strain. But passive strains also occur, as shown by the frequency with which the cheek ligament, which extends to the lower portions of the tendon, becomes diseased.

In the hind legs the portions of the flexor pedis perforatus tendon which suffer oftentimes are those lying just above the fetlock, or below the hock. Bruises are rare causes of inflammation of tendons, though seen in the flexor perforatus, its surface situation more readily allowing of injury from kicks, etc. Inflammation sometimes extends from the tendon sheaths, or articular surfaces, to the flexor tendons, and the form associated with infectious diseases, and occurring during convalescence from thoracic influenza, always starts in the tendon sheath. The first sign of inflammation is a peculiar semi-soft swelling just above the fetlock, which extends thence to the perforans and perforatus tendons. I have often seen a similar appearance and look on such cases as due to secretory metastasis. In convalescents the inflammation sometimes originates in the perforatus tendon, particularly when animals are worked too early. The interference with general nutrition produced during the disease is probably the predisposing cause.

Inflammation of the flexor tendon is accompanied by the following symptoms:

1. Lameness, which varies according to the position and extent of injury. The form seen after influenza is usually the most painful; that following mechanical injury of the perforatus less so. In tendonitis of the flexor perforatus lameness is slight. When only one division of the tendon is affected lameness may be observed.

Lameness is shown only when weight is placed on the limb. Attempts are made to shorten that phase of movement, during which the phalanx is in a position of volar flexion, that is, upright and under the body. Neither passive, extension nor rotary appear painful, a fact which distinguishes the disease in question from disease of the joint. The symptoms are then, supporting leg lameness; shortening of the period when the limb is upright; volar flexion of the phalanx and absence of pain when the limb is rotated. Sometimes

animals try to place weight on the diseased limb by setting the heels on an eminence, e. g., on a stone, and by thus bringing the fetlock into an upright position, minimize the tension of the tendons. This is well seen in the hind limbs during disease of the flexor perforatus. When lameness is severe the animal never stands so completely on the foot, even when at rest, as it occasionally does in disease of the joint.

2. Local examination detects pain, swelling and increased warmth, which, however, is only seen early in the disease, and even then indistinctly. It is difficult to distinguish pain in the reinforcing band of the flexor perforatus, though it occasionally suffers. In applying pressure to the tendons, it is important not to be deceived by mere general sensitiveness.

The swelling varies in degree and extent, being scarcely ever visible in the flexor perforatus, or reinforcing band, even in "clean" legs, and in other cases only being detected by palpation. At first it is soft and diffuse; later it becomes harder and sometimes sharply defined. In examining for pain and swelling the foot is lifted. The reinforcing bands can only be properly examined in this position.

3. The symptoms enumerated are afterwards followed by shortening of the diseased tendon, continuous volar flexion and upright position of the hoof. This is differentiated from the volar flexion produced by placing weight on the leg, by the fact that it continues even when the animal stands fairly on the limb. The point is at once settled by lifting the other foot. While contraction of the flexor perforatus produces volar flexion in all the lower joints, contraction in the flexor perforatus and suspensory ligaments only affects the obliquity of the pastern. The hoof remains in its normal position. In race horses a large number of fasciculi of the flexor perforatus may be ruptured, producing abnormal flexion of the phalanges, and so-called "break-down." This is oftentimes seen when both limbs suffer, or when the animal is forced to stand continuously on the diseased limb.

The disease always occurs suddenly, and the anatomical structure of the tendons explains its subsequent chronic course. After strain or rupture isolated hemorrhages and hperæmia of the tendon set in, and are followed by serous infiltrate into the interfascicular connective tissue and paratenium. The fasciculi of the tendon are thus thrust asunder, and predisposed to further rupture. At the seat of serous infiltrate more leucocytes afterwards appear (plastic infiltrate) causing the swelling, which is at first soft, to assume harder character.

In section the parts display grayish white, sometimes grayish red, masses of connecting tissue. In consequence of extravasation of leucocytes the cells of the firm connective tissue thickening results, which may lead to shortening of the tendon, as the newly formed tissue contracts, while the paratenitis leads to adhesion with neighboring tissues. The tendon becomes permeated with blood vessels. Ossification has sometimes been seen and parasites met with in inflamed tendons. I have seen a case in the horse in which the ussoid ligaments were ossified and the flexor perforatus changed into cartilage.

Knuckling over may either be brought about by shortening of tendons, in consequence of cicatricial contraction, or of contraction of muscles. In the first case, only the lower joints take up the position of volar flexion. When muscles are involved the knee-joint is also bowed over. All cicatricial tissue, whether in tendon or elsewhere, is inclined to shrink, but the excessive development of this tendency is seen only when the limb is rested and entirely relieved of weight. Provided weight is placed on the limb, even occasionally, it never becomes so excessive. After contraction the fibres of the tendons no longer run in a straight direction but take a tortuous course.

On account of the peculiar character of the pathological processes, tendonitis varies greatly in course and results. Complete reabsorption of inflammatory products occurs in eight to fourteen days, when the case is favorable, and when rest and early careful treatment are adopted, but in most instances some thickening remains. Though lameness usually disappears in three or four weeks the newly formed tissue has not the strength of normal tendons and a point of less resistance results, which explains the frequent relapses. Continuous, severe pain points to serious local change, and often causes "knuckling over." The prognosis, therefore, depends chiefly on the degree of pain. The results of strains of the flexor tendons depend very largely on the region involved, the most serious being those which affect the suspensory ligament and the reinforcing bands, in which complete revolution is rare. Next comes the flexor perforatus. Inflammation of the flexor perforatus is less troublesome. The animal's usefulness is not impaired, even though considerable thickening remains. Needless to say the older the condition the less chance of recovery. When lameness is of old standing the outlook is bad. The condition is still graver when both limbs are affected. When the joints are much shot-over, tenotomy is sometimes successful, but this depends on whether the flexor tendons are adherent to one another, or both, or to their lower sheaths. Adhesion of the flexor perforatus with the perforatus is always troublesome, though cure is not entirely out of the question. Tendonitis occurring during infectious dis-

eases is more obstinate than inflammation mechanically produced in otherwise sound animals. Great pain and resistance to treatment point to an infectious origin, though such swellings occasionally disappear after 12 to 24 hours when the sheath of the tendon is only slightly involved.

The most important point is to stop work. When possible, absolute rest should be given and the shoe removed. Fresh cases, due to mechanical injury, are treated during the first 24 to 48 hours by cold applications, the best being in the shape of some freezing mixture, but after this time little good results from the employment of cold. I then prefer moist warmth, supplemented by proper bandaging, applied as follows: After carefully cleansing the parts, two long rolls of oakum, rather thicker than a man's thumb are moistened and laid lengthwise on either side of the diseased tendon, close to the metacarpus, and fixed there by a linen or cotton bandage, wet and applied pretty tightly. Over this a dry woolen bandage is placed, so as to exercise regular pressure on the material below and on the diseased spot. When available a piece of rubber tissue, or waxen linen, may be placed between the two bandages. The moist warmth and regular pressure favor reparative changes. Excessive extravasation and cellular proliferation are checked, and resorption assisted. The rolls of oakum must exercise even pressure on the diseased tendon.

When pain disappears, massage may be resorted to during the interval of changing the dressing, the injured tendon being rubbed from below upwards, with the thumb and forefinger, using moderate pressure, for about five minutes at a time, the parts being meantime covered with a piece of brown paper. The operation must not be persevered with if pain or swelling follows. When early and carefully used, massage cures and removes the swelling in cases where, with the antiphlogistic methods formerly employed, thickening almost always remains. The slight vascularity of tendons in no way supports the theory of the action of cold; on the other hand, the moist warmth and methodical compression assist absorption, and are certainly not so likely to impede absorption as cold.

The action of blisters is largely due to the mechanical effort of infraction, and the pressure of the cutaneous thickening on the inflamed spot, and when the above described treatment proves impracticable it is good practice to apply a blister. Liquid is the best, and repeat when the parts have thoroughly healed.

Old thickenings are best treated by severe firing. In this case, the chief effect is produced by the mechanical action of the inflammatory swelling and cicatricial shrinkage in the cutis, the loins running straight from the front backwards, should not be wider apart than half an inch and should meet at the back of the perforatus tendon. After the scab has fallen the parts can be blistered, and when they have thoroughly healed the above described pressure dressing can be again applied.

In shoeing horses with disease of the perforans or perforatus the heels should be spared and the toe shortened as much as possible, and shoes with calkins, or thick heels, used. For many years it has been disputed whether raising the heels by calkins exercises any influence on the angle of the phalanges towards the ground. In my opinion this is certainly the case, for the pedal and coronet joints, at least, and for the former to a greater extent than for the latter. The position of the fetlock-joint and the fetlock angle are, however, scarcely affected by the dorsal flexion so produced in the pedal and coronet joints. Raising the heels, therefore, has no effect on the suspensory ligament, but that it is useful in inflammation of the tendons I have convinced myself.

COULD EQUAL FRANCE.

Joseph D. Wing of Chicago, who recently returned from a visit to France, addressed the Washington Live Stock Association, December 18th, at its session held at Spokane and said:

"There is no reason in the world why this section of the west can not produce just as good or better horses than France. There is a great demand for horses, and the price is high and they will never be any cheaper. There is a large amount of money spent abroad for draft horses that could be kept at home. There is about \$1,000,000 spent annually with France, Germany and England for draft horses. I saw 500 draft horses in France, the best they produced, and we could have produced just as good animals in America. I personally investigated the conditions in France and found they never overworked their horses in France, as they do in America. They also take better care of them and never let them go hungry, but they are never stuffed. They raise all kinds of clovers and grasses and have sufficient pasturage for their animals.

"This section of the west has the same opportunity for raising feed for its animals. The breeders of France keep part of their stallions at work, while others are on the road part of the time. The breeders have options on the colts and buy the best of them. Until the breeder is through with an animal no amount of money can induce him to part with a stallion."

Your Stomach is O. K. is you drink Jackson's Napa Soda.

THE FARM

ARGUMENTS FOR PURE BRED.S.

Why is the pure-bred fowl better than the mongrel? The reasons are many, says the "Rural Home." For one, you can always depend on the pure-bred for uniform growth. Take a mongrel hen, and her chickens will vary. They never grow fast, and one or two in the bunch will be ready for market two months before the others. Not only that; the pure bred are uniform in looks after dressing and sell higher on this account for breeding and hatching purposes. Their eggs and themselves always sell higher than the market price. Persons raising the pure-bred exclusively in this country must keep all their eggs from early spring until hatching the eggs; and now, since incubators are so useful and common, those who want eggs often order many weeks ahead to get all they need. Another reason is that the mongrel hen averages at the best about forty eggs per year. The pure-bred laying breeds, with worse care given, will lay over a hundred eggs, and with moderate attention I have known them to lay very close to 200 eggs per year.

What is needed is to bring our pure-breeds up to the highest type of hardness, utility and beauty, and then for the poultry farmer to use only fowls that are strictly pure in blood. Until then poultry raising will be more or less an uncertainty. When good blood is used, we see success in all branches of live stock. Blood is the foundation of success. In all the established businesses the best is what must be secured for foundation. Mongrel hens may answer some owners, but the best is the cheapest in the long run, and those who would prosper in the future poultry business must produce the best for breeding. As a rule, you can not buy a breeders' best birds unless he raises them in large numbers and has more good birds than he needs for his own breeding pens—birds fully as good as he has elected for his own use. If he is an honest breeder, you can buy eggs for hatching from his best pens, and the chances are you can raise birds just as good as his best at a small cost. Start right by saving only the best eggs from the selected hens for incubation, the most prolific layers.

STATION NOTES.

In treating calf scours at the Michigan station a mixture of tincture of rhubarb, camphor and opiate, equal parts, in hot water, is used. Dose, a teaspoonful. In one case a calf with scours was treated successfully after it was so near death the feet were stretched out cold and stiff and there was every symptom of death. The calf was given medicine and fed raw eggs and milk occasionally and he recovered and made one of the best feeders in the bunch.

Pigs to breed well should not be too fat says the Kansas station. It is the aim of successful breeders of swine to keep their animals in a medium condition, neither too fat nor too thin. A sow that is too fat will be hard to get with pig, will be less prolific and will produce a poorer mother than a lean sow. The fat animal is likely to

roll on her pigs, and the pigs from these sows are apt to be small and weakly. Do not breed sows until they are ten to twelve months old, and then keep them in medium flesh and they will do better than if too fat. Proper food and special care and attention are necessary to raise good pigs.

The Pennsylvania experiment station has issued a bulletin on relative value of feeding stuffs. It contains the results of certain feeding stuffs for maintenance and for fattening determined by means of the respiration calorimeter. It was found that these values were decidedly lower than those computed according to current methods from the amounts of digestible matter present. Coarse fodder in particular was found to have much lower value for maintenance, as well as for fattening, than concentrated feeds, the relative values of the former as compared with the latter being greatly overestimated in the feeding tables in common use.

Cornell University experiment station at Ithaca, N. Y., has just issued two bulletins. One entitled Root Crops for Stock Feeding, and the other, on Culture and Varieties of Roots for Stock Feeding. The bulletins deal with mangels, sugar beets, turnips, hybrid turnips, rutabagas, kohlrabi, carrots and parsnips. Roots make a good feed for all classes of farm animals, and can be used to advantage by more feeders than at present use them. The experiment of English feeders proves the value of roots as a supplemental feed.

KIND OF SKINS IN DEMAND.

Not all kinds of goat skins are in demand for leather. The skin of the Angora, for instance, is not at all suitable for shoe leather or for kid gloves, although tanners make of it morocco leather, and it is used to considerable extent in the manufacture of workmen's gloves. A prominent Philadelphia dealer in goat-skin, says: "The pelt of the Angora, whether it be from Turkey or else where is as a rule too thin and poor for leather, as it is a fact that the longer the hair of the goat the thinner and poorer the pelt." This being true, not only are Angoras put out of consideration, but also all goats having long hair. This eliminates a very large number of the goats of the United States or any other long haired variety. Not all of the imported skins are suitable for shoe leather, but the tanner carefully sorts each bale and throws out all that have long hair, as that is conclusive evidence of inferiority.

Among the French mountaineers the raising of kids for their skins is a leading industry. Softness, delicacy of texture, and freedom from blemish are principal factors in the value of kid skins, and to secure these essentials great pains are taken. So soon as the kids are old enough to eat grass or other vegetation the skin declines in quality, as with such diet the skin begins to grow coarser and harder in texture, and thus its chief merit disappears. The kid is therefore carefully penned, not only to prevent it from eating grass, but also to secure the skin from accidental injury from scratches and bruises, which necessarily impair its value. When the kids have reached a certain age, at which the skins are in the best condition for the use of the glove, they are killed and the hides are sold to hawkers, through whom they reach the great centers of the tanning industry. The conditions in the United States, especially as regards the item of labor, are so unlike those of mountainous France that it is not at all probable that a similar industry could be maintained here.—Government Bulletin.

Twenty-two agricultural students from Missouri University entered the State Fair judging contest at Sedalia, and won twenty-three out of twenty-four valuable money prizes. The fair board offered \$250 in prizes to be awarded to the best judges of cattle, horses, sheep and swine. The college men who entered this contest were all trained at the university and made a good showing among the older expert judges of the show.

RANGE TAX EATS UP PROFITS.

"It will never pay to own land upon which sheep are to run east of the mountains," said William Hughes, a well-known sheep-raiser of Morrow county to a Portland, Oregon, reporter the other day. "I therefore look for an entire extinction of the sheep-raising industry over there within a few years.

"Where taxes on sheep range amount to 50 cents an acre each year, we cannot afford to raise sheep, as the animals cannot pay the expense. The reason of this is because grass only grows on the Eastern Oregon and Eastern Washington ranges for about three months in each year, and it takes too much land to graze a sheep the year around.

"The Government is now charging sheepmen 15 cents a head for sheep run on the reserves of the Blue Mountains in the Summer time, and grass is scarce at that. The reserve ranges are badly crowded in the Summer months, and sheep naturally come out of the mountains poor in the fall. The prairies, where 25 years ago sheep could be pastured in the Winter, are now the property of farmers, and so are not available for sheep range any more. It follows, then, that sheep-raisers must either own the land their flocks run on or must rent from the farmers at such rates as to render the raising of sheep decidedly unprofitable.

"Although sheep are to be exterminated from that portion of the Northwest east of the mountains, they can still be raised to advantage on the farms west of the Cascades. Grass grows for ten months of the year, instead of three, and it takes less land to run the flocks. At present prices for wool and wethers there is actually more money raising sheep in the Willamette Valley than there is in raising grain.

HIGH PRICE FOR A CALF.

It pays every breeder of pure-bred cattle to strive for the best. There are high prices awaiting the animal of first-class pedigree. While pedigree is not all, the knowledge that the dams and grand dams have made great records go a long way in influencing the size of the price. This fact is exemplified in the enormous prices paid for animals of top notch breeding.

The Farm Stock Journal learns that Charles S. Averill of Syracuse, has just paid \$4,000 for a Holstein-Friesian bull calf, to be delivered to him at the age of nine months. This is believed to be the largest price ever paid for so young a calf.

The dam of the calf is Pontiac Rag Apple, which was sold for \$8,000 to Field Bros., of Brocton, Mass., and the sire was the Milk and Butter King, formerly owned by Mr. Averill, and recently sold to a syndicate of Syracuse men for \$10,000. All the animals are registered Holstein-Friesians. Mr. Averill's calf has been named King of Butter Kings. He is the only male calf in the world of whose dams in the pedigree average thirty-two pounds of butter in seven days.

That the young bull will prove himself worthy of the price we have little doubt. It pays to strive for the best.

FEED FOR DAIRY COW.

The ration for dairy cows should be succulent and bulky, and at the same time be rich in protein. In sections of the country where alfalfa can be cheaply grown, and has a value of \$7 per ton, or less, many people question whether grain can be profitably fed with it. We understand, of course, that with a balanced ration we can get the greatest product; but the most vital point is to get the cheapest product. The feeder must determine such problems as this by experience, in many cases. Wheat hay, bran and potatoes would form a fairly good ration, but not necessarily a cheap one. In many sections of the country clover can be grown more cheaply and have

a lower value than wheat hay, being at the same time better adapted for dairy cows. Bran has about an equal value with oats, and a little greater value than wheat for dairy cows, so the choice between these feeds will be largely one of price. Among the root crops, generally speaking, mangels, or sugar beets can be grown in greater quantities, and will prove to be more suitable feed for dairy cows than potatoes; and, again, with potatoes, there is a greater danger of choking, unless pulping or slicing is resorted to.—Spokesman-Review.

SHOULD BREED PURE-BREDS.

There are three good reasons why a lot of farmers should begin breeding pure-bred cattle and swine this fall, says the "Live Stock Journal."

First of all, the ultimate end of all cattle breeding is high enough to be profitable to any farmer. Second, cow and heifer stuff never have been so scarce, per capita of our population, as they are now. The ranges are being broken up and an unprecedented number of calves are being vealed. Hence, the best prospect for beef products and breeding stock to remain at present high prices, or to go higher. Third, the farmer never had so much money in the bank as at the present time. And as money is of no use, except as it can be put to use to increase itself, there is no form of investment that will reproduce the original investment quicker than a pure-bred sow.

Fully one thousand invitations were mailed to well known stockmen of the Northwest to attend the fourth annual convention of the Washington Live Stock Association in Spokane, on December 18th and 19th. Some of the best known authorities on stock raising in the Northwest addressed the convention. The first address was by Joseph E. Wing of the Breeders' Gazette, Chicago. Professor H. T. French of the University of Idaho and Prof. E. E. Elliott of Washington State College also addressed the meeting. Other speakers were Paul Clagstone, Clagstone, Idaho; E. S. Waterman, Walla Walla; Dr. C. W. Deming, United States Inspector, Spokane; D. B. Sheller, Forest Superintendent of Wenatchee; L. McLean, President Spokane Canal Company; E. F. Benson, Prosser; George Urquhart, Krupp, Wash., and George L. Walker, Secretary of the National Wool Growers' Association, of Cheyenne, Wyo. The last address was one of particular interest, as sheep-raising is an industry which is just being introduced to the Island Empire.

TO FATTEN CHICKENS.

The following is the formula of a large New England feeder for fattening chickens:

Take equal parts of oat meal, graham flour, and corn meal, and for every hundred pounds of the dry feed add six pounds of brown sugar and three pounds of tallow. Mix with buttermilk or sour milk so it will pour out of a pitcher. After each meal mix milk and the dry feed for the next meal. Put in three ounces of soda for every hundred head of chickens. The soda sweetens the mixture and makes it light and palatable for the fowls. I use this ration for my capons every year and can recommend it. Do not fail to keep plenty of charcoal and grit before the chickens. Keep them away from a day at regular hours. I feed at 9 and noise and excitement and feed twice 4 o'clock and never feed except when cooped.

Some breeders say that a cross sow makes the best mother, but it is a statement without proof.

Remember that overfatness in a sire may hide many defects.

RAISING MULES.

This is one of the questions which is perplexing to a number of our farmers as a great many prefer raising mules to horses, but, it seems they know more about the horses and how to attend to them to get the best results, while they have had very little experience with raising mules.

In the first place to obtain the best success in raising good mules, a man should select mares that have a strain of good blood and of fair size. "The best sized mares are from 1100 to 1300 pounds." With a good sire this grade of mares are best for the following reasons: The mare generally has good life, which has a tendency to produce a mule with his head up, and this sized mares have proven to produce mules that weigh from 1100 to 1500 pounds, with lots of style, which command the best prices in the market. Bigger mares produce well but if the mare is large she is nearly always lubberly. No one wants clumsy, lazy mules. The upheadedness is not as a rule obtained from the jack; however, in selecting a jack a man doesn't at any time want a dead head. The jack should be black with white points, of good size, with a good disposition. The disposition should be taken largely into consideration.

The best time to breed your mares is April, May or June; this brings the colt when the grass is green and the sun is warm. The mare needs grass to suckle the colt. She gives lots of milk on this feed, which strengthens the colt and makes him stretch in the sun and exercise lots. As soon as he begins to eat, which is generally at three or four months old, give him a little chopped feed and fix a trough in his pasture where he can get it at any time. Keep him away from the mare during the day, after he is four months old and when you come to wean him he will eat, thrive and continue to grow. He should be weaned at six months old, and if he has learned to eat well the thing from this time on is to give him a good pasture with plenty of good water and choppedfeed in his trough all the time.

The secret of mule raising is to keep them growing and feed, exercise and sunshine will make them mature.

Here is an instance which happened the past summer. One man had a mare weighing 1040 pounds which foaled a mule colt the last of April. This colt was allowed to run in pasture with its mother every night and was given all it would eat. The owner sold this colt for \$135 when the colt was six months old. Another man owned two mule colts, both foaled in May, from mares weighing 1100 and 1200 pounds each. These mares were kept on dry feed all the time they were suckling these colts and he sold the mules for \$65 each in October.

The care has very much to do with the outcome of your colts. During the breeding season care should be taken to see that the mare is returned and tried on the 18th to 21st day after she is bred and should she prove not to be in season try her again the 27th day from service and you will find it will add to your stock of colts the next spring.

Persistence is the secret of success. A good way to get a man to try his mare is to require a few dollars deposit at the time of the first service, then, if he forgets he has a mare, he will wonder what has become of that five or ten-dollar gold piece that he had hoarded away in his pocket, and when he remembers that he has a mare he will get busy and take the mare to be tried. I have tried this system, and it is surprising how well they remember and the result is that my jacks have 85 per cent of mares with foal.

No man can have good success in breeding an animal, "no matter how good care he gives that animal," unless the mare owner takes care of her also, and the person who takes good care of his mares has the most to gain. Should she go over a season without a colt, her owner has lost from \$50 to \$100 and the country is no better off because he owned a mare.—A. H. Hotchkiss.

Slops may make fat, but we prefer bacon that is built on clean grain and grasses.

Fairmont Hotel Palace Hotel Co.

A Guarantee of Excellence

The only large hotel commanding a view of our incomparable bay. The best located hotel in the world, as it is the most convenient to the business centers, while its elevation affords wholesome advantages in the way of pure air, sunshine and the absence of all annoyances connected with the rebuilding of a great city.

SAVE-THE-HORSE[®]

Registered Trade Mark
SPAVIN CURE

From a One-Time Owner of the
GREAT ANGUS POINTER

Columbus, Ohio, Oct. 2, 1907.
My horse, Gold Hal 2:12 1/4, in his second race was in a bad mix-up. Two pacers were down and he jumped into the pile, injuring both his fetlocks. Both shin and knee boots were torn off, also his support and both tires. A broken brace punctured one of the fetlocks, and he went dead lame. We resorted to your remedy and he stepped a couple of miles to-day better than 2:10 in his work. I consider that it has done wonders in this case.

The duty counts so that I will, if possible, take some home with me. My home address is Carleton Place, Ontario, Canada. I am the party who bought Angus Pointer 2:01 3/4, when he was a yearling, developed him, getting him a record of 2:06 before selling him to F. G. Jones of Memphis, Tenn. Would like you to write me, quoting trade price. Address care of H. W. Wilson, Secretary K. T. H. B. A., Lexington, Ky.

Yours respectfully,

J. MACPHERSON.

Is a Steed Bred to the Purple More
Valuable Than a Mongrel?

Are Not Diamonds More Valuable
Than Paste?

Then this vital fact stands out as clear as crystal, "Save-the-Horse" is worth its weight in gold. No other agency, remedy or method can accomplish such miraculous and unfeigned results. It saves time and money.

MAKES A TENDON LIKE A ROD
OF STEEL.

"Save-the-Horse" permanently cures Bone and Bog Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boli, Wind Puff, Injured Tendons and all lameness, without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

MANHATTAN STOCK RED BALL BRAND FOOD

Awarded Gold Medal at California State Fair, 1892. Every horse owner who values his stock should constantly have a supply of it on hand. It improves and keeps stock in the pink of condition. Ask your grocers or dealers for it. Positively cures colic, Scouring and Indigestion. Manhattan Food Co., C. P. Kertel, Pres., 1001-1003 E. 14th St., Oakland, Cal.

THREE HIGH CLASS HORSES FOR SALE TO CLOSE AN ESTATE.

No. 1. Seal brown gelding, five years old, stands 16 hands, weighs 1,150 pounds. Sired by Direct 2:05 1/2, dam by Guy Wilkes 2:12 1/4; second dam by Chas. Derby 2:20. This horse has never been trained, but is a fine driving horse and can trot a 2:40 gait. He is in every respect a very handsome and desirable animal, in first-class condition, very kind and gentle.

No. 2. Bay filly coming three years old, stands 15 1/2 hands, is a trotter. Sired by Greco B. 2:12 1/4, dam by Poscora Hayward; second dam by Williamson's Belmont. She is a remarkably fine filly, gentle and kind, has been broken but four weeks, and think she can show a three-minute gait.

No. 3. Bay gelding, coming three years old, natural pacer. Sired by William Harold 2:13 1/4; first dam by Luster 2:22; second dam by Richard's Elector 2:17; third dam by Chieftain 7:31; fourth dam by Williamson's Belmont; fifth dam by imported Langford. Has been broken but two months, and shows great natural speed. Stands 15 1/2 hands, weighs 1,075 pounds. Is developed like a four or five-year-old. Very handsome and in first-class condition. A real show horse, with the kindest disposition and every promise to become a great race horse.

None of these horses wear boots or straps. They are not afraid of anything on the road, and I will guarantee each one to be sound and without blemish. For particulars address or apply to

H. OLSEN,
814 E St., Haywards, Cal.

FIVE CHOICE HORSES FOR SALE.

Bay gelding (3) by Searchlight, out of La Muscovita, the dam of Yolanda 2:14 1/4. This colt is a nice big fellow, 16 hands, and can trot a 2:30 clip.

Bay gelding (2) by Stam B. 2:11, out of same dam; a very handsome colt, that can beat a three-minute gait.

Bay gelding (3) by Searchlight 2:03 1/4, out of mare by Director 2:17, that will learn to pace fast.

Billy B. (trial 2:13), brown gelding, by a son of Button, 16 hands, weighing 1100 pounds; a very nice horse.

Auger Baron (trial 2:15).

All of these horses are sound, thoroughly broke, in splendid condition, and can be seen at Pleasanton race track. Inquire there of G. H. FARMER, or JOHN GREEN, 1918 Steiner St., San Francisco, Cal.

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Spavins, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dickens, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, spavins, windpuffs and all bunches it has no equal." Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking. W. B. Eddy & Co., Whitehall, N. Y.

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.

PRICE—25c, 50c and \$1.00

AUTOLOADING SHOT GUN

"LOOK FOR THE BIG RED W"

THE big red W is the connecting link between the consumer and the makers of Winchester goods. Over a year ago we adopted this safe-guarding trade-mark and since that time every box, carton and package put out by us has borne the big red W, the hall-mark of goods as perfect as brains, experience and ingenuity, coupled with a modern and complete plant, can make them. Our object in adopting this trade-mark was to make it easy to distinguish Winchester goods from other makes, which equal them neither in quality nor reputation, and thus protect you and protect ourselves. We have done our part. Will you do yours by looking for the big red W whenever buying anything in our line? The big red W is to guns, cartridges and loaded shells what the word "Sterling" is to silverware the world over. For your own protection we again ask you to "Look for the big red W"

The Stallion Number

OF THE

Breeder and Sportsman

Will be issued February 15th, 1908. It will have a hand-
some cover in colors, contain many illustrations and be
replete with matter interesting to breeders and horsemen.

If You Own a Stallion

Don't fail to advertise him in this issue, as an advertisement
of your horse in this number will reach every man on the
Coast who owns a good mare.

If You Own a Mare

You will find this number very interesting, as it will con-
tain the stallion announcements giving particulars as to
description, pedigree, terms, etc., of all the best horses on
the Coast, and from these announcements you can decide
on what stallion will nick best with your mare.

ARE YOU INTERESTED IN HARNESS HORSES?

If so, you will be interested in reading this number, as it
will contain statistics and news that will be valuable and
entertaining.

In place of getting out the usual large Christmas
number of the BREEDER AND SPORTSMAN last month, it was
decided to make a special effort and get out a handsome
stallion issue, and the date of February 15th was selected
as Christmas comes too early for an issue of this descrip-
tion. Owners of stallions who wish illustrations of their
horses to appear in this issue should have photographs
prepared without delay and send in their orders for space.
A specially low price has been decided on for advertising
in this issue, placing it within the reach of all. Write
for price and particulars.

LIBERAL FUTURITY STAKES are "the real thing" just at present with the turf journals published on the other side of the Rocky Mountains, and they have been engaged in a hot contest to see which could devise the most liberal terms and conditions, as a large list of entries is an absolute necessity toward the success of these newspaper Futurities, which, while of great benefit to the horse breeding industry, are also a great source of revenue to the newspapers offering them. The Western Horseman of Indianapolis inaugurated a stake some years ago with the financial assistance of several wealthy breeders, by which a person had only to subscribe for that journal to make his colt eligible to a stake worth \$8,000. The American Horse Breeder of Boston announced a \$10,000 Futurity last year which only called for an entry fee of one dollar to nominate in it. The Horse World of Buffalo inaugurated a stallion stake, the greater part of which was to be put up by the stallion owners, all foals by these stallions to be free of entry in said stake. The Horse Review of Chicago, which has given a very successful Futurity for years, in its Christmas number recently issued announced new and most liberal conditions, which enable a breeder on the payment of \$2.50 subscription to the paper for one year to nominate in a \$12,500 stake every mare he owned that was bred in 1907. This seemed to cap the climax of liberal stakes, but now comes the Chicago Horseman with a Futurity guaranteed to be worth \$15,000, and any owner, on the payment of the insignificant sum of one dollar, is entitled to nominate every mare he owns. Entries to this stake will close Monday, March 2d, and the only payments thereafter will be \$5 November 2, 1908, on each foal (this payment to carry with it a year's subscription to the Horseman), and \$5 May 1, 1909, on each foal. The only other payments are starting payments. As the Horseman guarantees the stake to be worth \$15,000 and also guarantees that all money paid in in excess of this guarantee will be added to the stake, this Futurity is beyond question the most liberal ever devised. All these stakes help the breeding business greatly and we hope each and every one of them will secure entry lists large enough to make them profitable to the journals giving them.

THE SAUSALITO POOL ROOMS have been declared a nuisance by Judge Bush of Shasta, sitting on the Superior Court bench of Marin county. District Attorney Boyd of Marin county had brought a civil suit to abolish the pool rooms of Frank Daroux and others as a public nuisance, and Judge Bush has sustained the complaint. The Judge says in his decision that such a business constitutes a nuisance in drawing together persons who annoy the neighborhood, endanger the public peace and corrupt good morals is without question.

THE LISTS OF ENTRIES for the Occident Stake, foals of 1907, has been received, and there are eighty-one entries, the largest list for several years. This list, together with the lists of those on which second and third payments were made January 1st in the stakes of 1908 and 1909, will be printed next week.

A TEN-DOLLAR PAYMENT, the last until the starting payment, must be paid on or before February 1st on all three-year-olds that are to be raced in the Pacific Breeders' Futurity this year. Make this payment or your colt will not be eligible to start in this rich stake.

THE HOLIDAY NUMBERS of the Eastern journals devoted to harness horse affairs are particularly fine this year. The Horse Review, Horseman, Horse World, Trotter and Pacer, American Horse Breeder, Bit and Spur, and Rider and Driver, all published beautifully illustrated editions.

Secretary Stewart of the Los Angeles Driving Club will be kept busy this spring and summer, as the club will hold matinees twice a month. A great improvement which will be made this year is the shortening of the program to five races during the afternoon, instead of trying to pull off seven or eight events and keeping the crowd until late in the evening. Some fast time will be made in these amateur races, as there are owned in the club two or three trotters and several pacers that can beat 2:10 almost any time they turn around.

The colts by the Palo Alto bred and owned stallion McKena 39460 (McKinney-Helena 2:11¼) are such fine lookers and show so much trotting action that many breeders will again send their mares to him. Mr. William Hendrickson owns some particularly fine colts by the horse and has them at Pleasanton.

P. J. Williams owns a couple of stallions that breeders should patronize. Monterey 2:09¼ and his son Yosemite are both horses whose blood will benefit and improve the stock of any locality. They have size, good looks and great speed, as well as dispositions that are about perfect.

Bon Voyage (3) 2:12¼ is said to be in fine shape this year and will be well patronized by the Southern California breeders, although we understand Mr. Clark will have Gerrety put the great young horse in shape to reduce his record during the summer.

From the reports of young pacers by Star Pointer being worked on Eastern and Southern tracks, it looks as though the old champions' 2:10 list would be doubled in 1908. He now has five in this list and they are all race horses.

J. R. Fronefield is in Los Angeles this week in the interests of the Breeder and Sportsman, and will visit San Bernardino, Bakersfield, Hanford, Tulare, Fresno and other points before returning to San Francisco.

A GREAT CALIFORNIA TROTTER.

The subject of our illustration this week is the gelding Geo. G. 2:05¼, called the best and fastest race trotter of 1907, as he not only won every one of his five starts and beat the best in his class, but afterwards lowered the world's half-mile record to 2:06¼, the quarters of which mile were 0:31½, 0:31, 0:31¼ and 0:32½.

George G. was bred by Frank Wickersham of Fresno and was sired by Homeward 2:13¼, a son of Strathway. His dam was Mabel by Junio 2:22, son of Electioneer. Nothing much was thought of him when a colt and finally George Grandau purchased him for \$50 and gave him to Josh Albertson to train, who discovered that the gelding had a great flight of speed and entered him through the California Circuit in 1903, where he won three out of four starts, not being called upon to do anything but educate himself a little in his first race. He took a mark of 2:12½ that year, and the next summer was purchased by Mr. A. N. Brady of New York for \$15,000. He was given to Ed Geers to race, and owing to indulging in breaks at the critical moments, was called a gold brick, as he took a record of 2:06¼ and failed to win a race. The next year he worked better for Geers, but did not race much better, as he lowered his record to 2:05¼ without winning first money. In 1906 he was matineed and won the Cleveland Challenge Cup and the Gold Cup at Pittsburg. In 1907 he went to the Blue Ribbon sale and to the surprise of everyone nearly there was very spirited bidding on him, and he was finally knocked down to his present owner, William Bradley, of New York, for \$10,000. He was turned over to Alta McDonald, who has made a good actor out of him, as his unbeaten campaign last year proved. His first victory, says the Horseman, was at Poughkeepsie, where he defeated Turley, Oro, Lady Gail Hamilton and Kid Shea, leading from wire to wire each heat in 2:08¾ and 2:07. At Readville he trimmed Lillian R., the only time the bay mare was beaten all year, as well as Oro, John Caldwell and Kid Shea, in 2:06, 2:08 and 2:09¼, the first heat being the trotting record for the year at the time. Although the track was slow, George G. could have trotted in 2:04 that day. He was idle the next two weeks, but at Syracuse jogged two miles in 2:07 and 2:07½ to beat Oro and Lady Gail Hamilton, marching the last quarter of the first heat in 0:31 and the last quarter of the second in 0:31½. His last starts of the year were at Columbus. Main-sheet 2:05 had been given a special preparation for the two events, and it was expected he would prove very troublesome; but at no time could he make George G. stretch his neck, the gelding winning the first in 2:06¼, the last half in 1:02, the second in 2:08¼, the first half in 1:02½, the second quarter in 0:31, and the third in 2:05½, the quarters being in 0:32, 0:30¾, 0:30¾ and 0:30¾. In his second race he won in 2:06¼, 2:08 and 2:07¼. The first half of the first heat was in 1:01½, the second quarter in 0:30¾ and the first in 0:31 and the last quarter of the third heat in 0:31. It is said that there is not a trotter in existence that can step a quarter in 30 seconds as easily as he can, as he seems to be only jogging when doing it.

The picture of George G. which appears on our first page this week was taken while he was at Oakland, just after the close of his first campaign in 1903.

Major P. P. Johnson of the National Trotting Association has been appointed adjutant general on the staff of the Governor of Kentucky.

Secretary Horace W. Wilson has announced October 7th to 18th as the dates of the Lexington meeting of 1908.

and when to move up. Fanny trailed the J. B. Davis horse for fifteen miles, never making a break or skip, but kept right at his sulky wheel. The horse tired on the first turn of the sixteenth mile and dropped out. Fanny took the lead. Black Squaw quit, hopelessly beaten, and the only horse left was Haley's, and he stayed in to the last. Fanny jogged in the last two miles, while Haley's horse staggered under the wire. Haley was quite a character, very loud-mouthed and noted for his wit. When the crowd cheered him and his tired horse, jogged in the last two miles, while Haley's horse He's always in the ring!" Fanny was taken out of the sulky amid the cheers of the delighted crowd and led over to the stable, a large number of admirers following her. Colonel McDaniel, who owned Harry Bassett, the celebrated race horse, my father, and Mr. Calvin Green adjourned to the club house, while I remained with the mare, the proudest young fellow that ever watched a trotter cool out.

"Three months after this trying ordeal Fanny Wickham dropped a filly by Sebastopol, which I bought, but it met with an accident and died. My father then sold Fanny to a very wealthy barrel manufacturer named Wainwright, who lived in New York City. What became of her after that I never knew, for I was at the front until Lee's surrender, then I left Virginia for Frankfort, Ky., and engaged in civil engineering. I also had a farm and bought and sold a number of trotters. I had heard a great deal about a thoroughbred called Childe Harold and wondered if he was the sire of Fanny Wickham. I learned that John Wickham was still living and wrote him about it."

Mr. McCloy said in answer to my queries: "What kind of a disposition had she and how fast could she go?" "Well, she was always full of nerve; no negro could go near her and many time I had to stay at home to attend to her when I would have preferred going away with my companions shooting or fishing. She could trot a mile in 2:40 and go the last mile of a ten-mile race as fast as the first. Fanny never needed a whip or spur to urge her, and was remarkably intelligent. Once, while in Accomac county, she ran away and came home to us. We found her standing quietly in front of the big barn, early in the morning, waiting to go into her stall."

"Here is the letter which I refer to and which I have cherished all these years."

Near Westham Docks P. O.,

Hennico Co., Va., May 4, 1870.

Mr. McCloy, Frankfort, Ky.

Sir:—Yours of April was misssent, and then mislaid—hence the delay.

The filly Fanny Wickham, as your father called her, was not by Childe Harold, as you suppose. I do not positively remember seeing her sire, nor can I find a note of him, but am pretty confident, almost certain in recollection, that her sire was Herald, by Sovereign, out of Imported Queen. Herald was owned by a friend of mine then living in Richmond, Dr. Cabell (since died), who told me of his pedigree.

The dam of Fanny Wickham was by Imported Trustee, out of a Sir Charles mare, and she (the Sir Charles mare) out of a mare who was sired by Ball's Florizel, and who was the dam of Boston, and this dam of Boston was out of an Alderman mare.

Fanny's pedigree, therefore, according to my best information, is as follows: Sired by Herald, dam by Trustee; grandam by Sir Charles; great grandam by Ball's Florizel; great great grandam by Alderman. See Vol. of Old Turf Register.

I would like to have you inform me of the latter history of Fanny Wickham. Is she still alive? Have you any of her descendants? I would like to have a good filly out of her. Yours respectfully,
J. WICKHAM.

There is decided discrepancy between the pedigrees as furnished by Mr. Wickham and the one published on page 429, Volume 1, of the American Stud Book, a pedigree which the late Henry Williamson (owner of Williamson's Belmont), always claimed could not have been right, neither color nor age being given and none of the names of her dams. Mr. Williamson was a deep student of blood lines and I have often heard him doubt the authenticity of the one published, so it was to get the correct version that I so often importuned Mr. Malone. The pedigree published is as follows:

FANNY WICKHAM, — m, foaled —. Bred by John Wickham, Esq., Tuckahoe Co., Va., by Herald. First dam by Imported Trustee; second dam by Imported Barefoot; third dam by Sir Archy; fourth dam by Ball's Florizel; fifth dam by Imported Alderman, etc.

The Ball's Florizel mare, as listed in the same volume, page 454, never was bred to Sir Archy but once, that was in 1827, and she missed, but she had two chestnut fillies by Sir Charles, one in 1824 and the other in 1826. One of these was undoubtedly the grandam of Fanny Wickham. Imported Trustee stood in Virginia in 1830 and it looks as if Mr. Wickham's version is correct. He should know, as he gives it very straight, and no doubt it was clearer in his memory than anywhere else. However, there is no denying the fact that Fanny Wickham's pedigree goes back through the Florizel mare (Boston's dam), to the thirteenth dam, by Brimmer. This is something that no one interested in her famous descendants has heretofore known. Therefore, it is not to be wondered at that gameness, soundness,

action and good looks distinguish every member of this family when we analyze the royal breeding of this famous mare, whose grand-daughter, Katie G., was the greatest producer of early and extreme speed of any daughter of the immortal Electioneer.

BETTER HORSEMEN AND HORSES NEEDED.

Washington, January 5.—Thirteen photographs from life, illustrative of racing and exploits in horsemanship form the unique exhibit sent to Congress by the direction of the president to accompany recommendations from himself and the chief of staff for the betterment of army riding. The pictures are intended to show how far ahead of American military men are Europeans in the art of equitation. One of the most thrilling represents an Italian cavalryman riding over a twenty-foot perpendicular cliff, the photograph being taken in a series to illustrate the sagacity of the horse and the skill of the rider in maintaining his poise.

There are pictures of German student officers apparently leaping from hill to hill; of fat majors and lieutenant colonels going through bogs and swamps and over hedges, riding the famous drag hunt of the German army. The official correspondence with the pictures consists of letters from the president to the secretary of war requesting him to secure legislation to secure a higher decree of skill in horsemanship. The report says: "These measures are essential to improvement of horsemanship in the army."

Another letter from the president to the chairman of the house committee on military affairs transmits a report from Major General Bell, chief of staff, the president saying: "The field officers of our army cannot be held exclusively responsible for the poor riding which has been frequently observed. The quality of our horses does not equal that of the mounts used by foreign armies. Furthermore, though all infantry captains in European armies are mounted an infantry officer of our service has little opportunity to practice riding until he becomes a field officer."

General Bell prefaces the report by quoting a note from the president referring to a "number of press comments, apparently inspired by the impression that such a test (riding ability) was something extraordinary and unheard of" and requesting him to state the requirements in foreign armies in this respect.

Speaking generally, the report shows that in Europe all mounted officers of every grade shall keep themselves and their mounts in a fit condition for instant war service. Most of them maintain schools where student officers are constantly under instruction in horsemanship.

A CAMPAIGN OF EDUCATION.

An excellent plan for advancing the breeding interests of the trotter has been advanced by one of the foremost breeders of Indiana. In particular he wishes to promote interest in the trotter in the Middle West. Just at the present time he is seeking the co-operation of other large breeders and the secretaries of the leading half-mile tracks in the section referred to.

The plan as outlined and, of course, subject to revision and modification, is to have several of the owners of big breeding establishments agree to race a stable of high-class trotters and pacers on the half-mile tracks of Indiana, Illinois, Ohio and Michigan. Just what tracks will, in a great measure, depend on the interest taken in the project by the various secretaries. First of all, the breeders are to agree to campaign a high-class, but not necessarily a large, stable of horses. Each stable is to have a free-for-all trotter and a free-for-all pacer and a good colt or two, and whatever other class horses they may elect. The drivers are to wear silk jackets of colors distinguishable by all the spectators in the grand stand, while all the grooms are to wear white jackets and, necessarily, the stable equipment is to be in-keeping.

The secretaries, assured of the support of the breeders, are to be asked to furnish purses for a free-for-all trot and a free-for-all pace and good premiums for the colts. It is argued that they can afford to do this, and will so realize when once the plan is fully explained to them. It is not the desire of the breeders that the secretaries curtail the profits of their racing associations, but they are confident that the secretaries, by doing their share, will be able to materially increase the earnings of the various associations with which they are connected.

With the plan outlined in a general way, as above, it is well to consider the reasons for such a campaign. The main one is to advertise the trotter to the farmer and induce him to add one or more good trotting bred mares to his breeding stock. There are hundreds of farmers who see the trotter in races but once a year, at a fair or race meeting held not far from their farms. It is seldom that they see contests save between second raters or else horses that have not yet been developed into national importance. The racing methods are oftentimes lax and his impressions of light harness racing are not what it would be were the contests between some of the best trotters and pacers in the land and conducted not only strictly according to rule, but with all the attention to detail that serves so well to make other sporting events of interest to the occasional spectator. There is no doubt but that racing between the

best trotters and pacers in the country and between colts sired by stallions of national reputation would be an incentive to the farmer to breed a colt capable of holding his own with the best in the land and with a chance to develop into a performer of free-for-all calibre.

There is no reason why every farmer should not have a few well-bred trotting mares on his farm. They would do the farm work much better than the kind of horses at present in use, the mares would benefit by being worked, the foals would be better because the mares were worked and a well-bred colt would be an annual source of revenue to the farmer. The campaign as outlined would be unexcelled as a means of impressing these facts on the farmer. The stallion owner would benefit because of the increased patronage that well-bred stallions would receive. The race track manager because such a meeting would be an attraction that would command the patronage of the whole community.

The owners of large breeding establishments could well afford to make a campaign over the half-mile tracks. To send a stable out on the Grand Circuit is an expensive proposition and the returns, because of the hot competition, are small. The owner would be able to run away from business a few days each week and enjoy the pleasures of seeing his horses perform, something that is now impossible because of the time consumed in long trips.

With horses of Grand Circuit calibre to draw crowds to the meetings, race track managers would find it a profitable investment to provide suitable purses for the free-for-all events. The mere fact that the stars were to race for big money would advertise the meetings and the interest would increase as the series progressed. By no other means would the secretaries be able to present such a magnificent and attractive program to their patrons.

The breeding interests and the sport would both benefit from a series of such meetings run on the highest plane and with noted horses competing. Conducted in a manner that would insure unexcelled contests and with all the attention to detail of a metropolitan meeting, the farmers would find light harness racing an unequaled source of recreation during or after a busy season of work and would awaken to the fact that the trotter and pacer furnishes not only pleasure but profit to those engaged in breeding and would soon understand that the trotter is the greatest horse for the farm, the show ring, the road, the speedway and the track that there is in the world.

The plan as outlined above is worthy of the best consideration and support of those interested in the light harness horse, both breeders and race track managers, as it will afford both a means of reaching the class of patrons that are essential to the welfare of the sport and the industry.—Western Horseman.

STAKE FOR STALLIONS.

For some unknown reason, says The Horseman, we have dropped the stallion stakes that were so popular a few years ago. When these stakes were offered for trotting stallions, we had the very best of these horses racing for the highest honors of the trotting turf. Stallions which won such stakes took a rank of great importance, and were ever after known as winners of such stakes. Since the time of Cresceus we have dropped this great stake, and owners of good stallions are deprived of the opportunity of showing their worth in a proper class.

An association would have little difficulty in giving a stallion stake for about \$2,000. The horses might be required to be entered on the graduated entrance scale, their entrance fee being regulated by their time mark. For example, horses with records below 2:08 might be charged an entrance fee of five per cent of the purse; 2:10 horse, four per cent; 2:12 to 2:10, three per cent; 2:15 to 2:12, two per cent; slower than 2:15, one per cent. At this rate there should be enough entries to pay about eighty per cent of the purse. If the stake was a \$10,000 affair, this would leave about \$2,000 for the association to pay, and the card would be well worth the money to an enterprising association.

Among the stallions which would be likely to be entered in such a stake are General Watts 2:06½; Kentucky Todd 2:08½; Athasham 2:09½; Tregantle 2:09½; Codero 2:09½; Sterling McKinney 2:09½; Mainsheet 2:05; King Entertainer 2:10½; Shady G. 2:10½; Judge Parker 2:10½; Exalted 2:07½; Guy Axworthy 2:08½; Coronado 2:09½; Guvallis Dircy 2:09 ¾. These, with a large number of green stallions in the country, would make a splendid list to draw from.

The association that will give a stake of this kind will find the prominence it would get in the trotting horse world would more than pay the cost of giving the stake.

Here is an opportunity for an association to get fame at a small cost.

Gen. Nelson A. Miles is one of the most enthusiastic of Boston's road drivers and heartily enjoys the sport on the snowpath. With the pacer Quadriga 2:08½, a fast young trotter by Bingen 2:06½, and others, he has a strong stable. The General also has a mare or two that he is breeding.

Any horse that starts in a race with hoppies must wear them all through the race. If he starts without them he must race the contest through without them.

RACING HERE AND IN THE EAST.

When a Pacific Coast horse owner sits down by his own fire-side and figures on taking his horse across the mountains, and winning a lot of races and a big bunch of money on the Grand and other circuits, let him reflect over the following facts:

It costs at least \$1,000 cash to ship to Chicago, pay car fares and get back home again. That's a thousand on the wrong side of the ledger to start with.

Now pick out a good, consistent race horse and figure his winnings on the Grand or the Great Western circuit. The pacer Angus Pointer 2:01½ started ten times on the Grand Circuit, including the Detroit and Lexington meetings. He won ten races and was second in the other. His total winnings were \$7730.

That great trotting mare Lillian R. 2:06¾ started nine times, winning eight firsts and was once second. Her total winnings were \$7595.

Angus Pointer and Lillian R. were the two most consistent winners that started with fast records and raced through the Grand Circuit, Angus Pointer's mark at the close of 1906 being 2:02¾ and Lillian R.'s 2:08¾.

The trotter that won the most races and the most money on the Great Western Circuit was Sterling McKinney 2:09¾. He was four times first and twice second, and was in all the slow classes where the big purses were. His winnings on that circuit were \$5375; and no other horse won as much.

The pacer Straight Advice 2:05½ started the year without a record. He contested in nine races on the Great Western, winning six, and being once third, once fourth and once unplaced. He won \$5000 all told.

The California owner who could take a trotter or pacer with a fast record east this year and have him do as well as Lillian R. or Angus Pointer did on the Grand Circuit last season, would doubtless think he had done pretty well, and the same would be true of the owner who took an unmarked trotter or pacer to the Great Western Circuit and win as often as Sterling McKinney or Straight Advice.

We had a pretty fair circuit out here on the Pacific Coast, last season, counting the California and North Pacific circuits as one. The largest winner of the fast record pacers was Sir John S., who started the season with a record of 2:10¼, made in 1906, and closed it with a mark of 2:04½. He won every race he started in—six in all—and had \$5750 to his credit at the close of the racing season.

The wonderful little mare Inferlotta was the champion of the green pacing class. She raced at every meeting from Salinas to Sacramento and then went south, winning at Fresno and walking over at other meetings later on. She won a little over \$5000, and was only beaten in her first two races, getting second money in both.

Among the trotters Carloklin and Berta Mac were the principal winners on the Pacific Coast Circuit. Carloklin had a record of 2:20¾, while Berta Mac was a green trotter when the season of 1907 opened. Both are by McKinney, and won over \$4,000 each during the season, Berta Mac having \$4,200 to her credit, and Carloklin pressing her very close for the honors of largest money winning trotter.

Now, let us see how the winnings of the horses mentioned above compare as to circuits:

Grand Circuit.

Lillian R. 2:08¾, trotter.....\$7,595
Angus Pointer 2:01¼, pacer..... 7,730

Great Western Circuit.

Sterling McKinney 2:09¾, trotter.....\$5,375
Straight Advice 2:05½, pacer..... 5,000

Pacific Coast Circuit.

Berta Mac 2:13¼, trotter.....\$4,200
Carloklin 2:13¼, trotter..... 4,100
Inferlotta 2:04½, pacer..... 5,200
Sir John S. 2:04½, pacer..... 5,750

It will be seen by the above figures that with a good Pacific Coast Circuit our home owned horses can have as great an earning capacity as the Great Western or any of the lesser circuits can provide. Of course, the Grand Circuit offers inducements to an owner who can take a Sonoma Girl or Sweet Marie across the mountains that no other racing circuit can approach, but the horse that wins over there must be a genuine crackerjack, or have nothing but good luck from the day he leaves home until he returns. It is a long and expensive trip by rail from California to the Mississippi River, and distance always lends enchantment to the view, unless the viewer has his eyes turned towards home and there is no money in his pocket.

The good pacing gelding J. J. J. 2:06¾, owned by John J. Jermyn of Scranton, Pa., fell on the street at Hornell, N. Y., recently and broke a leg, which necessitated his being destroyed. He was raced to his record last fall at Lexington, Ky., by W. L. Snow, in whose stable he was at the time of the accident.

Lon McDonald will do his winter training at Selma, Alabama. He will take with him a well bred two-year-old filly by John A. McKerron 2:04½, dam Anzella 2:06¾. This filly is owned by a Russian horseman, who leaves her with McDonald until after she has fulfilled her Futurity engagements.

THE EXTREME SPEED SIRE.

But eighteen stallions have sired as many as twenty 2:15 performers, and the list, with age of foaling and names of their sires, follows:

Name of Stallion—	2:15	2:10
McKinney (1887), by Alcyone	45	17
Gambetta Wilkes (1881), by Geo. Wilkes	36	16
Baron Wilkes (1882), by Geo. Wilkes	32	11
Simmons (1879), by Geo. Wilkes	32	4
Brown Hal (1879), by Tom Hal Jr.	31	11
Alcantara (1876), by Geo. Wilkes	31	6
Onward (1875), by Geo. Wilkes	29	11
Direct (1885), by Director	28	12
Wilton (1880), by Geo. Wilkes	26	9
Chimes (1884), by Electioneer	26	9
Ashland Wilkes (1882), by Red Wilkes ..	24	9
Allerton (1886), by Jay Bird	24	7
Bourbon Wilkes (1875), by Geo. Wilkes ..	24	5
Red Wilkes (1874), by Geo. Wilkes	24	3
Bobby Burns (1888), by Gen. Wilkes	21	7
Guy Wilkes (1878), by Geo. Wilkes	21	4
Anderson Wilkes (1884), by Onward	20	5
Prodigal (1886), by Pancoast	20	3

The above table makes a remarkable showing for the family of Geo. Wilkes. Nine of these eighteen sires are by Geo. Wilkes himself, and five others are his grandsons, leaving but four that are from other families. Of these one is by Electioneer, one is by the pacing bred horse Tom Hal Jr., one by Director and one by Pancoast. All but Brown Hal and Prodigal trace in the direct male line to Hambletonian 10, and Prodigal has several crosses of the blood of that great progenitor of trotting speed.

PALMER CLARK SAYS.

Scott McLane is shaping up Auto 2:07¾ to take a fall out of Bolivar 2:00¾ over the Chicago speedway. Bolivar has been added to the Chicago speed class for the purpose of cleaning up all comers. There are some in Chicapo that believe Bolivar is not invincible and who think Auto 2:07¾ can give him a convincing argument, consequently they have enlisted Scott McLane of this city into the cause. Scott is always one of those willing kind who has the utmost confidence in his horses. He is now putting the finishing touches on Auto before he makes his Chicago debut.

Auto was at pasture all summer, while Scott was away making good with his grand trotter Octoo 2:10¼, a brother of Auto. Scott called at my stable and asked me to "ride after a good horse," and when we struck smooth slipping Scott turned Auto loose and the speed he showed was a caution. A ride behind a fast horse is exhilarating and refreshing compared with a trip in one of those jug-jug wiggling mechanical wagons.

When Auto is ready no horse has more straight away speed than he has, for he is sound, clean, and willing, and to-day is free from excuses, and if Scott has as much patience as nerve, he will beat Bolivar.

The advent of these two speed marvels on the Chicago snow path will be awaited with interest, more especially as there are owners of other nags who believe they can beat them both.

The newspaper Futurities for foals of 1908 so far announced are remarkable for their extreme liberality. In the Horseman Stake, \$15,000 guaranteed, a one dollar bill on or before March 2d makes every mare owned by the nominator eligible. A \$5 payment November 2d on weanlings and a \$5 payment May 1st on yearlings are the only payments required before the year of the race, when \$150 must be paid by each starter.

The American Horse Breeder stake, \$10,000 guaranteed, is practically the same, with the exception that \$1 must be paid on every mare named. The Horse Review, \$12,500 guaranteed, closes March 10th, when every subscriber of the Horse Review can name every mare he owns free of charge. The weanlings and yearling payments are the same as in the other events, but only a \$100 payment is required from starters. It should also be added that the yearling payment on the Horseman stake includes a year's subscription to that journal.

For practically a little over \$30 a colt can thus be made eligible, by paying the additional starting fee, to nearly \$30,000 in stakes. With such liberal conditions, if the promoters get out with a whole skin, they will indeed be lucky.

Mr. J. N. Anderson of Salinas, who bred and still owns the Occident and Breeders Futurity winner of 1906, Della Derby 2:17, writes us that the mare Queen Mab, owned by Mr. E. P. Iverson of Salinas, foaled a bay filly January 7, 1908, by Highland C. 2:19¾. Mr. Anderson says: "This, I think, is the first of the crop of futurity candidates nominated in Pacific Breeders Futurity for foals of 1908. The filly is dark bay with near hind ankle white and small snip on nose. Queen Mab is by Nutwood Wilkes 2:16½, out of Nina B. Electioneer, next dame Gabilan Maid, a full sister to the great brood mare Lady Ellen by Carr's Mambrino. So you see this one is bred in the height of fashion." She certainly is, and the Electioneer-Wilkes cross is a double one in this instance, as both sire and dam are representatives of this line of breeding. Highland C. is now making a season at Watsonville, Henry Struve having leased him from W. H. Clark, Jr., and the prospects for a big season are excellent.

COOLING OUT.

After the youngster has been worked, jog briskly to the stable, unharness him, after putting on his halter and before crossstyng him, sponge out his mouth and give him a sup of water; throw a light cooler over him, then take off the boots, sponge off the legs and roll on the bandages if you are using bandages on the colt; they generally need them after they have advanced to the point where they can step a 2:40 gait or faster. Be sure not to have your cooling-out place where the colt will have to stand in a draft. Turn back the cooler and if you have brought out a light scrape go over the youngster with the scrapers, then rub out all the water, straighten the hair the right way and cover him up well and take him out for a walk. Watch his cooling out carefully so that he will not freeze up and dry out too quickly; after he has been walked about ten or fifteen minutes take him in and give him another light rub-out; if you find that he is not clothed warm enough make the change to a medium weight cooler instead of the light one. It is often a good thing to throw a light woolen hood over the loins, in addition to the cooler, as this is the place that a great many horses go wrong and get sore. Give him a few more swallows of water before you take him out for another drill. When his temperature becomes normal, and a good groom does not need a thermometer to tell when this period is reached, by simply placing his hand underneath the blankets at the flank he can tell in a twinkling whether he is cooled out or not. Give him a few bites of grass, if situated so that you can, before taking him to do him up. After brushing him out well, change the bandages, pick out his feet and wash them well. If the work has been unusually stiff or hard, it may be necessary to use a good body wash of some kind, and as there are so many different kinds and they are applied in so many different ways it will be a hard matter to give advice that will be satisfactory to all parties, but one of the best combinations for this purpose that we have ever used is composed of camphor, arnica and pure witch-hazel.

Take a couple of ounce of camphor gum and cut it with alcohol; add three ounces of tincture of arnica and put this into a gallon of witch-hazel. This lotion or liniment may be rubbed over the shoulders, forearms, loins, stifles and gaskins thoroughly. Put on the woolen steamers and pin them up securely, blanket him well and turn him loose in his box-stall to a good bunch of bright hay. The above liniment is a good leg wash as well as a good body wash. Don't let the feet get hard and dry, pack them with clay after his work before putting him away for the night.—Speed Bulletin.

A man who stands at the head of one of the largest horse-selling establishments in this country recently said that one of the noticeable effects of the introduction of automobiles had been to greatly increase the demand for speed in the fashionable carriage horse, remarks an exchange. "People get used to going fast in their touring cars," he said, "and when they come to buying coach horses they all want a bit of step—a good bit, I may say. Next to conformation, it's the first thing they look for. If a horse can't step away the dealer is wasting time to show him in most cases, for the customer won't buy. Showy action was the main thing only a few years ago, but 'get there' seems to be the watchword with everybody now. Of course, the best horse is, and always has been, the one that combines speed and action, but speed comes first." It is this demand for step or pace, that makes the trotting bred carriage and coach horse the best selling horse in this field. Horses of hackney breeding may be able to show more action, but when it comes to action combined with pace, the trotting bred carriage horse has no serious rival.

Zolock 2:05¼ will be one of the best patronized stallions in California this year. His colts all show so much speed that breeders looking for futurity winners are patronizing him extensively. After a season at San Bernardino he will be taken to Walla Walla, Washington, where a very large number of mares are already booked to this son of McKinney. His son Sherlock Holmes 2:06¼ gave Zolock a "rep" in the northern country last summer that made the breeders up there want more of them.

The Horseman says that Ed Bither has big hopes of doing great things on the Grand Circuit this year with Mack Mack 2:08. Bither found there was more in the horse than had been got out of him, and as he was a little peculiar it took him some time to learn what the horse needed. Having found this out, Bither thinks he has nothing more to do now than carry the horse to the limit of his speed, which he figures is nearer two minutes than 2:08.

D. A. Messner of Oxford, Ind., the breeder of Dan Patch 1:55, has sold to J. W. Nutt of Wichita Falls, Texas, Zelica Morgan, by Respond, out of the dam of Dan Patch, and Jim Klatawah, by Klatawah, out of Zelica Morgan, for \$1,500.

Two ice meetings of considerable importance will be given at Montreal this winter, one January 21st to 25th, the other February 13th to 15th. Good purses will be offered, and the best of the Canadian ice horses are expected to compete.

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

SNIPES SHOOTING IN CEYLON.

Though the large game of Ceylon has greatly decreased in numbers, the island is still quite a paradise for the snipe shooter. The climate is certainly trying, and a day after snipe in the damp, hot-house heat of the low country is the very hardest of work. The nearest approach to these conditions that one meets with in Upper India is when shooting a jheel early in September, for then the sun has lost little, if any of its hot-weather power, and the whole earth is steaming from the effects of the recent monsoon. Later, when the Indian cold weather has set in, snipe are shot under quite pleasant conditions. This is never the case in the Island Colony, where there is no cold weather, and the shooter's eyes are always blurred with perspiration and his body tingling with prickly heat. I spent three months in Ceylon in 1900, and for most of that time was at Trincomali, whence I made two ten-day trips to Lake Kantalai. There I put up in the dilapidated old rest-bungalow, the same one in which Sir Samuel Baker, in *The Rifle and Hound in Ceylon*, mentions his brother having had a narrow escape from a snake. This snake incident was forcibly brought back to my memory by an unpleasant adventure which I met with myself on the snipe ground below the lake.

The weather being very hot and steamy, I was foolishly shooting in loose cotton shorts, not reaching to the knee, while I wore socks and tennis shoes, so that my legs were bare. I had two snipe down in a patch of very green grass about a foot and a half high, so walked in to look for the birds, parting the grass with my gun barrels in the search. While thus engaged I felt a drag around one leg, which I took at first to be a creeper. Glancing down, I saw, to my horror, the loop of a dark-colored snake's body round my bare leg! Instinctively I jumped into the air, and the snake fell off and instantly vanished among the thick grass. After a bit, when I had recovered my nerve, I walked again, with great precaution, into the grass, and made a strict search for the two snipe. I found one only, though two had dropped close together in the patch. Subsequently I came to the conclusion that one of my snipe was not quite dead and that the snake had seized it and was carrying it off when he got a turn round my leg. This is pure conjecture, however, for I never saw the reptile's head. What kind it was, I do not know, but in the instantaneous glance I had of the body I thought the coloring remarkably like that of a cobra.

The paddy fields below the lake, from which they were irrigated by an overflow stream, held a lot of snipe. While at Kantalai I spent most of my time in hunting for other game—spotted deer, green pigeons, etc.—so that only three days were devoted to snipe. My bags were then sixteen, eleven and a half, and seven and a half couple. I was, however, constantly coming across snipe when not specially looking for them, and used to pick up two or three couple in odd corners every day. One portion of the paddy fields was much disturbed by natives working, and the snipe used to leave the open and lie just inside the heavy forest which bordered the cultivation. A native walking inside the jungle readily put these birds up, and they generally came out high over the tops of the trees. Snipe coming overhead are by no means as hard to hit as one would expect, as they fly straight and do not twist.

There is a little lake in the heart of the jungle about a mile and a half from Kantalai, where I found snipe sitting on the bare mud in the shade of low, spreading trees which grew beside the water. The branches of these trees were only about a couple of feet above the mud, and the snipe when disturbed used to shoot out from under them like rockets. The problem was to stop the birds before they got out over deep water, for the lake was full of crocodiles, so that it was only safe to walk a short way in.

In Ceylon are numerous grass tanks, as they are called. These consist of a sea of very high grass growing in a very little water. One day near Nalaville, some miles north of Trincomali, I was skirting one of these grass tanks looking for snipe, armed only with a shot-gun and No. 8 cartridges. Suddenly within a hundred yards of me the huge head of a buffalo bull was raised above the grass, and the animal with the nose stuck straight out and his horns aid flat on his neck, looked so ill-tempered and menacing that I made a hasty retreat to a more distant part of the tank. I had often heard of this buffalo before, and had been told that he and a solitary elephant were generally seen together. The elephant, however, I never came across, though his fresh tracks were in all directions.

At Tamlegam, between Kantalai and Trincomali, there is a celebrated snipe ground, where very heavy bags are constantly made. I paid a visit to this place, but found the walking so heavy and trying in the hot sun that I gave up after shooting seven couple. I do not remember ever having met such damp and sticky ground as that day in the Tamlegam paddy fields. I went in to the knees

at every step, and it was the greatest exertion to pull my feet out of the tenacious slime.

There is a pretty little lake at Periyakulam, seven and a half miles from Trincomali, and round its edges I used always to get a few snipe, but the extent of the ground is small. A brother officer went to Periyakulam one morning, and found, to his disgust, an elephant standing in the middle of the snipe ground. From a safe distance he saluted the intruder with a charge of No. 8, and the elephant stalked away into the jungle. The big beast had, however, effectually scared away all the snipe, and not one was to be found.

All the Ceylon tanks are full of fish, and during the heat of the day, when shooting was out of the question, I used to fish for olive carp (*Barbus chrysopoma*) with a roach rod and bread paste. The fish were plentiful and ran from half a pound to one and one-half pounds, giving fair sport on the fine tackle I used. Murral (*ophiocephalus*) too swarm everywhere, and take a small live bait freely. In fact, the sportsman who makes a trip to any of the Ceylon lakes should always make a point of taking a rod. All the fish, too, are eatable, the Indian gudgeon especially (*Gobius giuriss*), being really excellent. These last take a worm or very small live bait freely, and I have caught them up to one and a half pounds in weight.—The Asian.

TOO MANY COUGARS.

Deer hunters are advocating a vigorous campaign against mountain lions, which beasts are pests in some portions of the State. There is a bounty of \$20 a head offered by the Board of Fish Commissioners, and it is believed that this should be a strong inducement to decrease the animals.

It is the opinion that the lions do more harm to the deer supply than all the hunters, for the latter pay some attention to closed season and pass by the does and fawns, while the lions work all the time and not only play havoc with the larger game, but take their fill upon the smaller birds and animals pursued by sportsmen as well.

It is said by hunters of wide experience and keen powers and opportunities unusual of observation, that, while game in general is on the decline, the lions are increasing. This is in spite of the fact that every hunter kills a lion at sight and never misses a chance to help exterminate the supply. These big cats are skulkers of the most crafty type, however, and it is no small job to clean them out in any locality where they have obtained a foothold.

Hunting, hounding with a pack of "varmint" dogs, trapping and poisoning are the methods generally resorted to by stockmen to keep the lion crop down. They are vitally interested from a business standpoint, for the lions get away with many a lamb and calf, to say nothing of full-grown sheep and other stocks on occasion. They are fond of shoats and poultry.

Mountain lions are worst in the timber as a rule, but the well-brushed foothills are also a favorite place for these marauders. Although large and powerful animals, lions are very easily killed. They lack the traditional nine lives of the cat tribe. A 22-caliber Winchester special bullet rightly placed has killed many a lion and a shotgun at fairly close quarters is deadliest of all.

Coyotes and wildcats also do great mischief to the game supply. From one section in the Sacramento valley it is reported hunters have found this year more than fifty deer, evidently the pray of mountain lions. In the same country it is doubtful if the hunters got as many.

Wildcats kill a great many fawns. Hounding deer has many drawbacks, but it has the advantage that in a country where hounds are running much the vermin are kept busy getting out of the way. Oregon has a law that makes it a misdemeanor to shoot a deer ahead of hounds, but also forbids the killing of the hounds that are running the deer. It is said the hounds rarely run a deer down of themselves and their chasing it thus is argued a protective measure for the deer, for no coyote or cougar is likely to bother the animals much when dogs are scouring the country.

Some hint of what may be accomplished by exterminating vermin and carefully protecting game comes with statistics recently compiled in Austria. Every kill is recorded and the game record for Lower Austria last year includes 3739 red deer, 22,654 roebuck, 358,000 hares, 64,000 pheasants, and 302,000 partridges. Bohemia did even better; 642,000 hares and 1,222,000 partridges were reported; more than two million partridges were killed in the monarchy. Wild game of larger size was plentiful also, 21 bears, 58 wolves, 34 lynx, 143 wildcats, 645 eagles and 1145 otters. More than 40,000 foxes were killed.

Quail are reported to be very plentiful in the vicinity of Oroville. The recent rains have stripped the brush of leaves; all that is necessary is a heavy frost to make ideal quail shooting conditions.

QUAIL IN NEW ZEALAND.

The proposed importation of Australian and Chinese quail into New Zealand is by no means a new scheme so far as the introduction of quail into the colony is concerned.

There existed until comparatively recent years a New Zealand quail, which at one time flourished in considerable numbers, but that species is now extinct. In Buller's "Mammals of the Birds of New Zealand," published in 1882, the writer states, that the New Zealand quail, the only indigenous representative of the colony of the order gallinae, was then on the verge of extinction. In the early days, he adds, the bird was excessively abundant in all of the open country, and especially on the grass-covered downs of the South Island. The first settlers who carried with them from the Old Country their traditional love of sport, enjoyed some excellent quail shooting for several years, and in 1848 two sportsmen shot as many as 43 brace in the course of a single day, within a few miles of what is now the town of Nelson, and it is recorded that in the early days, on the plains near Selwyn, a bag of twenty brace was not looked upon as extraordinary sport for a day's shooting. Partly owing to the introduction of dogs, cats, and rats, and partly to the prevalence of the bush and grass fires, the native quail rapidly disappeared.

Then was begun the importation of Californian quail, a larger and more vigorous bird than the New Zealand species, and able to fly much better. That bird has made a good fight against its many enemies, and up to the present time exists in considerable numbers in different localities in New Zealand. The Australian quail, which it is now proposed to introduce, is very much like the New Zealand quail, and is very abundant in Tasmania, South Australia, and New South Wales. Open, grassy plains, extensive grass flats, and the parts of the country under cultivation are situations favorable to the habits of the bird. "In its economy and mode of life," states an Australian authority, "it so closely resembles the quail of Europe that a description of the one is equally descriptive of the other." The bird possesses considerable powers of flight, and can therefore escape from the earth enemies. The New Zealand quail, on the other hand, was a poor flyer, and fell an easy prey to stoats and weasels, and other pests. The chief food of the Australian quail is stated to be grain, seeds, and insects, and owing to its partiality for cut corn fields it is also known by the name of "stubble quail." The Chinese quail also resemble very closely both the Australian quail and the extinct New Zealand species. It is a bird full of vitality, and can exist under most trying conditions. Extensive shipments of live Chinese quail are regularly made from China to Sydney, where the birds are sold for food purposes. They are crowded together in crates, and many of them find it difficult to procure the food supplied to them, but, notwithstanding these prejudicial conditions, the percentage of deaths is comparatively small.

Before sanctioning the proposed importation, the Minister of Agriculture is inviting the opinion of the farming community on the desirability of importing the species referred to, as he has been informed that quail consume the young grass, and are somewhat of a farmer's foe.

Dr. Moorhouse, President of the Canterbury Acclimatization Society, who was consulted by a "Referee" reporter relative to this fear, stated that quail did no more harm than partridges, which were imported into and encouraged in the colony. "There is no question," the doctor added, "that quail pick up a certain amount of grain, but they do not eat standing grain to any extent. They feed on stubble and so on, and they certainly do eat a certain amount of young grass, but nothing like enough to make any difference to the farmer. There is not the slightest chance of their being a pest, but even if they did become too numerous they are easily shot down, and their numbers could be reduced without difficulty. In the course of further conversation, Dr. Moorhouse stated that the Californian quail still held their own in some parts of the colony. The Australian and the Chinese quail were very good flyers, and consequently would stand a good chance of existing. The Australian quail were already acclimatized in the North Island, and doing fairly well up there. Reference was made to the fact that the Californian quail, at one time very numerous in Nelson, had almost died out, and the doctor stated that there were several causes combining to account for that. There was the extensive inbreeding which destroyed the vitality of the birds, and they were also subjected to the ravages of the hawk, which had become practically a carrion bird of late years. The Californian quail, Dr. Moorhouse explained, was still found in considerable numbers in localised spots in the colony, and there were a fair number of them to be found on the Port Hills, in the sand hills round about Christchurch, and in the river beds in the province. Dr. Moorhouse heartily approves of the project to import the Australian and Chinese quail, and is firmly of opinion that they will not prove troublesome to the farmer. His only doubt is as to whether they will manage to exist or not.

Mr. D. Macfarlane, president of the Canterbury A. and P. Association, also approved of the proposed importations, and he did not think that the farming community would object to them. The quail had not proved a nuisance in Australia, and there was no reason to fear that they would prove troublesome here. He thought, how-

ever, there was very little hope of the Australian or Chinese quail multiplying in New Zealand, owing to the number of enemies they would have to contend with, but if they were brought here they should be turned out in localities where they would be given a reasonable chance to exist.

The Curator of the Christchurch Museum, Mr. Waite, who is an authority on Australian birds, very much doubts whether the Australian quail or the Chinese quail for that matter would be able to exist here if introduced, seeing that the New Zealand species was exterminated by causes which still exist. The Australian quail very possibly nibbled off the young heads of grass, but they would never become a pest, and quail were not in any country regarded as harmful.—Weekly Express.

Open dogs—1 Mallwyd Beau, 2 F. P. Butler's Tiverton. Winners dogs—1 Mallwyd Beau, res Tiverton. Puppy bitches—1 F. W. Motlow's Kate. Novice bitches—1 A. Edwards' Lady Jane. Limit bitches—1 Mark Manning's Lady Dorrie M., absent Huron Rock's Ch. Sue Gladstone. Winners bitches—1 Lady Dorrie M., res Lady Jane.

Gordon Setters. Open and winners dogs—1 A. L. Stuart's Ch. Doc Watson. Limit bitches—1 G. Creyk's Nellie C. Open bitches—1 H. B. Knox's Sis. Winners bitches—1 Sis, res Nellie C.

Irish Setters. Novice dogs—1 Dr. R. B. Corcoran's Tipperary. Limit dogs—1 R. H. Groves' Phil Law, 2 George S. Lillie's Reddy. Open dogs—1 Reddy. Winners dogs—1 Phil Law, res Reddy. Limit and winners bitches—1 R. H. Groves' St. Lambert Phyllis.

Field Trial Class. Absent Ed Weisbaum's Rex Rodfield.

Irish Water Spaniels. Open and winners dogs—1 Frisco Kennels' (Wm. Bay) Our Chance Jr. Open and winners bitches—1 Frisco Kennels' Frisco Dot.

Field Spaniels. Limit dogs and bitches—1 A. Balfour's Inchkeith Billy, absent A. L. Stuart's Judge Casey. Open and winners dogs and bitches—1 Inchkeith Billy.

Cocker Spaniels. Puppy dogs, black—1 D. P. Cresswell's Sir Saxon. Novice dogs, black—1 Mr. Birch's Chub. Limit dogs, black—1 Ben Razor's Razor's Runt. Open dogs, black—1 Miss A. Wolfen's Ch. Searchlight. Winners dogs—1 Ch. Searchlight, res Sir Saxon. Limit dogs, any color except black—Miss Kempf's Commodore Carrots, absent Ch. Redlight. Open dogs, parti-colored—1 Alex Wolfen's Ch. Gypsy Chief. Winners dogs, other than black—1 Ch. Gypsy Chief, res Commodore Carrots. Puppy bitches, black—1 D. P. Cresswell's Lady Saxon, 2 Geo. A. Neiborger's Creole Sue. Novice bitches, black—1 Creole Sue. Limit bitches, black—1 Geo. A. Neiborger's Creole Belle. Open bitches, black—1 A. L. Cresswell's Cressella Nancy, 2 Geo. A. Neiborger's Cricket. Winners bitches, black—1 Cressella Nancy, res Cricket. Limit bitches, any solid color except black—1 A. E. Williams' Cleo. Open bitches, any solid color except black—1 Geo. A. Neiborger's Patience, 2 Kingsley M. Stevens' Brownland Babbie, absent L. M. Whipples' Poinsetta. Winners bitches, any solid color except black—1 Patience, res Brownland Babbie.

Dachshundes. Novice dogs—1 Mrs. W. W. Burnett's Largo. Limit dogs—1 Largo. Open dogs—1 Mrs. Phil M. Wand's Ch. Dougie, 2 Largo. Winners dogs—1 Ch. Dougie, res Largo. Open and winners bitches—1 Mrs. Phil M. Wand's Nordica.

Collies. Puppy dogs—1 Wm. Ellery's Valverde Watch, 2 D. H. Bibb's Tamal King. Junior dogs—1 Valverde Watch. Novice dogs—1 Miss Viola Blesser's Dodge, 2 J. D. Calder's Scott I. Limit dogs—1 Robert Wallace's Dictator, 2 Wm. Ellery's Valverde Veto, 3 Mrs. L. W. Seeley's Old Hall Sandy. Open dogs, bred by exhibitor—1 Valverde Veto, 2 H. McCracken's Presidio Hero. Open dogs, bred in the United States—1 Valverde Veto, 2 Old Hall Sandy. Open dogs, tri-color—1 Dictator, absent Wm. Ellery's Wishaw Leader. Veteran dogs, over five years—1 Old Hall Sandy. Open dogs, and color—1 Dictator, 2 Valverde Veto, 3 Old Hall Sandy. Winners dogs—1 Dictator, res Valverde Watch. Puppy bitches—1 Mrs. M. H. Warren's Easter Queen. Junior bitches, over 6 and under 18 months, bred in the United States—1 S. Ducas' Ormskirk Queen. Novice bitches—1 Easter Queen. Limit bitches—1 Wm. Ellery's Valverde Venus, 2 Easter Queen. Open bitches, bred by exhibitor—1 Valverde Venus. Open bitches, bred in the United States—1 Valverde Venus, 2 H. McCracken's Presidio Paleface. Open bitches, any color—1 Valverde Venus. Winners

bitches—1 Valverde Venus, res Presidio Paleface.

Curly Poodles. Novice dogs and bitches—1 Thos. B. Eastland's Sunday B. Limit dogs and bitches—1 E. Tripod's Black. Open and winners dogs and bitches—1 Black, 2 Sunday B.

Dalmatians. Limit, open and winners dogs and bitches—1 Arroyo Kennels' Arroyo Coquette.

Bulldogs. Puppy dogs—1 Mrs. A. Cellier's Margo's Mowgli. Limit dogs—1 Dr. J. Auburn Wiborn's Walsingham Roy, 2 Bernon Ogden's Judge, 3 L. S. Greenbaum's Bull Durham, absent Chas. T. Crocker's Tam O'Shanter. Open dogs, bred in the United States—1 Walsingham Roy, 2 Judge, 3 Bull Durham, absent Tam O'Shanter. Open dogs—1 Walsingham Roy, 2 Arroyo Kennels' Endcliffe Baron, 3 Bull Durham, absent Tam O'Shanter. Winners dogs—Walsingham Roy res Endcliffe Baron. Novice bitches—1 Dr. T. Martin Smith's Freedom, absent Frank V. Grey's Leone Lilly. Limit bitches—1 A. H. Hayes' Saint Queenie, 2 Freedom. Open bitches bred in the United States—1 Freedom. Open and winners bitches—1 Saint Queenie res Freedom.

Airdale Terriers. Novice dogs—1 Mrs. Henry Fischer's Bosco. Limit dogs—1 Nat. T. Messer's Motor Dace, 2—Nat. T. Messer's Sandy Monk, 3 Bosco. Open dogs—1 Motor Dace. Winners dogs—1 Motor Dace res Sandy Monk.

Bull Terriers. Puppy dogs—1 Miss Louise Easton's Wonderland Jim Woods, 2 C. McShane's Wildwood Wizard. Novice dogs—1 Wildwood Wizard. Limit dogs, over 30 lbs.—1 E. P. Shortall's Silkwood Ben Ali, 2 Mrs. Horton F. Phipps' Brooklyn Patsy, 3 John Cawkwell's Silkwood Surprise, absent G. Ward's Silkwood Gem. Open dogs, over 30 pounds—1 Silkwood Ben Ali, 2 Robt. Richard's Stiletto Tarquin, 3 Silkwood Surprise, withdrawn Brooklyn Patsy. Open dogs, Coast bred—1 Wildwood Wizard. Winners dogs—1 Silkwood Ben Ali, res Wonderland Jim Woods. Novice bitches—1 Mrs. Geo. Flexnor's Queen Bess. Limit bitches, not exceeding 30 pounds—1 Robt. A. Roos' Hartford Ted. Limit bitches, not exceeding 30 pounds—1 Mrs. Frank Morris' Venoma Belle. Open bitches, not exceeding 30 pounds—1 Hartford Ted. Open bitches, exceeding 30 pounds—1 C. B. Gill's Silkwood Brassie, 2 Mrs. Geo. Flexnor's Lady Hazel, 3 J. Sparrow's Ch. Edgewood Jean II. Open bitches, Coast bred—1 Hartford Ted. Winners bitches—1 Silkwood Brassy res Lady Hazel.

French Bulldogs. Puppy dogs—Dr. G. A. Collins' Brackenside Count Desjardin. Novice dogs—1 Brackenside Count Desjardin. Open dogs—1 Mrs. H. N. Cook's Ch. General De La Mare, 2 C. G. Cook and S. Postley's Loulou. Winners dogs—1 Ch. General De La Mare, res Loulou. Novice bitches—1 Dr. J. Auburn Wiborn's D'Anglemont Fleurette, absent Tosca D'Alfort. Open bitches—1 D'Anglemont Fleurette, absent Tosca D'Alfort. Winners bitches—1 D'Anglemont Fleurette.

Boston Terriers. Novice dogs—1 Miss Genevieve L. Harvey's Houdini, 2 D. S. Steele's Spot Steele, 3 V. Whitney's Johnnie. Limit dogs, 12 and under 17 pounds—1 A. H. Hayes' Ranier Dick. Limit dogs, 17 and under 22 pounds—1 Miss Jennie A. Crocker's Frisco Cinders, 2 Spot Steels. Limit dogs, 22 and under 28 pounds—1 Arroyo Kennels' Arroyo Autocrat, 2 Houdini, 3 Johnnie. Open dogs, 12 and under 17 pounds—1 Ranier Dick. Open dogs—17 and under 20 pounds—1 Miss Jennie A. Crocker's Ch. Dick Dazzler, 2 Frisco Cinders, 3 Spot Steele. Open dogs, 22 and under 28 pounds—1 Arroyo Autocrat, 2 Houdini, 3 Johnnie. Winning dogs—1 Ch. Dick Dazzler res Frisco Cinders. Novice bitches—1 Dr. T. Martin Smith's Eldora Necco, 2 Arroyo Kennels' Arroyo Affiliate, 3 Miss Jennie A. Crocker's Wonderland Venus, res Miss Jennie A. Crocker's Little Mother, v.h.c. Mrs. Ella F. Morgan's Vixen III, v.h.c. P. L. Harley's Moxie M., h.c. Arroyo Kennels' Arroyo Alternate, c W. C. Adams' Girl. Limit bitches—1 Arroyo Affiliate, 2 Arroyo Alternate, absent El Mundo Kennels' Dolly Varden. Limit bitches, 17 and under 22 pounds—1 Miss Jennie A. Crocker's Clancy III, 2 Eldora Necco, 3 Wonderland Venus, res Moxie M. Limit bitches, 22 and under 28 pounds—1 Little Mother. Open bitches, 17 and under 22 pounds—1 Miss Jennie A. Crocker's Ch. Endcliffe Tortora, 2 Clancy III, 3 Wonderland Venus. Open bitches, 22 and under 28 pounds—1 Little Mother. Winners bitches—1 Ch. Endcliffe Tortora, res Clancy III.

Fox Terriers. (Smooth coated.) Puppy dogs—1 W. W. Stettheimer's Tallac Smasher. Novice dogs—1 Tallac Smasher, 2 W. W. Stettheimer's Tallac Brush. Limit dogs—1 Irving C. Ackerman's Sabine Rasper, 2 W. W. Stettheimer's Tallac Marlin, 3 W. W. Stettheimer's Tallac Casino, absent Tallac Oxford. Open dogs bred in the United States—1 Sabine Rasper. Open dogs—1 Sabine Rasper, 2 W. W. Stettheimer's Wander Resist. Winner dogs—1 Sabine Rasper res Tallac Marlin. Puppy bitches—1 W. W. Stettheimer's Tallac Echo. Novice bitches—1 W. W. Stettheimer's Tallac Orchid, 2 W. W. Stettheimer's Tallac Lakebreeze. Limit bitches—1 W. W. Stettheimer's Tallac Sunbeam, 2 W. W. Stettheimer's Tallac Sprite. Open bitches—1 W. W. Stettheimer's Tallac Seabreeze, 2 W. W. Stettheimer's Tallac Dusky Lassie. Winners bitches—1 Tallac Sunbeam, res Tallac Seabreeze.

Fox Terriers. (Wire haired.) Limit dogs—1 Irving C. Ackerman's Humberstone Penance, 2 J. Oliver's Humberstone Jack. Open dogs bred in the United States—1 Humberstone Penance. Open dogs—1 Humberstone Penance, 2 Humberstone Jack. Winners dogs—1 Humberstone Penance, res Humberstone Jack. Novice bitches—1 J. Oliver's Humberstone

Nellie. Open bitches—1 Irving C. Ackerman's Ch. Endcliffe Precise. Winners bitches—1 Ch. Endcliffe Precise res Humberstone Nellie.

Pomeranians. Limit dogs and bitches over 8 pounds—1 Miss Frances M. Reid's Baby, 2 Miss Francis M. Reid's Rollo. Open dogs and bitches over 8 pounds—absent Miss G. Sonnenfeld's Humberstone Masher. Open dogs and bitches over 8 pounds—1 Baby, 2 Rollo. Winners dogs and bitches—1 Baby res Rollo.

Yorkshire Terriers. Open dogs and bitches—1 Mrs. F. A. Woodworth's Cahoot.

Pekinese Spaniels. Limit dogs and bitches—1 Miss Margaret Barron's Little Pao Ki. Open dogs and bitches—1 Miss Margaret Barron's Shi Li.

Japanese Spaniels. Open dogs and bitches—absent Robison Bros' Yeddo.

Toy Poodles. Open dogs and bitches—1 Mrs. Chas. Patton's Jeanette, absent Robison Bros' Cresta Blanca.

Toy Terriers. Limit, open and winners dogs and bitches—1 Robison Bros' Tutsillife.

Italian Greyhounds. Open dogs and bitches—1 Cummings and Deane's Ch. Dude, 2 Cummings and Deane's Ch. Duke II.

Special Awards.

Cup for best in the show—Miss Jennie A. Crocker's Boston Terrier Ch. Endcliffe Tortora, reserve, I. C. Ackerman's smooth Fox Terrier Humberstone Penance.

Club cup for best American Foxhound—Hon. Carroll Cook's Ch. Ned.

Club cup for best Pointer—A. Balfour's Senator's Jack. Club trophy for best of opposite sex—H. B. Townsend's Walla Walla Rush.

G. W. Ellery cup for best English Setter—V. Kuehn's Mallwyd Beau. Club cup for best of opposite sex—M. Manning's Lady Dorrie M.

Club cup for best Gordon Setter—A. L. Stuart's Ch. Doc Watson. Club cup for best of opposite sex—H. B. Knox's Sis.

Club cup for best Irish Setter—R. H. Grove's St. Lambert Phyllis. Club cup for best of opposite sex—R. H. Grove's Phil Law.

Club cup for best Irish Water Spaniel—Frisco Kennels' Frisco Dot.

Club cup for best Field Spaniel—A. Balfour's Inchkeith Billy.

Cup for best Cocker Spaniel—Miss A. Wolfen's Ch. Searchlight. Club cup for best of opposite sex—A. L. Cresswell's Cressella Nancy. Club cup for best of opposite color to winner—Geo. A. Neiborger's Patience. Club cup for best puppy—D. P. Cresswell's Sir Saxon. California Crocker Club medals for best dog—Ch. Searchlight; best bitch, Cressella Nancy.

Club cup for best Dachshunde—Mrs. Phil. M. Wand's Ch. Dougie.

Nathan, Dohrmann & Co. trophy for best Collie—R. Wallace's Dictator. Club trophy for best of opposite sex—Wm. Ellery's Valverde Venus.

Club cup for best Curly Poodle—E. Tripod's Black.

S. F. Kennel Club cup for best Bulldog—Dr. J. Auburn Wiborn's Walsingham Roy. Miss Jennie A. Crocker cup for best of opposite sex—A. H. Hayes' Saint Queenie. Cup for best puppy—Mrs. A. Cellier's Margo's Mowgli.

Club cup for best Airedale—Nat. T. Messer's Motor Dace.

Irving C. Ackerman cup for best Bull Terrier—E. P. Shortall's Silkwood Ben Ali. Robison Bros' trophy for best of opposite sex—C. B. Gill's Silkwood Brassie. Club cup for best novice—Mrs. Geo. Flexnor's Queen Bess.

Club cup for best French Bulldog—Mrs. H. N. Cook's Ch. General De La Mare.

Chas. K. Harley cup for best Boston Terrier—Miss Jennie A. Crocker's Ch. Endcliffe Tortora. Cup for best of opposite sex—Miss Jennie A. Crocker's Ch. Dick Dazzler. W. W. Stettheimer cup for best in novice class—Dr. T. M. Smith's Eldora Necco.

Chas. K. Harley cup for best smooth Fox Terrier—Irving C. Ackerman's Sabine Rasper. Club cup for best of opposite sex—W. W. Stettheimer's Tallac Sunbeam. American Fox Terrier Club cup for best smooth American or Canadian bred—Sabine Rasper Cup for best American or Canadian bred novice dog—W. W. Stettheimer's Tallac Smasher. Cup for best American or Canadian bred novice bitch—Tallac Orchid.

Club prize for best wire-haired Fox Terrier—I. C. Ackerman's Humberstone Penance. Club cup for best of opposite sex—1 I. C. Ackerman's Ch. Endcliffe Precise.

Club cup for best Pomeranian—Miss F. M. Reid's Baby.

Club cup for best Yorkshire—Mrs. F. A. Woodworth's Cahoot.

Club cup for best Pekinese Spaniel—Miss Margaret Barron's Shi Li.

Club cup for best Toy Terrier—Robison Bros' Tutsillife.

Club cup for best Italian Greyhound—Cummings and Deane's Ch. Dude.

Review.

The initial bench show of the Del Monte Kennel Club, held Saturday, January 4th, was, taking in consideration the time of the year and other conditions, a very successful affair. In fact, indications for well patronized bench shows at Del Monte in the future were so promising that announcement has been made that another show will be held next August.

It would be difficult to find, on the Pacific Coast, a more pleasing and suitable place to hold a one-day bench show. The Del Monte Hotel and its palatial accommodations are too well known for extended description here. As an outing trip this affords an opportunity not equalled anywhere. Special hotel rates and railroad fares induced a large attendance of the fancy from San Francisco and other points. The show was also well patronized by society people, a number of our society leaders were exhibitors and took an active interest in the success of the show.

The judging was first started in the large stable, a change was quickly made to the lawn in front where two rings were arranged. After luncheon the balance of the classes were judged in rings on the grassy lawn of the golf links. In other words, there was just so much more interest and a greater attendance than had been anticipated and arranged for. Weather conditions were pleasant and agreeable to spectators and exhibitors and comfortable for the dogs.

The total number of dogs shown was 156 (16 absentes). The total class entries were 252. The large breeds were not in evidence, this being the first Coast show in many years where we have noticed the absence of St. Bernards, Great Danes, Mastiffs, Greyhounds, etc. What was lacking in numbers was more than made up in quality, for on general average this show will compare favorably with any of our previous shows. The judging was by home talent and, in general, was satisfactory.

Mr. W. E. Chute's classes were:

American Foxhounds, six entered, a better lot than usually seen. Ch. Ned in for specials only, won over Judge, Dante first puppies is a very workmanlike youngster that will improve.

Pointers, four shown, Walla Walla Rush the best. Senator's Jack (son of Ch. Senator P.), is a bit too light. Mike Geary has the body and legs but is lacking in head finish. A Doc Daniels' bitch Doc's Fan is a stylish acting, seven months old one that should prove a good worker to the gun.

English Setters, nine entered. Mallwyd Beau, a well-finished young dog went over Tiverton, who showed the wear and tear of upland work this season. Beau is a dog that will go at any show. Three puppies were excellent. In bitches Lady Dorrie M., a litter sister of Beau, won out easily, and is a classy young bitch. Ch. Sue Gladstone was absent.

Gordon Setters, three in number, were old familiars and not overly good.

Irish Setters, five shown, were of good averaging quality. St. Lambert Phyllis, a new comer to the Coast, won out for best shown; she is an even, well-finished bitch.

Cocker Spaniels, sixteen entered, were a strong entry. Ch. Searchlight, put down in good fettle, won out for best in blacks. Sir Saxon, first puppies and reserve winners, is one of the best looking youngsters benched for some time. In bitches Cressella Nancy and Cricket came together again, Nancy winning the tri-color and special. Lady Saxon, litter sister of Sir Saxon, is also a most promising puppy. Creole Sue, second puppies and first novice blacks, a six-months-old Ch. Lucky puppy, is good for her age and will improve. In parti-colors Ch. Gypsy Chief was alone. In reds Ch. Redlight was absent, leaving the way clear for Patience to win special for best, also first winners over Brownland Babbie, reversing the Stockton placing.

Dachshundes, three good ones shown, the old familiars Ch. Dougie and Nordica taking the principal honors. Largo, a son of Ch. Venlo Rorever, bears the hall mark of his good sire.

Collies, thirteen entered, were an excellent all-round showing. Dictator won over Valverde Watch just on a margin of coat, Wishaw Leader being absent. Old Hall Sandy was put down in better condition than we ever saw him before. In bitches, Valverde Venus had a walkover.

Bulldogs, ten entered, introduced three new ones—Walsingham Roy, Saint Queenie and Freedom. Roy, a grey brindle, annexed the special and firsts for dogs. He is a well balanced dog with a pleasing head and front, good spring of ribs and loins that are properly tucked. Endcliffe Baron, Judge, Bull Durham and Margo's Mowgli are familiar benchers. In bitches the race was between Saint Queenie and Freedom, both good looking red brindles, the latter is too low stationed in front. Queenie won out on body and legs.

Fox Terriers, fourteen smooths entered, were a pleasing class. Sabine Rasper carried the Humberstone colors to the front in dogs and Tallac Sunbeam, with a kennel mate, Tallac Seabreeze, put Tallac Kennels in the van for bitches.

Fox Terriers, nine wires shown (Ch. H. Bristles, Ch. H. Brittle, Ch. H. Mearns, Ch. H. Record and Ch. H. Hope in for exhibition only), were a good all-round lot. H. Penance easily won over Jack in dogs. In bitches Endcliffe Precise, although heavy in whelp to Mearns, retains her style and quality to a degree.

The Ladies' Variety Class had eight entries. The order of awards was: 1 Miss Jennie A. Crocker's Ch. Endcliffe Tortora, Boston Terrier (cup for best in class); 2 Mrs. H. N. Cook's Ch. General De La Mare, French Bulldog; 3 Mrs. Geo. Flexnor's Lady Hazel, Bull Terrier; 4 Miss Kempf's Commodore Carrots, Cocker; 5 Mrs. L. W. Seeley's Old Hall Sandy, Collie. Absent Mrs. Horton F. Phipps' Brooklyn Patsy, Bull Terrier.

The special for best in the show was finally awarded to Ch. Endcliffe Tortora. Humberstone Penance reserve.

Mr. Phil M. Wand's classes were:

Italian Greyhounds, two shown, both excellent specimens.

Irish Water Spaniels, two shown. Firsco Dot, a new bitch here, going over Our Chance Jr. on coat and general substance. Both are excellent specimens and would be in the ribbons at any show.

Field Spaniels, Inchkeith Billy, the only one in, is a much better Spaniel than our shows generally produce.

Airedales, Motor Dace was the best one of three shown. He has the size and type desired.

Variety Brace Class, three braces entered. Miss Jennie A. Crocker's Bostons, Ch. Endcliffe Tortora and Ch. Dick Dazzler were placed over the Foxhound and Collie braces—Judge and Ned; V. Veto and V. Venus.

Mr. Irving C. Ackerman's classes were:

Boston Terriers, eighteen entered, were a classy lot. Ch. Dick Dazzler and Frisco Cinders were one, two in winners dogs and Ch. Endcliffe Tortora and Clancy III led in bitches, the principal awards and specials going to Wonderland entries. Rainier Dick was shown in better condition than at Stockton.

In novice bitches Vixen HI, v h c was possibly very much overlooked. She was entitled to a higher position. Eldora Necco is a neat bitch, a newcomer, by the way, but is a bit too low in front and might be fuller in muzzle. Clancy III. has matured into a symmetrical and typy looking young bitch.

Dalmatians, one shown, and a better specimen than usually benched, Arroyo Coquette, owned in Pasadena.

Poodles, two entered, with honors easy for Black, possibly the best Curly Poodle on the Coast.

French Bulldogs, a class of merit and an indication that the breed is picking up here. Ch. General De La Mare and Loulou, both veteran benchers, were one, two in dogs. Brackenside Count Desjardin is a puppy of pleasing type. D'Anglemonte Fleurette is an evenly set up one that should do well on the bench and as a brood bitch.

The small breeds were few in numbers, and of no particular extra merit. Two Poms., one Yorkshire, two Pekinese Spaniels, two Toy Poodles and one Toy Terrier, Tuttsiliffe, of which, it can be said, is a bit better than seen at our shows.

Variety Team Class had two entries—Judge Carroll Cook's team of Foxhounds, Judge, Ch. Ned, Prince Louis and Queen, placed first, and W. W. Stetheimer's Fox Terriers, Tallac Marlin, Wandee Resist, Tallac Seabreeze and Tallac Orchid.

Mr. J. J. Gleason judged the classes of:

Bull Terriers, thirteen entered, and a well rated lot. The interest centered in the competition between Silkwood Ben Ali and Brooklyn Patsy. They came together in limit, over 30 pounds, and when they were in right ascension the solar system was dimmed. The judge finally awarded the blue to Ali, a decision that was well received by the large audience about the ring. Ali was in splendid fettle and handled by his breeder, John Sparrow. He passes Patsy in head, muzzle and lips, neck and shoulders, and does not carry his tail as gaily as Patsy when shown around the ring. Patsy was withdrawn from further competition after the first round. This brought a very likely puppy, Wonderland Jim Woods, up to reserve winners. The dog classes were all excellent and above the average. In bitches Silkwood Brassie could not be denied the red, white and blue and special. Lady Hazel, reserve winners was in excellent trim, in fact, the bitch entries were the equal of the opposite sex in class and quality. A more even and excellent benching of Bull Terriers is rarely seen at any show.

DOINGS IN DOGDOM.

Chas. Gilbert was a painstaking and efficient superintendent at Del Monte. Tom Blight was unavoidably absent.

Mr. Geo. F. Herr, Dr. and Mrs. Geo. A. Collins of Angeles were present at Del Monte.

Mr. Herr is energetically working up the Los Angeles show for next month, if a report of the support the Southwestern Kennel Club will receive from Frisco and fanciers of the vicinity is any criterion Mr. Herr's enthusiastic and sportsmanlike efforts have met with a popular recognition.

If would not be an overplay by stating that 40 or more dogs will be sent down to the orange belt show.

A Wolfen's Cocker bitch Plumeria Sapho whelped on January 4th a litter by Ch. Redlight.

The trophies and cups awarded at the Del Monte show were presented to the winners by Hon. Carroll Cook on Saturday evening, in the foyer of the Del Monte Hotel.

Mr. C. W. Clark donated a cup valued at \$100 to be awarded the best in the show. This trophy was won by Ch. Sudcliffe Tortora. The Larson gold medal for best in the largest breed entry (Boston Terriers) was also awarded Tortora.

The California Circuit this season promises to be a lively one. The show germ has developed into a colony that will give us at least nine shows this year.

Pasadena is a fixture for February 13 and 14. Judges not yet announced.

Los Angeles follows with a four-day show commencing February 19th. The judges announced are: Messrs. Irving C. Ackerman, Norman J. Stewart, John Brown, Jas Ewins and Chas. K. Harley. Mr. Harley will be East at the time of the show, however. His classes—Fox Terriers, Irish Terriers and American Foxhounds will be judged by a judge to be selected by the Bench Show Committee.

Santa Rosa, it is reported, will hold a show on the 6th and 7th of March. This doggy function is under the guidance of Judge Carroll Cook, which means that the show is practically a fixture and that the specials and other details will be of so satisfactory a character that a large entry is assured. His Honor is the kind of timber that will build up and hold dogdom in general.

The judges for Santa Rosa will be a selection of home talent. We should not be surprised if Dr. Sharples of Seattle and Frank E. Watkins of Portland were seen in the rings.

Oakland is dated for the end of March. It is possible that the East will be drafted upon for the judicial feature of the exhibition. The finger of selection, rumor has it, points towards the Hub.

San Francisco is dated for the end of April. The annual bugbear, a suitable hall, has been effectually handled, the Auditorium Rink having been engaged. By the way, no better hall could have been secured, both for convenience and location, than the building on Page and Fillmore streets.

The judge for San Francisco has been announced, but from what we can gather the announcement was premature, as no engagement to make the awards has yet been consummated.

Del Monte will show again in August. It will be a whopper.

Tanforan is spoken of by several enthusiasts as the scene of a show this year.

San Mateo Kennel Club will show as usual on September 9th. Reports are current that either Frank Dole or George Thomas will judge.

Venice will probably close the show circuit with a show in the oceanside pavilion, late in September.

C. H. Cook has had the misfortune to lose his good French Bull bitch Margot de Pantin. She died in whelping a litter of five by Ch. General De La Mare. The puppies are thriving in charge of a foster mother.

A stylish and well bred Pointer bitch puppy awaits a purchaser at a reasonable price; address of the owner can be obtained from the Kennel Editor.

The report that Glenwood Lucky was located in a Southern California kennels was not correct. Lucky is at present in this city and owned by Chas. Gilbert. He is the sire of a recent litter of five nice, black puppies out of Jollie Fille.

A recent report coming from Perth, West Australia, to the effect that an exploring expedition in the Northwest regions of Australia has discovered a species of dog the size of a rat, is of special interest to dog fanciers. The smallest full grown dog in the world, it is claimed, is a two-year-old Chihuahua, owned by Deputy Sheriff Hamilton Rayner of El Paso, Texas. The Chihuahua is a breed raised in Mexico, where they are said to be growing scarce. The English Toy Pomeranian is probably the smallest popular European breed of the day. Many prize specimens, although full grown, weigh only forty-eight ounces, and occasionally a matured female is reported to scale only forty ounces. The once fairly numerous Toy Black and Tan Terrier, averaged under three pounds. Speculation is rife as to the type of animal the newly discovered miniature Western Australian dog is.

Riverside county has been promised by the Fish Commissioners black bass fry for Lake Elsinore, should that location prove favorable for the fish. Trout fry are to be transplanted in the streams of Coldwater Canyon and also in Strawberry Creek.

The Commission also propose to place Hungarian pheasants at a location in the county where they will propagate and thrive, using this ground as a nucleus for future liberation of the birds in surrounding counties.

EASY METHOD OF BREAKING COLTS.

The secret of management of a horse is to know what is going on in his mind. Most of us approaching a wild horse approach him with an insult. We do not think about it, but that is what we do. Now, mark you, there is nothing that so insults a wild horse as to handle his nose or his ears, yet, nine men out of ten approach a horse with a halter the first thing. They insult him, and after that they have to begin to prove to the horse that they are not his enemies, and they begin at a disadvantage.

This method of handling a wild horse without putting anything on its head was evolved by experience with a yearling half-bred Western colt. I had a halter on his head and had tied him to a fence. I ran my hand down his neck and toward his knee. He struck at me. It would not do any good to whip him. He would not understand what he was being whipped for. He was too big for me to hold his foot, whether he wanted it held or not. I stepped into the barn, got a rope and slipped the noose over his fetlock joint, then pulled the foot toward me. It was but a few moments until I could handle that foot. I went further back and he kicked at me. I then put the rope on his hind foot, ran it forward between his forelegs and attached it to his halter. Then I went back on him again, and when he kicked at me he nearly kicked his head off. He soon grasped the idea that it was easier for him to let me handle him than it was to kick.

When I have a wild horse to handle I put him through such a course of "sprouts" that he will understand that I am his master. Put the wild horse in a box stall or other small enclosure. Get a rope and make a noose as for lassooing. Enter the stall and the horse will move over as far as he can, probably trying to crawl under the door. You know how anxious a wild horse is to get his freedom. If you walk in one direction the colt will walk in the other. Now lay your noose upon the floor and walk the colt around till he steps in it with his left fore foot. Let the rope slip up to the fetlock joint and then hold on tight. When the colt feels the rope on his foot he will try to shake it off, but do not let him do it. If he gets it off once he will spend half of your time thereafter trying to get it off again. You can never convince him that it can be done. If his attention is divided between you and getting that rope off he will waste half of your time, so be careful and do not let him get the rope off. Pull his foot toward you and do not let him put it down squarely, as he has done for four or five years, if he is as old as that. You pull on the rope and make him set it down eight or ten inches from where it normally would be. He will say that he is not going to do it and will shake his foot and run around, determined that he will not put his foot down; but after a while he will get so tired that he will have to. The moment he puts his foot down at the place you select you have gained your first victory. You have taught him that you will have your way and you have neither hurt him nor scared him.

Now approach him. Put your hand on his shoulder. Never mind his head, neck or nose. If he will not let you touch his shoulder, pull the rope and he will find that he has to take his choice between your pulling on the rope and your putting your hand on his shoulder; between having your hand on his shoulder and his feet off the ground. He has learned more about men than he ever knew before and he has learned nothing bad about them. As soon as he will stand still and let you run your hand down his shoulder, gather up the rope, keeping it tight all the time, so that the colt cannot get it off, and throw the loose end of it over his back. He will jump and run, but you can soon convince him by pulling on the rope that it is unpleasant to run. He is doing most of the work. He is at the outside of the stall and you are in the center. Now gather up the rope and throw it over his back again. Again he must take his choice between your throwing the rope over his back and your pulling on his foot. Then bring the rope under him and be sure to pass it in front of the perpendicular portion of the rope fast to his foot, because if the rope, as you pass it around his body, is brought across behind the perpendicular rope and the colt should succeed at any time in getting in front of you the rope would pull right off over his tail and you would have to begin all over again.

Now you are ready to show him another thing or two. Unless he is a very large horse you can hold up his foot at any time you want to. By this time he has reached the point where, if you want him to move you must force him to do so. Many a smart horse will bore a hole in the ground with that foot rather than lift it. Now pull his foot right up. He will rear and plunge. That is worse than having his foot pulled to one side, but he will soon learn that he must stand quiet. As soon as he is quiet let his foot down. He has learned that it is unpleasant for him if he does not do as you want him to.

Now get a collar—not a new one, smelling of a lot of things that are strange to the colt, but an old one, preferably one that has been used by some horse that he knows. Bring the collar to him and put it on. If he objects pull that foot up. It will be but a moment till he decides that he would rather have the collar on than to have his foot pulled up. You can now put the harness on him just as you would an old horse. Do not stand off as though he were a kicking cow but walk right up to him, throw the harness over him, and if he moves or runs out

walk behind him and put the crupper strap on. His attention is riveted on that foot. He will neither bite, strike nor kick. You will be surprised to see how anxious he is about that foot. You can bridle him any time you want to.

Now you need another piece of rope, which ought to be nine or ten feet long and three-quarters of an inch thick, and two iron rings such as are in the ends of the breching of a single harness. Make a loop in the end of this rope, a loop that will not slip; then tie two rings on to the rope about ten inches apart and so placed that when this rope is passed around the horse and the rings are under him the loop will be around on the off side. Tie this rope right around the horse. Get a couple of hame-straps and two more rings. Buckle one hame-strap around each fore fetlock with a ring in the strap. You now have a ring fastened to each fetlock joint and two rings on the rope around the horse's body. Take the loose end of the foot rope, of course all the time keeping it tight in your hand, and slip it through the ring on the horse's body that is nearest to you, then down through the ring that is at the fetlock joint, back to the other ring at the horse's body to the ring at the other fetlock joint, and then tie to the noose on the off side of the body. Take the other end of the rope off.

Now, if you pull this rope when the horse is in action, you will pull both feet right up to his body. Do not go out of the door with control over only one foot. The horse can run faster on three feet than you can on two. You are not likely to have to throw the colt after you get outside, for a slight pull on the tightened rope will stop him. If you have not yet put the bridle on him you may do so at this time, or drive him with the rope alone. You can shoo him around like an old hen; he will be more quiet than many old hens.

Now get your quiet old horse that you break your colts beside; stand him on the left side of the tongue; hitch up the traces and neckyoke; then go and pick up the rope that is on the colt; hitch him beside the old horse and drive off.—Chicago Horseman.

HIGH DEATH RATE IN NEW YORK.

Statistics on file in the department of Health show an astonishing number of fatalities among horses in New York during the year just closed. Though the records are not yet complete it is certain that the number of deaths will exceed 20,000, and in all probability it will reach 22,000. In the nine months ending September 30 there were 16,678 deaths, and if this rate be maintained during the three months ending December 31, no less than 22,236 horses will have succumbed to accident, disease, debility, ill treatment and old age in 1907.

It is impossible to ascertain or even closely estimate the death rate per thousand among the city's horses, because no one knows how many horses there are in New York, but men in closest touch with the equine population say that the rate of mortality is undoubtedly increasing and is probably higher today than at any time in the history of the metropolis, except in periods of epidemic, such as the deadly epizootic of thirty-five years ago.

Slippery pavements in winter and extreme heat in summer are two of the chief causes of mortality among the horses. A well-known New York dealer has estimated that one hundred or more break their legs or are otherwise fatally injured every day on icy asphalt during the rough weather in winter. Pneumonia and colds caused by exposure are almost equally fatal to horses at this season.

At first blush it seems like a far cry from the panic in Wall street to the increased death rate among horses, yet one of the shrewdest observers in the Bull's Head market said the other day to a reporter for the Herald that one was largely the effect of the other.

"A great many horse owners, finding themselves very hard up as a result of the financial disturbances and the consequent loss of business," he explained, "are curtailing expenses in every possible way, and, with feed selling at unprecedented prices, large numbers of them are almost starving their horses while making one team do the work of two. Aside from being inhuman, this is a very costly thing to do, for when a horse is underfed and overworked at the same time he is going to give out quickly and completely, either through contracting pneumonia or through becoming emaciated. From what I have seen and heard I am convinced that thousands of horses are dying off this winter from just this cause.

Great as the fatalities are in winter they are sometimes far greater in the summer months. It is on record that during a memorable hot spell in 1896 more than 1,200 horses died in one week in New York. Overloading and overdriving often add greatly to the fatal effects of extreme heat and extreme cold.

Although no attention is paid to mortality statistics, as such, for any kind of animals, the Health Departments records respecting deaths among horses in New York are probably as accurate as those concerning human being. They are obtained from the Thomas F. White Company, a corporation which for years has had the contract for removing the dead horses in the city. There is no burying ground for horses, and as no one nowadays follows the example of Commodore Vanderbilt, who made a grave in his own dooryard in Washington Square

for his favorite trotter, Mountain Boy 2:20¾, many years ago, equine kings and paupers find a last resting place together at Barren Island, where the White people have their fertilizer plant. As all the dead horses are collected by this concern, its weekly reports to the Health Department accurately reflect the number of fatalities.

When a horse dies, all that the owner has to do is to telephone to White's and in short order a wagon is sent around to remove the animal, free of cost. If, as often happens, a live horse, no longer valuable except for his skin and bones, is led down to the dead horse dock and shot, the Whites pay the owner two dollars for him. Hundreds of these worn out "skinners" find their way to the foot of West Thirty-ninth street, "where their whip-scored hides soon cease to smart and their aching limbs grow numb."

Once or twice a day a barge goes down the river, across the bay and out to Barren Island freighted with a gruesome cargo. There a use is found for every part of a dead horse. His hide is turned into leather belting, his bones into jackknife handles, combs, etc.; his teeth into ivory ornaments, his mane and tail into hair cloth, his hoofs into glue, his fat into soap-grease and what then remains of his carcass into fertilizer for enriching the soil.

GRAND CIRCUIT.

The stewards of the Grand Circuit will meet in New York January 13 to determine on the tracks that shall be included in the big chain of meeting for the light-harness horse during the season of 1908. It is practically assured that the Cleveland Driving Park Company will not give a meeting next season and unless some other Cleveland club comes to the front there will be no Grand Circuit meeting at the Forest City.

Detroit is also somewhat in doubt for the reason that Daniel J. Campau, the man who has managed the big trotting meetings there for many years, announces that he positively will not be identified with the sport next season. This will mean a change of tracks even though a meeting is given.

Kalamazoo, Libertyville and Lima are three applicants for places, so there is no question about the strength of the Grand Circuit in case Cleveland and Detroit do both drop out. The Libertyville meeting preceded the opening of the Grand Circuit last year, and many horses that started at Detroit were given their first races at Libertyville. It was there that Highball made his record of 2:06¼ in his first start, beating Sonoma Girl, and it was also there that the great gelding met his first defeat, losing to the speedy California mare in a second race over the same track the following week.

Kalamazoo was hot for a place in the Grand Circuit last year and would gladly accept dates ahead of Detroit in case the latter holds onto the week usually assigned for the Blue Ribbon meeting. Libertyville would naturally come in ahead of Kalamazoo, and Lima, is admitted, would have to take the place usually assigned Cleveland.

From Buffalo the circuit will very likely be about the same as last year—Poughkeepsie, Readville, Providence, Hartford, Syracuse and Columbus, the latter with a two weeks' meeting.

There should be a chance for Philadelphia to get into the circuit, taking one of the weeks given Columbus, but so far no one has come to the front with the necessary amount of backing. It is believed that a first class trotting and pacing meeting conducted on up-to-date lines would prove a winner at either of the Philadelphia tracks, particularly at Point Breeze, because of the good transportation facilities, but there would, of course, be some risks. A strictly first class meeting carried out successfully this year regardless of losses, would insure a money-maker the years following, for Philadelphia is one of the best horse towns in the country, and all that is necessary to bring out the people is to convince them that they are getting the best that is to be had. A second class meeting would pay no better than those that have been held there heretofore.—Stock Farm.

THE CAUSE OF THE SMASH-UP.

The old ducky was suing the railroad company for damages. The man contended that, not being warned by the whistle or engine bell, he had started to drive his rig across the company's track, when a shunted box car of said company crashed into his outfit, causing the death of the horse, loss of the wagon, and minor injuries to himself. After the prosecution had closed its side of the case the company's lawyer called the old ducky to the stand and went at him.

"Mr. Lamson," he began, "your rig was struck by the box car in full daylight, was it not?"

"I fink dar was some clouds overhead, suh," answered the cavilling witness.

"Never mind the clouds! And only a few days before the accident the railroad company had put a new sign at the crossing?"

"Dar was a sign dar, ya-as suh!"

"And didn't that sign say 'Stop! Look! Listen?'" Now, dar am the whol' accusation ub de trouble!" said the witness with animation. "If that Stop sign hadn't caught dis chile's eye jes' 's he war squar' on dat track, dar wouldn't 'a been no smash-up!"

A writer aptly says: The shortest cut to the ideal carriage horse is through the American trot.

THE FARM

FEEDING FOWLS.

The most important element of success in the poultry business lies in the man that carries the feed pail, as he can make or break the business by the way this part of the work is done.

While many advocate hopper feeding and others to make all fowls scratch for all they get, still I consider both ways all right if properly done, and neither will be a success if improperly done. Judgment has to be used in both cases and different fowls want different treatment. My ideal way of feeding is to have fowls rather hungry scratching for feed all day till toward evening, when they should have access to a hopper containing all kinds of feed, so as to go to roost with their crops full of the necessary, and while they do not always know what is best for them, still they do not make many mistakes in the long run. I think all fowls should go to roost with all they want to eat, as then is when the systems are built up and eggs manufactured, and the difference between half-grown chickens that go to roost only half fed and sleep in crowded quarters, unventilated, and chicks that have hopper feed at night and have hopper feed at night and have comfortable quarters at night, proves it is very poor economy to try to save feed by feeding growing stock any less than what they will eat up clean. While wet mash will do occasionally, I am in favor of a dry mash in hoppers if you have the hopper that works right. A mash in a hopper that is clogged up and they can't get a piece of it only when you knock it down to them is not a success.

The more grains you have mixed in the ground mash the better. I always like to use corn meal, oats, wheat, bran, barley, peas, and sometimes beans, together with meat scrap or, better still, meat meal, to which should be added some linseed meal at all times. The construction of the digestive organs of the common fowl is such that the mastication takes place after swallowing, and a crop is provided as receptacle for food in which it may be softened, thence it passes to a hard, muscular, hollow organ, where it is thoroughly triturated and reduced to small particles and rendered digestible.

These peculiarities in the construction require an increasing amount of hard substance to be taken in with the feed in order that the organs used for the mastication may be gradually developed so they will eventually completely perform their functions.

I know of no better grit for this purpose than a heap of sharp, gritty sand, and it, like pure air, is cheap, and these two items are more important than any others, still they are most often overlooked.

While fowls are naturally scavengers, still they do better when fed on good sound grains and the eggs are of a very different texture and taste. The following grains are all good and you can select those that you can get to best advantage in your locality:

Clean, bright wheat, cracked or whole, is probably as good a feed as we have for either growing or full grown fowls. Although rather more high priced, still it produces results that make it cheaper feed in the end.

Shredded wheat can be bought in bags now and it makes a very fine feed when fed in the hoppers with other ground feeds, and being nothing but cooked whole wheat, I can not see how any feed could be more healthy.

Oats is one of the best balanced feeds we have, however. The coarse fibrous hull should be removed for young stock, and it pays to buy oats of the best quality so the heart will be heavier in proportion to the hull.

Roll'd oats, or cracked oats, is one of the most important feeds we can give to growing stock, as it is a

muscle builder and makes fine feathers.

Corn is the most common article of food for fowls, in fact many people in years past never fed their fowls anything but corn from hatch to death, and had comparatively good results, but such feeding would require free range to balance up such one-sided feeding.

Corn is rich in carbo-hydrates, hence is largely consumed in production of heat and energy, for this reason it is a very desirable feed in winter time, still it should be fed in connection with other grains.

Barley has much the same composition as oats, but is slightly richer in protein, and has the advantage of having only one-third as much fibre.

Oil cake or ground flax seed is also a very good food for growing fowls and laying hens, especially during moulting. It is one of the richest foods we have in bone and feather forming material, but it is too rich to be given alone and should not constitute more than 10 per cent of the ration for fowls.

Peas are extremely rich in protein and cracked peas can be added to any mixture of grains to advantage.

The value of charcoal is very often overlooked and it should be fed to fowls of all ages as a preventative of disease. It should be kept before fowls at all times, as there is no danger of them eating too much, and it has a great purifying effect in absorbing noxious gases and will correct many digestive disorders.

I believe in a variety, and judgment should be used and change with the seasons, and above all see your fowls have a liberal supply of green feed of some kind and plenty of grit and lean shells for laying hens.

The mangle wurzel beet is the greatest winter feed I know of, as it can be easily raised and keeps all winter, and all fowls do well on them and they are especially beneficial to Reds on account of the red in their make-up. Their use for young stock is a great help in securing specimens striking in red color. It takes red to make red and many fine promising chicks have been utterly ruined by not having proper feed to produce the fine feathers they would have had if given the material to make them. Many white feathers are caused by injury and lack of balanced rations or half rations.—Edward De Graff in Horseman and Stockman.

WHAT IS BABY BEEF?

Baby beef is a prime butchers' beast, thoroughly fattened and ripe for the block at from 12 to 24 months of age. Growth has been artificially promoted by continuous heavy feeding from birth, with the object of obtaining in the shortest time possible the maximum amount of well-matured beef. The customary ages at which cattle are put on the market are as two-year-olds or three-year-olds, the greater part of the time being required for natural growth, while about four to six months at the end are devoted to fattening. In the production of baby beef the fattening process is begun at birth and carried on simultaneously with growth. In order to make calves thoroughly prime and fit for the block as yearlings it is absolutely essential that they be always fed to the limit of their ability of transforming food into beef.

Baby beef is a special article in which the essential characteristics are early maturity, quality, finish, and thickness of flesh. Nine out of ten yearlings sent to market for slaughter do not class as baby beef, because they lack finish or quality, while some are overfed or "overdone." This results from lack of a proper understanding of the qualities that constitute the condition known as "ripeness" or "finish." It thus happens also that much disappointment in regard to prices often results from marketing such unfinished and overdone cattle.

The most important and perhaps the most noted progress in the improvement of domestic live stock has been the continuous advance toward early maturity, earlier maturity having been one of the chief objects kept in view by all great improvers of live stock.

Selection and breeding have been the principal means through which the time required for the natural maturing of domestic cattle has been reduced several years. It is also recognized that heavy feeding exerts a marked influence in producing early maturity, this being an artificial method through which animals are matured for the block in less than the normal time.

Numerous reasons have been given as causes of the growing popularity of early fattened baby beef with both consumer and producer. Doubtless it may be said to be based on economic principles.

The first step toward baby beef was the demand for and production of smaller and more compact animals, already referred to as pony beef. The butchers claimed that this change was a good one for economical reasons, because small, compact carcasses cut up with less waste fat and furnish the thick, light steaks which are most in demand by the consumer because of their greater cheapness. As the demand regulates the price, it was natural that the producer should furnish the smaller and more compact carcass for which there was a steady demand and for which he would receive a good price.

Again, experimental evidence shows that young animals will feed more economically than those more mature in age, so that baby beef will give from 25 to 50 per cent more meat for the grain consumed than the same animal would if kept until two or three years of age. This was the economical solution of the problem of cheapening the production of meat. Therefore, the greater profit in small joints, together with the greater economy of producing young beef, may be regarded as the most potent factors in bringing about baby beef.

Maturity for the block in beef cattle means that condition when they have reached full growth of body and are thoroughly fat or ripe for slaughter. The average age at which cattle are now fully grown and fattened for the market is between two and three years. Early maturity, therefore, means that the animal has been fully grown and fattened in less than the average length of time required by that class of stock.

In addition to the factors already mentioned through which early maturity can be produced—namely, selection, breeding and feeding—there is a great difference between individual animals in their tendency to mature early. Small-framed, compact animals that possess quality, indicated by fine bone, a soft, mellow hide, and silky hair, generally mature in less time than is required by the average of the breed. Feeding is the strongest means by which advantage can be taken of this tendency in an animal to hasten its maturity. Another way of producing stock that will mature early is by breeding very young animals, but this is not recommended, because it is a dwarfing process and therefore associated with more or less chance as to the result.

When early maturity is attempted by means of liberal feeding with nutritious feed, carbonaceous in character and lacking in bulk, the tendency to produce flesh and fat is readily developed; but when very heavy feeding is resorted to there is always the danger of overfeeding, which often results in permanent injury to the animal.

From the butcher's point of view there is no difference between pure-bred, grade, cross-bred, or common stock, provided they all possess the same beef qualifications. From the breeder's and the feeder's points of view the choice is decidedly with pure bred animals, as they are most likely to breed and develop true to type and to present a uniform appearance. At present the feeder relies principally on grade stock, and when such animals possess a high concentration of the blood of any one breed they are generally equal to pedigreed animals for feeding purposes. Cross breeding is not very common in this country. In England, where it is more generally practiced for the production of special beef qualifications, excellent results have been obtained; but unless the breeds are well selected bad results are

liable to follow, especially after the first cross. Stress is often laid on the importance of uniformity in color, although the packers claim that it does not increase the value except as it might catch the eye of the buyer.—Extract from Bulletin No. 105, United States Department of Agriculture.

FOOD FOR HENS.

The most costly portion of the egg is the white, or albumen. This is derived from the nitrogenous matter of grains, but principally from the animal foods. Hence meat, milk, insects and grains, rich in gluten, are the best foods for that purpose. One of the cheapest articles that can be used is blood. If it can be secured from the slaughter house, mixed with the ground grain and cooked, it will be highly relished by the hens, and will largely assist in egg production. When meat is used the lean portion should be preferred, as the fat is of but little service if corn is used in the food. One of the cheapest substances for adults is milk, whether sweet or sour. Regarding the use of blood it is well adapted for egg-production. It can be given with advantage to chicks as well as fowls, and be used in several different ways. First, by mixing one pound of blood with three pounds of mixed ground grain, and the whole mixture cooked as bread. There is nothing superior to it in such form, not even meat. Second, if the mixture of blood is put in a bag and boiled it makes a food that not only takes the place of meat, but it is better for the purpose. As the blood at some slaughter houses is usually wasted there should be no difficulty in procuring it. It will keep any length of time in winter, but if not cold weather, should any portion remain after feeding, it may be added to the compost heap, where it will be valuable as one of the best nitrogenous fertilizers that can be used.

POULTRY NOTES.

One reason why poultry manure is rich, concentrated, and active is because fowls feed principally on seeds and insects all of which are rich in fertilizing matter.

In selecting a site for the poultry-house the one thing to be avoided is dampness. Damp houses and swampy yards are responsible for a goodly share of the ills that afflict poultry. South hill sides are capital places for poultry-houses, as usually good sunlight and good drainage can be readily provided.

No amount of persuasion or temptingly high prices should induce the breeder to part with his best birds, for if he desires to steadily improve his flock no matter whether it is of so-called common birds or pure-breds he must take his pick first of the very cream of the flock.

Statistics show that ninety-nine farmers out of a hundred keep hens. It is estimated that seventy-five per cent of this number raise mongrels and cross-breeds. Now that the campaign for pure-bred cattle, hogs and even field seeds is on, it would seem wise to reduce the number of mongrel poultry.

Cornmeal fed to poultry will be much improved if mixed with boiling water, which partially cooks it. A mistake is often made in feeding it, if given too wet and soft, in which state it is often injurious, compelling the fowls to take more water than their nature requires.

Poultry generally suffer from preventible ills. Naturally they are subject to very few diseases. If kept clean, not overfed, not cooped up close, fed pure food, supplied with clean water regularly, and have an abundance of pure air in their roosting places they will live and thrive without any trouble except in rare cases.—N. J. Shepherd.

THE HAND CREAM SEPARATOR.

Authority on the subject of farm dairying will agree that any farmer who milks five cows or more and is either selling the cream or making butter of it, needs a centrifugal hand cream separator to secure the best profits.

The hand cream separator, working under favorable conditions, does not leave over 1-20 of a pound of butter fat in 100 pounds of skimmilk. The gravity systems and dilution separator methods of securing the butter fat will leave, under favorable conditions, from one-third to three-quarters of a pound of butter fat in 100 pounds of milk.

According to these figures, a farmer who uses a hand separator and milks 10 cows, would lose in the skim milk but 30 pounds of butter fat a year on the total amount of milk. By the other methods he would lose from 200 to 450 pounds a year. Figuring butter fat at 20 cents a pound, there would be an annual loss of from \$34 to \$84 between the hand separator and the other methods.

Not only does the machine secure practically all the butter fat, but it delivers the skim milk in a sweet, warm, and undiluted condition ready to be fed to the calves. Very few dairy utensils are needed, as the milk is separated as soon as it comes from the cow and the skim milk is fed at once. Less work is required to handle the milk in this manner than with the other methods.

The cream delivered from the separator is of uniform richness; it has had all the fibrous and foreign matter removed. The milk has not absorbed bad flavors and odors from standing around and the cream is in excellent condition for ripening. Thus there is a gain in the quantity and quality of butter obtained.

Not only is the centrifugal separator of advantage in the production of fine butter, but it is equally advantageous in the purification of milk and cream for direct human consumption. Dairies improve the quality of their milk very much by running it through the separator and then mix the milk and cream before bottling it.

The average farmer cannot afford to haul the whole milk to the creamery even if he is within hauling distance and the roads are good. The skim milk often comes back in a cold, half-sour and contaminated condition, which is unfit for feeding purposes. Even if it does come back in good condition, it is impossible to feed it regularly, and it is far from being equal to hand separator milk. Too much time is required to haul it to the creamery compared to the length of time required to separate it at home by hand. The hand separator cream, by careful handling, need not be hauled to the creamery oftener than every other day during the summer and perhaps not oftener than once in three days during the winter months.

Hand separators may be procured in sizes varying in capacity from 150 pounds of milk (18 gallons) an hour to 1,200 pounds (144 gallons) an hour. The prices varying from about \$40, for the smaller size, to about \$175 for the larger size, depending upon the particular make.

A farmer who milks 10 cows, obtaining from them, say, 300 pounds of milk a day, or 150 pounds at each milking, should be able to separate it in fifteen minutes. This will require a separator of 600 pounds capacity an hour, which would cost about \$100. The average separator of standard or reliable make should last, with good care, for 12 or 15 years, with very few repairs.—Rural World.

Legitimately the fowl has four well-defined uses, as an egg-producer, for its flesh, for its feathers, and in exterminating pests, and to these might be added, saving waste.

No fowl over two years old should be kept in the poultry yard except for some special reason. An extra good mother or a finely feathered bird that is desirable as a breeder may be kept longer. But ordinary hens and cocks should be fattened for market at the end of the second year.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's
Caustic Balsam
IT HAS NO EQUAL

For Human Body
It is penetrating, soothing and healing, and for all Old Sores, Bruises, Wounds, Burns, Ulcers, Cancer, Boils, Corns and Bunions. CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

Address FAIRMONT HOTEL

FAST PACER FOR SALE.

Seymour M. 2:23 by Diawood, dam Nancy H. by Upstart. Brown horse, six years old, absolutely sound and good mannered. Stands 15½ hands high, weighs close to 1100 pounds. Was timed separately a mile at Pleasanton in the 2:20 pace in 2:12, heat won by Inferiotta in 2:07¼. He has been a half mile in 1:03½ to Miller cart and quarters in 30 seconds. For price and further particulars address

J. E. MONTGOMERY,
Davisville, Cal.

TWO PACING STALLION COLTS WANTED.

A yearling or two-year-old by Star Pointer and one by Zombro. Must be good color, natural pacers, standard bred and registered, or eligible to registration. Bay or brown, little or no white, of good size, neat heads, not too high on leg, standing and traveling square on their feet. Must have plenty of knee and hock action. Must be absolutely sound and out of good mares. Address giving price, pedigree and full particulars as to speed, if worked, etc., to F. W. KELLEY, Breeder and Sportsman, 616 Golden Gate Ave., San Francisco.

WANTED

TROTTER BREED STALLION.

A trotting bred Stallion, standard-bred preferred. Send breeding, description and all particulars, also very lowest cash price to

P. O. BOX 1011,
Phoenix, Arizona.

FOR SALE CHEAP.

Combination horse, five years old. Shows all gaits under saddle, single-fuots three-minute gait, trots square to buggy, very showy, trick horse. Lady can drive or ride. Swiftest riding horse on the Coast. Sound, and can be taught anything. Suite 11 to 14, 2011 Mariposa St., Fresno, Cal.

JACK FOR SALE.

Weights 1,000 pounds, is well turned, good looking and without blemish. Is a prompt worker. Apply to

Santa Rosa Cal.

"SAVE-THE-HORSE"
Registered Trade Mark
SPAVIN CURE

From a One-Time Owner of the
GREAT ANGUS POINTER

Columbus, Ohio, Oct. 2, 1907.

My horse, Gold Hal 2:12½, in his second race was in a bad mix-up. Two pacers were down and he jumped into the pile, injuring both his fetlocks. Both shin and knee boots were torn off, also his support and both tires. A broken brace punctured one of the fetlocks, and he went dead lame. We resorted to your remedy and he stepped a couple of miles to-day better than 2:10 in his work. I consider that it has done wonders in this case.

The duty counts so that I will, if possible, take some home with me. My home address is Carleton Place, Ontario, Canada. I am the party who bought Angus Pointer 2:01½ when he was a yearling, developed him, getting him a record of 2:06 before selling him to F. G. Jones of Memphis, Tenn. Would like you to write me, quoting trade price. Address care of H. W. Wilson, Secretary K. T. H. B. A., Lexington, Ky.

Yours respectfully,
J. MACPHERSON.

Is a Steed Bred to the Purple More
Valuable Than a Mongrel?

Are Not Diamonds More Valuable
Than Paste?

Then this vital fact stands out as clear as crystal, "Save-the-Horse" is worth its weight in gold. No other agency, remedy or method can accomplish such miraculous and unflinching results. It saves time and money.

MAKES A TENDON LIKE A ROD
OF STEEL.

"Save-the-Horse" permanently cures Bone and Bog Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boli, Wind Puff, Injured Tendons and all lameness, without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express
Paid.

**THREE HIGH CLASS HORSES FOR
SALE TO CLOSE AN ESTATE.**

No. 1. Seal brown gelding, five years
old, stands 16 hands, weighs 1,150
pounds. Sired by Direct 2:05½, dam
by Guy Wilkes 2:12½; second dam by
Chas. Derby 2:20. This horse has never
been trained, but is a fine driving horse
and can trot a 2:40 gait. He is in every
respect a very handsome and desirable
animal, in first-class condition, very
kind and gentle.

No. 2. Bay filly coming three years
old, stands 15.1 hands, is a trotter. Sired
by Greco B. 2:12½, dam by Poscora
Hayward; second dam by Williamson's
Belmont. She is a remarkably fine filly,
gentle and kind, has been broken but
four weeks, and think she can show a
three-minute gait.

No. 3. Bay gelding, coming three
years old, natural pacer. Sired by Wil-
liam Harold 2:13½; first dam by Luster
2:22; second dam by Richard's Elector
2:17; third dam by Chieftain 721; fourth
dam by Williamson's Belmont; fifth
dam by imported Langford. Has been
broken but two months, and shows
great natural speed. Stands 15.3 hands,
weighs 1,075 pounds. Is developed like
a four or five-year-old. Very handsome
and in first-class condition. A real
show horse, with the kindest disposi-
tion and every promise to become a
great race horse.

None of these horses wear boots or
straps. They are not afraid of any-
thing on the road, and I will guarantee
each one to be sound and without
blemish. For particulars address or
apply to

WINCHESTER

SMOKELESS POWDER CARTRIDGES AND .22 CALIBER RIFLES

Just to show that all things ARE POSSIBLE with Winchester .22 Caliber Cartridges and Rifles, and also to prove "Who's Who" in making rifle records IN PUBLIC, Mr. Topperwein recently shot for ten consecutive days at San Antonio, Texas, and made the above world's records for wing shooting with a rifle. He used only two rifles and loaded them himself. These record-breaking, history-making scores were made, without the aid of a notary public, before large crowds of people in a public park—not in a far-away back lot or down on the farm behind the barn.

The Stallion Number

OF THE

Breeder and Sportsman

Will be issued February 15th, 1908. It will have a hand-
some cover in colors, contain many illustrations and be
replete with matter interesting to breeders and horsemen.

If You Own a Stallion

Don't fail to advertise him in this issue, as an advertisement
of your horse in this number will reach every man on the
Coast who owns a good mare.

If You Own a Mare

You will find this number very interesting, as it will con-
tain the stallion announcements giving particulars as to
description, pedigree, terms, etc., of all the best horses on
the Coast. and from these announcements you can decide
on what stallion will nick best with your mare.

ARE YOU INTERESTED IN HARNESS HORSES?

If so, you will be interested in reading this number, as it
will contain statistics and news that will be valuable and
entertaining.

In place of getting out the usual large Christmas
number of the BREEDER AND SPORTSMAN last month, it was
decided to make a special effort and get out a handsome
stallion issue, and the date of February 15th was selected
as Christmas comes too early for an issue of this descrip-
tion. Owners of stallions who wish illustrations of their
horses to appear in this issue should have photographs
prepared without delay and send in their orders for space.
A specially low price has been decided on for advertising
in this issue, placing it within the reach of all. Write
for price and particulars.

BREEDER AND SPORTSMAN
SAN FRANCISCO, CAL.

THE WEEKLY BREEDER AND SPORTSMAN

(Established 1882.)

F. W. KELLEY, Proprietor

Turf and Sporting Authority of the Pacific Coast

OFFICES: 363, 365 and 366 Pacific Building,

Corner Market and Fourth Streets,

SAN FRANCISCO

P. O. DRAWER 447.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

A couple of enterprising Californians who like the harness horse breeding business got together a few weeks ago and as one had a nice farm and the other some ready cash, they concluded, after talking the matter over, that Searchlight 2:03½ would be an excellent investment in the stallion line, if he could be purchased and brought back to California, where last season the three-year-old Aerolite and the two-year-old Ray o'Light, both sired by him, were the sensations of the year, the former pacing a public trial in 2:05½ and the latter taking the two-year-old pacing race record of 2:13¼.

A letter was written to the manager of Searchlight and a reply was received stating the price at which the great son of Darknight would be allowed to change ownership. The price was a stiff one, but did not stop the Californians, and they immediately wrote the owner that the money would be deposited and paid over on a clear bill of sale being made for the horse. They waited a reasonable length of time, but no reply of acceptance came, so the telegraph wires were used and still no answer was returned.

The California gentlemen were disappointed, of course, but concluded that there was no use worrying over it, so they dropped the matter. At the price they expected to pay it would have taken two or three years of good business to break even on the trade, with the chances of the horse dying and many other contingencies that are possible in the horse business. They have their money and it will not spoil if proper care is taken of it, and there are other sires for sale if they should conclude they could not get along without one.

We are pleased to record the fact that Mr. Frank J. Kilpatrick of this city has purchased from Sam Norris of Santa Rosa the splendid stallion Washington McKinney, formerly owned by Rose Dale Stock Farm. Dick Ables, who has quite a string of horses owned by Mr. Kilpatrick in training at Pleasanton, has already shipped Washington McKinney there. This horse is an own brother to that very fast trotter Geo. W. McKinney 2:14¾, that P. W. Hodges, who trained him, says could have beaten 2:10, and that Washington McKinney was fully as fast as his brother when a colt. Mr. Kilpatrick purchased several youngsters by Washington McKinney during the past two years, and is so enamored of them that he determined to own the sire. Nearly every one of these youngsters is a fast trotter, some of them having already shown close to two-minute speed, and as they have much style and finish, as well as fine trotting action, the conclusion is irresistible that Washington McKinney will be a first-class sire if given any chances at all in the stud, which he will certainly have if Mr. Kilpatrick owns him.

There is no handsomer horse in California than this stallion, and he will be a very popular horse with breeders.

Thos. Ronan, proprietor of the Pleasanton track, has decided to place his young stallion Birdman in the stud this year to a few outside mares at \$50 to insure. Birdman is one of the best bred horses on the Coast, and has size, style and great natural speed. His sire is Antrim, the sire of that great mare Anzella 2:06¾, that was the largest money winner of her year on the Grand Circuit when Milard Sanders campaigned her for the Santa Rosa Stock Farm. Antrim was sired by Aberdeen, who sired Kentucky Union 2:07¼ and the dams of Onward Silver 2:05¼, Patchen Maid 2:08¼, Aldeen 2:09½ and other fast ones. Aberdeen was a son of Hambletonian 10. The dam of Birdman is the registered mare Birdie by the great Jay Bird, one of Geo. Wilkes' greatest sons. Jay Bird sired five in 2:10 and the dams of three in 2:10. The second dam of Birdman was a daughter of Geo. Wilkes, and the third dam a producing daughter of Daniel Lambert, a son of Ethan Allen, one of the handsomest stallions of the great Morgan family.

A careful perusal of the pedigree of Birdman will show that he is closely related to many champions of the race track and show ring. His colts are fine lookers and can all step fast as soon as they are broke to harness. Mr. Ronan has a few of them at Pleasanton and will be pleased to show them at any time.

The first advertisement of a California stallion for the season of 1908, which has appeared in the columns of the Breeder and Sportsman, is that of Zombro 2:11, the greatest of the sons of McKinney thus far as a sire. Much has been written about Zombro in the columns of this journal since he first appeared as a three-year-old trotter and beat all the best ones of his year in actual contests, winning forty heats that year in standard time, a feat never before or since equaled by a three-year-old, and closing the season with a record of 2:13, still the Coast three-year-old stallion record. In writing of Zombro nowadays, about the only thing necessary is to refer to his record as a sire, as the Year Books furnish all the facts and figures necessary.

One of the most remarkable facts in connection with his history as a sire is that only two of his sixteen 2:20 performers are out of record mares. Of his four 2:10 performers, Italia 2:04¾, Zephyr 2:07¾, Hymettus (3) 2:08½ and Bellemont 2:09¾, but one, Zephyr, is out of a record holding dam, she being the daughter of Gazelle 2:11½, dam of Zolock 2:05¼. Of Zombro's ten 2:15 performers, but one other, Clara B. 2:13½, is from a record mare—Scrapoose 2:16½, pacing.

In this connection it might be well to state that a table recently printed in the Chicago Horse Review showed that of the sixteen 2:20 trotters sired by the great stallion Bingen 2:06¾ all but five were out of mares with records below 2:18, the famous Nancy Hanks 2:04 and Fanella 2:13 being among the matrons that had helped Bingen in the production of his list of fast performers. According to the development theory, therefore, Zombro's prepotency as a sire of speed is the more remarkable from the fact that he has not been assisted by having a large proportion of fast record holding mares bred to him, but has established his reputation from non-record mares of all lines of breeding.

Zombro will make the spring season of 1908 at the home of his owner, Geo. T. Beckers, 3949 South Figueroa street, Los Angeles, at the very moderate fee of \$50.

MOVED DOWN TOWN

The Breeder and Sportsman

is now located in the

PACIFIC BUILDING,

Corner Market and Fourth Streets, San Francisco.

Offices 363, 365 and 366

Every horseman in the country who has ever met J. H. Neal, now Town Clerk of Pleasanton, and also Deputy Postmaster of that town, will sympathize with him in the loss of his wife, which occurred last month, after an illness of nearly two years. When "Jo" Neal was with Monroe Salisbury as superintendent of his racing stables, as well as the breeding farm where Director 2:17 and Direct 2:05½ were the stallions used, he met and had business relations with horsemen and breeders all over the United States, and since severing his connection with Mr. Salisbury years ago has been a citizen of Pleasanton, near which town he was born. He has occupied many positions of trust and there is not a citizen of that town more respected or held in higher esteem than he. He was a valuable aid to the Pleasanton Matinee Club in the management of its very successful meeting last year, and still retains a deep interest in all harness horse matters, although his other duties have kept him from being an active participant in them, except during the Pleasanton meetings, when he always is called upon to act as clerk of the course, being particularly efficient in that line. The death of the partner of his joys and sorrows for many years, while not a surprise, was a shock to all, and Mr. Neal and his children have the deep sympathy of everyone with whom they were acquainted.

Mr. J. W. Zibbell, who had the best two-year-old trotter in California last year in the Futurity winner Katalina 2:22¼ by Tom Smith 2:13¾, came up from Fresno this week and went to Sonoma to get a four-year-old filly by Seymour Wilkes 2:08½, out of a mare by Silver Bow 2:16, that he had recently purchased on an order from Mr. Geo. H. Estabrook of Denver, Colo., the gentleman who purchased Capt. Batchelder's mare Perfection last year from Chas. De Ryder for \$10,000. Mr. Zibbell has orders to take the filly to Fresno and train her, and she is said to be a very fine prospect for a record breaker. She was bought from Mr. W. C. Nolan of Sonoma. In a letter to Mr. Zibbell, Mr. Estabrook states that he recently purchased the filly Dorothy Axworthy that took a two-year-old record of 2:21¼ last year, also the unmarked peacer Whitelock, that is considered good enough to race anywhere in any company, and they, with others of Mr. Estabrook's horses, will be trained at Denver by Gus Macey. The price paid for Dorothy Axworthy was \$7,000, and she is entered in the Kentucky Futurity, Horse Review and other big stakes for this year. Macey will get Silver Band 2:10¼, trotting, and Tommy Grattan 2:12¼, pacing, ready for the races also, and the chances are that Mr. Estabrook will have a most formidable string. It is to be hoped that good luck will attend them, as an owner who is game enough to stay in the game after having so much bad luck as Mr. Estabrook has met with is entitled to some of the good things that are distributed annually

among horse owners. Mr. Zibbell reports all the horses at Fresno doing well, and says the young things by Tom Smith are all showing lots of trot. Zibbell with have Prof. Heald's stallion Advisor by Advertiser 2:15 in the stud this year and may race him.

P. W. Hodges, who is now located at Pleasanton, has a couple of five-year-old stallions that are attracting much attention from horsemen. Both are by Zombro, one being out of a mare by Nutwood Wilkes, the other out of Hazel Kinney 2:09¾, therefore inbred to McKinney. Umatilla Chief, as the one from the Nutwood Wilkes mare is called, looks like a trotter that would beat 2:10 away off, and the fact that he worked the Brace half-mile track last year a mile in 2:14 is pretty good evidence that he could do 2:10 right then. The one out of Hazel Kinney has trotted a mile in 2:17. Mr. Hodges has never advertised these stallions for public service, but bred them to a few of his own mares as three-year-olds. Mr. Hodges has a filly by Owyne 2:22¾, out of the fast pacing mare Queen R. 2:12¼ by Redondo, that is as fine as a thoroughbred and has two-minute speed. She is a perfectly gaited pacer, game and with every racing quality except that she is not as level headed as a race horse should be, so he has concluded to breed her to Star Pointer 1:59¼ this season, and not train her until she has raised a colt and settled a little. As the old champion is one of the best headed horses in the world, the produce of this union, if it has his head, should be a world beater. Hodges has a four-year-old by Neer-nut 2:12½, out of a sister to Greco B. by McKinney, second dam by Anteeo, third dam the dam of Lou Dillon, that is showing a great deal of speed. A couple of broodmares that he is offering for sale are nice lookers and elegantly bred. They are by Freckels, son of Wilton, one being out of Miss Patchen by Mambrino Patchen, the other out of a mare by Redondo, son of Stamboul.

Jack Phippen has a row of prospects in his stalls at Pleasanton track, from which some great speed is bound to develop before the summer months are here. He has among others a filly coming two years old, owned by Capt. C. H. Williams of Palo Alto, that is only just nicely broken, but is showing that she has a high rate of natural speed. She is by the Captain's young stallion Unimak, own brother to Sterling McKinney 2:09¾, and out of Alta Nola 2:20 by Altamont, second dam by Nutwood. With just ten days' work at the Pleasanton track Nalta W., as she is called, stepped a quarter in 47½ seconds and an eighth in 28 seconds on a trot and good gaited. This is remarkable for the practice she has had, and goes to show that Unimak is another producing son of the great McKinney, and will not only get speed, but early speed. Nalta W. is one of the oldest of his get, as she was sired when Unimak was a three-year-old in 1905, being a foal of 1906. He was bred to but for or five mares that year, and there are that number of foals. Nalta W. is the only one being worked so far, but they are all nice lookers. Breeders will use good judgment if they look this great bred son of McKinney over before settling upon a stallion to breed to this season.

Farmer Bunch brought his mare Zella Mac 2:26¼ back with him when he returned from his Eastern campaign and has her now at Pleasanton in as fine shape as any horse at the track. Her legs are as clean and sound as a hound's tooth, showing that the many races she started in must have been rather easy for her. She won six races without having to trot faster than 2:26¼, all of them over half-mile tracks in the Southern States, where she was raced. She was the Farmer's bread winner during the summer, and he refused many tempting offers for her that were a shade below the price he thought her worth. Zella Mac is a large, well-made mare with nice, clean trotting action and one of the best bred of the McKinneys. Her dam is Minnie Alto by Iran Alto 2:12¼, son of Palo Alto 2:08¼, second dam Princess Dawn by Dawn 2:18¾, son of Nutwood 2:18¾, third dam Edith 2:10 by Dexter Prince, fourth dam by Hamilton Chief, fifth dam by the thoroughbred horse imported Belshazzar. Bunch may take Zella Mac East again this year, but if not will enter her in all the big trotting stakes on the Pacific Coast, as he thinks her good enough to win some of the money, no matter how fast they trot.

Col. J. C. Kirkpatrick usually spends the week end with his family in their pretty bungalow at Pleasanton, and takes great pleasure in driving some of his horses. He jogs Charley D. and occasionally lets the son of McKinney brush an eighth at pretty fair speed. Charley D. never looked better than he does now. The Colonel has a chestnut mare in DeRyder's care that has all the signs of a fast trotter. She is by Sidney Dillon, out of Flora M 2:16 by Richard's Elector. She has a good deal of knee action and seems to be good headed and able to go the mile out at speed. A mile in 2:28½ with the last quarter in 35 seconds is the best that has been asked of her as yet, and she answered it in a manner that was very satisfactory.

W. E. Ditels of Pleasanton, who purchased from S. E. Coram a filly by Nutwood Wilkes that is entered in the Breeders' Futurity, is keeping her paid up, as he thinks she has a chance to be among the first four in the three-year-old race this year.

NOTES AND NEWS

For list of foals on which fifth payment of \$10 each was made January 2d, in Pacific Breeders' Futurity No. 6, see page 11.

Get your stallion advertisements in the Breeder and Sportsman as soon as possible and don't fail to have them in the big stallion edition which will be issued February 15th.

Stallion cards, gotten out in the very latest style and most complete in every way are now being printed at this office from brand new type.

Lynwood W. 2:20, sire of Sonoma Girl, and Charley Belden, will again make the season at Santa Rosa, where he has been for several years. His owner, H. A. Carlton, thought for a while that he would take the great sire to Stockton for the season of 1908, but so great was the demand for Lynwood W.'s services from the breeders of Sonoma county that he concluded to remain there. His fee will be \$50.

The 2:05 class pacers will furnish great races on the Coast this summer if the purses offered them are big enough to keep them at home. Inferlotta 2:04½ has proven to be not with foal, and a race in which she would meet Sir John S. 2:04½, Sherlock Holmes 2:06½ and a few more of the wind splitters, would draw a crowd that would tax the capacity of the grand stand anywhere.

Silver Dick, the pacer that won a matinee race at Los Angeles on Christmas Day, is by Geo. W. McKinney 2:14½, an own brother to Mr. Frank J. Kilpatrick's new purchase, Washington McKinney. Silver Dick won his race by taking the first and third heats in 2:11½ and 2:12. On the 11th inst. he again won, this time in straight heats in 2:12½ and 2:12. Silver Dick is out of a mare by Bob Mason. He looks like a good prospect to race.

The pacer Silver Coin 2:10 by Steinway out of Jenny Mac 2:09 by McKinney is beginning to show as a sire. The bay gelding Siegfried that paced a mile in 2:12 last Saturday in a matinee at Los Angeles, winning his race, is by Silver Coin. He is owned by Frank B. Long and looks like a comer.

Frank Lieginger of Stockton owns two good mares that he expects to present him with foals this spring. One is by Dorsey's Nephew, the other by Alex Button, and both have speed. He bred them last year to Western Mac, a fine looking and well bred son of McKinney that is out of a Stamboul mare, second dam by Hawthorne. Mr. Lieginger expects something pretty good from this breeding.

There is a chance that Stockton will be in the California Circuit again. On Monday evening next the horsemen of that city will attend a banquet and convention at which a board of directors of the San Joaquin Valley Driving Association will be elected and a new constitution and by-laws submitted. It is proposed that this club will hold matinees during the summer commencing about May 1st, when the track will be in good shape to drive over, and there is a strong feeling that a regular harness race meeting should be held at which fair purses would be hung up. The breeding interests of San Joaquin and adjoining counties are very large and many good stallions are owned there, as well as a large number of well bred mares. We know the Stockton horsemen will make a success of this venture if they undertake it.

Hollister will probably lose its race track and fair grounds, as the Hollister Land Company sold the property last week to parties who propose tearing down the buildings and cutting the fifty-one acres up into small tracts. The price paid was \$6,250. San Benito county's citizens would have done a good thing had they purchased this property for a fair ground.

Payments of \$25 each were made January 1st on twenty-one three-year-olds that are eligible to the Occident Stake for three-year-olds, to be trotted this year at the California State Fair. The probabilities are that each and every one of these three-year-olds will be in training by March 1st.

This number of the Breeder and Sportsman is a good one to preserve, as it contains the lists of entries in the three stakes offered by the California Breeders Association of Los Angeles, the lists of entries in the Occident stakes of 1908 and 1909, besides the list of two-year-olds on which payments were made January 2d in Pacific Breeders' Futurity No. 6. These lists will be valuable for reference.

Thos. Ronan is breaking a colt by Stam B. 2:11½ out of Mountain Maiden by Cresco, the dam of Tom Carneal 2:08½, Kenneth C. 2:13½, etc. The colt is a good looking although he is yet "in the rough" with a winter coat of long hair, and steps out like a sure trotter driven to a heavy breaking cart. He is an own brother to S. K. Trefry's Ben Hur, a colt that will be heard from this year if raced and that will show a 2:15 clip any day.

Barney Simpson has been receiving letters from Chico breeders who are so well pleased with their colts by his horse Arner 2:17½ that they want more of them, and desire Barney to make another season with him there. He is waiting to see whether the proposed track is to be built there, however, as he has a number of young Arners to train this year and must locate where there is a track. He thinks a track at Chico would make it the best horse town in the State.

Frank Jermyn is again in California after spending the summer on the Grand Circuit and the fall in and around New York, and visits Pleasanton nearly every week. He owns a couple of two-year-old fillies by Lynnwood W., sire of Sonoma Girl, that look like good ones, and will be given a chance to prove it.

Lee Wells, President of the Pleasanton Matinee Club, is one of the busiest men in Alameda county at the present time, but always finds time to talk with anyone who has the welfare of the club at heart. While the club held one of the best meetings ever given in California, last year, the cash balance after all bills were paid was not as large as the members expected and they look for a few concessions this year before announcing another race meeting.

DeRyder has Dr. McLaughlin's two grays by Gossiper in his string at the present time, and will sample them a little this spring. They have both worked miles below 2:15, driven by amateurs, and act as though they might trot faster. The Doctor enjoys driving them and hopes the matinees at Pleasanton will be revived this summer.

We think Henry Helman has brought to California one of the best bred young stallions that ever came to the Coast in the two-year-old Alconda, that he has now at Pleasanton and will place in the stud this year to a few mares at \$30. Alconda is by the great Jay Bird, one of Geo. Wilkes' greatest sons, beyond any doubt. Alconda's dam is the producing mare Alma Wilkes by Baron Wilkes, another of the great sires by Geo. Wilkes, and one that has earned the title of Founder of the Futurity Winning Family, owing to his descendants winning so many of these big stakes. The second dam of Helman's colt is Almata by Almont 33, and his third dam that greatest of all brood mares Alma Mater by Mambrino Patchen. Any person at all acquainted with trotting pedigrees will see at a glance that this Jay Bird colt has nothing but producing blood in his veins for generations back. As he is a grand looking youngster, and is limited to a very few select mares, his book should be full within a very few weeks.

The Oregon State Fair will renew the two \$5,000 stakes that were so popular last year, when they were given for 2:15 trotters and 2:09 pacers. California trainers will again try to "get the candy" in both.

An item that will be of interest to all horse owners is the following from last week's issue of the Livermore Herald: "One of our alive and up-to-date farmers has found a way by which he can make his horses use up to a good advantage the poor hay raised on the ranch. H. A. Bettencourt, while looking over one of the farm journals, learned that horses could be made to eat poor hay with great relish if it were sprinkled over with a little cheap molasses and water. He tried it and has made a great success. The horses no longer waste the hay, but clean up every whisp of it that is thrown in the manger and look well. This has been tried in the southern part of California, where hay is scarce and where cheaper qualities of food have to be used. The molasses used can be obtained at the Sugar-Beet Factory in Alvarado.

Says the Rural Spirit: But few people know that the world-famous trotting mare Sonoma Girl was entered in the big trotting stake at Salem in 1904, but went lame that year and was turned out. This goes to show the class of horses these big stakes draw to the State Fair. Sweet Marie, the greatest race mare in America, was attracted by these big stakes in 1903. Big money brings the big horses and the big horses draw the crowds.

Nutwood 2:18½ was certainly a wonderful sire of broodmares. Twenty of this year's new standard performers are out of Nutwood mares, which gives Nutwood a total of 305 through his daughters, or nearly 100 more than his nearest competitor, Red Wilkes, whose daughters have produced 217.

The service fee of Todd 2:14½, the \$30,000 stallion, has been placed at \$200 for the season of 1908.

Any owner who does not have a few entries in the Eastern colt stakes this year will be overlooking the harvest when it is ripe. There never was a time when foals could be staked for so little money. Whether one intends to race East or not, a few entries will be money well invested.

It is said that Gen. W. B. Chisholm, proprietor of Thistle Doune Farm, at Randall, Ohio, will pay California a visit shortly. This farm will campaign a racing stable in 1908, with Bert Shank as trainer. And it may be that the General will keep his eye open for something extra good among the trotters and pacers in training in California.

McKinney 2:11½, whose service fee last year was \$500, is advertised at \$300 for the season of 1908.

Lotta 2:08½ was purchased for Max Woss of Vienna, Austria, a wealthy gentleman, who races a private stable in that country.

Portland will soon announce six big early closing events for its big fall meeting. All will be harness events.

J. V. Perry of Concord recently purchased from Rees Jones of Martinez the pacer Martinez Boy, and will use him on the road.

Fanny Dillard 2:03½ and Trilby Direct 2:08½, returned to this country from England a year ago, are in foal to Baron H. 2:19 and will be bred to Direct Hal 2:04½ after having their foals.

Geo. R. Hall of Boston is to drive Cinch 2:08½ and Terrill S. 2:08½ to pole, while Tuna 2:08½ and Czarina Dawson 2:11½ are to be used as a team on the Philadelphia speedway by Oliver H. Bair.

Walter Cox thinks that the folks who consider Thornway 2:05½ outclassed are away off. He says that the past season is the only one that the son of Steinway has had half a chance, and another year he looks for him to reach his real form.

The death of G. A. Hosington of Adams, N. Y., is reported, having occurred on December 27th, at the age of 70 years. Mr. Hosington has been prominently identified with the harness horse industry for over thirty years. His first horse of note was the stallion Gen. Benton, that in 1872 he sold to Governor Stanford for \$25,000.

Joe Cuicello has a five-year-old stallion by Sidney Dillon, out of Ladywell 2:16½ by Electioneer, that he desires to lease to a responsible party for the stallion season of 1908, as he does not wish to train the horse this year. This is a well made young horse that should be profitable in good hands. See advertisement.

Mr. P. W. Bellingall, the San Francisco customs broker, has as great a proportion of prospects among the youngsters of his breeding as any stock farm in the country can show. He has now at Pleasanton three fillies coming two years old, all out of Secretary mares. Two are by Kinney Lou 2:07½, and one by Del Coronado 2:09½. One of the Kinney Lou fillies is a trotter and the other a pacer, and both show remarkably well for youngsters that are only just being broken. The trotter showed a 2:20 gait last month, and the pacer, although it has only been in harness a few times, has a way of going that makes her look like oil in the can. The Del Coronado is a square going trotter with a most determined way of going and great natural speed. All are very fine lookers and Lou Carillo, who is taking care of them is in love with all three.

No more forcible evidence of the sensational progress that has been made in the development of the trotter and pacer can be had than a comparison of the number of extreme speed performers at both gaits at the close of the racing season of 1908 and those at the present time—a period of ten years. At the close of 1898 the world's trotting champion was Alix 2:03½ and only two other trotters had taken records of 2:05 or better, these being Nancy Hanks 2:04 and Azote 2:04½. The list of pacers with records of 2:05 or better numbered twenty-two, and of these only four had records faster than 2:03, namely, the champion Star Pointer 1:59½, John R. Gentry 2:00½, Joe Patchen 2:01½ and Robert J. 2:01½. So that ten years ago the total number of trotters and pacers in the 2:05 list was just twenty-five. At the close of the racing season of 1907 we find no less than one hundred and seven members of the 2:05 list, thirteen trotters and ninety-four pacers. The last season added but one trotter to the list, Main-sheet 2:05, while seventeen pacers became eligible, which would go to show that it takes a consistent 2:05 pacer to make good on the Grand Circuit.—Stock Farm.

A Kentucky correspondent of the American Horse Breeder says: "J. H. Thayer is getting things in shape for the removal of himself and family to California. The climate of that State is not unfamiliar to him, as he once lived on the other side of the Rockies. After selling his horses, including The Bondsman and about a dozen others at the Midwinter sale in New York, he will dispose of his real estate holdings in Kentucky before taking his departure for the Golden Slope. Mr. Thayer is a native of Georgia and has made a fortune in the trotting horse business. He hopes to regain his health in California.

A. P. Church, the Pleasanton track-horse shoer, has sold his colt by Bonnie McK. 36569 (McKinney-Bousilene 2:14½) out of an Austrian mare, to Mr. McBride of Oregon, the latter paying \$500 for the colt. Mr. McBride has got a good one in the opinion of every horseman on the track and as Henry Helman is to train the youngster it has a chance to do all claimed for it. It is coming two years old and has recently taken to pacing. Mr. McBride saw the colt pace a quarter in 39 seconds the day he bought it.

NEWS OF LOS ANGELES HORSES AND HORSEMEN.

[J. R. Fronefield.]

A few more than one hundred and fifty trotters and pacers are in training at Agricultural Park.

Inferlotta 2:04½ is not in foal after all, and will be out again this year for all the money in sight in her class.

W. H. Murray of Cleveland, Ohio, owner of Italia 2:04½ by Zombro, reports this mare due to foal soon to Moko, and has ordered that she be bred back to him. At the Walnut Hall Farm Italia is pronounced one of the best looking mares in the harem.

Mrs. L. J. H. Hastings has just lately engaged Mr. W. B. Bayless to take charge of her training stable and seven head of choicely bred and extra good-looking youngsters have been taken up. Mr. Bayless comes well recommended and considerable may be expected from several that he will try out. Two choice mares at this place are Sappho 2:15½ by Robert McGregor, in foal to Del Coronado 2:09½, and Princess Louise 2:09½, in foal to Redlac 2:07½. A colt that should surely show himself a trotter is by Parole, out of Sappho. He has all the ear marks of a fast horse and is handsome. Judge Dillon by Sidney Dillon, out of Eveline, the grandam of Sonoma Girl 2:05½, etc., will be trained and raced, and in the meantime priced right to a buyer.

Geo. T. Beckers has decided that Zombro 2:11 shall make the season of 1908 right at home and will pay the shipping expenses one way on suitable mares sent from the upper country, where the horse is well known and has been liberally patronized.

Beside the great speed sire Zombro 2:11, George Beckers has a young stallion by Stam B. 2:11½, out of Whisper, the dam of Zombro. This is a show horse and a perfect specimen of the trotting bred cob. He goes extremely high all around, also carries the blood that gets race horses.

Jake Levy, now living in Los Angeles, but recently from New Mexico, has two good pacers in the stables of Fred Ward. Mr. Levy is a member of the Driving Club and thoroughly enjoyed training Shecam 2:12½ for the last matinee. The horse had not been to the races for a long time and was nothing near ready when he started, but after an easy mile the first heat showed in the second trip that he will do later on. The other horse is a green pacer called Robert S., that has been a half in 1:06 over a half-mile track.

C. T. Hewitt & Son have a stable of fourteen head. As they have fully determined that Inferlotta is not in foal, and her early preparation for many fast miles this season has already commenced. She is walked four miles every day beside a saddle horse and about the first of February will be asked to jog. She is higher in flesh, sound as a bell, and couldn't possibly be in any better condition to go into training for miles that will be worth going to see if the right bunch of pacers hook up together. They have a trotter in Don Z., a gelding by Stam B. 2:11½, out of a Lottery mare, that Mr. Hewitt likes, and another that is sweet on is Phyllis C., a five-year-old mare by Zombro, out of an Altamont dam, that after working a mile in 2:14 and a half in 1:05 last year was carried over. Nothing fast has been asked of her yet this winter. Hewitt & Son like the horse show end of the business, as well as to race, and have a mare with lots of class in Lena Rivers. She goes extremely high all around and will win most anywhere. Their only stallion is a saddle-bred fellow by Hermoso by Rex Montgomery 2011, out of Thelma by Gloster Denmark. This colt is a two-year-old and in a class by himself when it comes to looks and action, and should be a nice horse to breed to.

Red McK. by McKinney, out of Bonnie Red by Red Wilkes, owned by Mr. Murphy of Los Angeles, is the kind of stallion that needs no comment. In breeding and individuality he speaks for himself, and he will soon enter the list of speed sires, as his get are commencing to step.

Will G. Durfee's and Walter Maben's stables are full of speed prospects that can show right now. Each of these trainers has a large stable and much could be said about nearly every horse in both strings. I will only state here that "The Pig" in Maben's hands is all that has been said about him as a horse of phenomenal speed at the pace, and has the cut of a real race horse. Durfee is well supplied with speed siring stallions in Del Coronado 2:09½, Petigru 2:10½ and Carloklin 2:13½. In Regalo, matinee record 2:09, Durfee thinks he has a better trotter than Sweet Marie 2:02, and that really great mare was sheltered many days in the very same stall that Regalo occupies. Clara Madison, a slashing two-year-old filly by Del Coronado, out of a mare by James Madison, is entitled to special mention as a trotter, also the full brother to Copa de Oro 2:07½—but I said I would not say more. They all step.

Everything sired by Highland C. 2:19½, the horse that Henry Struve of Watsonville recently leased from W. A. Clark Jr., shows lots of speed. In Mr. Clark's stable here Gerrety has a three-year-old filly that is trotting like an old campaigner, stepping a mile in 2:37, last quarter in 37 seconds, and is a sample of this stallion's get. Bon Voyage (3) 2:12½ will be raced again this year. Those who have not seen this horse for some time will hardly recognize him. He has developed into a grand looking big horse, and it is freely predicted that he will carry plenty of flesh all through his campaign. Mr. Ger-

rety has been a mile in 2:18 with him, and a quarter in 31 seconds since coming down here. He has all of his speed and everyone wishes him good luck and a lower mark. His weanlings that are being handled are a superb lot and would be a credit to any sire.

In compliment to "Ted" Hayes, Mr. Clark gave him a colt sired by Bon Voyage 2:12½, out of Ruth Mary by Directum 2:05½, second dam Tuna 2:12½, the dam of Buck 2:20 by Ethan Allen Jr., that has turned out to be the record breaker of California, if not of the world. The colt is now about nine months old, and of average size. On January 10th, hitched to a long-shaft Payne sulky, pulling Mr. Hayes, weighing about 165 pounds, he trotted a quarter of a mile in 43½ seconds, and the last eighth in 21½ seconds. The colt did not seem to be trying, at that, for he was more interested in a bunch of colts in the infield and a flock of pigeons on the track close to the grandstand than he was in making a record.

J. H. Williams has a stable of twelve head, including several good matinee performers. Danube 2:12½ and his full brother Dinero (4) 2:20, are two nice stallions, that will serve a few mares, but Mr. Williams' main reliance in the stud this season will be Limonero 2:15½. He will make a full season at the home stable, and as he is well known and has colts to his credit, will get all that is coming to him.

Charles Thayer is located just outside the track with Six Bells and some of his colts that are surely a handsome lot. This stallion is an inbred Chimes and stamps his get with trot.

In about a month I. C. Mosher will take up the Montana bred pacer Mandolin 2:10 and give him a careful preparation for the races. This gelding is now fully grown and seasoned, and will take a lot of beating this year.

Mr. G. A. Pounder finds training his own horses a source of pleasure, and is very enthusiastic in doing all he can to help the light harness horse business. He is just now breaking the full sister to Sonoma Girl, that he has named Lotta Lynwood, about the handsomest filly in the world. It may be she is too good looking to beat her sister, but we will wait and see. He is also going carefully with a green mare called Wenza by Zolock 2:05½, out of a mare by Nutford. She has had several miles between 2:15 and 2:20, and an occasional brush at a very fast clip.

SAN BERNARDINO MATINEE.

Excellent sport was had at Association Park, San Bernardino, on the afternoon of January 8th, by members of the Driving Club there. The track was a little slow, owing to rain the day before, but was in fair condition. The San Bernardino band furnished music.

The races were all clean-cut, and a number of close finishes, especially in the 2:40 pace and 2:20 pace, helped to make plenty of excitement for the crowd. The race in which the most interest of the afternoon centered was probably the 2:20 pace, which went to Adalantha in two straight heats, though Dewey, owned by John Lazenby of Riverside, made a hard fight for honors. The summaries:

Trotting, 2:40 class—

Ben Z., Rutherford & Young	1	1
Lady Patrick, H. H. Eastwood	2	2
Mark Twain, J. T. Wells	3	3

Time—2:31½, 2:42.

Pacing, 2:40 class—

Velox, C. H. Thomas	1	1
Wampo, A. S. Fettler	3	2
Redlands, R. T. Curtis	2	4
Coupon, J. T. Garner	4	3

Time—2:30½, 2:30.

Trotting, 2:50 class—

Lot, Frank Pond	1	1
Prince Valentine, G. F. Carrigan	2	2
Ole, John Lazenby	3	3

Time—2:51, 2:51½.

Pacing, 2:20 class—

Adalantha, G. W. Prescott	1	1
Dewey, John Lazenby	2	2
Maidie, G. H. Judd	3	3

Time—2:20, 2:20.

A Californian who has been putting in a good part of his evenings this winter reading the different theories of breeding fast trotters, and who recently saw the statement made that the champion three-year-old mare Fantasy 2:08½ was to be mated this year with the champion three-year-old stallion Gen. Watts 2:06½, says he would like the different theorists to make a prediction now in accordance with their theories, as to the speed and the gait of the foal. He says that according to the development theory the foal should be a world beater when three years old, while according to the "antis" it will not trot as fast as one sired by the same colt but out of some mare without a record, while according to still another theorist it will have to go to a good school before it will be able to do much of anything. He says that if these writers would only make up the proofs to establish their theories from the list of foals nominated in the Futurities instead of from the Year Books, and print these proofs before the colts trot or pace their races, the public would be better able to judge their value.

LOS ANGELES MATINEES.

The Los Angeles Driving Club held a matinee on Christmas Day, which has not been heretofore reported in these columns, but which was a big success in every way. Fast time was made in three of the events. Hazel Kinney 2:09½ is still able to hold her own with the fastest trotters owned in the club, and in a special event trotted the first and third heats in 2:15 and 2:15½, Ida Millerton winning the second heat in 2:14. In the pacing free-for-all Silver Dick, a gelding by Geo. W. McKinney, won the first and second heats in the fast time of 2:11½ and 2:12, while Cleopatra, a sorrel mare by Zolock, took the second heat in 2:12½. In the free-for-all trot Regalo by Osito won the first heat in 2:09, but the Zombro mare Bellemont took the next two in 2:11½. There was a large crowd to see the sport.

On Saturday last, January 11th, another excellent matinee was given, and five good races decided. Seigfried, a bay gelding by Silver Coin 2:10, won the first race, pacing the first heat in 2:11. Zombretta by Zombro captured the second race, trotting the third and final heats in 2:13½. Silver Dick won the free-for-all pace, fastest time 2:12. Artesia by Iris took the 2:30 pace in straight heats, both in 2:18, while the last race went to Zom Woolsey by Zombro, fastest heat 2:27. The summaries of the two meetings follow:

Christmas Day Races.

Trotting, 2:30 class—

Liberty Song, b g by Liberty Chimes (Clark)	1	2	4	1
Willow, br g by Zombro (Holcomb)	4	1	2	2
Charley Wilkes, b g by Nutwood Wilkes (Sadler)	3	4	1	3
Nat Bruen (Snowden)	2	3	3	4
Almo (Deffebach)	5	5	dr	

Time—2:28, 2:26½, 2:26½, 2:27.

Trotting, special—

Hazel Kinney, br m by McKinney (Reynolds)	1	2	1
Ida Millerton, br m by Millerton (Delorey) ..	2	1	2
Gen. Boodle, br g by Boodle (Fritz)	3	3	3

Time—2:15, 2:14, 2:15½.

Mixed, 3:00 class—

Angie Duryea, b m by Duryea (Hummelbaugh) ..	1	1
Lenora M., b m by Petigru (Morehead)	2	2
Monk R. (Watkins)	3	3

Time—2:30, 2:33.

Pacing, 2:30 class—

Beulah, ch m by Nutwood Wilkes (Clark)	1	1
Joe Athby, b h by Athby (Nowlin)	2	5
Artesia, b h by Iris (Jonas)	9	2
Isabelle (Love)	3	3
Zella Z. (Dickson)	6	4
Rancho del Paso (Delorey)	4	6
Tom Hayes (Snowden)	5	8
Irish (Watkins)	8	7
Lady Sefton (Walker)	7	9

Time—2:26, 2:24.

Pacing, free-for-all—

Silver Dick, gr g by Geo. W. McKinney (Reynolds)	1	2	1
Cleopatra, s m by Zolock (Garland)	2	1	2
McO'Dea, rn g by Zolock (Pounder)	3	3	3

Time—2:11½, 2:11½, 2:12.

Trotting, free-for-all—

Bellemont, b m by Zombro (Smith)	2	1	1
Regalo, b g by Osito (Williams)	1	3	2
Glory, br m by Zolock (Pounder)	3	2	3

Time—2:09, 2:11½, 2:11½.

Saturday, January 11th, Races.

Pacing, 2:15 class—

Siegfried, b g by Silver Coin (Long)	1	1
Lohengrin, b g by Charleston (Dodge)	2	2
Beulah, s m (Clark)	3	3

Time—2:12, 2:14.

Trotting, 2:14 class—

Zombretta, br m by Zombro (Smith)	2	1	1
Modicum, b m by Geo. Ayers (Morris)	1	4	2
Buck, b g by McKinney (Clark)	3	2	3
Glennetta, b m by Rex Gifford (Keller)	4	3	4
Knight, b g by Geo. W. McKinney (Peters) ..	6	5	5
Sadie McK., blk m by Coronado (Garland) ..	5	dr	

Time—2:17, 2:18½, 2:13½.

Pacing, free-for-all—

Silver Dick, gr g by Geo. W. McKinney (Payton)	1	1
Cleopatra, s m by Zolock (Garland)	2	2
Mac O'Dea, rn g by Zolock (Pounder)	3	3

Time—2:12½, 2:12.

Pacing, 2:30 class—

Artesia, b h by Iris (Jonas)	1	1
Zella Z., s m by Zombro (Dickson)	2	3
Shecam, b m (Levy)	4	2
Irish, s g (Watkins)	3	5
El Diablo, s g (McLellan)	5	4
Lady Sefton, b m (Walker)	6	6

Time—2:18, 2:18.

Mixed, 2:40 class—

Zom Woolsey, b h by Zombro (Sherwood)	1	1
Bonnie Crocket, b m (Pierce)	2	4
Charles N., s s (Watkins)	5	2
Maggie Mason, s m (Moya)	3	3
Vilda V., b m (Higgins)	4	5

Time—2:30, 2:27.

CALIFORNIA BREEDERS' ASSOCIATION STAKES.

Entries Received for California Breeders' Futurity No. 1, California Breeders' Stake and Canfield Stakes.

When the California Breeders' Association of Los Angeles was organized last year it inaugurated and arranged for three colt stakes, but by some inadvertence only two were advertised. It seems that the California Breeders' Futurity No. 1, for the foals of mares bred in 1907, with conditions very similar to the Pacific Breeders' Futurity received 187 entries. This stake is guaranteed to be worth \$7,000.

The California Breeders' Stake is the one that failed to be advertised, although blanks for it were sent out. It is for foals of 1907, to trot or pace as three-year-olds in 1910. It has received eighty-eight entries. This stake is for the money paid in, with \$400 added by Mr. C. A. Canfield, president of the association.

The Canfield Stake is for foals of 1907, to trot or pace as two-year-olds in 1909. This stake also has \$400 added to the stake money by President Canfield. It received fifty entries. The lists of entries in all three stakes are as follows:

California Breeders' Futurity No. 1.

Jno. Suglian's Foxey by Valentine Boodie, bred to Tom Smith.

Frank H. Burke's Wanda 2d by McKinney, bred to Bon Voyage; Lady Belle Isle by Eros, bred to Bonnie Direct.

W. G. Durfee's Jessie Madison by Jas. Madison, bred to Del Coronado; Atherine oy Patron, bred to Del Coronado; No Name by Gen. Beverly, bred to Del Coronado; Directoc by Direct, bred to Del Coronado; Vela McKinney by McKinney, bred to Murray M.; Irene S. by Petigru, bred to Zolock; Rose of Peru by Charleston, bred to Del Coronado; Belle Pointer by Star Pointer, bred to Del Coronado; Beatrice Zombro by Zombro, bred to Owynex; Lulu Wilkes by Bay Wilkes, bred to Del Coronado; Lady Alexandria by Bob Mason, bred to Del Coronado; Little Agnes by Gossiper, bred to Del Coronado; Polka Dot by Mendocino, bred to Del Coronado; Swift Bird by Waldstein, bred to Del Coronado; Queen S. by Sable Wilkes, bred to Del Coronado; Subito by Steinway, bred to Del Coronado; Nona by by Direcho, bred to Del Coronado; Tacoma by Guycesco, bred to Del Coronado; Queen Director by Montana Director, bred to Del Coronado.

Cornell Bros.' Queen Basler by Robt. Direct, bred to Light Rose; Miss Stone by Stoneway, bred to Light Rose.

W. A. Hunter's Lady B by Stephen A, bred to Turban.

T. B. Gibson's Maggie by Soudan, bred to Iran Alto.

C. A. Canfield's Mamie Elizabeth by Red Regent, bred to Walter Barker; Dixie W by Zolock, bred to Redlac; Cleo by Conifer, bred to Walter Barker; Sue by Athadon, bred to Walter Barker.

H. J. Myres' Gladys M. by Ketchum, bred to Del Coronado.

Alex. Brown's Majella B by Nushagak, bred to Prince Ansel; Daisy B by Waldstein, bred to Prince Ansel; Lottie by San Diego, bred to Prince Ansel; Lauress by Mendocino, bred to Prince Ansel; Serpole by Mendocino, bred to Prince Ansel; Josie D by Nutwood Wilkes, bred to Prince Ansel; Viola by Gen. Benton, bred to Prince Ansel; Mamie Martin by Nushagak, bred to Prince Ansel; Steina by Steinmont, bred to Prince Ansel; Steina by Steinmont, bred to Nushagak; Zanita by Electricity, bred to Nushagak; Nosegay by Langton, bred to Nushagak.

W. A. Clark Jr.'s Bay Leaf by Telephone, bred to Kenneth C; Bon Mot by Erin, bred to Moko; Centereye by On Stanley, bred to Highland C; Christobel by Chas. Derby, bred to Star Pointer; Electric Maiden by Electric Bell, bred to Tertius; Fussy B by Stam B, bred to Highland C; Lucy May by Oakland Baron, to Bon Voyage; Patty D. by Ultimus, bred to Highland C; Reino Del Diablo by Diablo, bred to Highland C; Ruth Mary by Directum, bred to Bon Voyage; Sally Lunn by Wiggins, bred to Bon Voyage; She by Abbottsford, bred to Bon Voyage.

Mrs. L. J. Hastings' Princess Louise by Coronado, bred to Redlac; Sappho by Robt. McGregor, bred to Del Coronado.

I. J. Garcia's Tanita by Gen. Beverly, bred to Del Coronado.

C. Nanny's Lucy by Bismarck Jr., bred to Athby. J. W. Snowden's Scrappy Nell by Pellatier, bred to Redlac; Minnie M. by Col. K. R., bred to Redlac.

Geo. L. Warlow's Cora Wickersham by Junio, bred to Athadon; Narcola by Athadon, bred to Stanford McKinney; Sextette by Athabio, bred to Stanford McKinney; Lustrine by Onward, bred to Stanford McKinney; Santanette by Neernut, bred to Glenwood.

Pat Sweeney's Lady R. by Col. K. R., bred to Athadon.

Chester H. Warlow's Bessie by Yosemite, bred to Athadon.

A. Allen's Lady Allen by Echo Chief, bred to Tom Smith.

F. N. Frary's Ruth by Brigadier, bred to Herbert Dillon; Nora Falrose by Falrose, bred to Herbert Dillon.

T. M. Brents' Reina del Norte by Del Norte, bred to Coronado.

A. Dudley's Bee Sterling by Sterling, bred to Lorna Doone by Bayswater Wilkes, bred to

Jules Verne; Paprika by Oro Belmont, bred to Palite. J. W. Marshall's Trix by Nutwood Wilkes, bred to Star Pointer; Madaline by Demonio, bred to Zolock; Lovanna by Dictatus, bred to Demonio.

W. C. McCully's Concha by A. W. Richmond, bred to Cedric Mac.

W. S. Harkey's Deviletta by Diablo, bred to Hal B. I. L. Borden's Allie Cresco by Cresco, bred to Barney Bernatto; La Belle Altamont by Altamont, bred to Barney Bernatto.

Dr. Wm. Dodge's Molly Rex by Atto Rex, bred to Limonero.

Wm. Garland's Hawthorne by McKinney, bred to Redlac.

J. N. Anderson's Nora D. by Del Sur, bred to Bon Voyage.

J. F. Davis' Miss Sidney Dillon by Sidney Dillon, bred to Bon Voyage.

J. H. Poole's Laurell Inca by Inca, bred to Direct Heir.

Alfred Solano's Vivandier by McKinney, bred to Audubon Boy.

Dana Perkins' Zaza by Bay Bird, bred to Zombro.

M. H. Tuttle's Ramona B. by Stam B., bred to Zombro.

W. E. Tuttle's Maud McAlto by McKinney, bred to Zombro; Belle Carter by Nutwood Wilkes, bred to Zombro.

C. B. Bigelow's Lucy B. by Alex. Button, bred to Prince Ansel.

Wm. Hashagen's Chitiwee by Chas. Derby, bred to Kinney Rose; Leta H. by Nutwood Wilkes, bred to Kinney Rose.

Charles Burlock's Tia Juana by Kewannah, bred to Strathway; Dorothy Welborn by St. Vincent, bred to Strathway.

Thomas Brodnax's Mary Chimes by Chimes, bred to Strathway; Bonnie Red by Red Wilkes, bred to Strathway.

Zibbell & Son's Kate Lumry by Shadeland Onward, bred to Tom Smith; Evangie by Shadeland Onward, bred to Tom Smith.

H. H. Helman's Electress Wilkes by Nutwood Wilkes, bred to Jay Bird colt.

R. B. Moorehead's Mowitza by Soudan, bred to Del Coronado.

James W. Rea's Mrs. Weller by McKinney, bred to Iran Alto.

G. W. Pounder's Magnet by George Stock, bred to R. Ambush.

F. B. Stockdale's Selda by Stormy John, bred to California Guide.

F. E. Ward's Lady Madison by James Madison, bred to Zolock.

G. A. Pounder's May M. by McKinney, bred to Audubon Boy; Nellie Lee by McKinney, bred to Johnnie Bull; Rosie O'Moore by Sidmoor, bred to Johnnie Bull.

Wm. Morgan's Grace McK. by McKinney, bred to Direcho; Sona by McKinney, bred to Redlac.

J. Walker's Lassie by Strathway, bred to Red McK. Carey Montgomery's Lady Caretta by Nutwood Wilkes, bred to Prince Ansel.

J. A. Mackinnon's mare by Major Ban, bred to Sky Pointer Jr.

Thomas Holmes' Happy Maid by Happy Prince, bred to Zolock.

George W. Kirkman's Sweet Way by Stoneway, bred to Radium; Bell Basler by Robt. Basler, bred to Stoneway.

J. A. Kirkman's Carrie by A. W. Richmond, bred to Stoneway; My Way by Stoneway, bred to Stoneway.

J. H. Torrey's Manila by Shadeland Hero, bred to Zolock; Elloretta by Zombro, bred to Zolock.

F. P. Ogden's Lou by Ira, bred to Monocrat.

G. R. Myers' Neer Bird by Neernut, bred to Red McK.

Chas. W. Winter's Pattie McKinney by Geo. W. McKinney, bred to Redlac.

Alex. H. Davidson's Lillian Zolock by Zolock, bred to Col. Green.

Jacob Broliar's Ethel Basler by Robt. Basler, bred to Best Policy.

L. H. Todhunter's The Silver Bell by Silver Bow, bred to Bon Voyage; Loma B. by Stam B., bred to Bon Voyage; Zomitatia by Zombro, bred to Bon Voyage; Janet B. by Stam B., bred to Zombro.

Chas. Middleton's Nina C. by Stoneway, bred to Sky Pointer Jr.

J. H. Williams' mare by Sky Pointer, bred to Autumn Boy.

P. Garnier's Clara by Gossiper, bred to Limonero.

C. H. Williams' Twenty-Third by Director, bred to Star Pointer; Alta Nola by Altamont, bred to Searchlight Rex.

L. A. Denker's Bernie Wilkes by Athol Wilkes, bred to Limonero.

Harry D. Brown's Grace Cole by Nutwood Wilkes, bred to Arner.

J. F. Byrne's Dixie S. by Zolock, bred to Direct Heir.

Ed Roberts' Colton Maid by Maximillian, bred to Arrow Stanley; Zolo by Zolock, bred to Arrow Stanley.

J. A. Lane's Vaida by Diablo, bred to Humboldt Dillon.

Fred Kline's Miss Handsome by Stamboul, bred to Zolock.

W. R. Johnson's Maud by Stamboul, bred to Greco B.; Sadie Moor by Grand Moor, bred to Greco B.; Banker's Daughter by Arthur Wilkes, bred to Greco B.; Myrtle Kinney by McKinney, bred to Sadi Moor; Belle W. by Harry Wilkes, bred to Sadi Moor.

Wm. Manske's Eralut by Tipton Almont, bred to Redlac.

E. S. Train's Belle Fredericks by ———, bred to Steam Beer.

W. L. Vance's Elisa S. by Alcantara Jr., bred to Bon Voyage; Mollie McCune by Lynmont, bred to Sir John S.

John Renatti's Madaline S. by Horace S., bred to Sir John S.

W. A. Glasscock's Grey Bess by Sir Richard, bred to Zolock; Bay Queen by ———, bred to Murray M.

S. G. Cousins' Dolly Wheeler by Joe Wheeler, bred to R. Ambush.

R. A. Fuller's Pelee by Zolock, bred to Raymon.

I. W. Hazelett's Inaugurita by Zolock, bred to Redlac.

Frank B. Long's Lady L. by ———, bred to Zolock.

Valencia Stock Farm's Rose Drop by Sidney, bred to R. Ambush.

A. Morris Fosdick's Athene by Dexter Prince, bred to Bon Voyage.

R. A. Cushman's Daisy McKinney by McKinney, bred to Zolock; Trilby Maid by Truman, bred to Lynwood W.

Miss B. Fitzgerald's St. Gertrude by Diablo, bred to Palo King; Nellie by Advocate, bred to St. Anthony.

Frank E. Alley's Welladay by Steinway, bred to Bon Voyage; Lady Lesmo by Memo, bred to Diawood; Diavola by Diablo, bred to Zolock.

Geo. W. Putnam's Tessie Tildon by Bay Wilkes, bred to Star Pointer.

E. M. Conroy's Frances C. by Wasatch, bred to Star Pointer.

L. L. Puderbaugh's Elizabeth S. by Nushagak, bred to Zombro.

W. R. Murphy's Lady Marlow by Red Star, bred to Red McK.; Lady Gossiper by Gossiper, bred to Red McK.

J. J. Rupp's Birdie Clay by Bay Bird, bred to Red McK.

C. H. McFeely's Glassy by Arthur Wilkes, bred to Bon Voyage.

E. T. Parker's Naulahka by Nutford, bred to Del Coronado.

Thos. Ryan's Kitty by ———, bred to Jimmy S.

M. C. Keefer's Advosta by Advertiser, bred to Prince Ansel; Annie McKinney by McKinney, bred to Jay Bird; Dimentes by Diablo, bred to Zombro.

C. A. Spencer's The Bloom by Nushagak, bred to Zombro.

J. E. Montgomery's Effie Logan by Durfee, bred to Star Pointer.

Hemet Livery Stables' Lady Woolsey by Woolsey, bred to Geo. W. McKinney; Nealy W. by Geo. W. McKinney, bred to On Stanley; Lady Zombro by Zombro, bred to Geo. W. McKinney; Belle by Conifer, bred to Geo. W. McKinney.

California Breeders' Stake—Foals of 1907.

Chestnut foal by Diablo-Bell by April Fool, Jno. Suglian.

Bay foal by R. Ambush-Dolly Wheeler by Joe Wheeler, S. G. Cousins.

Bay filly by Direcho, F. B. Long.

Bay colt by Zombro-La Belle by Sidney, Valencia Stock Farm.

Brown colt by Zombro-Puckachee by Dexter Royal, Valencia Stock Farm.

Bay filly by Amado-Rosedrop by Sidney, Valencia Stock Farm.

Brown filly by Amado-Glendower by Mohawk Chief, Valencia Stock Farm.

Black foal by Del Coronado-Bonnie Ailes by Faustino, J. A. Fairchilds.

Bay foal by Bon Voyage-The Silver Bell by Silver Bow, L. H. Todhunter.

Brown foal by Bon Voyage-Lomo B. by Stam B., L. H. Todhunter.

Bay foal by Zombro-Florette by Prince of Norfolk, L. H. Todhunter.

Sorrel foal by Stoneway-Viva by Antevolo, J. A. Kirkman.

Bay colt by Parole, dam Sappho, Mrs. L. J. Hastings.

Bay foal by Judge Dillon-Mowitza, Mrs. L. J. Hastings.

Sorrel foal by Stoneway-Susie D. by Diamond Denmark, G. W. Kirkman.

Sorrel foal by Stoneway-Glory, G. W. Kirkman.

Black foal by Stoneway-Bell Basler by Robt. Basler, G. W. Kirkman.

Black foal by Radium-Lady Stoneway by Stoneway, G. W. Kirkman.

Brown foal by California Guide-Mabel, F. B. Stockdale.

Black foal by Zombro-Jenny by Black Diamond, A. H. Belt.

Bay foal by Zombro-Lady S. by Neernut, J. Walker.

Brown foal by Direcho-Lassie by Strathway, J. Walker.

Sorrel filly by Lynwood W.-Maud Fowler by Anteeo, G. A. Pounder.

Sorrel foal by Young Hal-Rosie Moore by Sidmore, G. A. Pounder.

Bay foal by Direcho-Lady Madison by James Madison, F. E. Ward.

Bay filly by Athadon-Nugget, D. L. Bachant.

Bay filly by Star Pointer-Effie Logan by Durfee, J. C. Montgomery.

Bay filly by Geo. W. McKinney-Lady Woolsey, Hemet Livery Stable.

Bay colt by Geo. W. McKinney-Belle by Connifer, Hemet Livery Stable.

Bay foal by Zombro-Manila by Shadeland Hero, J. H. Torrey.

Brown filly by Jimmy S.-Kitty, Thos. Ryan.

Black colt by Del Coronado-Queen Woolsey by Woolsey, E. E. Sherwood.

Sorrel foal by Nutwood Wilkes-Dot McKinney by McKinney, W. T. Sesnon.

Bay foal by Star Pointer-Frances C. by Washsatch, E. M. Conroy.

Bay colt by Exchange-Thumza by Zolock, H. P. Herman.

Bay colt by Bon Voyage-Welladay by Steinway, F. E. Alley.

Bay colt by Bon Voyage-Mabel Wynn by Zombro, F. E. Alley.

Bay colt by Del Coronado-Pineapple by Woolsey, W. G. Durfee.

Bay filly by Del Coronado-Belle Pointer by Sky Pointer, W. G. Durfee.

Bay colt by Del Coronado-Queen Director by Montana Director, W. G. Durfee.

Dunn filly by Del Coronado by Gen. Beverly, W. G. Durfee.

Bay colt by Bon Voyage-Reina del Diablo by Diablo, W. A. Clark Jr.

Brown colt by Bon Voyage-She by Abbotsford, W. A. Clark Jr.

Bay filly by Highland C.-Patty D. by Ultimus, W. A. Clark Jr.

Brown colt by Bon Voyage-Ruth Mary by Directum, W. A. Clark Jr.

Bay colt by Bon Voyage-Lucy May by Oakland Baron, W. A. Clark Jr.

Sorrel filly by Zolock-Myrtha Whips by Whips, W. A. Clark Jr.

Brown filly by R. Ambush-Hytu by Happy Prince, J. H. Kelley.

Sorrel colt by Bolock-Violet by Conn, J. H. Kelley.

Bay foal by Billy Dunlap-Miss Stone by Stoneway, Cornell Bros.

Brown filly by Prince Ansel-Majella B. by Nushagak, Alex. Brown.

Bay filly by Prince Ansel-Daisy B. by Waldstein, Alex. Brown.

Chestnut filly by Prince Ansel-Mamie Martin by Nushagak, Alex. Brown.

Bay filly by Nushagak-Kinocha by McKinney, Alex. Brown.

Brown colt by Nushagak-Steina by Steinmont, Alex. Brown.

Black colt by Nushagak-Zamita by Electricity, Alex. Brown.

Brown colt by El Rio Rey-Lottie by San Diego, Alex. Brown.

Bay filly by El Rio Rey-Josie D. by Nutwood Wilkes, Alex. Brown.

Bay colt by El Rio Rey-Bonnie Derby by Chas. Derby, Alex. Brown.

Bay foal by Bon Voyage-La Moscovita by Guy Wilkes, W. E. Detels.

Bay filly by Bon Voyage-Hawthorne by McKinney, Wm. Garland.

Sorrel filly by Cresco Wilkes-La Belle Altamont by Altamont, I. L. Borden.

Bay colt by Star Pointer-Trix by Nutwood Wilkes, J. W. Marshall.

Black colt by Zolock-Madeline by Demonio, J. W. Marshall.

Bay filly by Demonio-Lauanna by Waldstein, J. W. Marshall.

Bay filly by Prince Ansel-Ima Jones by Captain Jones, E. D. Dudley.

Bay filly by Wayland W.-Hattie Fowler by Robin, S. B. Wright.

Bay colt by Del Norte-Miladi B. by Chehalis, Thos. H. Brents.

Bay filly by Del Norte-Laurelia by Caution, Thos. H. Brents.

Brown colt by Senator H.-Mattie Norte by Del Norte, Thos. H. Brents.

Sorrel foal by Stoneway-Irene by Iran Alto, O. C. Higgins.

Bay foal by Stoneway-Sister Logan by Gen. Logan, O. C. Higgins.

Bay foal by Star Pointer-Roda Fay by Gen. Logan, D. B. Moshier.

Bay filly by Sonny-Electa by Escort, W. H. Samson.

Bay filly by Athasham-Bessie by Yosemite, C. H. Warlow.

Bay colt by Stanford McKinney-Donnatrine by Athadon, G. L. Warlow.

Bay filly by Prince Ansel-Ima Jones by Capt. Jones, E. D. Dudley.

OCCIDENT STAKE HAS 81 ENTRIES.

The Occident Stake for foals of 1907 to trot in 1910 closed January 1st with 81 entries, which is an increase over the lists received for the stakes of the past few years as the stake for foals of 1906 received 77 entries, and those for foals of 1905 and 1904 received but 66 entries each. Secretary Filcher writes us that he will send the lists of second and third payments made January 1st on the stakes of 1909 and 1908 in time for our next

issue. The list of foals of 1907 entered in the Occident to be trotted in 1910, is as follows:

Thos. H. Brents' b f Princess del Norte by Del Norte-Laurelia.

Robt. S. Brown's ch c Mendolock by Zolock-Arios.

Alex. Brown's b f by Prince Ansel-Daisy B.; br f by Prince Ansel-Majella B.; b f Nukina by Nushagak-Kinocha; br c Rey Lot by El Rio Rey-Lottie.

Jacob Broilhar's gr c Kinney B. by Red McK.-Ethel Basler.

Martin Carter's b c by Nutwood Wilkes-Mora Mac. J. L. Charlton's ch f Miss Jasper by Dumont S.-Nellie J.

W. A. Clark Jr.'s br c Jean Valjean by Bon Voyage-She; b c Bon Vivant by Bon Voyage-Reina; b f Perissa by Highland C.-Patty D.; s f Nona Whips by Zolock-Myrtha Whips; b c Voyageur by Bon Voyage-Lucy May.

Robt. F. Curtis' br f Molly McGinn by Adjutant-Connie.

Wm. E. Detels' b c Bon Guy by Bon Voyage-La Moscovita.

W. G. Durfee's b c by Del Coronado-Pineapple.

E. D. Dudley's b c Pal by Palite-Lorna Doone.

I. N. Harlan's b c Prince Alto by Iran Alto-Rita R. Mrs. L. J. Hastings' b c Robin Parole by Parole-Sappho.

Wm. Hashagen's ch h Kinney by Kinney Rose-Chitiwee; gr s Kinney H. by Kinney Rose-Lola H. H. H. Hellman's b m by Kinney Lou-Electress Wilkes.

E. P. Heald's b f by Count Hannibal-Nona Washington.

H. S. Hogoboom's br c Clear Voyage by Bon Voyage-Carrie Malone; b c Fred Raschen by Iran Alto-Lady Raschen.

S. H. Hoy's b c Laverne by Jules Verne-Miss Davis.

J. B. Iverson's s f Salinas Girl by Nutwood Wilkes-Ivoneer; b f Amy McK. by Bonnie McK.-Amy I.; s f Rose Wilkes by Eugeneer-Roseate.

M. C. Keefer's blk c Nuvosta by Nushagak-Advosta.

J. H. Kelly's s s by Bolock-Violet; b f by R. Ambush-Hyto.

La Siesta Ranch's b c Roman Boy by Zolock-Wanda; b c It by Bonnie Direct-Wanda II.; b c Lord Isle by Zolock-Lady Belle Isle.

W. K. Lindsay's blk f Dolly Maden by Almaden-Queen.

M. L. Lusk's gr f Alma Belle by Almaden-May Belle Blanche.

J. W. Marshall's blk c Zoblack by Zolock-Madeline.

Abe Marks' b m Ethel Marks by Wayland W.-Cecille M.

W. S. Maben's ch f by Walter Barker-Mamie Elizabeth.

W. C. McCully's br s Sylmar by Cedric Mac-Concha.

W. W. Mendenhall's b g Strathdown by Strathway-Elsie Down.

Edmund Miller's b f Stambonita by Stam Boy-Straightness.

M. D. Mosher's br c Heinie Sneider by Zombro-Athalene.

C. Nanny's b f Ella by Athby-Lucy.

Ed. S. Parker's b c by Bon Voyage-Missie Medium.

W. C. Parsons' s f by Albert Mac-Bell.

Henry Peters' br c by Jules Verne-Little Babe.

G. A. Pounder's s f Lotta Lynwood by Lynwood W.-Maud Fowler.

C. C. Price's b f Miss Price by Zombro-Miss Williams.

Thos. Ryan's br f Miss May Belle by Jimmy S.-Kitty.

F. D. Sexton's b f by T. C.-Squaw.

L. C. Shell's br c Kid O. by Bonnie McK.-Cayuse Mollie.

Chas. F. Silva's b f by Demonio-Polka Dot; b f by Demonio-Queen S.

N. M. Strong's b f You Tu by R. Ambush-Ajeta.

Geo. T. Trowbridge's blk f Miss Trowbridge by Guy Dillon-Antee Rosa.

J. H. Torrey's b f Zella by Zombro-Manila.

L. H. Todhunter's b f by Bon Voyage-The Silver Bell; br c by Bon Voyage-Loma B.; b c by Zombro-Florette.

E. S. Train's ch f Brewery Belle by Steam Beer-Belle Fredericks.

Valencia Stock Farm's b c by Zombro-La Belle; br c by Zombro-Puckachee; b f by Amado-Rosedrop.

Geo. L. Warlow's br c Stanadon by Stanford McKinney-Donnatrine; blk c McCola by Stanford McKinney-Narcola; br f Shamtrine by Athasham-Lustrine; b c Sexsham by Athasham-Sextette; blk c Strathboule by Stamboulette-Strathalie; b c Donasham by Athadon-Cora Wickersham.

C. H. Warlow's b f Ateka by Athasham-Bessie.

Fred E. Ward's b f Bess J. by Direcho-Lady Madison; b f Folly by Direcho-untraced.

C. H. Williams' b f by Nutwood Wilkes-Twenty-Third.

S. B. Wright's b f by Wayland W.-Hattie Fowler.

F. E. Wright's b f Toots W. by Stam B.-Iadora; br f Expedio by Lijero-Mater Expedio.

J. Walker's b h by Zombro-Lady S.

W. W. Yandell's c Jim Johnson by Osito-Black Bess.

Second Payment, Occident Stake, 1909.

D. L. Bachant's ch f Sadie B. by Athadon-Nugget.

Geo. T. Beckers' blk c High Pride by McKinney-

CONDUCTED BY J. X. DeWITT

THE CALIFORNIA ANGLERS' ASSOCIATION.

What the California Anglers' Association, an enthusiastic and representative body of active sportsmen, has accomplished and the possibilities of future work for the general welfare in the propagation and protection of game fishes in this State is pleasingly apparent in the following excerpts taken from the third annual report of the Board of Directors:

During the short three years that the association has been in existence much has been effected in the line of better protection and propagation of both fresh and salt water game fishes. The club is quasi-public in its standing, its aim and scope in all pertinent matters has been carried out on broad lines in the endeavor to preserve one of the natural heritages of man.

The showing made during the past year in obtaining good legislation, in defeating bad legislation; in stocking near-by Coast streams with fish and in a coherent esprit du corps in matters of importance to the fraternity, should alone, if for no other reasons, appeal strongly to the angling sportsmen and lover of out-door life and through a common sentiment of interest arouse the desire for affiliation and co-laboration, both by personal effort and contribution of the individual mite for the general good of a worthy purpose and cause.

At the last annual meeting, by resolution adopted, the Board of Directors selected a committee to urge upon the Legislature, then in session, the enactment of several needed laws for the better protection of trout and striped bass.

"Your Board is pleased to report that its work along the lines of securing good legislation and preventing bad legislation at the last session of the Legislature, was productive of great good, and such work has been of great value towards protecting our game fishes, and also of great benefit to all anglers and out-door enthusiasts.

"Many bills affecting game fishes were introduced during the session of the Legislature and more or less vigorously supported by their authors and adherents.

"Notably among the bills were: Senate Bills 113, 82, 545, 731, 739, 833 and Assembly Bills 386 and 827.

"Senate Bill 113, that became a law after many amendments thereto, was amendatory of many sections of the Penal Code, all relating to fish. Its principal feature was an amendment to Section 628A of the Penal Code, known as the striped bass law. The section of the bill as proposed and advocated by many was as follows:

"Section 2—Section 628A of the Penal Code of the State of California is hereby amended to read as follows:

"628A (Striped Bass). Every person who, at any time, buys, sells, offers for sale, or has in his possession for sale, any striped bass of less than five pounds in weight, or who, at any time offers for shipment, ships or receives for shipment or transportation from the State of California to any place in any other State, Territory or foreign country any striped bass of less than five pounds in weight, caught or taken in the waters of this State, is guilty of a misdemeanor; provided that the possession of such striped bass shall be prima facie evidence of the fact that such striped bass were caught or taken in the waters of this State."

"This bill virtually sought to remove all protection to the striped bass as anyone can readily understand from its reading. Nowhere in its provisions did it seek to make it unlawful for anyone to take, kill, destroy or have in one's possession, a bass under five pounds in weight, but simply sought to make it unlawful to buy, sell or have in one's possession for sale. One could take, kill, destroy and have in his possession so long as he did not sell or offer the same for sale.

"Your Board is pleased to state that the efforts of the association to defeat this measure and retain the present law for striped bass was successful, irrespective of the great fight that was made for its passage. In this contest for the preservation of the striped bass this organization stood alone and every angler for this game fish owes a debt of gratitude to the association that successfully fought to retain the present law.

"Your Board caused Assembly Bill 829 to be introduced. This bill in brief sought to place a closed season upon striped bass. This measure was not pushed on account of a strong opposition and the fear that our forces would be weakened in the fight against the proposed five-pound bass law.

"Further, we caused to be introduced Senate Bill 82 and Assembly Bill 811, which afterward were converted into the General Appropriation Bill and passed. This was an appropriation of \$7,000 with which to erect a striped bass hatchery. This was in line with what the association proposed doing itself, prior to April, 1906.

"With a part of this appropriation, the State Board of Fish Commissioners in May of last year, acting with the Federal Bureau of Fisheries, erected a hatchery upon Bouldin Island in the San Francisco River. The first season's take of eggs

amounted to something over eighteen million. The largest number of eggs ever taken in any Eastern State was eleven million in a season. It is confidently expected that this year's take will be from fifty million to one hundred million eggs. The establishment of the hatchery for the artificial propagation of the striped bass will insure the future of this magnificent game and table fish.

"This Association has been and is the pioneer in the advocacy of the artificial propagation of the striped bass, and the great results that have been achieved by reason of its untiring zeal and activity, justly entitles its position as the foremost organization on the Pacific Coast.

"The present law making it unlawful to take a trout, steelhead trout or salmon less than five inches in length was introduced in the Legislature, advocated by and became enacted at the instance of this association. The wisdom and justice of this law is recognized by all.

"Your Board wishes to call the attention of the members, and all anglers who frequent the Coast streams, to a measure that passed the Legislature and became a law irrespective of a strong fight made by us against the same. The changing of the trout season from April—November to May 1st to November 15th was deemed unwise by your Board because it would interfere with the angler of our Coast streams when fishing was at its best, and such change would not be of any greater protection to the fish than formerly. The sentiment of up-country Legislators being so strong for the change and realizing that the change would be made, we secured an amendment to the then pending bill in and whereby the Coast stream angler is permitted to fish for trout during the month of April in tide-water. Anglers generally, and especially those who fish at Point Reyes, and at other places along the tidal waters of erstwhile Coast streams, can and should appreciate the work of this association in securing this compromise.

"One of the bills introduced in the Legislature was Assembly Bill 386. This measure sought to amend the law of trespass. The measure was wicked and vicious. By its provisions one who should go upon any lands, whether enclosed, cultivated or otherwise where signs were displayed forbidding shooting or fishing, without written permission of owners would be deemed guilty of a trespass and punished accordingly. We are pleased to say that the bill was killed in committee and full credit is due this association for its death.

"This association stood behind the bill appropriating \$7,500 for the acquisition of a railway car for the better distribution of the game fishes in stocking the streams and lakes. We approved all the appropriation bills introduced at the instance of the Fish Commission and did everything that we could for their successful passage.

"This association at its last annual meeting gave expression favoring a license tax of one dollar upon those who angle for game fishes, and during the past year such sentiments have been taken up and endorsed by clubs and individuals to such an extent that it may well be said that the angling sportsmen of California favor such a tax. Your Board is thoroughly of the opinion that the next Legislature will take the subject up and pass a measure favoring such a license. The solution of acquiring an ample fund with which to propagate and thoroughly protect our game fishes will be solved by the license tax."

In the important matter of stocking several streams within easy reach of San Francisco the report states:

"Great interest has been taken in the propagation, planting and protection of game fishes by the angling sportsmen during the past year, not only here in California, but all over this country. Many of the Governors of various States and Territories during the past year refer to the absolute necessity of stocking streams and lakes and keeping such waters stocked with game fishes, showing as it does the hold that the cause of fish protection has all over the United States; and, judging from the reports of the various Fish Commissions throughout the country, great and good work is being done in this direction.

"During the past year your Board took up the proposition of stocking the Paper Mill Creek in Marin county and Sonoma Creek in Sonoma county. These streams are notable among the numerous trout streams of California, and especially so in the former. The nearness of these streams to the center of population, and the nominal cost to an angler to fish them, have endeared these two fishing waters to the anglers in and about our bay cities.

"On the 28th of last September your Board planted 50,000 rainbow trout and 10,000 steelhead trout in the Paper Mill and in October following your Board planted 35,000 rainbow trout in Sonoma Creek, near the town of Glen Ellen. The trout planted ranged in size from 1½ inches to 3 inches in length, the average fish being all of two inches in size. The fish were placed in favorite localities and the two plants were highly successful as to size of fish, conditions of water and environments where planted. In plant-

ing the fish your Board received the unstinted courtesies of the Northwestern Pacific Railroad and of the members of the State Board of Fish Commissioners, who all contributed towards making the restocking of these streams so successful. It will be the policy of the Board to continue the good work along these lines and keep these and other near-by trout streams stocked and re-stocked from time to time. Your Board has had an abstract of the fish laws of the State printed upon quarter cards and caused the same to be distributed in the vicinity of fishing waters for the better information of the public.

"Recognizing the necessity of having sportsmen anglers commissioned as Deputy State Fish Commissioners in order that the laws might be better enforced, your Board made a request to the State Board of Fish Commissioners for the appointment of twelve deputies from the body of the association. Up to this time eight of our members have been commissioned as deputies, with full power to act, and we have the assurances of the appointment of four others. Much good work has been accomplished by our deputies. They have visited fish stalls and market places and warned the dealers of arrest, with an active prosecution in case of any violation of the fish laws. These deputies are active sportsmen anglers and are all more or less upon the streams fishing, and their presence, or the fear of their presence, will have a salutary influence upon all persons who are inclined to violate the law.

"It has been the policy of our association from the beginning to acquire a library, devoted entirely to piscatorial matters.

"At the time of the fire we had many publications, both scientific and otherwise. The library had grown from a few volumes to 200 or more and much interest was developed by members in the same. The destruction by fire of this fine collection of volumes was not only a loss to us, but to the public as well, as the library had become one of general reference.

"Your Board has undertaken to secure from the various departments at Washington reports and other matters bearing upon fish life and the fishing industry generally, and have already received many valuable Government books and State reports, with promises of receiving all reports and pamphlets that are obtainable from the Government.

"Contributions of books relating to fishing, hunting, outdoor life and natural history are respectfully solicited from the members and others, which same will be acknowledged by letter and also by placing a card of the donor in the book. Photographic views of fishing scenes and outdoor life are also solicited, these to be kept in permanent form as an attractive feature of the club room. Various periodicals and magazines are taken and received (sixteen in number) by the association, and are always available for reference or recreation in the club room."

A year ago at the annual meeting there was a membership of but eighty-six active members out of a total of 176 that were enrolled at the time of the great fire, April, 1906. Since then twenty-six of the old members have been again placed on the active roll, making a total of 112 of the old members who are now in active standing.

The present status of membership may be summed up briefly as follows:

Old members 112, old members resigned 9, old members dropped 6, total 15. Present roster of old members 97.

New members, since April, 1907, 62; new members deceased, 1; new members resigned, 2; new members dropped, 1; total, 4.

Present list of new members, 58. Honorary members, 3. Total active membership, 158.

The collector's book, saved from the fire, shows that forty-seven additional members have not identified themselves with the association since the great catastrophe and their present whereabouts are unknown.

The membership of the association is widespread, as will be seen here: San Francisco, 116; Alameda county, 16; Marin county, 4; Sonoma county, 2; San Mateo county, 4; Solano county, 3; Mendocino, Contra Costa, Napa, Plumas, Orange and San Joaquin counties, 1 each; State of Nevada, 2; Massachusetts, 1; Washington, 1. Honorary members: California, 2; New Jersey, 1 (Hon. Grover Cleveland).

The financial condition of the association is healthy, there being a good cash balance in the treasury. There being no indebtedness, save for ordinary current expenses.

The furniture, pictures and all other property in the club rooms are owned by the association and are fully insured.

The present club rooms are located at 1771 Geary street, on the lower floor, are cozy, comfortable and located centrally. It is contemplated to hold monthly "smokers" in the immediate future, thus enabling the members to get thoroughly en rapport with each other.

It is probable, however, that later on this spring or summer the club will move further "down town" to more commodious and suitable quarters.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

ANGLING CLUBS ENJOY BANQUET AND SMOKER.

The California Anglers' Association members and guests assembled in the cosy clubrooms on Geary street, near Fillmore, Monday evening, January 6th, the occasion being the annual meeting, followed by a "smoker." There were about 100 jolly fishermen in attendance. The evening was enlivened by speeches, songs, music and fishing stories.

Among the speakers were: General George Stone, president of the Board of Fish Commissioners; James Watt, S. A. Wells, W. J. Street, E. W. Freeman, Chief Deputy Charles H. Vogelsang, George A. Wentworth and others.

The following directors were elected: H. B. Gosliner, E. M. Pomeroy, George F. Roberts, Dr. Charles E. Lietthead, W. J. Street, C. R. Overholtzer and Geo. A. Wentworth. Eleven applications for membership were received and placed on file. The directors were to meet last Monday evening and elect officers for the ensuing year.

The San Francisco Striped Bass Club's annual meeting and banquet took place on Wednesday evening, January 8th. The only club member absent was an unfortunate fisherman who was ill. The officers elected for the ensuing year were: Charles P. Landresse, president, Hugh Copeland, vice-president; James S. Turner, secretary, and Charles H. Kewell, treasurer. Trophies for record catches last season were awarded as follows: First prize, Chris L. Johnson, for the largest fish caught, a striped bass weighing twenty-five pounds, in San Antonio Slough, on Christmas day; Mr. Johnson also now wears the Ripley high hook medal. Second prize, Emil Aceret; third prize, James S. Turner; fourth prize, Charles Landresse; fifth prize, Charles Hollywood; sixth prize, Joseph Uri; mysterious prize, won by Chris Johnson, after tossing up with Joe Uri.

Among the speakers during the evening were: "Billy" Hynes, James Watt, James Lynch, Charles Breidenstein, M. J. Geary, J. X. De Witt, H. Copeland, Chris Johnson and others.

Those present were: James Lynch, James S. Turner, James Watt, Charles P. Landresse, Charles H. Kewell, Frank Marcus, M. J. Geary, James M. Thomson, Charles Breidenstein, H. Copeland, Joseph Uri, W. S. Turner, Nat Mead, Raisch Terry, W. J. Hynes, "Billy" Hynes, H. A. Sangster, Chris L. Johnson, Henry Franzen, Fred Franzen, Louis F. Armknecht, Tim Lynch, J. G. Bliss, Charles B. Hollywood, E. Oelzmann, S. F. Murphy, Al Varozza, George Becker, Carl Thomson, Fr. Paulson, Mr. Wallace, Tim Murphy and R. Jenisch.

Cause of the "Involuntary Pull."—As on this subject much doubt seems still to exist even in the minds of gun manufacturers, it is interesting to have Mr. Teasdale-Buckell's account of the matter, as given in his recent work, "The Complete Shot." With omissions necessary to economize space, this is what he says: "The accepted view of involuntary pull * * * was that after the shot from the first barrel, recoil jumped the gun away from the finger, and then the shoulder rebounded the gun forward on the stiff finger, which, being struck by the trigger, let off the second barrel. The author, for some time previous to 1902 had become conscious that this explanation was open to question. However, it was not until he sat down and worked out the times of recoil and finger movement that he felt safe in challenging so generally accepted a statement. But this calculation proved to him that, so far from rebound causing the unwished for 'let off' the latter occurred in one-twentieth of the time occupied by recoil backwards." Then follows an account of the experiments undertaken to prove the theory, and the writer continues: "It was demonstrated that the rebound from the shoulder had nothing whatever to do with the involuntary pull. The true, and now always accepted cause was, as the author had stated it to be, namely, that the recoil jumped the trigger away from the finger in spite of the muscular contraction that still continued after the let-off of the first barrel; that this muscular contraction continued to act and again caught up the trigger, as soon as the pace of recoil was diminished by the added weight of the shoulder, and so the finger inflicted a heavier blow or pull on the trigger than in the first pull off. In the first pull it was finger pressure, in the next it was pressure acting over distance, and was measurable in foot pounds, as work or energy is measured. This proved to be the correct solution."

Registered Tournaments.—We are in receipt of explanatory blank form application for registered tournaments under the auspices of the Interstate Association, which were mailed by Secretary-Manager Elmer E. Shaner.

These forms are complete and models of conciseness and detail. Mr. Shaner states that he has mailed some 7,500 of the blanks and an equal number of explanatory forms, to gun clubs and individual shooters throughout the United States and Canada. He will be pleased to send this matter to any person making application for the same by addressing Elmer E. Shaner, Secretary Interstate Association, 219 Coltart Square, Pittsburg, Pa.

Application for sanction must be made not less than thirty days in advance of the tournament opening date.

A. K. C. AFFAIRS.

The present status regarding proceedings of the A. K. C. (Incorporated) and the opposition to the situation as it now stands is outlined below by an Eastern correspondent. So far the Ashland House Committee seems to have won a point, in that court proceedings have been stayed temporarily and it looks as if there was a chance for an amicable settlement.

The internecine quarrel of the American Kennel Club has now spread over the country. Members in distant States who hitherto have evinced only a passive interest in the strife are now called upon to join in the issue, and the struggle bids fair to engage for the next three weeks not only the kennel interests, but the attention of the sporting fraternity. The contest for supremacy in the American Kennel Club is of long standing, and has been marked by much bitterness of feeling.

The trouble was precipitated by a certain element in the organization that has since been known as the Ashland House Committee. These members objected to the incorporation of the American Kennel Club. They contended that when the American Kennel Club, unincorporated, transferred its assets to the American Kennel Club, Incorporated, in 1906, it was represented to the delegates that the policy of the old club was to be perpetuated and that there was to be no change in the management and methods employed to control dog affairs in this country.

In view of these promises the necessary authority to transfer the property was unanimously agreed to. Afterward and when a careful examination was made, it was stated that the articles of incorporation had been so drawn up that it vested unlimited power and the control of the entire dog interests in America in six men named as incorporators for a term of at least three years, and in such a way that the control could be indefinitely perpetuated.

Several attempts to introduce amendments were made, all of which failed. The administration in reply to the charges denied any attempt to control kennel affairs, and asserted that the American Kennel Club was incorporated for the purpose of protecting the dog interests, and that they were actuated only by considerations of sportsmanship and the welfare of the American Kennel Club. The charges that the administration had formed a trust was waved unceasingly.

Failing to secure a majority at the meetings of the American Kennel Club to pass amendments to the constitution, the Ashland House Committee objecting to what they termed "high finance" methods began an action in the Supreme Court to prevent the American Kennel Club from making further use of the assets of the original organization, and asked for a receiver for the association, for an injunction restraining its officers from paying out its funds, and for an accounting.

Before the case was called for trial Attorneys G. H. Taylor, representing the American Kennel Club, and R. D. Murray, acting for the Ashland House Committee, entered into an agreement which superceded the court proceedings, by which an arbitration committee of thirty members of the club was agreed upon to settle all differences. The result of the decision of these members should be final. According to the agreement five members were to be named by the officers of the American Kennel Club, five by the Ashland House Committee, and twenty to be balloted for by mail vote of the clubs all over the United States in affiliation with the American Kennel Club, unincorporated, or as they existed before November 19, 1906, when the alleged invalid acts began.

President August Belmont appointed Marcel Viti, Philadelphia; Wm. G. Rockefeller, Howard Willets, B. S. Smith, Dwight Moore, New York, as the American Kennel Club representatives. The selection of the Ashland House Committee was F. H. Osgood, Boston; Dr. Henry Jarrett, Philadelphia; Dr. J. E. De Mund, L. M. D. McGuire and Clair Foster, New York.

The canvass for votes began at once, and the following tickets for the remaining twenty committeemen on the list were nominated:

American Kennel Club—August Belmont, president of the A. K. C.'s present and past; W. B. Emery, Boston; Edward Brooks, Medford, Mass.; C. W. Keyes, East Pepperell, Mass.; J. W. Appleton and George B. Post Jr., Barnardville, N. J.; Thomas Cadwallader, Philadelphia; Winthrop Rutherford, James Fortimer and George Lauder Jr., Greenwich; William Rauch and Samuel N. Cutler, Revere, Mass.; John G. Bates, J. H. Brookfield, C. F. Drake and Chetwood Smith, Worcester, Mass.; H. K. Bloodgood, Singleton Van Schaick and H. H. Hunnewell, Wellesley, Mass., and W. W. Stettheimer, San Francisco.

Ashland House Committee—J. Sargeant Price, Philadelphia; R. Stewart Edson, Stamford; William C. Codman, Providence; D. Murray Bohlen, Philadelphia; Russell H. Johnson Jr., Boston; Joseph B. Thomas Jr., Hartford; Willis N. Kimball, Boston; M. Mowbray Palmer, Stamford; Richard H. Hunt, George Lauder Jr., William L. Barclay, Henry W. Warner, Dr. M. A. Stivers, S. N. Cutler, S. W. Groome Jr., Dr. O. H. Albanus, W. S. Gartner, James Jenkins and John F. Collins, New York.

As the matter now stands, two tellers, with Secretary Vredenburg, will open the ballots on January 22d. The lawyers of the two committees—R. D. Murray for the Ashland House Committee and G. H. Taylor for the administration—will also be on hand.

In the meantime both sides have appealed to their supporters. In presenting their side of the case, the administration supporters in a circular say:

The administration takes pride in the fact that it has made and maintained the enviable record of the American Kennel Club, which is due to its untiring and unselfish efforts. It has succeeded in making the stud book the only one recognized by the United States Government for the importation of dogs, to the exclusion of the foreign stud books, formerly recognized.

The administration was actuated by considerations of sportsmanship and the welfare of the American Kennel Club. It was deemed expedient not to waste \$7,500 in legal proceedings and therefore consented to an amicable arrangement.

Much has been said about the power of the Executive Committee as constituted at present, but no mention is made of the fact that the provisions of the constitution and by-laws have not been changed one iota in this respect since their adoption by the unincorporated club in the year 1890.

Much has been said about the selection of the directors by the incorporators, yet they used their best judgment to select a representative board, and their subsequent resignation above referred to shows that if any mistakes were made in the original selection, the error could have been cured last spring if the Ashland House Committee had so desired. Can any one conceive of a more thoroughly self-constituted body than that of the Ashland House Committee?

It is ridiculous to assert that the original directors were to remain indefinitely in control. The directors passed a resolution to fill vacancies in the board by electing those nominated by the delegates at large, and three directors were so elected at the last annual meeting of the club. In one year of the existence of the corporation five vacancies took place, and it was provided that six directors were to be elected by the delegates in February, 1908, and six each year thereafter, so there was ample opportunity for representation while guaranteeing the continuance of enough members to assure a prosperous policy for the club. Any club whose delegate is a director of the American Kennel Club has the power to terminate his term of office as director by withdrawing his name as delegate or appointing another delegate in his place.

In a list of twenty names all clubs cannot be represented, but the administration has confined itself to no section, and has selected from all interests, headed by Mr. Belmont, the president. His name has been left off the other ticket, notwithstanding fully 90 per cent of the dog interests recognize the invaluable services he has rendered the American Kennel Club for a quarter of a century. In looking over the names on the other ticket one is not impressed with the fact that they have contributed largely to the support or success of the American Kennel Club.

The Ashland House Committee in giving out the names of their candidates, prepared a history of the proceedings in circular form that was sent to each member. The official communication in part contains these amendments:

When the American Kennel Club transferred all of its assets to the present so-called American Kennel Club, Incorporated, November 19, 1906, it was represented to the delegates there present that the policy of the old club was to be perpetuated and that there was to be no change in the management and methods employed to control dog affairs in this country.

On these representations the unincorporated club, having confidence in its officers, by whom the arrangement was recommended, authorized the execution by them of the papers necessary to effect the transfer of all its property.

Afterward, and when a careful examination was made of the constitution, which had been adopted by the so-called incorporated club, it was ascertained that it had been so artfully drawn by the six men who had incorporated it as to vest unlimited power and control of the entire dog interests in America in themselves for a period of at least three years in such a way that this control could without much doubt be indefinitely perpetuated.

The way in which the incorporators accomplished this object was briefly as follows:

In May, 1901, a committee was appointed to investigate and to report concerning the advisability of incorporation. In September, 1901, a short resolution was smuggled through to amend so as to enable the committee not to investigate and report, but actually to incorporate the club.

Nothing was done, and the matter was forgotten, dropped, and abandoned by the club. However, in 1903 a certificate of incorporation was obtained for a corporation known as the American Kennel Club. The men who incorporated this new organization were August Belmont, A. P. Vredenburg, Marcel A. Viti, H. K. Bloodgood, W. G. Rockefeller, W. B. Emery, H. H. Hunnewell and G. F. Carnochan.

Nothing was done with this certificate of incorporation until November 5, 1906, when the incorporators held a meeting and adopted a constitution, which vested absolute power in an Executive Committee, to be selected by a board of thirty directors. These directors, instead of being selected by the club, were selected by six incorporators. This was an absolute reversal of the democratic principles of the club, in which all were elected by the members themselves.

These six incorporators next proceeded to elect Mr. Belmont and Mr. Hunnewell president and vice-presi-

dent, to appoint Mr. Vredenburg as secretary, and then to elect, as has been stated, the thirty directors. These directors, apparently recognizing that "one good turn deserves another," immediately met and proceeded to elect as chairman of the standing committee a sufficient number of the of the original incorporators to give to them a majority. In other words, the Executive Committee now consists of Incorporator Belmont, Incorporator Rockefeller, Incorporator Hunnewell, Incorporator Viti, Incorporator Bloodgood, Incorporator Emery, together with their friends Appleton and Brooks.

DOINGS IN DOGDOM.

The judges for the thirty-second annual dog show of the Westminster Kennel Club, to be held at Madison Square Garden during the week of February 11th, have been chosen. Several foreign judges will officiate, while experts have been named for all classes. Fritz Kirschbaum of Berlin will award the ribbons in the classes for Great Danes and Dachshunds; L. Fairwell of Canada will preside in the ring during the exhibition of Cocker Spaniels; Walter S. Glynn of London has been selected for Airedale Terriers, Fox Terriers, Irish Terriers, Scottish Terriers, Rose-neath Terriers and Welsh Terriers, while Charles Lyndon of Canada will judge Newfoundlanders, Retrievers, Bull Terriers and a number of classes of smaller dogs.

The entry list promises to establish a new record. More entries have been received up to date than in any previous year at this time. Entries will close with James Mortimer, 801 Townsend Building, 1123 Broadway, New York City, January 23d. The list of judges follows:

Dr. Henry Jarrett, Philadelphia, Penn.—Bloodhounds, Irish Water Spaniels, Clumber Spaniels, Field Spaniels, Collies, Old English Sheepdogs, Chow Chows and Dalmatians.

John W. Keegan, Brooklyn, N. Y.—St. Bernards. Fritz Kirschbaum, Berlin, Germany—Great Danes and Dachshunds.

Joseph B. Thomas Jr., Simsbury, Conn.—Russian Wolfhounds.

Brig. Gen. R. D. Williams, Lexington, Ky.—Deerhounds, Greyhounds, American Foxhounds, Bassett hounds, Samoyedes and Esquimaux (Mallimutts).

W. Rutherford, New York City—English Foxhounds.

B. F. Seltner, Dayton, Ohio—Pointers. William Tallman, Brooklyn—All Setters and Chesapeake Bay Dogs.

L. Farewell, Toronto, Ont.—Cocker Spaniels. G. Cadwalader, Philadelphia, Pa.—Beagles.

Charles D. Bernheimer, New York City—Poodles. John F. Collins, Brooklyn—Bulldogs.

Walter S. Glynn, London, England—Airedale Terriers, Fox Terriers, Irish Terriers, Scotch Terriers, Roseneath Terriers and Welsh Terriers.

Charles Lyndon, Coleman, Ont.—Newfoundlands, Retrievers, Bull Terriers, Whippets, Black and Tan Terriers, Skye Terriers, Bedlington Terriers, Dandie Dinmont Terriers, Schipperkes, Toy Black and Tan Terriers and miscellaneous class.

William Lennox, New York City—French Bulldogs. Thomas Benson, Boston, Mass.—Boston Terriers.

E. M. Oldham, New York City—Pomeranians, English Toy Spaniels, Japanese Spaniels, Pekinese Spaniels, Pugs, Yorkshire Terriers, Maltese Terriers, Griffons Bruxellois, Toy Poodles, Chihuahuas, Papilons and Italian Greyhounds.

Some of the best Collies of the Glen Tana Kennels will be shipped to the bench show, to be held at Los Angeles on February 18th, 19th, 20th and 21st.

The reputation of the Glen Tana Kennels for breeding good Collies is spreading far and wide. An evidence of this has just been received by T. S. Griffith, the owner of the Spokane Kennels, in an order for a pair of extra fine Collie pups to go to Conception Del Oro, Mexico. Mr. Griffith is especially pleased with this order, as it shows the wide reputation being gained by the Spokane dogs.

The California Cocker Club at a recent meeting decided to follow the precedent established by Eastern specialty clubs and have endorsed the following gentlemen as the official judges for the club for this year: Phil M. Wand, W. E. Chute, Mrs. W. C. Ralston, J. Hervey Jones and Alex. Wolfen.

The Kennel Editor has received from time to time inquiries for books on "training dogs for the hunting field." We can recall no better work than "Training the Hunting Dog for the Field and for Field Trials," by B. Waters. The articles on "Canine Education," which appeared in these columns several weeks ago, were taken from this standard work. The perusal of the articles will easily convince any of our readers as to the value and authority of the work itself. The price, bound in cloth, is \$1.50, and can be had by forwarding this amount to Forest and Stream Publishing Co., 346 Broadway, N. Y.

Entries for the Los Angeles show close February 8th.

All communications to the Southwestern Kennel Club should be addressed to J. H. Pearman, Secretary and Superintendent of the show, 2423 Budlong avenue, Los Angeles, until February 1st, and to 100 South Spring street after February 1st.

PATROL LAUNCH FOR SACRAMENTO.

George Neal, Game Warden of Sacramento county, has received a thirty-foot gasoline launch from the State Fish Commission in which to more conveniently patrol the territory over which his jurisdiction lies.

Neale has been expecting the boat for several weeks, says the Sacramento Bee, but it did not arrive until a few days ago. He has set to work fitting it up to suit himself with careful regard to all possible comforts and conveniences. He will erect a canvas shelter for it for night use and under this shelter will have an improvised bed. There is also room in the launch for provisions and a gasoline stove which can be used for both cooking and heating purposes.

The boat was given Warden Neale in recognition of the good work that he has done in both game and fish matters. His recent work is saving over a million black bass from land-locked lakes of this county and turning them over to the Commission for distribution in places where black bass were strangers has, in the opinion of the Commission, merited a favor at its hands and so he was provided with the launch.

The new boat will be of great service to Neale, especially in apprehending the many violators of the fishing laws. The fishermen who are carrying on the illegal practice of catching black bass in nets in endless numbers are becoming bolder each day as they are not molested in their work. They are mostly Italians, but their methods of evading capture are most unique. With a speedy launch to make a sweep upon the fishermen before they have a chance to escape, Warden Neale believes he can add to the good work he has done along this line. With a launch he can keep a better watch of the waters of the district and can greatly expedite his travels.

The new boat has been named "The Audubon," and it will be ready for launching in a day or so.

The last official notice that has been received in regard to the shipment of Bohemian pheasants that are to be introduced into this State by the Commission was to the effect that they are now on the way. Warden Neale has completed all arrangements for the care of the hundred pair that are to be allotted to Sacramento county.

A launch will also be placed in Russian river, so that the deputies can keep down the work of the net men, between Duncans and the river's mouth.

The mid-week duck hunting, particularly on the Suisun marshes was exceedingly poor. The birds had left for the overflowed lands and green fields. Geese were, however, present in flocks of thousands.

On the 12th inst. many limit bags were secured on the Suisun marshes. Members of the Volante, Family, Teal, Marsh and other gun clubs returned with plenty of fine conditioned ducks. On some ponds the shooters took things easy and selected their birds.

Ducks are reported to be loafing on Soap Lake, near Gilroy, by the thousands.

Twelve members of the Empire Gun Club all secured limits last Sunday on the Elkhorn Slough ponds.

A report from Sacramento duck shooting resorts states:

The best news for the duck hunters these days is the coming of the big toothsome canvasback, whose arrival from the northern regions has been looked for since the first of the year. The big birds are not here in force, but are gradually increasing in number until now almost every powder burner bags a redhead or so on each excursion to the marshes.

The cans have been a few weeks late in coming this year, but if the usual number are present several weeks before the season closes the delay will not be held against them. A week or so ago there was an occasional scattering of canvasbacks and the nimrods oftentimes succeeded in securing one or two. The strongest proof of their migration is found in the strings that are now being obtained. The hunters of the Suisun marshes have had some very good shoots on canvasback lately and when the birds are present around the bay tules they can be looked for on higher grounds in a week or so afterward.

The members of the various Los Angeles duck clubs that have their preserves along the ocean shore south of Santa Monica had the sport of their lives Sunday, January 5th, and, with very few exceptions, limit bags were the rule. There seemed to be countless numbers of teal and spoonies, but the sprig and widgeon are becoming scarce. The shooting was good all day, and those who did not get good bags, either went down late or came back early. The ocean was literally black with the birds, and yet, strange to say, a few of the clubs reported only ordinary luck, which leads some of the hunters to believe that the ducks sometimes fly in "streaks." The general opinion was that this Sunday was another good day of one of the best seasons for duck that the local hunters have ever enjoyed.

TRADE NOTES.

Good Work With Remington Autoloader.

Lieut. W. C. Jones of Co. I, Eighth Massachusetts Infantry, Thanksgiving Day entertained military friends at the Indian Hill range with his new Remington autoloading rifle, trying out the weapon at the 200, 300 and 500 yard ranges. The rifle is primarily a sporting gun and lacks, of course, the military sights which naturally prevented large scores in the work, but the working of the gun made enthusiasts during the trials and the scores under the conditions were excellent, indicating that once the rifle is properly sighted at the target the bullet is bound to go where it is intended, true to the mark. It is a magazine rifle, and the rapidity with which a string can be shot seemed little short of marvelous. Strings of five shots were fired in from 6 to 10 seconds. Sergeant Frost of Co. I, in 6 seconds rapid fire at the 200-yard range made four hits in five shots. Lieut. Jones himself at the 200-yard range scored two in 15 seconds, one in 9 and one in 10 seconds. First Sergeant Chas. J. Jeffries of Co. D spent some time in sighting the rifle for the work and finding the normal of the gun, and at 200-yard targets made a 20 out of a possible 25. Corporal Richardson got 17 in 9 seconds and then reeled off four out of five in 7 seconds. Major Sprague scored a 19, and so did former Private Vella. Lieutenant Colby of Co. D got an 18 at 200 yards. E. E. North, Eugene Ricker, Dr. Hitchcock and others interested in rifle work made good scores. Lieutenant Jones at the 300-yard mark scored a 17 in quick time, and some good work was done by others over that range and over the 500-fard as well.—From Daily Evening Item, Lynn, Mass., November 29th.

E. E. Drake's New-year's card, mailed to thousands of his Coast sportsmen friends, is a handsome half-tone engraving of a flock of "cans" skurrying through a snow storm seeking the shelter of a tule fringed slough.

Winchester's Wonderful Year.

Not since trap shooting was inaugurated have any shells in one year made such a great showing as was made by Winchester factory loaded shells in 1907. The shooting annals of the year are simply saturated with Winchester winnings and records—a glorious legion of witnesses of the reliable, uniform and strong shooting qualities of the red W brand. The highest average for the year's shooting was made by Fred Gilbert, who broke 95.8 per cent of the 9,195 targets he shot at with Winchester factory loaded shells. W. R. Crosby, known in the shooting world as King William, made the highest average ever known for a series of successive tournaments, covering 3,300 targets, he breaking 97.18 per cent with Winchester factory loaded shells. Crosby also won the professional championship for the year. The amateur championship was won by Hugh Clark with Winchester factory loaded shells, so these shells can claim both these highly prized honors. The high amateur average for the year was made by an Illinois amateur, who scored 94.5 per cent of the 4,730 targets he shot at with Winchester factory loaded shells. Winchester shells also established a new five-man squad record, both for 500 and 1,000 targets, at Leesburg, Fla., November 21, 1907, scoring 496 out of 500 and 980 out of 1,000 targets, scores that are really phenomenal.

Ad. Topperwein's marvelous shooting with Winchester rifles and cartridges has also drawn attention to the Winchester product. Recently, in ten days' shooting, he missed only 9 out of 72,500 targets shot at, the targets consisting of 2¼-inch wooden blocks thrown into the air by an assistant at 20 feet distance before a large crowd of people in San Antonio, Texas. Such a performance, which seems almost incredible, shows the perfection to which Winchester goods, the red W brand, have been brought. The year 1908 opens up with much promise for this sterling brand, for if past records are any criterion, it would seem safe to predict that the number of users of Winchester goods would be greatly augmented during the present year.

A Change Contemplated.

For the past sixty days Dame rumor has been busy on the street intimating that the Selby Smelting & Lead Co. contemplate making some change with their shell loading plant, and we have just learned that Mr. Dick Reed severed his connection with the company on the 31st of December, which certainly gives considerable color to these persistent rumors. In letting Fr. Reed go it is quite evident and also a good forerunner that developments will shortly materialize. Mr. Reed has been employed by the Selby Company for a number of years, and has been a prominent factor in every tournament on the Coast since 1902, when he made his debut as a professional. He has demonstrated his value as an ammunition representative on many occasions, and as he is one of the best shots on the Coast, a good fellow, a friend of everybody, and being exceptionally well posted and thoroughly conversant on the subject of guns and ammunition, we feel that the Selby Company no doubt would be loath to lose him, but for this contemplated change. Possibly this will be a surprise to our many readers, as it was to us, and we are sure you will join us in wishing "Dick" much success in any new venture he may take up with.

PACIFIC BREEDERS' FUTURITY NO. 6.

Fifth Payment of \$10 Each Made on 135 Two-Year-Olds, January 2d.

There are 135 two-year-olds originally named in Pacific Breeders' Futurity Stakes No. 6, that are still eligible to start in the stake, fifth payment having been made on them January 2d. These are foals of 1906. A goodly number of them are already in training, and while the majority will not be raced until they are three-year-olds, there will be fair fields in the two-year-old divisions at the Breeders' meeting this year. The list of those on which payments were made follows:

Thos. H. Brents' ch f Edgarelia by Edgar Boy, dam Laurelia by Caution; ch c by Caution, dam Saffrona by Antelope.

I. L. Borden's foal by Nutwood Wilkes, dam Alice Bell by Washington; foal by Prince Robert, dam Allie Cresco by Cresco; ch c by Prince Robert, dam La Belle Altamont by Altamont.

John B. Benedict's b f by Hambletonian Wilkes, dam Ida May by Grosvenor.

Jas. L. Bullock's s f Grace H. by Hambletonian Wilkes, dam Sally B. by General McClellan.

W. L. Bolton's gr c George Voddin by General J. B. Frisbie, dam Dolly.

W. O. Bowers' Zack by Silver Bee, dam Sadie Benton by Tom Benton.

Geo. T. Beckers' b f Miss Zoma B. by Zombro, dam Lady Van Nuys by Stam B.; b c by Zombro, dam Topsy; blk c High Pride by McKenna, dam Whisper by Almont Lightning.

D. L. Bachant's ch f Sadie B. by Athadon, dam Nugget.

Jacob Broliar's br f Zonelita by Zolock, dam Stone-lita by Stoneway.

O. F. Berquette's br c by Stoneway, dam Daisy by Brown's Patchen.

I. E. Bular's br f Zoriene by Zolock, dam Corriene by Red Cloak.

A. Butz's br c A. B. Hal by Hal B., dam Maud by Silkwood.

T. W. Barstow's b c by Nearest McKinney, dam Just It by Nearest.

Alex. Brown's br f by Nushagak, dam Nutflower by Nutwood Wilkes; ch f by Prince Ansel, dam Serpola by Mendocino.

E. K. Brown's s f by Demonio, dam May Norris by Norris.

Mrs. L. G. Bonfilio's b c Crescendo by Nutwood Wilkes, dam Atherine by Patron.

Lewis Charlton's b c by Dumont S., dam Rose Thorne by Hawthorne.

Martin Carter's b f Ella M. R. by Lord Alwin, dam Excella by Monbells.

S. Christenson's blk f by Strathway, dam Marguerite K. by Don Pedro; ch f by Strathway, dam Simone by Simmons.

H. Cox's foal by Wayland W., dam Babe by Designer.

W. A. Clark Jr.'s b f by Highland C., dam Lucie May by Oakland Baron; blk f by Highland C., dam She by Abottsford; blk c by Highland C., dam Ruth Mary by Directum; blk c by Highland C., dam Bay Leaf by Telephone; b f by Highland C., dam Patty D. by Ultimous.

S. H. Cowell's s f Zaza by Henry Nutwood, dam Two Minutes by Wildnut.

C. A. Canfield's b c by Zombro, dam Mamie Elizabeth by Red Regent.

E. D. Dudley's ch c by Palite, dam Bee Sterling by Sterling; ch c by Palite, dam Babe by Dawnlight.

J. P. Dunn's b f by Petigru, dam Nora Mac by McKinney.

W. G. Durfee's br f Zulu Belle by Petigru, dam Johanna Treat by Thos. Rysdyk.

F. N. Folsom's s f Lavene by Lynwood W., dam Diamonica by Diawood.

Miss Alice Frazier's b c Joker by Murrây M., dam Nienah by Nutford.

Geo. Fox's b c by Cresceus, dam Silpan by Silver Bow.

J. A. Garver's foal by Robert Basler, dam Lady Way by Stoneway.

E. S. Gammon's blk f Neta H. by Zolock, dam Lily S. by Direct.

F. Gomett's b c by Strathway, dam Rosata by McKinney.

T. B. Gibson's b f Virginia Lee by Iran Alto, dam Maggie by Soudan.

W. H. Hoy's s f Complete by Palite, dam Camilla by Bayswater Wilkes.

G. K. Hostetter's foal by Robert Direct, dam Lou Lively by Boodle.

Wm. Hendrickson's blk f by McKena, dam Ohio by Peveril; b f by McKena, dam Maud by Grover Clay.

Henry Hahn's ch c Lecket by Lecco, dam Henrietta by Boodle.

F. Hahn's b c Goldfield by Chas. Derby, dam Nellie Emoline by Leo Corbett.

W. B. Humphreyville's br c by Kinney Lou, dam Nellie by Jim Mulvenna.

C. L. Hollis' s c Stam Hopkins by Stamboulet, dam Sis Hopkins by Strathway.

Mrs. L. J. H. Hastings' c Robt. McGregor Parole by Parole, dam Sappho by Robt. McGregor.

E. P. Heald's b f by Count Hannibal, dam Nona Y. by Admiral; b f by Tom Smith, dam Nona Washington by Geo. Washington; b f by Tom Smith, dam Lady Marvin by Don Marvin; b f by Tom Smith, dam Princess McKinney by McKinney.

LONG LIVED HORSES.

Many stories are told of the extreme age to which horses have lived, but not all are authentic. Harry Wilkes 2:13½, the fastest of the get of Geo. Wilkes, and who made his record at the old Fair Grounds in Sacramento, Cal., in April, 1887, the spring he was eleven years old, is still living and was exhibited at a parade in the steets of Somerville, New Jersey, where he is still owned, on the 10th of last October. The old fellow made a brave showing hitched to a cart, and came in for quite an ovation. He was foaled in 1876, consequently is thirty-two years old this spring. He was gelded when a four-year-old, but is the sire of one standard trotter, has two producing sons and four producing daughters. His son, Billy Wilkes 2:29½, is the sire of four 2:10 pacers. Nathan Straus 2:03½, the fastest of the get of Director 2:17, is out of a daughter of Billy Wilkes.

According to a German journal Dr. Norner-Barensburg of that country has been collecting information as to the limit age of horses and finds that thirty years for equines is about the equivalent of "three score and ten" in the human family. It is a good old age for horses, but some reach it and a few surpass it.

The oldest horse of which he could learn any definite facts was a roan mare bred in the Govern-

ment Stock Farm in Hungary, and she was at least forty-five years old when she died. In 1852 she was assigned to Lieutenant Theodore von Leyss of Lemburg, serving in the Fifth Regiment of Uhlands. In the next year horse and rider were transferred to the Twelfth Regiment, and in 1859 they made the entire Italian campaign together. At the battle of Magenta the Lieutenant was cut off from his regiment by a body of French troops. His brave mare carried him to safety by an extraordinary leap over a stone wall.

In 1863 Von Leyss got into financial difficulties and in the following year he was obliged to part with his mare to a comrade who used her as a road horse until 1865, when she passed into the stable of a Major of Infantry. With him it is believed she made the campaign of 1866. Then Von Leyss, who furnished the facts to Dr. Norner-Barensburg, lost sight of her until 1873, when he found her, alas, serving as a cab horse in Vienna. He kept his eye on her after that and in 1882 she had sunk to drawing a delivery wagon for a manufacturer of paper boxes. Von Leyss by this time was in better circumstances and he bought back his old friend and comrade to take care of her until her death. This took place in 1892, when she was fully forty-five years old, according to the stock farm record. Down to the end she was employed daily at light work. She was a well set up animal with unusually clean-cut, graceful build and limbs. Two days before her death she refused feed for the first time in her life. Her skeleton is now set up in the veterinary college in Vienna. The great age she reached is all the more remarkable when her military experiences, including the hardships of two campaigns, are considered. Her biographer considers her career as establishing the advantage of allowing horses to become fully matured before they are put to work. No horse set to work while green, he thinks, could possibly have gone through so much and lived to such an age.

CODERO 2:09¾ GOES TO EUROPE.

The latest 2:10 trotting stallion to go to Europe is the roan horse Codero by Bingen 2:06¾, who trotted to his record as a four-year-old the past

season. He was purchased from R. B. Williams, of Boston, by John Splan, the latter presumably acting for Austrian parties.

Codero was foaled in 1903, having been bred by the late J. Malcolm Forbes. Sired by Bingen 2:06¾, his dam is Jolly Bird 2:15¼ by Jay Bird, so that his roan color can readily be traced to his maternal ancestor. Codero was sold with the other Forbes horses at the dispersal sale at the Boston auction in the spring of 1904, being bought by Bither and Palmer, Boston trainers for \$400. As a two-year-old he showed a mile in 2:21½ and was again consigned to the Boston sale, this time in May 1906, when as a three-year-old he trotted a mile in 30¾ seconds, Lon McDouald, acting for Ralph Williams, being the high bidder at \$5,000. Being entered in about all of the futurities, Codero was prepared for these engagements but unfortunately trained off, being declared out of his futurity engagements and being started but once. At Syracuse he was a starter in the \$1,200 class event for three-year-olds. The Abbe winning the opening heat in 2:14½, Codero second, while Daffodill took the next two in 2:13½ and 2:13¾, Codero finishing second and third. That fall Codero trotted a mile right at 2:10 in his work.

The past season, 1907, found Codero well staked, his first start being at the Detroit meeting, where he finished sixth in the summary in a field of thirteen starters. At Cleveland he got third money to Carlo and Margaret O., while at Buffalo he was again third, being headed by Sarah Hamlin and Za Za. He was next shipped direct to Readville where he won the 2:19 trot, taking a record of 2:10¼. He took a bad cold shipping to Providence, being unplaced in his first start, later in the week getting second money to Dr. Ives. His next start was at Indianapolis, where he took down second money in a stake won by May Earl. In the \$2,000 stake over the Lima, O., half-mile track he was again obliged to be contented with second money, Claty Latus being the winner. At Lexington he won the first heat in the West stake reducing his record to 2:09¾, Margaret O. taking the next three heats.

Codero is a fine looking stallion, grey roan in color, of splendid conformation and with another year added to his age he should prove a high-class trotter over the Austrian tracks.—American Sportsman.

THE FARM

THE STANDARD FOR EVERY FLOCK.

How far different the flock of the average farmer and even breeder is from what it may be and ought to be is too plainly in evidence. The reference here, in the first place, to lack of uniformity; in the second, to lack of outstanding development; and in the third, to lack of high all-round excellence. The average flock is usually characterized by a wide variation, so wide as to betray an absence of clearly defined views on the part of the owner, as to what the type of the flock should be, and of persistent effort to secure fixedness of type.

It would perhaps be correct to say that absolute uniformity is unattainable in a flock, howsoever small that flock may be. It is one of the curious things about development, that of the millions in the human family, no two are so nearly alike that points of difference may not be found to indicate distinct and defined individuality. It is even more remarkable that of the millions of leaves that clothe the forest trees, no two leaves can be found so nearly alike that the microscope in skilled hands is unable to find some distinctions between them. It shows the marvelous power that inheres in nature to differentiate, notwithstanding that each race and tribe in the human family has invariably enough of racial or tribal resemblance to clearly indicate the tribe or race to which it belongs, and every leaf of every tree has enough of resemblance to every other leaf on the tree to indicate unmistakably the species to which it belongs. Family resemblances are even closer than racial or tribal resemblances, and yet family resemblances are never so close as to render it impossible on the part of the accurate observer to distinguish the individuality. This illustrates why it is that the individuality of the members of any flock, however skillfully bred, can never become so close as to render it impossible for the capable shepherd in charge to distinguish between the individuals that compose the same, and yet the resemblance may be made so close that there will be but little difference in the average weight of all

the animals in the flock, but little difference in the general form, in the wool and the production of the same, in the fleshing properties and in all important essentials of individuality concerned in constituting material values. To state the matter concretely, notwithstanding the difference in the animals of a flock which constitute a groundwork for identification, the resemblance may be made so close that it may be and is frequently compared to the resemblance of peas in the same pod. It is that kind of uniformity which it ought to be the ambition of every flockmaster to attain to. How shall he attain to it? I answer, through careful and skillful breeding, through close selection and through judicious feeding.

He must select his males with reference to a type. He ought to be rigid in such selection, and when found prepotent, he ought to use them to the greatest extent possible. If such males are line bred, they are more likely to be prepotent than when much mixed in family blood lines. The reasons for this will be clear to all who have given much attention to the laws that govern breeding. Animals that are off type must be eliminated though individually good, as just in proportion as such specimens are tolerated, just in that proportion will uniformity in type be hindered. Good keep must accompany the work at every step, as it is only through a liberal support that uniformity of a desirable character can be secured. Uniformity in undesirable development would clearly be unfortunate, a great deal worse than lack of uniformity in animals of higher average merit.

Along with uniformity, outstanding vigor should be sought. Disease in various forms, and chiefly in those parasitical in their nature, is becoming a real menace to sheep husbandry in America. Continued well-doing in a young animal is a strong guaranty that it is not affected by those parasites and this is a recommendation as to why it should be retained for breeding. Especially should the evidences of such vigor be sought for in males, that they may transmit the same to their progeny. While the sheep should be protected from positively injurious exposure, such as draughts, cold rains and strong and cold winds, the aim should be to keep them as much as possible in the open air, and to give them as much freedom of exercise winter and summer as it may be pos-

sible to secure for them. By managing thus, the stamina of very many flocks could be raised to a much higher plane than it now rests on.

By carefully eliminating everything that is undesirable for breeding uses, a uniformly high standard must eventually be reached. The only animals in the flock that could possess inferiority would be found among the lambs, and where such a line of breeding is followed, as has been described, the proportion of these would be very small, in fact it would not exist at all were it not for the existence of that law of variation to some extent continually operative, and yet more or less circumscribed by careful breeding. The limit to which such improvement in breeding may be carried is the limit of the breeder's skill and the limitations that are set by the attendant conditions such as pertain to food production, shelter and the inherent possibilities of increase pertaining to the breed. It would seem correct to say that the limit of improvement has never yet been reached in the development of any breed even in the most skillful hands. If that is true, how great is the gap at the present time between average attainment and possible attainment in the improvement of the flocks of this country!—Prof. Thomas Shaw, in Rural World.

SETTING THE PRICE ON STOCK.

I have been keeping posted on the markets of livestock since the recent stringency of the money market and have noticed that while the packer buyers have succeeded in hammering down prices, yet they have not materially reduced the cost of the dressed meats to consumers and also that they stand in urgent need of a certain amount of livestock regularly. Even though money is close, they are willing to bid up on what is offered when the offerings are light as I am pleased to see them to be lately. This suggests something to stockraisers. It tells us in no uncertain language that they will give us something if we demand. will give us something for our stock if we demand.

But we know by past experience that if buyers get us on the markets with heavy consignments they will be in a position to get our stock at whatever they care to name in the way of price and we cannot help ourselves. This also suggests something: It points clearly to us that if we did not

let them have our stock at their price, that they would be compelled to give us ours, and farther and better, that if we followed the tactics of the wool producer that we could get Mr. Packer out on the range, where we could deal with him on an equal footing, with no railroad, yardage or feed bills to hamper and compel us to sell at his price, regardless of whatever we were making or losing money.

If stockmen would set the price on their stock and would not sell below that figure, and would ship nothing until the price of his stock was deposited in his home bank, it would not be two weeks until Mr. Packer would be out on the ranch asking the price of cattle, hogs, etc. Not only this, but if there was something on that ranch which Mr. Packer did not want, he could say so. Fewer canners and culls would go to slaughter and we would have more improvements on our ranches and all this, too, without injury to the consumer. Let us ask how many days the packing company's plant would run after consignments of livestock ceased to come in? Could not the grower have his royal highness—the packer—down on his knees asking for cattle and hogs if he only would neglect to ship them to him?

Is it not the same with everything farmers have? If they would determine what it costs them to produce a crop or an animal and positively refused to sell it until they would realize something on it, we would be better paid and better satisfied. How many farmers would ask from \$4 to \$10 per cwt. for onions, even though he knew them to be scarce? I have known commission houses and merchants to ask such a price. Of course, some of us are compelled to sell a thing as soon as produced at best obtainable prices and to all such would be extended a better market if those who could would only hold off.—R. M. Wetzberger.

CARE OF MILK.

As soon as the milk is drawn it should be taken from the stable and strained. A milk room in the barn may be partitioned off from the cattle with tight walls and, if the barn is poorly ventilated and at times foul, the door to this room should open from the outside to avoid stable odors and dust. Milk that is strained and allowed to stand in the stable any length of time is often nearly unfit

for use because of the bad odors it has taken up. If a room remote from the cows cannot be provided, the straining may be done out of doors, care being taken lest rain and dirt enter the can. This trouble can be largely averted by covering the can between strainings with a clean, moist cloth.

Under the best of conditions, some dirt will get into the milk, and the strainer is always a very important utensil and will remove a great deal of this dirt if well cleaned and provided with a fine wire gauze and two or three thicknesses of cheese cloth. The strainer and cheese cloths should be well cleaned after every milking. This should be done by first rinsing with cold water, second by washing with warm water to which some washing compound has been added, and scalding. All dairy utensils should be cleaned in this manner and, when possible, should be thoroughly steamed.

As soon as the milking is finished, the cans should be placed in cold water, the milk stirred occasionally for a few minutes and the covers left on until the milk is thoroughly cooled, precautions being taken that no dirt gets into the milk. In order to hasten the cooling process, it may be necessary to change the water surrounding the cans occasionally. During the greater part of the year in the irrigated sections of the country the milk cans may be placed in ditches near the buildings. Warm and cold milk should never be mixed. They should be kept separate until thoroughly cooled or heated and ready to run through the separator. Milk should not be frozen.

Milk should be separated in pure air and as soon after it is drawn as possible. When thus separated there is no heating required and the skim milk is of greater value than when thoroughly cooled and re-heated before being fed to the calves, but the fresher it is the better. The separator should not be placed near the cattle where the atmosphere is dusty and foul, but preferably in a separate building reasonably remote.

The separator, like the other dairy utensils, should be cleaned after every using as previously described; first, by rinsing all parts with cold or tepid water, then by washing the different parts with warm water, using some kind of an efficient washing compound in the water; third, by rinsing again, and lastly, by thoroughly scalding or steaming the parts. Flushing the bowl until the water runs from it clear is not sufficient cleaning, and when this is the practice only evil results can be expected. The separator should be well washed every time it is used. A brush is better than a clean cloth for washing utensils as all corners and seams can be reached by it.—Colman's Rural World.

TOO MUCH HAY CAUSES HEAVES.

Heaves is a disease much too common and my observation has led me to the conclusion that a larger percentage of farm horses suffer from this malady than in the towns and cities of our country, and the reason for this is, in my opinion, due to the fact that a large number of our farmers feed too much hay.

No horse requires more than one full feed of hay once in the twenty-four hours. When farm horses are working every day they are subject to just this condition, because they have not time either at their morning or noon meal to eat too much hay, but in winter they often stand all day with hay before them all the time.

A horse, to be in perfect health, should have the stomach emptied of the previous meal for two or three hours before he is given another. If such is not the case, digestion will not take place in a perfect manner, and disease is likely to result. There is a remarkable sympathy between the stomach and the lungs, because of the fact that the same nerve trunk supplies nerve force to both organs. When the stomach is deranged from improper feeding the lungs are liable and heaves often result. Care should also be taken that a horse should be fed no dusty or musty hay. This dust is as light as air, and the horse in breathing draws it right into the lung

tissue with every breath, and this substance, being an irritant, is very prone to develop the heaves. If no better hay can be obtained the dust should be laid by sprinkling with water, when the horse will not breathe it, but it will be swallowed with this feed and probably do him no harm; but when at all possible only bright, clean hay, free from dust, should be fed to horses. Again no horse is in fit condition for active exercise with a stomach distended with hay, because the stomach, situated as it is right behind the lung space, if full bulges forward into the chest to such an extent that the lungs have no room to properly expand, and can not perform their functions properly and anything that interferes with the function of the lungs predisposes to heaves. In many cases if farmers would feed one-third less hay to idle horses in the winter months they would come out in the spring in better condition, and we would have fewer cases of heaves in the country than we have at present.—H. G. Reed, V. S.

DAIRY DOTS.

Dairymen should not neglect to put in a piece of corn for extra feed when the fall pastures become short. It will pay.

A bull is about as dangerous a pet as a grizzly bear, and the man who handles one without a nose stick is risking his life every time he does it.

Even if a farmer cannot afford a pure-bred herd of cows he can afford a pure-bred bull, and in time, with the right selection he can have a good herd.

To use brine for salting butter is not feasible except when very light salting is wanted. It takes the salt itself to make good, marketable butter.

How can we expect an underfed cow to produce a full supply of milk? Might as well expect to put 100 bushels of corn through the sheller and expect 110 bushels from the spout, to say nothing of the cobs.

There are but few farmers who cannot keep ten cows on their farms. The time spent in caring for them and the products comes in the evening and morning, when the farmer cannot work in the field.

A cement milk tank is the latest use to which cement has been put. It can be built in one corner of the cellar or milk house. The water will remain cool much longer in it than in the old-fashioned wood tank and it will be impossible for germs to hide in the pores.

The good milk cows are not the ones carrying a large amount of flesh. They cannot produce milk and flesh at the same time. But they need good feed just the same. A cow is a factory where the raw material in the shape of hay and grain is taken in and converted into milk. Farmers should see that there is plenty of raw material supplied to keep the factory running.

Down on a Southern plantation the dairy boys were accustomed to do the milking squatting down in a primitive fashion until the owner introduced milking stools with other improvements. The boy who first sallied forth with the stool returned bruised and battered and with an empty pail. "I done my best, sah," he exclaimed. "Dat blamed cow she won't sit on it!"

The State of Maryland is doing good work in spreading hygienic knowledge by means of a "milk special" train. This railroad train has one car, which is used as an auditorium, in which farmers in the vicinity where the train stops are invited to attend a thirty-minute lecture, with demonstrations on the production of clean milk. Two speakers occupy fifteen minutes each at all stopping places.

A polished knitting needle dipped into a vessel of milk and immediately withdrawn in an upright position, will tell you whether your milkman is honest or not. If the milk is pure, a drop of fluid will hang to the needle; but the addition of even a small portion of water will prevent adhesion of the drop.

Dairy farming is considered one of the most profitable branches of husbandry. It takes less fertility out of the soil than grain farming and furnishes the largest amount of fertilizer. The by-products can be used in many profitable ways and increase the farmer's income.

An Illinois farmer is keeping ninety cows on 225 acres of land and shipping his milk to Chicago. The gross receipts per cow in 1906 averaged \$108 and his land paid him an income of \$35 per acre. Dairying beats corn husbandry and more farmers could profit by it.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable. Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for use. Send for descriptive circulars, testimonials, etc. Address: THE LAWRENCE-WILLIAMS COMPANY, Cleveland, O.

Fairmont Hotel

Management of

Palace Hotel Co.

A Guarantee of Excellence

The only large hotel commanding a view of our incomparable bay. The best located hotel in the world, as it is the most convenient to the business centers, while its elevation affords wholesome advantages in the way of pure air, sunshine and the absence of all annoyances connected with the rebuilding of a great city.

Address FAIRMONT HOTEL

PAST PACER FOR SALE.

Seymour M. 2:23 by Diawood, dam Nancy H. by Upstart. Brown horse, six years old, absolutely sound and good mannered. Stands 15½ hands high, weighs close to 1100 pounds. Was timed separately a mile at Pleasanton in the 2:20 pace in 2:12, heat won by Inferlotta in 2:07½. He has been a half mile in 1:03½ to Miller cart and quarters in 30 seconds. For price and further particulars address

J. E. MONTGOMERY, Davisville, Cal.

TWO PACING STALLION COLTS WANTED.

A yearling or two-year-old by Star Pointer and one by Zombro. Must be good color, natural pacers, standard bred and registered, or eligible to registration. Bay or brown, little or no white, of good size, neat heads, not too high on legs, standing and traveling square on their feet. Must have plenty of knee and hock action. Must be absolutely sound and out of good mares. Address giving price, pedigree and full particulars as to speed, if worked, etc., F. W. KELLEY, Breeder and Sportsman, 616 Golden Gate Ave., San Francisco.

Racing!

New California Jockey Club

Oakland Race Track

OPENING DAY

SATURDAY, NOV. 9

Races Commence at 1:40 P. M., Sharp.

For special trains stopping at the track, take S. P. Ferry, foot of Market street; leave at 12, thereafter every 20 minutes until 1:40 P. M. No smoking in the last two cars, which are reserved for ladies and their escorts.

THOMAS H. WILLIAMS, President.
PERCY W. TREAT, Secretary.

GOOD ONES FOR SALE.

A number of good mares, geldings, colts and fillies by such sires as McKinney, Searchlight, Lecco, James Madison, Daedalion, Morengo King and Bonnie McKinney. Good individuals, all kind and gentle. For further information and to see the horses apply to

H. BUSING, Race Track, Alameda, Cal.

STAM B. FILLY FOR SALE.

A coming three-year-old, entered and paid up on in Pacific Breeders' Futurity and Stanford Stakes, sired by Stam B. 2:11½, dam Henrietta by Boodle 2:12½; second dam Flora H., dam of Thompson 2:14½, and Bonetti (trial 2:14½); third and fourth dams by producing sires. Is now in Henry Helman's string at Pleasanton, where she can be seen. Trotted a mile in 2:50 as a two-year-old. An excellent prospect. For further particulars address HENRY HAHN, 2125 Buena Vista Ave., Alameda.

TWO TROTTERS FOR SALE.

Sorrel Gelding, five years, by L. W. Russell, dam Diva, dam of Helen Keyes, by Piedmont 2:17½. This horse is good size, sound, a first-class business horse and is considered a good speed prospect. Black Filly, four years old, by Dictatus Medium, dam by Bay Rum 2:16½. Sound, and a safe and pleasant driver. Will be fast if trained. Price for either of the above horses \$300. E. CONSAIRI, N. E. Cor. Grove and Laguna Sts., San Francisco.

"SAVE-THE-HORSE"
Registered Trade Mark
SPAVIN CURE

ITS SUCCESS IS PERPETUAL.

Every day fastens a new series of Greatness to its crowded record of achievements. On abandoned cripples, on desperate cases, on pronounced incurables, on the young and on the old, for incipient and chronic lameness it is put to extreme tests and scores a new and lasting triumph.

THE CITIZENS' BANK

of

Atchinson County.

Rock Port, Mo.

I have bought several bottles of "SAVE-THE-HORSE" through Mr. C. H. Widner, but as he has sold out, will order direct.

I used part of last bottle on my bay mare that was lame in hind tendon and she is doing fine, but to make sure, enclose draft for \$5 for another bottle. Have had over thirty-five years' experience in drug business and consider it the greatest Vet. Liniment I have ever handled.

Yours respectfully,

W. W. HUDGENS.

Paterson, N. J.

I used your "SAVE-THE-HORSE" according to directions and find lameness is gone. Also the knee was in very bad condition, springing over, while now it is normal. Kindly mail \$1 box of the Ointment and we will send money on receipt.

Yours truly,

THE J. H. WESTERVELT LUMBER CO., F. J. Westervelt, Secretary.

"SAVE-THE-HORSE" is worth its weight in gold. No other agency, remedy or method can accomplish such miraculous and unfailing results. It saves time and money.

MAKES A TENDON LIKE A ROD OF STEEL.

Permanently cures Bone and Bog Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness, without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express Paid.

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.

PRICE—25c, 50c and \$1.00

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper.)

The Stallion Number

OF THE

Breeder and Sportsman

Will be issued February 15th, 1908. It will have a handsome cover in colors, contain many illustrations and be replete with matter interesting to breeders and horsemen.

If You Own a Stallion

Don't fail to advertise him in this issue, as an advertisement of your horse in this number will reach every man on the Coast who owns a good mare.

If You Own a Mare

You will find this number very interesting, as it will contain the stallion announcements giving particulars as to description, pedigree, terms, etc., of all the best horses on the Coast, and from these announcements you can decide on what stallion will nick best with your mare.

ARE YOU INTERESTED IN HARNESS HORSES?

If so, you will be interested in reading this number, as it will contain statistics and news that will be valuable and entertaining.

In place of getting out the usual large Christmas number of the BREEDER AND SPORTSMAN last month, it was decided to make a special effort and get out a handsome stallion issue, and the date of February 15th was selected as Christmas comes too early for an issue of this description. Owners of stallions who wish illustrations of their horses to appear in this issue should have photographs prepared without delay and send in their orders for space. A specially low price has been decided on for advertising in this issue, placing it within the reach of all. Write for price and particulars.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

A BREEDING BUREAU for the State of California, something after the plan of the one in New York, has been launched by the new California Jockey Club, and three stallions have been donated to it. According to the ideas and theories of the gentlemen who are fostering this enterprise, thoroughbred stallions, placed in different sections of the State, and standing for a nominal fee of \$10 or less, will greatly improve the breeds of California horses, and consequently be of vast benefit to the farmers and the State. To inaugurate this Breeding Bureau, and form a nucleus of stallions that are to be provided, the New California Jockey Club, a few weeks ago, arranged a race for a purse of \$600, of which \$500 was to go to the winner, said race being for stallions only, the owner of the winner to donate the horse to the Bureau. Twice was this sort of a race put on the card, but both times it failed to fill, and it was tried a third time. After much rustling six stallions were found whose owners were willing to put them in such a race, and on Friday, January 17th, the race was run. The stallions were Mr. Williams' Altanero, Mr. Burns' Integrity, Mr. Stovers' St. George, Mr. Ramsey's Judge, Mr. Stevens' Tryconnel and Mr. Applegate's Roscoe. The distance was six furlongs, and Mr. Williams' horse Altanero, the lightest weighted one in the bunch (all carrying ten pounds below the scale) won in 1:17-1/5. The record for this distance is 1:11-1/4. The report of the race in the form chart stated that Altanero was the strongest ridden horse in the race, but he stumbled near the finish. He was probably tired from his strong ride. Having won the race, he was donated to the New California Jockey Club's Breeding Bureau, and Mr. Applegate, owner of the stallion Roscoe, that finished last in the great event, presented that horse to the Bureau also. Col. Dan Burns has since donated his stallion Col. Wheeler to the same purpose, and these three thoroughbreds now comprise the list of stallions that are to "improve" the breed of horses in California. While we give the New California Jockey Club due credit for inaugurating an enterprise which its members, no doubt, think will be of benefit to the State, we hope that owners of mares other than those of very inferior stock will not be convinced that a thoroughbred cross is of great value. If a farmer owns mares of the draft type, he they full bloods or grades, he should breed them to stallions of the same type, and if he is the owner of trotting bred mares, he should send them to trotting-bred stallions. At this date, no one should start any breeding venture with scrub mares, and no breed but scrubs will be improved by crossing them on thoroughbred stallions. The draft, trotting and coach breeds are well established, and any person possessing mares of either of these breeds should try to improve them along the lines of their breeding and not attempt improvement by getting away from the family to which the mares belong. An Iowa farmer recently wrote to the Chicago Breeders' Gazette and asked if it would be advisable to breed a trotting mare to a thoroughbred stallion, and this was the reply:

"Inquirer does not state what he would like to breed from this mare. If he wants to get a small horse that is very active and probably will be able to 'run some,' but without much prospect of ever amounting to much from a market point of view, then it will be all right to breed the mare this way. We can not imagine, however, that any farmer who reads this journal will be guilty of crossing breeds without having some definite object in view. We

should most certainly breed her to a standard-bred trotter, choice of sire to be made according to the facts in the case presently unknown to us. The progeny of a Thoroughbred stallion and a standard-bred mare can not be registered in either the American Trotting Register or the American Stud Book."

This is a common sense answer, and we hope California farmers will ponder on such a statement from the best authority on breeding in the United States. A breeding bureau that is started with a \$500 stallion that can only run six furlongs in 1:17-1/4, with 109 pounds up, will certainly not be able to add much stamina to our California horses, let alone improving them in other ways.

THE FIFTH RENEWAL of that very liberal stake for three-year-old trotters and pacers, the American Horse Breeders' Futurity, is advertised in this issue. This is the stake where the breeder gets "a square deal for a dollar," and we advise every reader of the Breeder and Sportsman who owns a mare that he bred to a trotting or pacing stallion in 1907, to send \$1.00 to the American Horse Breeder Publishing Company, 162 High street, Boston, Mass., accompanied with the nomination of his mare in this stake. The Eastern market is the big market for horses that have extreme speed, and any owner of a sound colt that shows a high rate of speed can get a good price for him from Eastern buyers, if the colt is entered in stakes that are trotted and paced on the other side of the Mississippi river. This futurity is worth \$10,000, of which \$7,000 goes to three-year-old trotters, and \$3,000 to three-year-old pacers. First money in the trot is \$5,000, and in the pace \$2,000, while \$700 additional goes to the nominators of money-winners, and \$300 will be paid to the nominator of the dam of winner of first money in the trot, whether he owns the colt at the time of the race or not. If you should nominate your mare, and should sell the colt when it was dropped, and the new owner of the colt kept it paid up on, and won the stake, you would get \$300 for your investment of one dollar. This stake is worth taking a chance in, and one of the principal features of it is that there is no newspaper subscription clause in it. You pay \$1 to nominate, March 2, 1908; \$5 on weanlings November 2, 1908, and \$5 on yearlings May 3, 1909. No more payments are due until the year of the race. No more liberal stake was ever devised and we hope a goodly number of California breeders will take a chance in it. Read the advertisement in this issue.

NEXT TUESDAY the speed committee of the Pacific Coast Trotting Horse Breeders Association will meet at this office to formulate a program of harness racing for the regular fall meeting of the association. Messrs. I. L. Borden, C. A. Durfee, and T. J. Crowley comprise this committee and are fully competent to arrange classes that will not only fill well but furnish excellent contests. As soon as the Breeders Association announces its program, place and date of meeting, every other organization in the State should do the same without delay. A good circuit will be assured if this is done.

BREEDERS ASSOCIATION TO ARRANGE PROGRAM.

A meeting of the Board of Directors of the Pacific Coast Trotting Horse Breeders Association was held last Wednesday, and those who have horses to race this year on the Pacific Coast Circuit will be pleased to learn that the association will immediately begin active preparations towards giving a big harness meeting this year. The Speed Committee consists of Messrs. Crowley, Durfee and Borden and has been directed by the Board to hold a meeting on Tuesday next to formulate a program of races for the fall meeting and to advertise it without delay. This is a step in the right direction and should be followed by all the other associations. Those who contemplate having horses in training this season want to know positively what the prospect is going to be of getting races for their horses. The dilatoriness of the associations and managers of tracks in not announcing their programs early in the season is most discouraging to horsemen who, without assurance of meetings and classes for their horses, are in doubt as to the advisability of going to the expense of training. Of late years the uncertainty of a good circuit in California that has confronted the horsemen early in the season, has

driven many owners to making engagements on the Eastern and Middle Western Circuits who would have preferred to race nearer home had they been assured of a continuous circuit here. If it could positively be announced that a meeting over every mile track in California would be given and a circuit arranged to the best advantage in regard to shipping from one place to the next, a great boom would be given racing here and the meetings could all be made more than self-supporting. In places where there is no regular association or where the association is backward about coming forward, let several public spirited and energetic citizens who are interested and love the sport take the initiative, get out a program and talk the kind of business horsemen will understand. Their efforts will be appreciated and they will be rewarded by a big entry list which is the prime factor in making a successful meeting. To them will be all the glory and by good management it need not be all glory but what is essential to the permanent success of any enterprise, and that is dividends. It is not necessary to close all the events early in the spring but to announce a full program and make some of the events early closing. By keeping all of the horses here, liberal advertising, getting up excursions from surrounding towns at the time of the meeting and good management, the meetings can be made to pay not only those who give them, but the merchants and business men of the town, besides advancing the big interest of breeding harness horses.

At the meeting of the Board of Directors, President Heald announced that he had been invited by Major P. P. Johnston, President of the National Trotting Association, to attend the Biennial Congress of that governing organization and act on the Committee on Rules. Prof. Heald, for over thirty years, has been a breeder of harness horses and for a great many years has been President of the P. C. T. H. B. A., and has always taken a great interest in its affairs and in harness racing in California. He is a member of the Pacific District Board of Appeals of the National Trotting Association and is as well posted on rules governing harness racing and the conditions on this Coast as any man in the country. The Board passed a resolution commending the appointment and authorizing Prof. Heald to specially represent the Association at the Congress. Nearly all of the members on this Coast who will not have a special representative at the Congress have sent credentials to Prof. Heald to represent them, having implicit confidence in his judgment and his knowledge of the requirements as to what is best to be done for the interests of the members on this Coast.

A communication from M. D. Wisdom, Secretary of the North Pacific Fair Circuit, was read, suggesting that the managers of the fairs in the north get together early in the season and announce their stakes early so as to hold the horsemen on this Coast and arrange a Pacific Coast Circuit so that the big meetings in Washington and Oregon would follow the California Circuit with one week between the California State Fair and the Oregon State Fair at Salem. Mr. Burke was appointed a committee of one to see if this matter could not be arranged with the California State Agricultural Society so that dates will be taken that will not conflict.

ANSWERS TO CORRESPONDENTS

S. E. McBride, Visalia.—Dora Doe is a bay mare, foaled, we believe, in 1895. She was owned in 1899 by a man named McAlpine, who lived at Yuba City, Sutter county, and was sold by him to Sam Hooper, who raced her and gave her a record of 2:12-1/4 at San Jose in 1900. She is by Don Lowell 2:14-1/2, but we do not know her dam's breeding. Don Lowell is by Don Marvin, out of Esmeralda by Brigadier.

Chris. Anderson, Arcata.—The term "Full Blood" is applied to any animal that is eligible to registration in the books of the breed to which it belongs. It is used to denote that they are purely bred. Thus there are full blooded Berkshire swine, Shropshire sheep, Holstein cattle, Langshan fowls, etc. The term thoroughbred is correctly applied to the running horse that is eligible to registration in the English or American Stud Books; he is the race horse. Standard bred is trotting or pacing bred horses that are eligible to registration in the American Trotting Register. A horse can be trotting bred and still be ineligible to registration.

R. J. McGrayn, City.—The jack-ass is the male ass. The female ass is called a jenny. When the male ass is bred to a female horse the product is a mule, and being a hybrid will not breed. The offspring of a jack and a jenny is an ass, the sex determining whether it is a jack or a jenny. A female mule will not breed, neither will a male mule, though there have been a few exceptions to this rule. The produce of a jenny and a stallion is called a hinny, and is like the mule, a hybrid and will not breed. The donkey is an ass and the name is applied to either sex.

Southern California Gossip

Our Mr. J. R. Fronefield, who has been in Southern California for the past two weeks, sends us the following interesting gossip of the harness horses he saw at the different tracks:

Los Angeles Work-outs.

In Will Durfee's string last week, there was considerable doing in the way of speed. Carol (4), by Del Coronado, trotted a mile in 2:17½, last eighth in 15½ seconds. Wickie Wickie (4), by the same sire, trotted a mile in 2:22, last quarter in 31½ seconds. Cleopatra (5), a green pacer by Zolock, went a mile in 2:11, with the last quarter in 30 seconds, and wears no hoppers. A two-year-old by Petigri trotted a mile in 2:26½, with a quarter in 34½ seconds, and looks like a good one; is out of a James Madison mare. A Del Coronado yearling out of a James Madison mare showed an eighth in 18 seconds. The bay stallion Owyne 2:22 trotting, by Owyhee 2:11 out of Inex by Sweepstakes 2:98, is one of the handsome horses in the country. He has been converted to the pace and can simply fly at that way of going. The Del Coronados are all fast and give every impression of being high-class race horses like their sire. A three-year-old filly by him trotted a quarter in 35 seconds and a two-year-old an eighth in 19 seconds. A yearling by Petigri paced a half in 1:15. One of the best ones in Durfee's string is the green mare Zomalta by Zombro that has worked a mile in 2:09 and brushed an eighth recently to cart in 15 seconds. Silver Dick, the green pacer by Geo. W. McKinney, that won at the last matinee in 2:12 flat, has been a mile in 2:10 with the last half in 1:02½, and the last quarter in 30 seconds. Avalon, a grand looking big green trotter, has shown a half in 1:06. He is by Mendocino, and belongs to Clarence Berry of Selma, Cal. Dewey, a green pacer that wears no hoppers, has been a mile in 2:08½, with the last quarter in 30 seconds. There are six more green pacers, some going with and some without hoppers, and a few green trotters with quarters in 34 seconds to their credit, which is a lively stable clip down here. The principals of Durfee's racing stable for the coming season are Carlok in 2:13½, Del Coronado 2:09½, Murray M. (3) 2:14, Copa de Oro 2:07½, and the green trotter Regalo, that matined in 2:09 the other day. They are all taking slow work and looking fine. Regalo should really be excepted from the "slow workers," as he has been taking some stiff work and is now fit and ready, and can step fast all the way.

Walter Maben's stable contains a number of real good ones. There is a yearling by Zombro that has been a quarter in 31 seconds already on the trot, and a bay stallion by Heir-at-Law 2:05½ out of a mare by Axtell 2:12, that has paced a mile in 2:15, with the last half in 1:04, and looks like one that would take a very low record. Walter has just started to work a green pacer by Athabio, sire of last year's stake winner Nogi 2:17½, and has been a quarter in 33 seconds with him. Ida Middleton 2:20, whose matinee record is 2:14 trotting, has shown a mile in 2:12. A green trotter by Zombro out of a mare by Albion, turned a mile in 2:14 very handily, and a pacing full brother to Alfred D. 2:12½ is just converted to pacing and can brush very fast. A green trotter by James Madison looks like the goods, having been a mile in 2:13 with the last quarter in 30¾ seconds. A great bred one is a five-year-old mare by Sidney Dillon out of By By by Nutwood. She has trotted a mile in 2:17, with the last quarter in 32½ seconds. There are not many like her. A nice green mare just started up has shown 2:30 and will soon have her name in the papers. She is by McKinney. A green mare by Monbells showed a mile in 2:16 with the last quarter in 31½ seconds, and is a sure trotter of the right kind. The Pig, as the fastest green pacer in California is called around this track, is one that wears no hoppers and makes no mistakes. His fastest mile was in 2:03¾, and the last quarter of this mile was in 30½ seconds. This pacer has never been to the races, but has been talked about for two years.

Ted Hayes is training a string of horses for Morris Brothers. Modicum, whose record is 2:13 pacing and 2:17½ trotting, worked a mile in 2:15 with a quarter in 30½ seconds. Alsandra by Bonnie Direct has been a mile in 2:17, last half in 1:05 and last quarter in 31 seconds. The world-beating weanling by Bon Voyage is out in the infield for a few days.

J. O. Gerrety has Mr. W. A. Clark, Jr.'s, horses all in good shape. Bon Voyage 2:12½ has been a mile in 2:17½ with the last quarter in 31 seconds. Miss Georgie 2:08½ is only jogging now, but looks fine. Beulah, a four-year-old by Nutwood Wilkes, showed a mile in 2:15½ with the last quarter in 30½ seconds, and the green trotter Liberty Song by Liberty Chimes showed a mile in 2:23¾. Buck 2:20¼ recently worked a mile in 2:16½. Chiquita (3) by Highland C. 2:19¾ has trotted a full mile in 2:37½, with the last quarter in 37 seconds. This filly has just been converted to trotting and does it so squarely and in such good form that no one would ever guess she had been a pacer, and a very fast one as a two-year-old.

J. A. Torrey of Long Beach is going very carefully with the Zombro filly Bessie T. This filly raced well last year under adverse conditions and should show well this year as she is entered in the stakes.

G. A. Pounder has a colt by Audubon Boy 1:59¾ out of a McKinney mare that is not only of the bluest blood, but perfectly formed. It was foaled on Christmas Day, just a week too soon for a stake winner.

In Sam Murphy's stable is Zoe, a two-year-old filly by Zombro, that trotted a quarter in 38 seconds as a yearling. Charley Wilkes, a fine year-old trotter by Nutwood Wilkes has been a mile in 2:24½, and a quarter in 34 seconds. Zombretta, a green trotter by Zombro, won her race at the last matinee, the third heat in 2:13½ eased up. Doesn't that look good? Direct Maid, a green trotter, has been a mile in 2:20, last quarter in 33 seconds. The three-year-old pacer Alice by Zolock, a half in 1:12 without hoppers, and will soon do although very green. May McKinney is a green one of the kind that it pays to train. A green pacer by Linda Richmond out of a Sultan mare, trotted a quarter in 34 seconds with little work, and a weanling colt by Syboleer paces and pulls a man in a cart as though it was play for him.

Henry Delaney, the man that made Zolock 2:05½, Jonesa Basler 2:05½, Queen Pomona 2:07½, Delilah 2:08, Welcome Mac (matinee record 2:08), Virginia 2:09½ and others, has Queen Pomona and a small stable of well bred youngsters. The Queen is looking fine but is only jogging as yet. A green pacer by Rey Direct 2:10, out of a McKinney mare, will be talked about, Delaney says, whenever he is ready to step her up. Another green pacer by Nutford out of a McKinney mare has been a mile in 2:12, and all the youngsters are looking well and can brush fast. In a recent newsy letter to Delaney, Jas. Gatcomb wrote that he will some time come back to California.

James Stewart has a stable of nine head, but nothing much is being done with any of them in the way of speed except a two-year-old filly by Diablo out of a mare by Athadon, that will make all the two-year-olds sit up and take notice.

J. J. Rupp's eighteen months old colt by Red McK. covered an eighth in 21½ seconds on the trot recently very impressively.

Fred Ward has been riding easy behind Magladi 2:10¼, but has driven the green trotter Emily W. by James Madison a mile in 2:10¼, and the pacer Explosion a mile in 2:08¾. The pacer Siegfried turned the track very handily, the other day, very close to 2:10 and won his last matinee race in 2:12. Neerguard has been a mile in 2:16¼ and brushes fast. Red Lock, a Zolock stud out of a mare by Atto Rex, is good enough to go to the races and has shown 2:16 for the mile. Another that will take some beating from now on is Shecam 2:12½.

Ramona S., a green trotter by Zombro out of an Anteo mare is owned by Ed. Swaby of Dixon, and is being trained by Ted Hayes. She worked a mile in 2:18 last summer and is a good prospect.

L. E. Shaw's yearling by Adjutant is out of the dam of Bystander 2:07½, and he has a full brother to it that is a great big weanling. Both are pacers with the right way of going.

J. P. Gaines has a four-year-old brown stud by Zombro that has trotted a mile in 2:35¼, with a quarter in 36 seconds, and can go much faster.

Mr. J. C. Grubb of Galesburg, Illinois, came to Los Angeles to find the exact condition of the draft horse market, thinking he would soon ship out a car-load of workers, reserving enough room in the car for his Allerton stallion Redlac 2:07½, but finding the market stagnant, will not ship for some forty to fifty days.

John W. Snowden, Secretary of the California Breeders Association, works hard to boost everything that tends to help the matinee game in Los Angeles, and to improve things generally for the light harness horse breeders. He has Scrappy Nell, matinee record (3) 2:26, trial 2:18, bred regularly. Her oldest is a two-year-old by Limonero, that has just been started up and brushed a quarter in 40 seconds, mocking a real trotter at every step. A yearling by the same horse and a weanling by Direcho are both large and fine lookers and will soon get a little early education. The mare was bred to Redlac last summer and is soon due to foal.

At San Bernardino.

The sight of snow-capped hills backing the green and gold of orange groves, and a good track and stables with plenty of grass, is inspiring to the horseman who visits "San Berdoo."

Packer & Donahue have here a stable of nine head. A three-year-old by On Stanley that has just been taken up, worked a quarter last summer as a two-year-old in 38 seconds. A three-year-old by Zolock out of Laura Inca, dam of Sir Gid 2:27, is a fast filly. A half sister by Ben Z., son of Zolock, has trotted a mile in 2:30 with a quarter in 33 seconds, with six weeks' work. She is a four-year-old. The first colt, R. Ambush 2:11¼, ever sired is in this string. He is a two-year-old trotter and is staked all down the line. As he can show a 2:30 shot very handily, will bear keeping in mind. A fancy filly by Izalco, full brother to Delilah, belonging to Dr. L. W. Orne, D. V. S. of San Bernardino, can step fast and is surely the making of a fast trotter. Several in this string are still in the infant class, but beginning to step along.

Rutherford & Young have 16 stalls occupied. They have Zolock 2:05½, R. Ambush 2:11¼, and Ben Z., a Zolock stallion that has a lot of speed at the trot; he was a winner at the last matinee with a heat in 2:30½. Another young stud in this stable is Conqueror (2) 2:16, by Direct Heir out of La Belle (2) 2:16 by Sidney. He beat Ray o' Light one heat at

Santa Rosa. Delilah 2:08 and Josephine (3) 2:20¼ are running out and looking good. The latter was second to Hymettus in 2:13¼, 2:10¼ and 2:09½, and timed separately in her Woodland race in 2:10½ with the last half in 1:01½. Both will be taken up about the middle of February and put to jogging. A three-year-old pacing filly by Sky Pointer Jr. has been bred to Zolock. She worked a mile in 2:27½, with the last half in 1:11. Easter, a two-year-old by Monicrat out of Atterina by Atto Rex, stepped a full mile last matinee day, December 5th, 1907, in 2:32, with the last quarter in 35 seconds. That is going some for a yearling, and he looks the great trotter that he is. Several of the remaining youngsters show plenty of speed for the amount of work done on them, and are a nicely gaited lot. A choice one is a yearling trotter by On Stanley 2:17½.

Chas. Thornquest has a stable of six, including Adjutant 2:18, and some likely youngsters by this horse. He has a three-year-old pacer by On Stanley out of Nellie Bly, that worked a trial mile as a two-year-old in 2:15½, half in 1:04½, quarter in 30½ seconds, and won a matinee race December 5th in 2:21½. Mr. Thornquest also has a green trotter by Neerut 2:12½ that is considered a good prospect.

G. W. Bonnell, of Redlands, is at this track with a string of six, including the four-year-old stallion Velox by Zolock out of a strictly thoroughbred mare. He is a pacer, never trained much, but can step a quarter in 35 seconds any time and was a winner in his last two matinee races. Adalanthia is a two-year-old pacing gelding by Zolock that is green but has worked a mile in 2:17½, and there is a four-year-old trotting filly by Zolock out of a Woolsey mare that was a close second, in 2:21 in a matinee. Arrow Stanley is a stud three years old by On Stanley out of an Electioneer mare, that has a nice way of going and will be given careful training this season. Mr. Bonnell is just breaking a three-year-old filly by Badger Boy 2:11, that shows good as a trotter. Norda, an unmarked pacer by Mercury out of Bessie Dale by Brown Hal, raced nicely last year, and should do well this year as she has shown a trial in 2:11½ over a track not considered fast.

William Rourke owns two fine stallions in On Stanley (3) 2:17½, by Direct 2:05½, and a five-year-old that is a full brother to Hazel Kinney 2:09¼. This colt is registered as Larry Kinney 43,322, and in his only start won a matinee race and trotted the last quarter in 34 seconds.

R. Ambush 41840, the good colt trotter by Zolock 2:05½, that reduced his record to 2:11¼ last season, winning the \$5000 stake at Salem, when he beat North Star 2:11¼, Carlok in 2:13¼, Berta Mac 2:13¼, Freddie C. Jr., Satin Royal and others, is here. His dam is May Kinney by Silkwood 2:07, second dam Satinella by McKinney 2:11¼, third dam Laura Inca by Echo, etc. He raced as a two-year-old, taking a mark of 2:20, as a three-year-old took a race record of 2:14¼, as a five-year-old trotted to his present record which is the trotting record for the Salem track and the Northwest. In all his racing career was never behind the money. After a season in the stud he will be raced again this year.

At Riverside.

There is a good half-mile track here and much interest in the light harness horse.

Dr. F. A. Ramsey is in line with two handsome stallions. Baron of Glenwood, black horse, trial 2:14½, is by Oakland Baron, out of Alma Wilkes by Baron Wilkes, and is one that is bred right, looks right and breeds right. The other is the three-year-old Don Reginaldo by On Stanley, out of Belle Raymon, second dam Gypsy, the dam of Delilah and grandam of Zolock, by Gen. Booth. This colt is one of the best lookers in the county and a trotter. The regret of his future is that he is entered in but one stake—the Pacific Breeders' Futurity—as, barring accidents he has a royal chance in any company. Dr. Ramsey also has Lola Belle, a brown mare (4) by Major Bell, son of Belsire, out of a mare by Lockheart 2:08½. This young mare is in foal to Baron of Glenwood.

Mr. T. Churchill Cobb, of Wellsville, New York, of the firm of Cobb Bros., owners of Direct Hal 2:04¼ and Mainsheet 2:05, is spending the winter in Riverside and other Southern California towns. Mr. Cobb is the owner of the McKinney mare Juliet D., the dam of Irish 2:08¼ pacing, the horse that was converted to the trot, but died before getting a record at that gait. Mr. Cobb declares that Irish was as fast as Mainsheet at the trot and feels the loss of what he considered after a few trials as one of the great sensational trotters. Mr. Cobb says that Irish was always a bad gaited pacer, but when he got going at the trot was as smooth as oil. Juliet D. is now at P. J. Williams' farm at San Leandro, and is again in foal to Monterey 2:09¼. She will be shipped east in the spring, and they hope to raise another like Irish.

Mr. Cobb's Companion in his travels is Mr. Milton Churchill of Toledo, Ohio, formerly of Rushville, Indiana. He is the owner of Joe Wilkes 2:12½ by Roy Wilkes. Joe Wilkes' record was made over a half-mile track last year at Baltimore. This horse will be in the stable of Al. Thomas next season, and will be staked all down the line.

Mr. E. F. Binder of Riverside has two stallions that he will offer for sale, now that he has sold the race-track property here. They are young, well bred and good looking. Some one can secure a bargain. The track is now leased to the driving club by the new owner.

The Zolock stallion is four years old, and out of Fernwood 2:23½ by Silkwood 2:07. He is a big

horse, reported a sure breeder, and sires colts with plenty of size and quality. The other horse is by Allerton 2:09½, out of Eoka by Sphinx, and is a fine big trotter that should make an excellent stock horse. Several young things by Expedition and Worth White are being broken and later will be offered for sale.

Mr. L. Fötter has a green mare by Zolock that has shown a nice way of going at the trotting gait, developing a 2:24 clip with little work, and a three-year-old gelding by Stanton Wilkes 2:10¾, that looks like a good prospect.

G. H. Judd is training a string of ten head, including a green stallion by McKinney out of Zoe Patch by Mambriño Patchen, etc., that is "some trotter." A mile by this fellow in 2:25 over the half-mile track means considerable. Madie, a green pacer by Silver Coin 2:10 (Steinway-McKinney mare), has been a mile in 2:18 pacing, and being a big, fine looking mare, and nicely gaited, has many admirers. The remainder are a nice lot of young things that are a credit alike to stock farm and race track.

At Santa Ana.

The race track here is in good shape, and several young trotters are quartered there, being broke and gaited.

Charles Farran will open a public stable there about February 1st.

Geo. W. Ford finds on looking over records and reports that 49 of the get of his stallion Neernut 2:12½ have taken records or gone trials in from 2:09½ to 2:30. Mrs. Lizzie Stiger of Berkeley, Cal., purchased Nutbrush, a pacing gelding by Neernut. This gelding was matineed at Los Angeles, was a winner, and had a mile in 2:14. Mrs. Stiger writes that she is well pleased with this horse as he has speed and is a pleasant driver.

Franklin Anderson, the gentleman that bought Burnut 2:13¾ at Phoenix, Arizona, last fall, in a recent letter to Mr. Ford states that the horse shows great form in their matinee races, and he now finds he owns a great trotter, which will be fully proven this season in the races. Goldnut 2:11½ has a few choice weanlings to represent him, and if their looks can be relied on will make a great stock horse. He is set down as a 2:08 trotter next season.

After seeing the horses working out here, I have come to the conclusion that any horse that wins a matinee race, around Los Angeles, San Bernardino, Riverside or Santa Ana will about do to go to the races.

RIVERSIDE DRIVING CLUB.

The annual banquet and business meeting of the Riverside Driving Association was held on the evening of January 9th, when a permanent organization was perfected. It was voted to hold a matinee race meet on Washington's birthday at the Riverside Driving Park, for which a permanent lease was made. Officers and directors for the new year were elected as follows:

President—Herman G. Stanley.
Vice-President—J. F. Backstrand.
Secretary—Dr. F. A. Ramsey.
Treasurer—J. T. Garner.
General Manager of Track—G. H. Judd.
Starter—Herman Stanley.
Clerke of Course—W. L. Scott.
Speed Committee—Axel Nelson, G. M. Carrigan and J. T. Garner.

Directors—W. A. Hayt, J. F. Backstrand, J. T. Garner, G. H. Judd, Axel Nelson, Dr. F. A. Ramsey and G. M. Carrigan.

At the banquet John T. Garner officiated as toastmaster. Several members of the San Bernardino Driving Club were present, including Thomas Holmes, R. O. Buckman, Joe Kelly, Homer Rutherford and Nick Young, all of whom were called upon for short talks. Among other who spoke briefly was W. A. Hayt, who despite his advanced years, takes a lively interest in all racing matters.

It is proposed that the meet to be held February 22 shall be the best in the history of the association.

H. T. Helm died recently at Los Angeles, Cal., aged seventy-seven years. He was one of the first horsemen to write a book about the American trotter. Rand & McNelly published his "American Roadsters and Trotting Horses" thirty years ago. In it Mr. Helm advanced the theory that the speed of a harness horse was largely dependent on the animal's conformation. J. H. Wallace, who was the first to maintain that the trot was in the head and not in the legs, dubbed it the "tape line theory," and so ridiculed the author that he made a bonfire of manuscripts prepared for a second volume of his work and soon afterward gave up all connection with horses.

William Bradley, who purchased the trotting stallion Todd at the recent Old Glory sale for \$30,000, has also purchased the Hackney Oxford King to place in the stud at his breeding farm in New Jersey. Oxford King was bred by H. McK. Twombly and was got by imported Acrobat from a daughter of Confidence.

Turley 2:07¾, the famous trotting gelding raced the past three seasons by E. F. Geers and sold at the late Old Glory Sale, is now being used as a saddle horse in Central Park, New York, by C. K. G. Billings, who now owns him.

ANOTHER FINE COLT FOR AUSTRALIA.

On the steel steamer Foreric, Captain Gardner, which cleared from this port for Australia last Saturday, was a black colt bred by Mr. S. B. Wright of Santa Rosa, and consigned by him to Mr. F. W. Krempin, of Newcastle, New South Wales. The colt, as his picture herewith will show, is a very handsome youngster. He was foaled on the 13th of March, 1907, being ten months old when shipped. The photograph from which the picture was made was taken last October, when the colt was but seven months old. The colt was sired by that splendid son of McKinney, Zolock 2:05¾, sire of Sherlock Holmes 2:06¾, Bystander 2:07¾, Delilah 2:08 and many other fast performers. The colt's dam is Maud P. 2:26 by Idaho Patchen 2:26½, son of Henry Patchen 2:32½, he by Geo. M. Patchen 30, one of the trotting champions of forty-five years ago, whose record of 2:23½ was made in 1860. The dam of Maud P. was Lady Moor, and she the dam of Arthur W. 2:11½, and John A. 2:12¾. Lady Moor was by Grand Moor, that sired dams of Joe Wheeler 2:07½, Humboldt Maid 2:13¾ and Lady Waldstein 2:15. The next dam was the Dinsmore mare by Glencoe Chief, he by Keokuk 546, out of a mare by imported Glencoe. The next dam was a daughter

of Ethan Allen Jr. 2903, a son of Ethan Allen 43. The breeding of Maud P., dam of this colt, is in very strong lines. The descendants of Geo. M. Patchen, The Moor, and imported Glencoe, have always been noted for their endurance and gameness, and crossed with the blood of a race horse like Zolock, the result cannot help being colts of the staying kind. On Mr. Wright's farm at Santa Rosa there are not many mares, but those he has are choice and he considers Maud P. one of the best, although none of her get are old enough to race. Her two-year-old by Lynwood W. is a trotter, and has shown enough in his breaking to convince Mr. Wright that he is as promising as any he ever raised and on his farm were born Sonoma Girl 2:05¾, Charley Belden 2:08¾ and other fast ones. Mr. Wright now has there Nellie Fairmount, dam of Zambra, holder of the world's five-mile-trotting record, Belle W., dam of Bolivar 2:00¾, the fastest pacer ever bred in California, and Maud Fowler, dam of Sonoma Girl 2:05¾, the leading money winner of 1907. Maud P., although she has yet to make her fame as a broodmare, is therefore in high class company, and when it is stated that Mr. Wright considers her one of his best, it will readily be seen that he puts a high value on her. Maud P. was a good race mare and trotted a mile at Stockton, driven by the late James Sullivan in 2:13, and could have beaten 2:10, it is said. Her colt by Zolock will be a splendid addition to the choicely bred American horses that have gone to Australia, and we hope he may have a good trip and be safely landed, as he will certainly make a reputation there for California bred horses that will lead to many further consignments from here. He is a natural trotter like his two-year-old half-brother, Lynwood Patchen.

The picture of the colt printed herewith was taken when he was seven months old.

THE CHICAGO HORSE MARKET.

The demand for horses is on the increase at Chicago, after two months' of poor business.

Prices have not recovered all the loss of last fall, although the market is on a much healthier basis than during the panic.

There is a good demand for well-mannered horses, but they are scarce in the country.

The quotations of last week were as follows for good to choice of the various kinds:

Drafters\$175@275
Loggers and feeders135@200
Chunks110@150
Farm mares and small chunks80@135
Light drivers150@360
Actors and coaches160@370
Carriage pairs290@650
Western (branded)60@100

Drink Jackson's Napa Soda.

NEWS FROM THE NORTH.

[Rural Spirit, January 15.]

Fred Shaft, owner of Sherlock Holmes 2:06¾, is negotiating with Ben Walker, of California, to drive Sherlock this year.

The Portland Horse Sale Company are arranging to hold another auction sale of horses the last week in April or first week in May of this year.

The mare Maud L., that was raced on the North Pacific Circuit last year by J. Grauf, seems to have a dark cloud hanging over her identity. Some horsemen here claim she is no other than Foxie Curd 2:07. The winnings of Maud L. were protested at Winnipeg.

William Williamson, of Nampa, Idaho, has purchased the stallion Christmas Chimes 2:19 and his daughter Nellie Chimes from Repeje and Perry, of Michigan. Christmas Chimes 2:19 is a son of Chimes; dam Beattie, a producing daughter of Mambriño King and was bred on the noted Village farm. Nellie Chimes is out of Knob by Sir Denton. Mr. Williamson owns other standard bred trotters and is laying the foundation for a breeding farm.

The annual meeting of the North Pacific Fair Association has been announced for February 6. At this meeting dates will be arranged for a circuit of fairs throughout the Pacific Northwest. Representatives who attend this meeting should come prepared to announce a speed program. This is absolutely imperative in justice to their own association, as well as others on the circuit. California horsemen have their eye on this circuit, and if purses are to their liking most of them will race here the coming season. The two big stakes at Salem have a wonderful influence in starting the horses this way, and with Portland on the circuit with equally as large a program there will be but little doubt about getting the horses this far. The balance of the circuit should arrange some attractive events, and no doubt will, as good, clean harness racing seems to be gaining ground everywhere.

LAST LIVING DAUGHTER OF HAMBLETONIAN.

Recent discovery of Rysdyk Maid 2:24¾, probably the last surviving foal of Rysdyk's Hambletonian, on a Massachusetts stock farm, is a reminder that many old time trotters of note are living out their last years in horse paradise, pensioners of men who have never forgotten that in their younger days these horses gave them enjoyment, honors and, in some cases, riches.

Walace's Year Book shows that Rysdyk Maid was foaled in 1872 and is therefore thirty-six years old. She was bred by Dr. W. J. P. Kingsley, of Rome, N. Y., and started in her first race as a four-year-old just thirty-two years ago. It was ten years later, in her last campaign, that she gained her record of 2:24¾ in the sixth heat of a race over the Mystic Park track, in Boston. In the meantime she had trotted thirty-six races, winning five of them. Everett L. Smith and other New England horsemen remember her as a punchy, lazy, sulky little dark mare, barely fifteen hands high, that John Riley used to drive with a spur and sometimes with a chain, so sluggish was she in races.

After her retirement from the turf, in 1886, she dropped out of sight and was put to breeding by J. J. Crawford, of Belmont, Mass., who then owned her. In 1893 she produced a bay filly, Easter, by Salvini, that in 1901 won a race in the Grand Circuit, at Providence, gaining a record of 2:12¾.

The old mare is still on the Crawford farm, now owned by David L. Thomas. Few horsemen knew she was living until Mr. Smith discovered her a few weeks ago.

When thirty years old, Rysdyk Maid was tuned up for speed by Mr. Thomas' daughter on the farm track and trotted a quarter of a mile in public in 0:40 at Combination Park, in Boston.

Miss Thomas feeds the old mare on porridge in winter and in summer lets her nibble grass in the pasture lot. Mr. Smith, who recently discovered this "last of the Hambletonians," says that Rysdyk Maid is still quite active and vigorous and seems likely to live for several years to come.

BREEDING THE AMERICAN TROTTING HORSE.

An American Breeders' Association has been established with headquarters in Washington, D. C., in which Hon. James Wilson, Secretary of Agriculture, is President, and Hon. W. H. Hays, Assistant Secretary of Agriculture, is Secretary, and the following committee on the breeding of the American Trotting Horse has been appointed, viz.:

Mr. H. K. Devereux, Chairman....Cleveland, Ohio
Senator Jos. W. Bailey.....Gainesville, Tex.
Mr. Wm. Russell Allen.....Pittsfield, Mass.
Mr. Sterling R. Holt.....Indianapolis, Ind.
Mr. Norman J. Colman.....St. Louis, Mo.
Mr. R. C. Estill.....Lexington, Ky.
Mr. A. B. Cox.....Paoli, Pa.

The general duties of the committee have been outlined as follows:

First, To investigate and report on methods of breeding trotting horses; and, second, to encourage the production of strains of the American Trotting Horse for business driving, and for carriage driving. The annual meeting of this association will be held in Washington, D. C., January 28-30, 1908.

NOTES AND NEWS

Zolock 2:05½ will leave for Walla Walla, Wash., February 1st and will make the season of 1908 there.

An advertiser who desires to raise carriage horses, wants a trotting stallion 16 hands or over, that weighs 1,300 pounds. A toppy fellow, one with style, good bone, and high action is desired. No pacers wanted.

Livermore will probably hold a horse parade and stallion show this spring, a meeting of horsemen having been called for to-day, at that place, to decide on the matter. Livermore has held many such shows in the past that were a credit to all concerned and resulted in much good to all. Some fine stock has been brought into the country around Livermore during the past two years.

From the way the young Bonnie McK's are acting, Mr. Geo. A. Kelly of Walla Walla has a coming great sire in this son of McKinney, whose dam Bosilene 2:14½ was by Stamboul, and whose second dam Bon Bon 2:26 by Simmons, is the dam of Bonnie Direct 2:06¼, Bonnie Steinway 2:06¼, Rector 2:10½ etc.

Coney 2:02 and Edwin S. 2:05 are both now owned by Bostonians who are driving them on the snow speedways around the Hub this winter.

Tom Hamilton, of San Diego, owns a team of four-year-olds by the Prodigal stallion Prochein, that are said to be as handsome a pair as were ever seen in the southern country. Mr. A. B. Clements, of Montana, who bred these horses, has recently purchased 400 acres of land in San Diego county, and has placed thereon the standard bred stallion Prochein 23532, the saddle stallion Red Squirrel and a band of about fifty mares and colts.

Alex. Nelson of Riverside has been presented with a handsome trophy offered by Mr. W. A. Hayt, of the same town, to the owner of the horse making the fastest time on the Riverside driving track during the year 1907. Mr. Nelson's horse McO. D., which he recently sold to Los Angeles parties for \$1,500, paced the mile which won the trophy for Mr. Nelson.

It is reported that an effort is being made to purchase the well known West Virginia trotting stallion Lord Roberts 2:07¼ for export to Europe.

Mr. W. S. Harkey's mare Deviletta 2:10½ by Diablo 2:09¼, that was raced some up north last year and bred to Hal B. 2:04½, is not in foal, more's the pity, as that mating might have produced a whirlwind pacer. It is Mr. Harkey's intention to breed this young mare to Aerolite (3) 2:11¼ this year. In condition and with good handling Deviletta should pace a mile in 2:06 or better, as she has a wonderful flight of speed.

Bonnie Russell 2:10¼, the bay stallion by Conifer out of Bonnie Ela by Bonnie McGregor, second dam by Del Sur, is now in the string of Al Thomas at Benson, Nebraska. Bonnie Russell was bred in California and there were several law-suits over his ownership after he was taken east. He is a wonderfully fast horse, but has been lame for two years and all his races during that time were trotted under adverse circumstances. Thomas has a reputation for fixing up lame horses and will put a good deal of time and attention toward effecting a cure for Bonnie Russell's lameness, if it can be accomplished. Perfectly sound, the stallion is dangerous in any company.

A gentleman's driving club is under practical consideration at present by many owners of fine horses in Pasadena, and if the plan proves feasible a club will soon be organized along lines similar to those followed by the Los Angeles driving club, which has held monthly matinee events throughout the season and which is now to make the matinee bi-monthly affairs.

Wm. Clark, of Medford, Oregon, would like to learn the present address of Mr. Jiles Cain, a horseman, who formerly resided at Fresno, and who was in Ashland, Oregon, three years ago with a car-load of horses. Mr. Clark will be thankful if anyone will send him Mr. Cain's present address.

Los Angeles, having secured the removal of the race track from its limits, now proposes to stop the printing of form charts and the selling of tips on races run elsewhere. A stringent ordinance was passed by the City Council last Monday, which makes it unlawful to print, distribute, circulate, sell or give away in Los Angeles any form chart or circular bearing any information, prediction, selection or advice as to the winner or probable winner of any horse race or contest. It bears a penalty clause imposing a fine of not more than \$500 or six months' imprisonment, or both, upon conviction. City Attorney Hewitt is inclined to believe that the ordinance will prevent the publication of form charts on races of the day.

J. W. Zibbell of Fresno, owner of the great two-year-old filly Katalina 2:22¼ by Tom Smith 2:13½, informs us that he has a full brother to her which he likes much better than he did the filly at the same age. He is just breaking him and says he is a sure enough trotter. He believes that he has got a mortgage on next year's Futurity for two-year-olds with his youngsters. A horseman who recently saw the colt in Fresno informs us that he is one of the grandest looking yearling that he ever looked at, greatly resembling his sire, Tom Smith, who is considered one of the highest formed horses of the trotting family in America.

Henry Parady, who had Santa Rosa Stock Farm's stallion Sky Pointer Jr. under lease, last year, making a good season with this son of Star Pointer's full brother at Fresno, returned to Santa Rosa last week and after looking over the colts by Sky Pointer Jr. that are at the farm, asked Frank Turner what he asked for the stallion. Frank's reply was "\$1,500," and Parady said, "I'll take him," about as soon as he could say it. Parady is in love with this horse and believes he will be one of the great speed sires as well as a sire of useful horses for the road, as he gets size and style from all kinds of mares. Turner is of the same opinion, but as he has fifteen other studs on the farm it has become absolutely necessary to sell some, and he has placed a price on nearly all of them. Mr. Parady worked for the Santa Rosa Stock Farm five years and during that time broke all the colts that Sterling R. Holt purchased from Turner and Mr. S. B. Wright. He is a sober, industrious man and handles colts well, both as a breaker and trainer. He will open a public training stable at Fresno and should get all he can do.

The McKinney stallion Osito 2:13½, whose son Regalo won a heat in 2:09 at a recent Los Angeles matinee, has been owned by Mr. G. E. Johnson, of Bishop, Inyo county, for the past six years, and has been bred to 30 or 40 mares each season on Mr. Johnson's ranch, and his owner races him against everything that comes along in the meantime. Although Osito is getting along in years, having been foaled in 1892, Mr. Johnson says he is able to skin anything that they import to Inyo county from Los Angeles.

MOVED DOWN TOWN

The Breeder and Sportsman

is now located in the

PACIFIC BUILDING,

Corner Market and Fourth Streets, San Francisco.

Offices 363, 365 and 366

The stallion Billups 2:20½ was foaled the property of Mr. J. L. Davis, and he is now and always has been that gentleman's horse, never having been sold nor offered for sale. This makes the fifth year that Billups has been under lease to Philip C. Byrne of Hanford, Cal., and Mr. Byrne has never at any time owned any interest in the horse beyond the lease. We make this statement at the request of Mr. Byrne, it having been stated incorrectly that he was the owner of Billups.

The transcontinental endurance contest between Homer Davenport's Arabian stallion Mesoud and Gen. J. B. Castleman's Kentucky saddle mare Carolina, is billed to start in May next. The conditions require that the two horses shall be shipped to Oregon from New York at the same time and under the same conditions, that they be allowed to rest the same length of time, and that when starting in the contest they shall carry the same weight which is to be maintained during the entire trip.

W. B. Linn of Martinsville, Ill., is now at Sacramento, and brought over with him the successful show ring winner Mary Mims (2) 2:30 by The Bondsman, dam Serene, dam of two, by Allerton.

Auburn, Placer county, is getting ready to hold a fair and race meeting. The gentlemen who lately bought the site of the old race track are preparing to put the grounds in order as fast as possible. They have organized the Placer Fair and Improvement Company, with the following directors: D. W. Lubeck, John M. Fullweiler, Charles Keena, Fred E. Brye and E. T. Robie. Fred E. Brye was elected president, D. W. Lubeck, treasurer, and W. A. Shepard, secretary. Messrs. Brye, Keena and Wise were appointed a committee on grounds. The stock is \$10 per share, and \$3250 of it has already been subscribed. A call was made for 25 per cent of the stock subscribed.

The Central Oregon Agricultural Association has set the date of October 17th, 1908, for the opening of its fair and race meeting at Prineville, which will be bigger and better than ever before. A good race program is promised.

The price which W. C. Nolan of Sonoma received for his four-year-old pacing mare, reported last week as sold through J. W. Zibbell to Geo. Estabrook of Denver, is given as \$550. This mare has paced a mile in 2:20 on the Sonoma half-mile track, driven by Mr. Nolan.

They have some big fairs in Texas. The total earnings of the last Texas State Fair amounted to \$237,819.75, an increase of \$27,228 over 1906, and the balance on hand is \$95,762.38. President James Maroney recommends the erection of several new buildings, including a new grandstand and a clubhouse.

It is said that Sterling McKinney 2:09¼ worked a mile while at Columbus, Ohio, last summer in 2:06¼. He repeatedly trotted quarters in 30½ seconds and halves in 1:02.

A late report from Moscow, Russia, states that the four-year-old mare Postee by Quartercousin, out of a Russian mare, lowered the ice record for trotters to 2:13¼.

While W. L. Snow was driving the pacer, J. J. J. 2:06¼, owned by J. J. Jermyn, Germantown, Pa., on the steeds of Hornell, N. Y., the horse got scared and fell, breaking a leg and necessitating his being put to death.

A concrete barn, 350 feet long and 60 feet wide is nearing completion at Empire City Farm, Cuba, N. Y., where McKinney 2:11¼ and Axworthy 2:15½, are kept.

Mike Bowerman, of Lexington, Ky., has bought from Groverland Farm, Georgetown, Ky., the bay colt Ashland Wilton, three-year-old record 2:17½, by Wilton 2:19¼, dam Cardome, by Ashland Wilkes 2:17¼, second dam Ola Moore, by Onward 2:25½, third dam Nettie Time, by Mambrino Time. Mr. Bowerman is also negotiating for the four-year-old filly, Katie Williams, that trotted a mile in 2:10½ at Lexington last fall, as he has a very high opinion of her.

When the buildings at Village Farm, East Aurora, New York, were torn down, recently, the old lumber sold for \$13 per thousand, which is more than it originally cost. The farm where Chimes was once the premier of a great trotting-horse breeding establishment is now to be cut up into building lots.

The French standard for trotting horses is not so high as it is in America. To have "standard" speed a horse must trot in 2:30 or pace in 2:25 in America, but in France the speed standard is two minutes to the kilometre, which is about five-eighths of a mile, which for a mile is at the rate of 3:12.

The biennial meeting, or Congress of the National Trotting Association, will be held at the Murray Hill Hotel, New York, February 12th. Prof. E. P. Heald, President of the Pacific Coast Trotting Horse Breeders Association, has been appointed one of the Committee on Rules and will attend the Congress as the representative for the Pacific Coast, many of the associations here, in membership with the N. T. A., having appointed him as their delegate.

IOWA STATE FAIR PROGRAM.

The State of Iowa holds a very successful fair every year, and has already announced its racing program. As an item of interest to Californians, we print this program, which is as follows. It will be noticed that there are six days of racing and that while the program opens on Saturday, it ends on Friday, and that but one running race is provided for each day, except the opening day.

Saturday, August 22.

Three-year-old, 2:25 pace, stake.....	\$ 600
Trotting, 2:25 class	600
Four furlong dash, running	100
Seven furlong dash, running	200

Monday, August 24.

Two-year-olds, trotting, stake	400
Trotting, 2:18 class	800
Pacing, 2:14 class	800
Five furlong dash, running	100

Tuesday, August 25.

Three-year-olds, trotting, stake	600
Trotting, 2:30 class, stake	1,000
Pacing, 2:16 class	500
Six furlong dash, running	200

Wednesday, August 26.

Two-year-olds, pacing, stake	400
Trotting, 2:15 class	800
Trotting, 2:21 class, stake	1,000
Four furlong dash, running	100

Thursday, August 27.

Pacing, 2:16 class, stake	1,000
Trotting, 2:11 class	1,000
Pacing, 2:22 class	600
Five furlong dash, running	200

Friday, August 28.

Pacing, 2:30 class, stake	1,000
Free-for-all, pacing	1,500
Eight furlong dash, running	300

Only One "BROMO QUININE."

That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the world over to Cure a Cold in One Day. 25 cents.

THOROUGHBRED SIRES OF WINNERS.

Statistics of the thoroughbred stallions for the year 1907, owned and standing for service in California and Nevada, compiled by Harry Lowden from the list of sires which sired winners of races in the United States and Canada, in 1907, as published recently in the Kentucky Farmer and Breeder. The moneys won are first moneys only, no credit being given in this table for second or third money winners.

The three leading stallions, Solitaire (Imp.), Canopus (Imp.) and Rubicon trace to Touchstone. Solitaire and Canopus are grandsons of Hampton, and Rubicon a son of imported Rayon d'Or, traces through another branch, viz.: Flageolet, Plutus, Trumpeter, Orlando, son of Touchstone. Commando, the premier sire of the United States in 1907 (sire of the unbeaten Colin and Peter Pan) is by Domino who also traces direct to imported Eclipse, son of Orlando.

Rey El Santa Anita, who stands fourth in this list, is a son of Cheviot (imp.) the full brother to Sir Modred, a descendant of Herod through Traducer, The Libel, Pantaloon, etc.

Kismet, fifth in the list, is a tail male descendant of Stockwell, and his dam Kisberina by the Derby winner Kisber, traces to the celebrated Queen Mary. Solitaire (imp.) by Ayreshire, dam Solesky by Thunder, Bruce Lowe figure 12, heads the list of money winners, and number of winners. He is owned by A. B. Spreckels, Napa Stock Farm.

Canopus (imp.) by Sheen, dam Charmian by Galopin or Bertram, is second in regard to the amount of money won by his get. He is owned by John Mackay, Woodland, Cal.

Rubicon by Rayon d'Or, dam Lilly R. by Glenelg, is third in the list of moneys won, but leads in the number of races won by his get. He is owned by E. Lannigan, San Francisco.

Rey El Santa Anita by Cheviot (imp.), dam Aloha by Grinstead, is fourth in the list, and is owned by E. J. Baldwin of Los Angeles.

Kismet (imp.) by Melton, dam Kisberina by Kisber, is fifth in the list. He is owned by the Estate of C. Kerr, Antrim Stock Farm, Bakersfield.

The totals show that 78 stallions, owned and standing for service in California and Nevada, sired 281 winners of 807 races in the United States and Canada, in 1907. The total value of the first moneys won amounts to \$294,345, no account being taken of second or third moneys. The list follows:

	Winners.		Races Won.	Amt. Won.
1 Solitaire (Imp.)	15	44		\$23,465
2 Canopus (Imp.)	9	45		18,310
3 Rubicon	12	47		15,555
4 Rey El Santa Anita.	12	30		15,415
5 Kismet (Imp.)	12	32		12,365
6 Brutus (Imp.)	13	37		12,145
7 Altamax	14	36		11,255
8 St. Carlo	10	29		10,660
9 St. Avonius (Imp.)	12	29		9,075
10 Eddie Jones	6	25		8,515
11 Orsini	7	19		8,395
12 Salvado	3	21		7,575
13 Herald	4	21		6,675
14 Prestonpans (Imp.)	2	4		6,595
15 David Tenny	4	13		5,695
16 Piccolo (Imp.)	4	13		5,600
17 St. Symphorien (Imp.)	6	14		5,505
18 Galveston (Imp.)	8	15		5,140
19 Col. Wheeler	5	16		5,025
20 Rey del Sierras	3	14		4,755
21 Magnet	4	14		4,625
22 Borgia	3	13		4,565
23 Salvation	3	12		4,210
24 Nephew	2	14		4,150

76 Kenilworth	1	1	200
77 Mariner (Imp.)	1	1	150
78 Piccolo or Borgia	1	3	975
79 Crescendo or Brioso	1	1	325

NEW LEASE OF RIVERSIDE TRACK.

Riverside, January 10.—At the annual meeting of the Riverside Driving Association a new set of officers was elected and the threatened disruption of the association and the discontinuance of horse racing in Riverside was settled for good. The racing grounds which were owned by Eugene F. Binder were purchased by L. Fötter for \$5000 and the association has leased the grounds and buildings from Mr. Fötter for \$500 per year.

Mr. Binder was for many years the backer and shining light in horse racing in this city, but of late the interest in the sport died down considerably and after the Thanksgiving races Mr. Binder announced that he would close the grounds unless some one would either lease them or buy them outright. Mr. Fötter came to the rescue, having always had great interest in the sport and now horse racing will be continued with monthly meets and the association is already making plans for a big meet on February 22.

THE ORIGINAL COPPERBOTTOM PACER.

Joseph Battell, author of the Morgan Horse and Register, is authority for the statement that the original Copperbottom, founder of the pacing family of that name in Kentucky, was bred by David Blunt, of Danville, Vt., foaled in 1809, and was a son of the original Justin Morgan. Copperbottom was taken with his dam to Bolton, P. Q., in 1810, where Mr. Blunt settled permanently. He was sold to a Mr. Jewett or Jowett, and went to Kentucky by the way of Montreal and Detroit in 1816.

This was probably the horse that is registered in Wallace's American Trotting Register, Volume 2, page 163, as Jowett's Copperbottom. Nothing is said of the color of this Copperbottom either by Mr. Wallace or Mr. Battell. The prevailing color of the most noted members of the Copperbottom family was roan. This is an unusual color in the Morgan family, but has been known to exist and be perpetuated with as much uniformity as in the Copperbottom family. Esty's Black-Hawk, a son of Vermont Black-Hawk was a roan horse, and it was from him, by way of his daughter Lady Franklin 2:29¾, that one of the noted sons of George Wilkes, Jay Bird, inherited the roan color, which he transmitted and perpetuated with as much uniformity and through as many generations as did any of the Copperbottom stallions.

The first Copperbottom stallion that is registered as roan was Fenwick's Copperbottom. His sire was Brutus, a son of Jowett's Copperbottom. The color of Brutus is not given in the Register, but it is probable that he may have been a gray roan, for his dam was by the thoroughbred Robin Grey, a gray horse, whose color was probably inherited from his dam, that was a daughter of Grey Diomed, a gray son of imported Medley. The latter was gray and so was his sire, Gimcrack, and so was Gimcrack's sire, Cripple, by Godolphin Arabian.—American Horse Breeder.

WOODLAND HAS A FAST COLT, TOO.

Woodland, January 20, 1908.

Mr. Editor: I see by the Breeder and Sportsman that Mr. Ted Hayes of Los Angeles has a very fast colt by Bon Voyage. He surely is a dandy. Any nine-months-old colt that can trot a quarter in 43¼ seconds is certainly great. Bon Voyage is bound to be a great sire. My Bon Voyage colt, out of Carrie Malone, steps to suit me. I have three Iran Altos nine months' old, and have never timed any of them, but they are the best lot of colts I ever broke, and all show well. Let me say right here that if Mr. Hayes were here with his colt, or anyone else with a nine-months-old trotter they could win a \$40 suit of clothes if they could beat the Iran Alto colt.

H. S. HOGOBOOM.

The wonderful hold harness racing has on the public is shown by the increasing attention which the big fair associations pay to this branch of sport. The average American citizen dearly loves to see a speed contest between horses, and he shows his love by paying for admittance to the grandstand where he may indulge his love for it. There is not a big fair association in the country that has made harness racing a feature that would consider a proposition to replace it with some other form of sport or feature. Increased purses for the harness horses and larger grandstands for the spectators are what the directors of most of the big fair associations are considering at present.—Horse World.

VETERINARY EDUCATION.

A few evenings ago Lieutenant Governor Harper, speaking in the college chapel, referred to veterinarians as "horse doctors." There was nothing unusual about this, but being a veterinarian and having the opportunity, I proceeded to criticize this attitude of the public toward the modern veterinarian.

In a general way, the educated veterinarian of character and ability is at last receiving the patronage and recognition which he so justly deserves. It is only occasionally a lapse of this kind occurs. It is with a feeling of wholesome pride and real satisfaction that several prominent veterinarians of this State are regularly invited to read scientific papers before medical associations; others have been elected honorary members of such societies; two or three are aldermen of their respective cities. The veterinarian will receive due recognition and will be respected as a member of society and a citizen of influence just as soon as by his attainments, socially and otherwise, he satisfies the public that such recognition is justified.

The State Board of Agriculture, in control of the Colorado Agricultural College, has created a Veterinary College. Under the new regime this school had a most auspicious beginning and the work is progressing satisfactorily. It is the only school of the kind between San Francisco and Manhattan, Kansas. Notwithstanding the fact that the matriculation requirement of high-school graduation is a step in advance of other veterinary schools in America (with two exceptions), yet we have enrolled thirty-four students, and could not, without much inconvenience, accommodate more students during the present year.

In one particular this course of study is to be looked upon as entirely different from others. In the ordinary vocations of life a question is seldom asked about a man's preparation for his life work whether within college walls or without—it simply remains for him to make good; he must deliver the message to Garcia. In the profession of medicine it is quite different, for here he is judged by his co-workers uncompromisingly, according to the reputation of the school from which he receives his degree. The limited course in veterinary science in vogue at the college three years ago was dropped none too soon. Several young men having completed the two-year course there and having been graduated from reputable veterinary colleges with honors one year later found themselves in an awkward predicament in not being eligible to the civil service examinations, or to the American Veterinary Medical Association. The requirement for good standing in this connection, among other things, is a bona fide attendance of two years in a recognized veterinary college. At that time we made no pretention of maintaining a regular veterinary school (not granting a degree), and while our graduates did the college, as well as themselves, much credit by winning special honors, yet they were caught by a technicality and were without standing, having spent only one year in a recognized veterinary college.

The veterinary science department of the Colorado Agricultural College, has now been launched as a full-fledged veterinary college, and we shall need to look to our educational standing that we may compare favorably with other schools. A high standard will be maintained in order to insure recognition for our graduates. To rank among the accredited schools of the United States we must have at least four qualified veterinarians on the faculty and a term of three years of six months each year. The curriculum must be satisfactory and the subjects taught with a degree of efficiency beyond question. The equipment must be ample and a large clinic is indispensable. These conditions have all been met. There are twenty faculty members, six of whom are veterinarians, two physicians, and among the rest are such men as Carlyle, Gillette, Headden, Paddock—men of national reputation in their specialties. The hospital is full most of the time. The equipment is already fair and will be made first-class in every detail.

The college term is nine months each during three years, making twenty-seven months in all instead of eighteen, as required. The number of students enrolled matters little to us, but we are much concerned about giving our students the best possible advantages, to the end that by their gentlemanly bearing they may be a credit to their alma mater.

To raise the standard of veterinary science in this country it must be evident to all that high-school graduation is the first requisite of a secure foundation; the next is a cultural training that goes with a thorough knowledge of the art and science of veterinary medicine and surgery. In this way only can our profession ever expect to aspire to the dignity, the respect, and station in life to which its nobility and importance justly entitle it.—Geo. H. Glover, Professor of Veterinary Science, Colorado Agricultural College, Fort Collins.

The new government breeding farm at Weybridge, Vt., established for the purpose of perpetuating the Morgan horse, is nearly completed. The government has expended \$25,000 on the station, and a further appropriation will be asked from Congress. All the buildings are lighted by electricity and heated by steam. About 40 Morgan horses have been placed on the farm, among them the stallion General Gates, which cost \$4,000. The station will be under the direct supervision of the Bureau of Animal Industry of the Department of Agriculture.

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

TO DEVELOP RIFLE AND REVOLVER MARKSMANSHIP.

According to an article in the Los Angeles Times an important movement is projected that will, if properly fostered, result in an incalculable advantage to devotees of rifle and revolver shooting, in fact, the good accomplished by Southern California marksmen in this respect will be of exceeding practically benefit by precept and example to sportsmen and target enthusiasts of the whole Coast. The territory which it is proposed to utilize in the development exploited below could hardly be more congenial. This, added to favorable climatic and topographical conditions, should enable those connected actively with the organization proposed to place the auxiliary force of riflemen and scouts on a plane of efficiency that would make a contemplated force of this character a formidable factor should the occasion arise for active field service. Aside from this, it is to be hoped, remote contingency, there is the opportunity for a series of unsurpassed outings in a country second to none on this mundane sphere. The chance to acquire a healthful training of body, a quick eye and skill with modern firearms that is afforded in but a few favored places. It will be remembered that practically the Boer army was made up of just such material and in about the same system of organization as is contemplated here. What they did in the field made history in the art of modern warfare—it is true that the Boers finally succumbed, but not until they were starved into submission by overwhelming numbers. They did not have a thickly populated country and innumerable lines of communication behind them as a base for support and supplies.

What has been accomplished with the American rifle and revolver has made history and changed the manufacture and style of firearms the world over. Every effort to perpetuate and increase the high standard of American firearms and marksmanship should receive the unanimous and generous support of the Federal Government, the State and the commonwealth.

Expert riflemen, pistol shots, and horsemen of Southern California are forming an organization which has for its object the development of marksmanship for the defense of the Southern California Coast line and frontier from foreign foes, if any should ever attempt invasion of the country.

With this object in view, the organization proposes to conduct target practice and schools of horsemanship. Membership is solicited not only from men who are expert with the rifle and revolver and in horsemanship, but those who are thoroughly familiar with the topography and characteristics of the country, who may act as scouts and guides.

This body of gun fighters and riders, which will be known as the Southern California Rifles, is to be formed into companies of sharpshooters, scouts and couriers to volunteer in an independent semi-military capacity under orders of the Federal Government in time of war, for defense against a foreign foe only.

The organization will construct a chain of rifle ranges from Balboa, below Long Beach, to a point above Santa Monica, and at strategic points in the passes and roads leading to Los Angeles. These ranges may be turned into rifle pits and points of defense immediately if war is declared.

Auxiliary to these ranges signal stations and routes of rapid transit for horsemen are to be located, especially in places where there are no telephone or telegraph and railway connections.

In this way it is proposed to map out the city and surrounding country into a strategic military district merely for training facilities at this time, but subject to the approval of the Department of War in case of hostilities.

Active measures for the permanent organization of such a body of home guards were taken last week, and a temporary organization was formed, to be made permanent by the election of a set of officers at a meeting scheduled for Washington's Birthday. Meanwhile, those temporarily in charge have adopted a set of by-laws to be in force until permanent organization is effected.

Officers elected to serve until such time are: W. H. Leonard, president; Arthur Loring MacKaye, vice-president; C. Harvey-Elder, secretary; George O. Spurrier, assistant secretary; Ross Dunlap, treasurer; O. S. Lowlesly, Dr. F. C. Shurtleff, directors; the whole body to constitute the board of control, temporarily.

As soon as possible a rifle range will be located at some accessible beach point, where target practice may be indulged in, as by any rifle club. Instead of the regulation bullseye targets of rifle clubs, the military manikin in the shape and size of a man will be substituted. These will be placed at various ranges. The targets will be made of some perforable metal, such as tin, or reinforced wood. Each bullet hole will be numbered, and a catalogue of statistics kept, showing what each man did in practice. When shot full of holes, the target will be preserved at headquarters as a trophy and placed on exhibition.

Targets patterned after every conceivable method of attack will be arranged. For instance, moving targets, manipulated on wires at a speed varying from a walk to the double-time or charge; boat targets on water, in which a boatload of target soldiers will be drawn to shore from a given distance by wire, and the object of the sharpshooters will be to perforate every target at least once in a given distance or time, or to sink the boat, which will be of a cheap material constructed for the purpose. In these two forms of target shooting, squad firing will be in order, as it would be impossible to keep a record of individual work.

Such would be the work of the sharpshooters. The scouts and couriers will be held in reserve to carry dispatches, scout the country and act as a mobile body of sharpshooters.

To secure practice beneficial for such a purpose, a series of suspended or moving targets could be arranged in the formation of a military force, and the mounted troops could charge by, emptying carbines or revolvers. If every target is perforated the troops would have made a perfect score, and records of the results could be kept.

The couriers would be able to act as signalmen and wigwag their messages by flags or mirrors, by smoke columns as did the Indians, by fires at night, or by delivering dispatches in person.

In the main, it is the purpose that the sharpshooters and scouts shall act, not in troop or company maneuvers, but from a thin, invisible skirmish line to harass the enemy as much as possible.

It is believed by those originating the project that not only will these general plans furnish excellent sport in the way of target practice and outings, but that an efficient fighting body always will be at hand at a moment's notice to defend the homes and lives of Southern Californians against attack.

In order to give the general public as large a share as possible in the scheme, it is proposed to hold periodical tournaments at a given location at the seashore at which sham battles can be fought—real fighters with ball cartridges arrayed against targets cleverly manipulated by wires or other mechanical contrivances, scoring the "hits" so that the watching thousands may see and applaud. Such an exhibition could be distinctly Californian and be made a gala affair.

No dues are attached to the membership. Each man is to own his own rifle and equipment. No particular pattern of arms is required, but it is recommended that the United States service arm be used wherever possible. Effectiveness is the first requisite. If a man can hit a target with a 30-40 Winchester better than with the new Springfield, he may have the use of that arm, unless the Federal Government should deem it advisable to furnish the service arm free to the sharpshooter.

If expenses are incurred, the organization proposes to raise the amount by subscription among the members; if that is not sufficient, public subscriptions or entertainments may be resorted to. The idea is to make a patriotic movement of the whole scheme so that every man will bear his own expenses in so far as fares, ammunition, guns, uniforms and other equipment used by him alone are concerned. Extraordinary expenses, such as targets, etc., are to be provided for in some other way.

For the present only executive officers are to serve. Later, when the organization takes on a more military aspect, field officers are to be selected who shall serve in case of hostilities, and in an honorary capacity prior to that time. Meanwhile the executive officers are to serve as a board of control.

Until actual service calls, there will be no non-commissioned officers. The men will rank in squads according to their shooting skill, thus no man being held above another except as competitive contests of skill give him honorary precedence. In times where authority is necessary, petty officers may be appointed by the field officers.

Thus the organization will take on the aspect of a rifle and revolver club, but the potential power for instant service will be latent and ready to spring to life at the call to arms.

A general idea is to form a body of men available for military service if need be, skilled in the use of firearms and in horsemanship rather than in field maneuvers, yet free of that military restraint and drilling, which is odious and impossible to the majority of business and professional men.

The organization is to be distinctive of Southern California, and its identity must remain centered in Los Angeles. In case of war primarily the object is to defend Los Angeles and the surrounding territory. Members only join with that end in view. However, if the Federal Government so desires it may call on the body as a whole or as individuals for service beyond its territory, but reorganization of the body must be effected, as an auxiliary of the parent body, or the members may be absorbed into a regular Federal military organization individually. The only requirements for general membership will be allegiance to the United States Government and a promise to join in the defense of Southern California.

The advice and services of military engineers are to be sought to map out the entire country about Los Angeles on a military basis. Points of vantage will be charted; first, second, third and possibly more lines of defense planned, and points marked where rifle pits and other defenses may be located.

All the plans as laid out and adopted are to be laid before the War Department and the entire force placed at its services. If the department cares to make suggestions, they will be adopted; if the Federal Army or officers of the War Department desire to assume command the organization is placed at their disposal in Southern California, and the members will serve as special volunteers.

Should war with a foreign power be declared, the organization will immediately place itself at the service of the Federal Government. No military action shall be undertaken without direct orders from the Government. Without permission from the Federal authorities the organization will be powerless to act in any offensive or defensive capacity whatsoever.

The applicants for membership shall be classified relative to their marksmanship, horsemanship and equipment. No application of an able bodied white man of good character will be refused. If without skill or equipment, he may have his name enrolled for service on call. The names then will be classified accordingly.

It will be a prime purpose of the organization thereafter to advance its members in equipment and efficiency. To this end instructors will be appointed from the skilled members, while assistance will be rendered in securing arms and equipment and in their expert manipulation.

The classes suggested are:

Class A—Men skilled above a certain percentage and fully equipped.

Class A-1—Men skilled above a certain percentage and unequipped.

Class B—Men familiar with the use of arms though not experts, and fully equipped.

Class B-1—Men familiar with the use of arms though not experts, and unequipped.

Class C—Men unfamiliar with arms but fully equipped.

Class D—Men without equipment and without knowledge of arms.

WILD FOWL IN LAKE OF CRATER.

A climb up the thinly-greened sides of grim old Diamond Head, near Honolulu, H. I., is well worth while these days, writes a sportsman sojourning in the Pacific Isles at present, for, beside the magnificent view obtainable from the crater's rim, there is a lake of quite respectable dimensions inside.

Last summer there was no lake in the crater. The soil was a little damper in the lowest part and the grass grew lushly, that was all.

The recent rains have formed the lake, which is about three-quarters of a mile in circumference. The depth a short way from the edges is about two and a half feet.

Here and there in the lake the top branches of mimosa are seen. Near the water-line a thicket of glue bushes and algarobas extends clear around, through which, on account of the thorns, a way is with difficulty made.

It is a curious fact that the thicket ends where the water-line begins; this is undoubtedly due to the regular presence of water in the bottom of the crater in past years.

In the early morning wild duck may be found in the lake and several have been shot of late. The birds come in about sundown and leave for their feeding-grounds soon after dawn. Shooting ducks in a crater is a form of sport which would appeal to even a veteran sportsman.

There are several coots in the lake at present, glossy blue-black fellows, with gray, flanged feet, a white fleshy plate on the top of the head and a white bill. Very wary are these birds, keeping well out into the middle of the water. A shot will drive them to the shelter of the bushes, however, and there, if craftily stalked, a shot may occasionally be obtained at them.

The flesh of these crater coots is sweet and succulent. The crops of two, which were opened, last week, were filled with some kind of green weed. One of the birds was in an early stage of egg-production.

Wading along the edge of the lake is treacherous work, for mud-holes abound and a person is up to his neck in mud of a particularly holding description before he realizes what has happened.

For a tour of exploration of the crater the coarsest, strongest clothes possible should be worn, otherwise the flesh of the wearer will assuredly be scratched and lacerated by the mimosa and algaroba thorns.

The hut of the lone settler who last year made his abode in Diamond Head has long been deserted and is fast going to rack and ruin, and the weeds have sprung up and hidden almost every evidence of his precarious husbandry.

George Wesley was fined \$25 for killing deer out of season by Judge Brown of Kennett. Wesley, together with William Sisk and John Lancaster, were arrested by Deputy Game Wardens Carpenter and Birmingham at Pitt. The cases against the other two were dismissed, as the men only had deer meat and hides in their possession. Wesley demanded a jury trial, but changed his mind at the last moment and pleaded guilty.

SQUIRREL AND RABBIT SHOOTING.

Now that the ducks and quail will soon be out of season and nothing but snipe are left to interest the scattergunner, sportsmen are turning to the little rifle for companionship on occasional day's outings in the country. Few who have never possessed one realize what an amount of sport can be had with a 22-caliber repeater of any standard make, and for a very trifling outlay. Shotgun ammunition costs money, but a 22-caliber can be fed liberally all day for a small amount.

Game for the small rifle is ever plentiful. The ground squirrel affords the best of marks. Some places more numerous than in others, he is always to be had, and a trip into the country adjacent to most points will put the shooter into good game country, so far as the needs of his small rifle are concerned.

Although not generally known, except among the Chinese, the common ground squirrel is very well flavored when fat, and if taken young, is tender as well. His flavor when fed on barley and weed seeds is fully equal to that of rabbit, and, if anything, a little more delicate. He is prepared the same way, the greatest drawback being the difficulty of skinning him, which is easier if performed at once. The 22 short cartridge is ample sufficient for squirrels. In hunting ground squirrels with a rifle considerable fun is to be had shooting off matches. A dozen squirrels is a good day's bag, no matter how plentiful they may happen to be, owing to the tendency of the animals to get to their holes, however badly wounded. Only a head or chest shot seems to be able to stop them on the spot, and in shooting them it is well to hold on the eye, for only squirrels in the hand can be counted at the finish.

Picking off "soldiers" sitting upright on the edge of their holes at a hundred yards is not beyond the powers of the 22 gun, and some pretty shots can be pulled off occasionally at them on the run. The game is well worth the trying.

Another pleasing variety of small rifle hunting is the pursuit of rabbits. Jacks can be shot on the run by a capable marksman, but he must be of the "up and coming" sort to accomplish anything at such a difficult game.

On a rabbit warren which are plentiful in many localities, a good shot can secure half a dozen in an afternoon, if conditions be right. The rabbits hole up on a man's approach, but show curiosity, and generally expose a pair of ears and a bright, shining eye if the hunter stands still. A quick shot aimed an inch below the junction of those ears generally resurrects bunny and gathers the material for a delicious stew.

Driving along country roads in the evening is another good way to shoot rabbits. They sometimes offer ridiculously easy shots, and can be knocked over with ease by a novice. Occasionally they will stand for a clean miss without blinking an eye, and allow a chance to send another bullet to its billet.

In a few weeks most of the female rabbits will be busy with their most serious business of bringing offspring into the world, but the bucks are just as good now as in midwinter. In this country they breed more or less the year around, and one who held off shooting them on that account would not kill very many rabbits.

Crows, hawks, some owls, blackbirds, are all legitimate game for the small rifle. It is surprising what a lot of things a man can find to shoot at in the course of a day's rambling over hill and dale with a rifle.

The range and killing power of a good 22-caliber rifle are generally underestimated. They are effective at a hundred yards, and a good shot can do considerable execution with them at a greater distance. Some of the trick feats that can be performed by a good shot with one are little less than marvelous.

A NORTHWEST HUNTING GROUND.

Isolated and remote from the whirl and noise of civilization is the Elk River valley, in the southeastern part of the Kootenay district of British Columbia, north-east of Spokane, which to-day is declared by seasoned sportsmen to be one of the most prolific and varied big game ranges on the American continent. Elk roam the valley in bands of hundreds and beaver have colonized in thousands. This is due in a large measure to the restrictions adopted by the provincial government and the excellent grazing range afforded. Elk and beaver have been protected since 1905 and the close season will continue until 1911.

R. L. Laird of Spokane, who has explored parts of the valley, declares that the measure of protection afforded the big game in the preserve has not been half-hearted; in fact, he adds, it is the belief of government officials, guides and others familiar with the district, that the law has been strictly observed with the result that elk and beaver, bear, deer, goats, mountain sheep and other fur-bearing animals have increased and are to-day probably more abundant than at any other period within the last half century. Mr. Laird said in describing the country:

"Elk river rises a couple of hundred miles north of the Crows' Nest branch of the Canadian Pacific railroad and runs in a general way due south to that line, finding its way ultimately into the Kootenay river, which in turn feeds the Columbia river. From the town of Michal, an important coal mining community and the outfitting point for the upper

Elk river country, the valley stretches eight to ten miles wide and is abundantly watered by the swift Elk river, literally alive with the gamiest trout that ever fought for a piscator's fly. On the uplands are thousands of acres of grazing land, covered with a thick growth of grass resembling the 'prairie wool' which makes the cattle ranges of Alberta and Saskatchewan unrivalled, horses preferring it to timothy. This grass cures itself and affords an ideal range for elk, goats and big horn sheep.

"For countless years the valley of the Elk was a famous hunting ground for Indians, the aborigines of the hills and prairies gathering there annually to restock their larders for the winter. When the white man arrived and began his usual tactics with regard to the beaver and elk the game dwindled rapidly, and there was grave danger of the extinction of both varieties. Realizing this the government declared a long close season and the game secured a fresh lease of life. Energetic game wardens have succeeded in keeping the Indians out of the valley, while the guides and trappers have co-operated in the preservation of protected game, realizing that when the close season lapses the importance of the district as a big game range will bring them a golden harvest.

"It is expected that sportsmen will be restricted to one bull elk annually after 1911, while a further close season may be declared for beaver. At last the nature-lover who desires to study the habits of beaver at close range can satisfy himself to the full. The elk have become careless and indifferent to visitors, and parties entering the country commonly encounter bands of elk, which manifest but slight disposition to waive the right of way on the trails.

"The highlands of Elk river valley are ideal ranges for mountain goats and the famous big horn sheep. These can be found at any time within a day's march from camp, although, as elsewhere, the matter of shooting either variety depends wholly upon the sportsman's skill as a stalker and taxes the expert's experience and endurance. Several experienced guides may be found at Michel with well equipped pack trains, and the outfitting point is best reached from Spokane."

HUNTING IN THE ANTIPODES.

The following is a word picture of sport in Queensland as contributed by the London correspondent of the Queensland Herald:—Imagine a sportsman out with his gun on the Queensland plain. A couple of miles away a line of eight or nine black dots apprises him that a flock of emus is in sight. If he is without a stout dog it is not much use to gallop after them; but, being a new arrival, he is sure to put his horse into a canter and prepare for the chase. The emu's chief weakness is curiosity, and the birds will run round uneasily as he approaches, stopping now and then to regard his movements with a timid uncertainty. If he reins in and stands motionless, they will probably circle round him with great swiftness, coming within twenty or thirty yards, so that he can see the startled expression of their large eyes and admire the wonderful grace of their movements before they finally turn and continue their flight beyond the horizon. As he rides along he will see the plain turkey or Australian bustard warily watching him as it slides away through the grass or spreads its great wings to look for grasshoppers at a safer distance. This bird is excellent eating, weighing as much as 20 pounds. It is in great abundance on the Western plains. The scrubs on the coast-side of the range also yield the sportsman excellent bags of great variety. There are many varieties of pigeons, the wonga and the gorgeous painted pigeon being the most prized. As our sportsman pushes his way through the thick tangle of undergrowth and creepers, he is possibly surprised to come upon a freshly-made mound four or five feet in height, and from fifteen to twenty feet in circumference. His first impression may be that in this tumultuous repose some native chief, his bow and spear beside him, secluded in death from a civilization so fatal to his race. He will be astonished to learn that this is a bird's nest. The scrub turkey, an excellent table bird, rather smaller than the fowl-yard specimen, constructs this great mound in which to deposit its eggs, which are hatched by the sun.

Salt Water Angling.—Monterey bay can always be depended upon for good fishing by the devotees of salt-water angling, a report this week, although commercial in its import, is of interest to anglers generally and is to the effect that the few fishermen remaining unemployed at present have suddenly found something to keep them moving for a short time at least, by the appearance in the bay of a large run of all varieties of fish in both the shell and finny articles. The bay is fairly teeming with sardines and big catches of mackerel, flounders, sole, cod, yellowtail, halibut and some salmon have been made. Sea lions also are plentiful and are causing destruction in cutting the nets and allowing the escape of many of the most precious fish. As most of the fishing is accomplished with deep sea nets it is an easy matter for these troublesome sea animals to interfere with business and pleasure on the bay. Sunday and Monday the bay and beach assumed a lively appearance, for many people took advantage of the extremely low tide and the plentitude of fish, which they were most successful in capturing. Abalones and mussels too, were plentiful and all who sought them were rewarded by a generous catch.

DESTRUCTION OF SALT WATER FISH.

John C. Wray, a Southern California salt water angler, who has made a close study of sea fishing and ocean food products, has the following to say regarding the wanton waste of food fishes, which prevails on the sea line of Los Angeles County:

"Close observation during the past three years confirms me in the belief that tons upon tons of valuable food fish are wantonly destroyed annually in the district mentioned. In great measure faulty legislation is largely responsible for the killing and consequent loss of fish which have not reached commercial size, but which if allowed to mature would eventually take its place as a food product.

"Comprehensive regulation of the size and character of the seines used in deep sea fishing would save hundreds of tons of food annually. It is a fact which can not be disputed that Italian fishermen are using small mesh nets that have been prohibited by the Italian government because of their killing qualities.

"These nets are being used without fear or hindrance in and about San Pedro, to the lasting damage to food fish interests. They are known as 'blankets', killing anything and everything that cannot escape a quarter-inch mesh.

"If to use these nets is a crime in Italian fisheries, why should they be allowed in California waters?

"It is a fact that four of these nets have been imported from Italy, are in daily use, and are serving as originals from which copies are being made.

"To their credit be it said that the better class of market fishermen refuse to use 'blankets' and are open in condemnation of their use. Market fishermen who have fished in these waters for years protest that the continuous use of 'blankets' and other nets of similar pattern by Italian and Japanese fishermen will result in the total destruction of the fishing industry within the short period of from five to ten years.

"The men who are using these fish-killers are, with one or two exceptions, foreign born fishermen who have no interest in the State of California or in the United States beyond the accumulation of dollars for their own personal benefit.

"These men could not earn more than \$2 a day in any other walk of life, yet because of faulty legislation they are piling up modest fortunes at the expense of the fishing industry of the future.

"It is a matter worthy of more than casual consideration that should these same foreign fishermen desire to take up land, say in the Antelope Valley, they must become citizens of the United States; while the immensely valuable fishing grounds adjacent to them are with practically no restrictions.

"The Japanese fishermen, barred from citizenship, are today the recognized vandals of the fishing grounds, and are directly responsible for the disappearance of abalone and other shellfish which they have selected for their own special prey.

"With no official figures at hand, I am unable to give the exact tonnage of meat and shells shipped out of this country by Japanese and Chinese fishermen. I have in mind, however, one smart Jap fisherman who admitted to me that after seven years he had retired from the fishing field with more than \$16,000 in American gold.

"The result of the Japanese raid on the abalone is found in the fact that the coast line from San Diego to Port Harford has been practically denuded of this valuable food and shell product. The last legislature, aiming at the Japanese, prohibited the use of diving suits in abalone fishing. But well-informed fishermen insist that the prohibition is at least five years too late. It is an illustration of locking the stable door after the horse is stolen.

"The rod and reel fisherman is the one who has in his power to arouse public sentiment against the wanton destruction of food fish as the Italian and Japanese market fishermen have no interest in the premises beyond the gathering of Yankee dollars.

"As a case in point, I will cite an occurrence which came under my personal observation last fall. The market was glutted with barracuda and more market boats were due to arrive. Result: Eight hundred pounds of fine, fresh barracuda dumped into the bay as food for the gulls. It was cheaper to go out for more than to ice them over night.

"How long will a fishing ground last under such conditions, and what is the remedy for the existing evils? First, the arousing of public sentiment against the use of fish-killing small-mesh nets. Second, the enactment of Federal or State laws which will place the alien market fishermen on a par with his brother who elect to acquire their livelihood from the public domain.

Leather Cement.—A good glue for leather is recommended by the Sporting Goods-Dealer in the following formula: Dissolve five parts of good glue or gelatine in 20 parts of acetic acid. Make a solution of 20 parts of mastic in an equal quantity of ether, add to it the solution of glue, and mix thoroughly by agitation. Finally dissolve 20 parts of gutta percha in 100 parts of carbon disulphide and to it add the foregoing mixture. We have made up a few drams of this cement and find it an excellent preparation, holding better than any we have yet tried.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

A CATFISH PRESERVE.

While not having a place in the list of game fishes, still the catfish has its uses, as well as abuses. As a food fish the "blue cat" is not to be despised; as a moderately exciting medium of sport for the lazy fisherman the catfish fills a niche peculiarly its own. When these fish are kept in a place where they can not do any damage to other varieties, they should be tolerated for more reasons than one, care should be taken, however, to avoid any possibility of their escape into adjacent waters.

Monterey is liable to become famous for its fine cat fishing. Laguna del Rey, the lake in the Vista Del Rey tract, is just teeming with blue catfish.

The species are the best of the catfish family, and were brought to that city by the Pacific Improvement Company for the purpose of stocking the lake at Hotel Del Monte.

They did well in the Del Monte lake, but propagated so fast they killed the black bass. For this reason it was decided to get rid of them. A couple of years ago the Del Monte Lake was dredged out for the purpose of removing the catfish. Tons and tons of the fish were taken out.

J. L. D. Roberts, the "father" of Seaside and who lets no opportunity pass to advance that thriving suburb, saw an opportunity to stock Laguna del Rey with fish. At his own expense he furnished a number of four-hour teams, and with these he hauled the catfish from the lake to the Seaside lagoon.

Forty tons of these squirming fish were transported, and to-day Laguna del Rey will furnish the finest cat fishing on the Pacific Coast.

Driving along the bank of the lake thousands of the small catfish are to be seen, and out in the deep water fish weighing three and four pounds can be taken.

The blue catfish is considered a great delicacy in the Eastern States. They are easy to catch, and when skinned and properly cooked are a most delicious morsel.

When the lake is turned into a pleasure resort, as the new owners of Vista del Rey intend to do, this squirming mass of water and fish will be an attraction that will draw thousands of visitors yearly.

The name of the body of water should be changed to Roberts Lake in honor of the man who stocked it with fish.

Fly-Tying.

Says a fishing contributor to a London sporting paper: "Ladies who find embroidery, poker-work, water-color painting, and the like, hobbies which are not only pleasing occupations for leisure hours, but on occasion profitable amusement too, might do worse than turn their attention to artificial fly-making. They will find it a most engaging pastime, admirably suitable for deft feminine fingers; and a good fly-maker can add considerably to her pin-money by means of her amusement. Some of the finest artificial flies and similar lures are made by women, and the process is not so difficult but that the dexterous amateur might derive both pleasure and profit from it. In America, several women gain quite respectable sums by fly-making. It is easy to get their angling friends to give them orders; and when once their skill becomes known to a few, it is not long before their fame spreads and their profits increase. Indeed, ladies in straitened circumstances have been known to live almost entirely on the proceeds of their art; while their more fortunate sisters can often make quite nice little sums to spend on trifles. At the least, they can add to the undying esteem of their sporting men-folk."

Ducks Scattered by the Rains.

Since the recent rains most of the ducks have deserted the South Bay country to the northward of Alviso, and are to be found in great numbers on the many inland pools formed by the heavy showers of rain. A week ago they were more plentiful on the South Bay than at any time this year. Teal were especially numerous; spoonbills, which have been conspicuous for their scarcity this winter, were beginning to make their appearance, and a few flocks of canvasbacks were coming from their northern haunts. Local hunters were making fine kills, but all of this was changed by the rains, causing the wary webfooted tribes to leave for fresh feeding grounds inland.

Hunters around Gilroy and in Hall's Valley, and others who had easy access to large inland ponds, were especially benefited and made large kills. Shooting around Soap Lake and in the marshes to the southeast of Gilroy was very good, thousands of all kinds of ducks making their appearance there, among them being widgeon, canvasback and teal.

A few canvasback, spoonbill and teal are still feeding on the marsh, but shooters returned with slim game bags, lately.

More upland game birds were killed in Oregon in the season of 1907 than during any previous season, according to State Game Warden Beebe. Chinese pheasants have been particularly numerous.

State Game Warden Beebe and County Game Warden Loomis disagree on the estimates of the season. Loomis has stated that fully 30,000 birds were killed in one county alone, but Beebe states that only about 10,000 of the game birds were killed in the entire State.

Mr. E. W. Van Slyke, of Los Angeles, proposes to arrange with the Fish Commissioners for a trip to Mexico, after wild turkeys with which to stock the reserves of this State. He intends to go to the feeding grounds and at once commence the trapping of the fowls, which will be shipped to points in California early in March, which is believed to be the best season in which to turn them loose on their new range.

A number of Pomona sportsmen recently organized the Rowley club, articles of incorporation being drawn up. The purpose of the organization is to rent a tract of land on the Chico creek, which runs into the Santa Ana river near Rincon, for shooting purposes as a preserve.

Local sportsmen have made several trips recently to the district and have found the ducks to be plentiful and the water and situation of the land wonderfully adapted for a preserve.

Among the members are A. E. Tate, M. H. Potter, B. Chaffey Shepherd, E. P. White, Florid George, J. Ransom Casey, Eugene McIntire, George Hill, T. S. Newby.

The preserve is a part of the Rowley property formerly known as the Durkee ranch.

PACIFIC COAST TRIALS.

Bakersfield, January 22, 1908.

The Pacific Coast Field Trial Club's twenty-fifth annual field trials were started on the club trial grounds, about eight miles south-west of this city, on Monday morning. Weather conditions the first two days were exceedingly pleasant; this morning a heavy fog delayed the running until 10 o'clock.

The winners of the Derby were: S. Christenson's English Setter dog St. Ives (Uncle Jimmie Whitestone-Belle Fontaine) first. J. G. Roberts' English Setter dog Boy Blue (Rival-Lighthouse) second. E. Courtney Ford's English Setter bitch Tiburon (Uncle Jimmie Whitestone-Belle Fontaine) and J.

J. W. AKARD.

E. Lucas' English Setter bitch Peach Maid (Sport's Count Danstone-Ch. Peach Blossom) equal third.

There were thirteen starters in the Derby—11 English Setters and 2 Pointers, which was finished Tuesday afternoon.

The All Age was begun Tuesday afternoon, two heats of which were run out. The first series was finished this evening. Six dogs were carried over for the second series.

Throughout the running birds were fairly plentiful. Cover conditions were excellent, frequently almost ideal for bird work. For some reason or other both the young Derby dogs and the seasoned All Age entries as well, repeatedly ran through cover from which birds were afterwards flushed and failed to locate. Scent conditions were evidently handicapped by some unknown but potent agency. There were seventeen entries in the All Age. The attendance has not been up to that of past meetings. Enthusiasm and camaraderie among the attending club members and sportsmen has made up in great part for the non-appearance of a number of absentees.

At the annual meeting on Tuesday evening the following officers were elected for the ensuing year: Elmer H. Cox of Madera, president; Jos. E. Terry of Sacramento, first vice-president; Hon. Chas. N. Post of Sacramento, second vice-president; E. Courtney Ford of San Francisco, secretary-treasurer. Executive Committee: John Schumacher of Los Angeles, H. L. Betten of Alameda, J. W. Considine of Seattle, V. L. Caglieri of San Francisco, T. J. A. Tiedemann of San Francisco and D. G. Macdonnell of Vancouver, B. C.

The following sportsmen were elected members: D. G. Macdonnell, W. H. Easterbrook of Boston, Gordon Tevis, Lansing Tevis, of Stockdale, J. Eastland of San Francisco and Col. E. A. Forbes of Sacramento.

A full report of the trials will appear in next week's issue.

DOINGS IN DOGDOM.

The premium list for the Southwestern Kennel Club show, next month, gives a full classification in all of the principal breeds and is liberally inductive for entries in the breeds that are generally represented by but few entries.

The list of specials embraces a fine selection of trophies and cups, there being no less than 70 principal prizes offered, with the pleasing statement that other specials will be listed in the catalogue.

The Bench Show Committee is deserving of the hearty commendation of Coast fanciers for the prizes offered for Pacific Coast bred dogs. This is a decided move in the right direction. The encouragement of the breeder is of too much importance to be overlooked. Heretofore the principal specials of our shows have been awarded to best shown in most all breeds. This, to a certain extent is all right, but where does the breeder come in? Further, when all or most of the best specials are awarded to "best" in this, that or another breed it gives the professional dog broker the opportunity he is looking for.

The opposition to the administration of the American Kennel Club has been aroused, according to the New York Times, by the election documents sent out by Secretary A. P. Vrendenburgh in the name of the Executive Committee of the club, and a protest was called forth from John W. Britton, 2d, who represents the Bull Terrier Breeders' Association. Mr. Britton addressed his protest to President August Belmont, who replied, defending the action, and declaring that it would be continued. The correspondence explains itself:

306 West Ninety-third Street,

New York, January 8, 1908.

Mr. August Belmont, Chairman American Kennel Club Executive Committee:

Sir:—This morning's post brought me a broadside signed "By order of the Executive Committee, A. P. Vrendenburgh, Secretary." (I wish I could believe it was done out of office hours.) This would lead me to the conclusion he signed it as Secretary of the American Kennel Club. The Executive Committee has no more right to have its personal communications signed by the Secretary of the American Kennel Club than has the Ashland House Committee, and should it make such a claim, you would be the first to dispute it.

Your partisans have before now accused me of being an office-seeker, which statement is absolutely false. I would not accept an office in the American Kennel Club if it was offered to me, which is, to say the least, not likely. Yours truly,

JNO. W. BRITTON, 2D,

Delegate from the Bull Terrier Breeders' Association.

January 9, 1908.

Mr. John W. Britton, 2d, 306 West Ninety-third Street, City:

My dear Sir:—I am in receipt of your favor of January 8, in which you question the right of the Executive Committee of the American Kennel Club to authorize Mr. Vrendenburgh, as Secretary, to send out officially a circular, which it had approved, and of which you received a copy.

Allow me to call your attention to the fact that the American Kennel Club, Incorporated, of which Mr. Vrendenburgh is Secretary, did officially, at one of its meetings of delegates, authorize the general agreement, under which a vote is now being taken, are the questions at issue respecting the validity of the club's incorporation. It is not only the right, but the duty, of the Executive Committee to see that the matter is thoroughly understood, from the standpoint of the American Kennel Club and all interested in its welfare. It will continue, in this controversy, to correct any error which it believes is abroad, with respect to either the substance or merits of the contention, and in so doing believes it is meeting the wishes and requirements of every one entitled to vote. I remain,

Yours respectfully,

AUGUST BELMONT,

Chairman American Kennel Club Executive Committee.

TRADE NOTES.

A Good Man in a Good Place.

"Dick" Reed, known to and popular with thousands of shotgun devotees on the Pacific Coast, has joined the ranks of trade representatives for the Union Metallic Cartridge Company and Remington Arms Company.

"Dick" will make all points in this State and it is safe to state that he will make good. His business connection with the Selby Smelting and Lead Company, for five years past, as a "professional" shooter is one that was successful in every respect. His new field of application is a thoroughly familiar one and without a further calling the attention of the trade and our readers to Mr. Reed's new business affiliation, we will take the liberty of congratulating the U. M. C. and Remington managements on the acquisition of so capable a sportsman, and wish "Dick" every success possible.

WINNING FAMILIES.

Within the past few years students of breeding the light harness horse have given much attention to the importance of winning families, or, as they should be more accurately described, families from which have come heat winners. The great brood mares as they are called, are those who have been the fountain heads of winning strains, and while in the past too much stress has been put upon 2:30 performers, even that was in a measure a guide, for there have been families from which have come even very few of this class, mediocre as it seems to be. In judging brood mares whose influence has been felt most strongly, it is well to bear in mind that a preponderance of stake winners, high-class race horses, champions, is after all what counts most, and any one of these is worth more in a family than a dozen trotters of ordinary capacity. In dealing with brood mares, statisticians as a rule give Miss Russell first place, and there is much justice in this award, for without doubt, the daughter of Pilot Jr. deserved during her lifetime the title of queen of brood mares, as she now does that of the mother of trotters. There never has been in the history of the light harness horse a famous dam who even approximated Miss Russell in point of individuality. She was the most superb type ever seen, possessed of exquisite quality, abundant substance, and her poise and bearing were truly queenlike. A study of the photographs that were taken of her before she began to fade away visibly will show her blood like appearance, her almost faultless conformation. Her picture has been shown many times to breeders of thoroughbreds who were familiar with what constitutes excellence of conformation, and almost invariably the likeness has been pronounced as that of a thoroughbred brood mare.

Miss Russell not only produced a champion, but in so doing gave to the world a trotter without an equal as a speed marvel. Her daughter held her supremacy for many years, and even to-day her best performance has never been duplicated under identically the same conditions. The son of Miss Russell have bred on successfully, and to-day her blood is found in the veins of many of the most brilliant performers in the history of light harness racing. The real greatness of this wonderful mare lay in the fact that she produced speed to every sire with which she was mated, and when the class of stallions to which she was bred is considered, they are found to compare unfavorably with those who were the consorts of other noted matrons. Harold never got a trotter that was comparable to Maud S. from any other mare, nor did Belmont ever get a sire that even approached Nutwood. As compared with the opportunities of Beautiful Bells, who was mated year after year with the greatest trotting sire of his day; with those of Alma Mater, whose greatest sons and daughters were by George Wilkes, Miss Russell's were limited, for Harold and Belmont were neither of them great sires when judged by the standards of to-day, nor was King Wilkes or even Woodford Mambrino. While Miss Russell never produced a trotter who took high rank among the race winners of the period in which they lived, her daughter Maud S. was so immeasurably superior to all others, with the possible exception of Jay Eye See, that she could probably have won any of the fixed events which were trotted in her day. She was a precocious mare, coming to hand early, and her four-year-old trial of 2:17½ was in itself proof positive of how marvelous a trotter she was.

Another thing that must be taken into consideration in dealing with the immediate produce of the daughter of Pilot, Jr., is the fact that at Woodburn training was carried on in a very limited way, and several of the daughters of this great mare were retired to the stud without being given the opportunity to thoroughly test their capacity on the track. Her son, Nutwood, while he acquired a very creditable record, did so only after several years of training, and can not be regarded as anything like first-class in this respect. He was very like the Belmont family in many respects, although his ability to breed on, must in a large measure be credited to the inheritance he received from his dam, for other sons of Belmont have failed to accomplish what he has achieved. Beautiful Bells, although she is regarded by many students of breeding as well as practical horsemen as superior to Miss Russell, can hardly be judged by the same high standards, for while she was mated with a horse who got speed from almost anything that was bred to him, she failed to produce a trotter who at maturity was capable of accomplishing that which is credited to Maud S. Beautiful Bells, it is true, gave to the world more than one champion colt trotter, and this in itself entitles her to great distinction, yet the family has not bred on as well as has that of either Miss Russell or Alma Mater, and consequently the daughter of The Moor can not with justice be said to have equaled in her stud career the history of the exquisite gray queen of brood mares. Alma Mater, while her family is not as large as some others, was truly a very great producer, and had she accomplished nothing else than to give to the world the incomparable Alcione, she would have achieved enough to have immortalized herself. It was a fortunate circumstance that this daughter of Mambrino Patchen and the thoroughbred Estrella should have been in the same locality as George Wilkes, for this cross was indeed a fruitful one, and her owner builded better than he knew when he mated her with this most marvelous of progenitors. In

Alcione she produced a trotter of much merit, while in his full brother Alcantara, she produced one who, if he had not been the victim of an accident, must surely have become a stallion champion.

Alcantara was probably capable of a mile, under favorable conditions, faster than the then existing record, and while he was never able to prove this fact in public, his private form was such as to justify the belief that he was the equal of any trotter of his day. Alcione's stud career has never been approached, for although it covered a very limited period, it resulted in many very high class trotters, sons and daughters, who not only achieved success themselves in the stud, but have continued to breed on until to-day the family is fully the equal of any other in the trotting register. Other sons as well as the daughter of Alma Mater, have added materially to the fame of their dam, yet as is usually the case, the greatest successes have come down through one line. As an example of this Green Mountain Maid can be cited, for here was a broodmare whose reputation to-day depends almost entirely on what has been done by the family of Electioneer. The daughter of Shanghai Mary produced a degree of speed to almost every sire with which she was mated, yet so much of her stud career was devoted to producing foals by Messenger Ducroc that she had little opportunity of founding more than one great family. Her owner, Charles Backman, had abiding faith in Messenger Ducroc, yet the stallion was unworthy of such sublime confidence, for individuality he was far from perfect, and even with the opportunities he received at Stony Ford, with its superb collection of mares, he failed to found a family of importance to the breeding world. Green Mountain Maid, in producing Electioneer, affected the light harness horse industry and the sport of racing, in a manner that has possibly never been equaled, for not only was he the most successful sire of his day and begot champions galore, but his family possesses a degree of quality that is extremely desirable and his sons and daughters have bred on with great uniformity.—The Stock Farm.

FUTURITY NOMINATIONS.

Word comes from Cleveland to the effect that the nominations for the futurity for foals of 1907 to be given by the American Association of Trotting Horse Breeders which closed December 31 have far exceeded expectations and there is every reason to believe that the richest futurity in the world will be one that will be raced for in 1910 and conducted by this association. While it is impossible to tell the exact value of either the championship stallion or the matron stakes, it is safe to place the ultimate worth of the stallion stake at \$20,000 and the matron stake at \$14,000 or \$15,000. In the champion stallion stake there have been 120 stallions named. This number includes every prominent sire in the country, there being hardly a stallion of any note that has not been named. With this large list of stallions named it is a conservative estimate to credit each stallion with twenty-five foals. Of course some of the young stallions will not have that many but the average will surely come up to twenty-five or more, so that at those figures 3,000 foals have been entered.

Under the conditions of the stakes all nominations must be made by members and all starters must be owned by members. All moneys such as the service fee of the stallion nominated and the various payments on the stake shall go toward the stake.

When an owner of a stallion nominates his horse it costs him just the amount of one service fee. But by so doing every foal by that stallion is entered in the stallion stake. The owner of the foal does not have to pay a cent of entrance money until the foal becomes a yearling, and then on December 1, 1908, the first payment of \$5 falls due. On July 1, 1909, a \$10 payment is due on two-year-old trotters and \$5 on two-year-old pacers, and on May 1, 1910, a \$15 payment is due on three-year-old trotters, and \$10 on three-year-old pacers. On July 1, \$25 is due on trotters, and \$10 on pacers, and on the night before the race \$100 is due on trotters and \$25 on pacers. All races are to be mile heats, best two in three and the money divided 50, 25, 15 and 10 per cent. Of course the entire amount of the futurity is to be divided 75 per cent to trotters and 25 per cent to pacers and then the money under respective events divided as above stated. Hopples are barred.

Among some of the prominent stallions nominated are found in the following lists: Trotters—Advertiser 2:15½, Alcione, sire of Axcyell 2:06¼; Axtellion 2:15½, Baron Dillon 2:12, Baron H. 2:19, Baron Gale 2:11½, Baronmore 2:14½, a great sire of early extreme speed; Bellini 2:13½, sire of three 2:10 trotters the past season; Bingen 2:06¼, sire of Todd 2:14½; Bingara, Boreal 2:15½, sire of Boralma and others; Bon Voyage 2:12½, Colonel Cochran 2:10½, Dare Devil 2:09, Edgemark, Galileo Rex 2:15½, Guy Axworthy, Grattan 2:13, John A. McKerron 2:04½, Judge Parker 2:10½, Jay McGregor 2:07½, Jack McKerron (2) 2:23½, Kremlin 2:07½, McKinney 2:11½, Mainshet 2:05, Moko, Oakland Baron 2:09½, Ormonde, Oro Wilkes 2:11, Peter the Great 2:07½, Prodigal 2:16, Sidney Dillon, The Tramp, Todd 2:14½, The Beau Ideal 2:15½ and some others of less prominence.

The pacing stallion list includes such sires as Audubon Boy 1:59½, Be Sure 2:06¼, Fred S. Wedgewood 2:05½, Five Points 2:10, John R. Gentry 2:00½, Rubenstein 2:05, Star Pointer 1:59½, Walter Direct 2:05½ and some others. With this grand list of stallions named there can not help but

be the cream of the foals represented.

The matron stakes contains 1,300 nominations. Included in the nominations are every great producing broodmare and every fast record mare which has been put to breeding.

The exact time and place for the racing of these stakes has not been decided upon, but it is stated that they shall be held on some centrally located track after August 1, 1910. As Lexington is well located for horsemen from all sections of the country it would not be surprising if the Kentucky city was the one selected by the executive committee of the American Association of Trotting Horse Breeders. Much interest will be taken in the foals entered in these stakes from now until the time of the race.

NO CHANGE IN DATES FOR GRAND CIRCUIT.

There will be no change in the Grand Circuit for harness horse racing this year. This was the decision of the Stewards after a protracted session, January 14th, when the dates for the leading meetings of the season were announced. The schedule was agreed to without a dissenting vote. The Grand Circuit meetings open one week later than in past years, and, while the delay is much regretted by racing men and horsemen, yet the Stewards were compelled to delay the opening on account of Buffalo, which holds its meeting over the Kenilworth track where the running meeting will not end until July 25th. The circuit will extend, as usual, ten weeks, making a total of twelve weeks, including Lexington.

One big advantage will be obtained by the drivers and trainers by the late opening. It will extend the big line at Columbus up to the opening of the Lexington meeting, thus necessitating no vacant week, as was the case last year.

For the first time in the history of the Grand Circuit, Daniel J. Campau did not represent the Grosse Point track, where the opening meeting of the major circuit has been held for many years. He represented the new racing association organized at Detroit, where the meeting will be held, including the trotting and pacing classics, the M. and M. and C. of C. Secretary Albert H. Moore of Providence will act as Secretary of the meeting, which will be held over the new Michigan State Fair Association's track.

The indications point to four meetings where betting will be barred. They are Cleveland, Readville, Providence and Hartford, each of these having secured dates with these expectations. Between now and the opening of the circuit, however, there may be some changes at one or more places, but at present it is certain that the line will not be disturbed on account of the pool-selling and betting question.

Three applications for dates were declined. The one from Baltimore was backed by a number of prominent citizens, who gave every assurance of a successful meeting over the Pimlico track. The Cella-Adler crowd, which secured the Grosse Point track, at Detroit, applied for one week, but the decision of the Stewards was prompt, and the application was denied. Last year Daniel Campau held the Detroit meeting over the Grosse Point track, but after the meeting he was notified that he would not be permitted to hold this year's meeting there.

William P. Engeman applied for a meeting for Kalamazoo, Mich., requesting the week of July 20 to 24. Dates for this week having been granted to Windsor, Ontario, and another Western track, the Stewards were compelled to refuse the application, which was the only one to find any favor with the Stewards.

There was a heated discussion over the selection of a presiding judge and official starter. There was a marked sentiment on the part of several members to select their own officials, independent of the Grand Circuit Stewards. A compromise was effected whereby A. J. Keating of New York was selected as presiding judge for the entire circuit, and the members were left free to select their own starters.

The resignations of James Butler, President of the Empire City Racing Association, and C. K. G. Billings were largely instrumental in forming the Grand Circuit.

There was no change in the list of officers, the present officials being re-elected. They are: President—John M. Johnson of Readville; Vice-President—H. M. Hanna of Cleveland; Secretary and Treasurer—Albert H. Moore of Providence. The schedule follows:

Detroit, Mich., July 27 to 31.
Cleveland, Ohio, August 3 to 7.
Buffalo, N. Y., August 10 to 14.
Poughkeepsie, N. Y., August 17 to 21.
Readville, Mass., August 24 to 28.
Providence, R. I., August 31 to September 4.
Hartford, Conn., September 7 to 11.
Syracuse, N. Y., September 14 to 18.
Columbus, Ohio, September 21 to October 3.

TEACHING A HORSE TO BACK.

A correspondent of the Chicago Breeders' Gazette gives the following advice: "In teaching a horse to lead I never pull straight ahead, but always take a side pull; and in teaching a horse to back I use the same system. Now suppose we have lines on the horse and are standing behind him. Take a few steps to your left and pull on the right rein, bringing it well down on his thigh. This will pull the hind end of the horse one way and his head the other. Now step to your right and pull on the left rein. Keep repeating this and every time you pull on him tell him to 'back.'"

THE FARM

LONGHORN VS. SHORTHORN.

The curious scientific doctrine of the survival of the fittest has few contests for supremacy among the longhorns and the shorthorns. The struggle has been long, the steps in the evolution consuming hundreds of centuries. According to the biological philosophers, it took thousands of years for cattle to acquire the queer frontal ornament known as the horns. It has taken fully as long, by steps still more remarkable, to lose or modify them. In the former case nature alone operated, through the principles of natural and sexual selection. In the latter case, man became a factor and it was by a system of breeding, along the lines of the natural law, that the longhorn gave place to cattle either entirely without or with horns much diminished. Entirely aside however, from this mere feature or characteristic, forceful reasons were in operation to displace the one with the other. The longhorn belonged to another day, the day of the frontier and the pioneer. In the older days the prevailing type all over the west was the long-legged, longhorned animal, with slabsides, much daylight under them, short of back, narrow of rump and deficient in beef-making qualities. They occupied the vast pastures of northern Mexico, the Llano Estacado of Texas, the slopes of the Sierra Madre and every valley between the Mississippi and the Rocky Mountains. They were driven in herds of countless thousands for hundreds of miles to the market towns of the Mississippi Valley and furnished the hides and tallow for all industries needing these articles. As beef cattle they were conspicuous failures, their meat being accepted because nothing better could be obtained.

When the railroads invaded the range and built shipping tracks from the main lines to the loading pens at the ranch, the last excuse for the propagation of the longhorns was obliterated. Before this the longhorn was an absolute necessity. When it was compulsory to drive cattle for the market hundreds of miles to reach the nearest shipping point, the longhorn alone was equal to the test. Beside him the fat, sleek shorthorn would have died by the wayside the first few hours of the journey, but the "Texas ranger," as he was called, was famous both for speed and endurance. His modern rival was an impossibility under frontier conditions. The problem of water supply was another factor in the culture of the longhorns. In the early settlement of the southwest the stockmen were forced to depend upon the streams that afforded a perpetual supply of water and there were few of them. That was before the day of the windmill and the artificial lake. Only the longhorn could find pasture in the hills many miles from these streams and make daily pilgrimage to the water without detriment to his physical condition. This he would do at a pace which taxed the enduring qualities of the hardy mustangs of the "cow punchers." The ability of the longhorn to withstand the blizzards was wonderful, adapting him peculiarly to the pioneer period. A Texas "norther," which would freeze a tender shorthorn to death, had no terrors for the hardy longlegs that roamed the limitless plains.

The early settlers were not prepared to provide shelter for their stock, but the longhorn needed no coddling and sought his own shelter in the hills. Thus it will be seen that the very virtues of the longhorn were a detriment to him, when we consider the prime object for which cattle are raised. Endurance, hardihood, speed and capacity for self-support were not the qualities that made good beef. Fat, not muscle, meat, not bones, compactness, not agility, are the qualities sought in cattle for slaughter. With all his traits, once commendable, the longhorn has no place in the twentieth-century scheme. The present civilization demands meat, rather

than speed in the marketable production from the range and the longhorn was not a meat-producer. He was healthy, vigorous and picturesque, but never fat. His appetite was prodigious and his digestion perfect, but he defied every law of nature in his persistent refusal to "take on meat." He might have been—to paraphrase a sentiment from a certain Western Governor—"The rich, juicy meat in the national sandwich," but the longhorn simply would be nothing but horns and bone and muscle. Hence his exit from the pastoral stage and hence his replacement by the shorthorn or nohorn under the inexorable law of the survival of the fittest. The latter realize the chief mission of cattledom by proving ideal furnishes of meat and milk. Their very sluggishness, inaptitude for storms or hard treatment, their love of luxury and tenderness acquired thereby, qualities diametrically opposite to those possessed by the creatures they displace, are precisely the ones that entitle them to precedence in an age seeking for the best beef producers.—American Farmer.

SOME UPS AND DOWNS.

Some years ago we contracted a bad case of the chicken fever, and, as it is absolutely impossible to cure it without making a try at the business, we started. We took the fever in the month of November and immediately began to read everything and anything pertaining to chickens. By spring we knew it all—you couldn't tell us a thing—but since then we have unlearned a large part of that knowledge.

In our reading we obtained a bulletin from the agricultural experiment station, Orono, Maine, which told of the muslin front house. We said, "If that works in Maine, it will work in Minnesota." We immediately built a house 12x16 feet on top of a hill, faced it to the east and muslined the front. Then we went to a commission dealer and got twenty-five old hens that he had kept in his cellar (waiting to be sold), for nobody knows how long. They were of every variety and of no variety at all—rose combs, single combs, Leghorns and Andalusians. We put them in the muslin-front house in zero weather, with plenty of straw to work in, and those hens not only did not freeze to death, but they did not freeze a comb. That settled the house question, and it has remained settled ever since.

In our reading that winter we read advertisements and each and every advertiser had the "world's best \$1,000 prizes" or more, but nothing about eggs. I said to my partner, "What's the matter with raising some chickens that will lay eggs?" We believed it would pay. So "eggs" was our motto from then on.

We bought two 200-egg incubators and six brooders and began to look for some breeder who had been working for better layers, from whom to get our hatching eggs. We knew, personally, one breeder of national reputation and wrote to him in February. On March first he replied, "No eggs till April or May. I raise my chickens to show, not to lay."

We finally learned of a man who had bred for eggs for years, and we supposed we could get eggs at a fair price from him. But he asked just as much or more, than some of the \$1,000 prize fellows. However, we figured that we were getting the benefit of his years of breeding as well as the eggs, so sent him our order.

We built six colony houses, each 3x6 feet; 2 feet high in the rear and 3 feet in front and imagined we were going to raise 1,000 chickens with that outfit; but we soon found we were wrong.

The 3x6 colony houses were too small. We then built some 5x7 feet, which answered fairly well. We put an indoor brooder in each house and that year we incubated 1,800 eggs, hatched 800 chicks and raised 700 of that number.

During the summer we built eight 12x32 laying houses and had them completed on August 19th. On August 20th along came Mr. Cyclone and blew five of them entirely to pieces, destroyed over one mile of wire fencing, blew down 187 trees, and

killed over 150 chickens. That put quite a crimp in our progress but, as soldiers are not made on the parade ground, we went to work again, and, in four weeks you would not have known there had been a storm.

By this time we were "all in" financially and it was either eggs from the 250 pullets we had left, or they would have to go to the butcher. On September 19th we went out among the pullets and told them just how we were fixed, and, I believe they understood, for the next day the first egg was laid, and that egg, up to that time, had cost us over \$5,000. During the following five months (to March first), those 250 pullets earned us, in market eggs alone, \$512, with a feed bill of \$30 per month.

The following year we began advertising in a small way; got good returns, increased our house room time to time as the business warranted it, and now have the largest "down-to-date" poultry ranch in the Northwest. Our birds have never failed to begin laying when they were six months old, nor to keep at it.

We have been able to maintain and greatly improve the laying qualities of our stock in a very simple manner. We operate twenty 200-egg incubators and from 200 eggs we mature something over 100 fowls—50 cockerels, 50 pullets.

We find that there is a difference of five to six weeks between the time the first pullet begins laying and when the last one, out of the same hatch, begins. As they start in to lay in the fall we leg-band those that start first, and, later make up breeding pens of those that laid first. We find that the pullets that lay the most eggs during November, December, January and February also lay the most during March, April and May.

Many people ask us if the chicken business pays. It does, if you have the "goods," and then advertise them. It pays to use good-sized space, and not to be afraid to pay for some white space in the advertising.

When you get an order for eggs or stock give your customer a square deal. Have him satisfied, if it takes more than you think he is entitled to; a satisfied customer is the best advertisement any breeder can have. There are many things about the business we have yet to learn, but we have learned to hatch good chicks, raise them so they will be laying in from five to six months, and to keep them at it.—L. B. Rich, in "Northwestern Agriculturist."

HORSES WITH HEAVES.

Broken wind is not curable, or it would not be such a common thing to see a good class of horses sold at a ridiculously low price because of this infirmity; but it is quite possible, by judicious management, to keep the ordinary case going with tolerable comfort to the animal and a fair amount of satisfaction to the owner or driver who is not particularly horse proud.

The first thing is to appreciate or take into consideration the nature and cause of what is popularly called "broken wind." It is not a respiratory disease, in the proper acceptance of the term, but is due, in the majority of cases, to bad feeding. Feeding an inordinate quantity of bulky, innutritious fodder, particularly badly saved, moldy or dusty seed hay, is one of the most common causes of broken wind.

The class of horses most frequently found to be broken winded are farm horses and inferior ponies. Both are greedy feeders, and both belong to a class of owner notoriously niggardly in their provision of corn. Thus the broken winded horse should be fed on the best of food, and of a less bulky or more concentrated character than is generally supplied to horses of this class. More corn and less hay should be given, and all the food should be free from dust and given slightly dampened, by sprinkling with salt and water. The broken winded horse should be fed on the little-and-often principle and the daily allowance of food divided into a large number of small feeds. The hours of feeding should be adapted to the hours of work, so that the horse is not called upon to labor on a distended stomach. The largest meal

should be given at night, after the work is over, and this is the time when the larger part of the moderate quantity of hay allowed should be fed. Linseed and bran should be given occasionally in the form of mash. Carrots and green feed are good for broken winded horses, being digestible and slightly laxative, but too much green feed is incompatible with condition, and the thing to be aimed at in the case of the broken winded horse is the maintenance for the animal in hard condition.

A cool, well ventilated stable is a necessity. Water is best kept standing within reach of the animal, so that it can drink at will; or where this is not possible, water should be offered before each feed. It should be clean and the supply frequently changed. Regular, moderate work, without which the maintenance of condition is impracticable, is better for the broken winded horse than irregular labor or long spells of idleness. At the start go slowly, until the bowels have been emptied. A distended stomach and bowels, by pressing on the diaphragm, increase the distress in breathing, and this is another reason for the food being more concentrated, or why it should contain the elements of nutrition in as small bulk as possible.

There is always a characteristic cough associated with broken wind, and on some occasions, where there has been some departure from the rules of feeding or good hygiene, or in certain states of the weather, there is an increase in the severity of the symptoms which may call for medicine to relieve them; but drugs are not of much use in ordinary cases of broken wind, and should not be persisted in when the acute symptoms have yielded. When recourse is had to medicine from time to time it seems more effective than when regularly given.

The bowels of the broken winded horse should never be allowed to become constipated, and when judicious feeding with linseed, carrots or green stuff does not suffice to keep them regular, a laxative should be given.—London Farm and Home.

ARTIFICIAL INCUBATION.

Those who are contemplating using an incubator the coming season may find many useful hints in the following, written by one who knows whereof he speaks:

It is usually a safe proposition to follow the instructions of the manufacturer that you bought your incubator from, but I find that you will have to do a lot more to get the best results. The directions say turn the eggs twice daily. That is all right as far as it goes, but turning them half a dozen times a day will give far better results. To illustrate: When I first started with incubators I followed the directions of turning the eggs twice a day, with the result that I always had a number of crippled chicks. Since then, by stirring the eggs whenever I happen to be near the machine, I have not had a cripple for the last two or three years. Quite a difference, isn't it?

In addition to the above stirring, I turn and cool the eggs twice daily after the second day. My method of turning the eggs is to take a dozen or so from the center of the tray, then shuffle the others toward the center with the hands, the same as the hen does with her body. Now take the eggs that you took from the center and lay them around the outside of the tray. I also turn the tray part ways around each time. This is necessary because no incubator has even heat in all parts of the egg chamber, and while the directions say not to do so, I always leave the incubator doors open while turning and airing the eggs, so as to give it also the benefit of a good airing, as the hen airs herself as well as the eggs when she leaves the nest. This is nature's method and we should try and imitate her as near as we can in the artificial method. I find it best to run the incubator in a convenient place, such as the dining-room or spare bed-room, and to have the sun shine into the room as much as possible, but not directly on the machine. The room should be well venti-

lated, but drafts should be avoided, especially directly on the incubator.

When the incubator has been running at the required temperature for a day or so, introduce the eggs into the machine, having none on end or piled on each other; an incubator can be run partly filled, but not crowded. The eggs should be clean, and of uniform size and shape. They will lower the temperature, but don't turn up the lamp, as it takes a lamp twenty-four hours before it will return to the point where you have been holding it. Fill the lamp and trim the wick once or twice daily, as the case may be. Do this regularly at the time the eggs are being turned and aired. Don't expect too much from your first hatch, especially early in the spring. Eggs at this time are not very fertile and unless great care is taken they are liable to get chilled, and a chilled egg should not be used for hatching. Fifty per cent is good hatching with pullet eggs. Chicks hatched from pullet eggs seem to be weak and you will find many dead in the shell and more will die in the first few days. At least this has been my experience in the past two years. If the incubator is given an even chance with a hen, the incubator will outlast her nearly every time. It is my honest opinion that almost all of the standard incubators made today will hatch every hatchable egg if given a fair chance.

Don't be too anxious and fool with the regulator; set it according to your directions. Be careful to adjust the flame the proper height. After you have filled and trimmed the lamp remember the regulator can let off the surplus heat, but cannot pull up the temperature. Don't open the incubator door more than is absolutely necessary while the hatch is coming off, as this lowers the temperature and thus checks the progress of the hatch.

"The more I feed the more I become confirmed in the belief that the day is not far off when mighty few cattle over eighteen months will be marketed as fat cattle for slaughter. Like all other old cattle feeders a few years ago I had an idea that the larger the steer the larger the profit. We never thought of marketing a steer in those days until he was over four years old. That day is past, and very few over three years old can be found on the fat cattle market now. Coming down to two-year-olds, we find more than in any other class, and I am betting on the majority of them going considerably below the two-year-old mark before long. No one will doubt the fact that the high-grade steer fifteen months old, that has been carefully handled and well-finished, will make better beef than the three-year-old steer. Then there is less waste to them, and the quality of the beef is far better. I grind all of my feed, and rush them along till they are about fifteen months old, when I let them go," says J. C. Cobb, expert cattle feeder of Odessa, Mo.

No man who keeps cows for the money there is in it, so rich that he can afford to keep poor ones. The rich fellow, who goes into dairy business for the satisfaction he can get out of it usually keeps the best cows that money can buy. The poor man who must depend upon his dairy for his living and profit too often keeps poor cows because the better ones cost more money. The rich fellow could well afford to keep this kind, but it is the most foolish kind of foolishness for the poor man to own such cows. He is just the man who should own good cows. It is impossible, of course, for him to buy the kind of cows that the rich fellow does, but this is not necessary or advisable. He can build up a herd of good cows from a very few good milkers by using a good dairy sire, and by studying the individuality of the herd. Just a little improvement each year will do the business.

One of the most striking characteristics of the Polled Angus is the longevity of the breed and they say the cows have to meet accidental death or be slaughtered in old age while yet useful. Old Grannie, cow No. 1 in the Scotch polled herd book, is said to

have met accidental death at the age of thirty-one after having been a regular producer of calves for a quarter of a century.

Prof. Van Pelt of Iowa claims that the advantage of the silo on the dairy farm is great. He states that two pounds of milk can be produced where under any other method of feeding, except on pasture, there would be only one pound. Silage never taints milk if fed directly after milking, and if the mangers are kept clean and sweet. The best possible ration for a dry cow, not on pasture, he gives as corn silage and alfalfa hay. The best ration for a milking cow, corn silage, alfalfa hay and about six or eight pounds of grain to furnish concentrates.

Manufacturers of concentrated commercial feeding stuffs have been quick to realize the food value of alfalfa as the protein-bearing feed. For instance, in one experiment with milk cows continued for a period of 207 days, a grain ration was fed composed of ten parts of cottonseed meal and three parts of linseed meal. When alfalfa meal was substituted for the bran in this ration, nearly as much milk was produced. Hay and corn silage were fed as roughage in both tests. This test indicated that the alfalfa meal was worth fully \$18 a ton. We of the alfalfa country do not begin to appreciate the utility of this great legume.

In an experiment to ascertain the cost of raising a calf, Professor Shaw of Michigan Station took a dairy calf and kept an accurate account of the expense of feeding for one year from its birth. The amount of feeds used in that time were 381 pounds of whole milk, 2,568 pounds of skim milk, 1,262 pounds of silage, 219 pounds of beet pulp, 1,254 pounds of hay, 1,247 pounds of grain, 174 pounds of roots, 14 pounds of alfalfa meal and 50 pounds of green corn. The grain ration consisted of three parts each of corn and oats and one part of bran and oil meal. At the end of the year the calf weighed 800 pounds at a cost of \$28.55 for feed. The calf was a Holstein.

H. G. Koch, a German farmer, has been tilling the soil for four years 100 miles north of the Zambesi River in Central Africa. No other farmer lives within fifty miles of him: There are not twenty European farmers in the whole of Northwest Rhodesia, a country as large as California. He likes the soil and the climate and is there to stay. His farm is as near the equator as the north part of Central America, but it stands more than 4,000 feet above the sea and the heat is less oppressive than in many other sections of Africa.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's
Gaustic Balsam
IT HAS NO EQUAL

For—It is penetrating, soothing and healing, and for all Old Sores, Bruises or Wounds, Burns, Exterior Cancers, Boils, Corns and Bunions. CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

REMOVES THE SORENESS—STRENGTHENS THE MUSCLES
Cornhill, Tex.—"One bottle Gaustic Balsam did my rheumatism more good than \$100.00 paid in doctor's bills."

Bonnie McKinney 41383 Son of McKINNEY 2:11 1/4.
World's Greatest Sire of Speed

Dam Martha Frazier by Rustic; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc.
Bonnie McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly
bred. Four black colts by him on exhibition.

Fee: \$40 for the Season.

January 1st. to July 1st.

Bonnie Searchlight 43899 SON OF SEARCHLIGHT 2:03 1/4.
King of Race Horses.

Dam Rita B. by Boodle Jr.; 2nd dam Gabilan (girl by Gabilan; 3rd dam Clara by Elmo 891, etc.
Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast
natural trotter and will be trained to race this year.

Fee: \$40 for the Season.

January 1st. to July 1st.

Will be pleased to show these horses at any time. Excellent care taken of mares. Fee returned if
mare fails to get with foal. Apply to or address

And winner of American Horse Breeder Futurity. It pays to book to such a sire.

When writing kindly mention this journal The Empire City Farms, Cuba, N. Y.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, windpuffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, etc.

NEW WORLD'S RECORD 15,000 Targets Without a Miss

J. W. Akard's claim to the title, "The King of Rifle Shots," is well earned. His performance of breaking 15,000 regulation clay targets without a miss is the greatest exhibition of skill on record. He used one shot only for each target. He threw his targets with his right hand, holding his gun with his left. He used

U. M. C. .22 SHORT CARTRIDGES

whose perfect quality supported his perfect aim. A great per cent of the targets were broken edgewise, so that the diameter of the disc does not truly represent the size of the moving target in the air. Mr. Akard's earlier run of 1,659 small marbles without a miss is nearly twice as long as any previous record on similar objects. In this case, also, he did his own tossing. Remember that Mr. Akard's run of 15,000 targets was unfinished. Mr. Akard is now giving demonstrations on the Coast.

U. M. C. CARTRIDGES EXCEL IN CLEANLINESS AND ACCURACY

The Stallion Number

OF THE

Breeder and Sportsman

Will be issued February 15th, 1908. It will have a handsome cover in colors, contain many illustrations and be replete with matter interesting to breeders and horsemen.

If You Own a Stallion

Don't fail to advertise him in this issue, as an advertisement of your horse in this number will reach every man on the Coast who owns a good mare.

If You Own a Mare

You will find this number very interesting, as it will contain the stallion announcements giving particulars as to description, pedigree, terms, etc., of all the best horses on the Coast, and from these announcements you can decide on what stallion will nick best with your mare.

ARE YOU INTERESTED IN HARNESS HORSES?

If so, you will be interested in reading this number, as it will contain statistics and news that will be valuable and entertaining.

In place of getting out the usual large Christmas number of the BREEDER AND SPORTSMAN last month, it was decided to make a special effort and get out a handsome stallion issue, and the date of February 15th was selected as Christmas comes too early for an issue of this description. Owners of stallions who wish illustrations of their horses to appear in this issue should have photographs prepared without delay and send in their orders for space. A specially low price has been decided on for advertising in this issue, placing it within the reach of all. Write for price and particulars.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

AN EXCELLENT PROGRAM of purses has been arranged and is advertised this week by the Pacific Coast Trotting Horse Breeders' Association for its August meeting this year. In addition to the four races of the Pacific Breeders' Futurity Stakes to be decided at this meeting, the following purses have been offered:

For Trotters—2:10 class, \$1,000; 2:14 class, \$800; 2:20 class (California Stake) \$2,000; 2:17 class, \$800; Four-year-olds, 2:20 class, \$500.

For Pacers—2:05 class, \$1,000; 2:08 class, \$800; 2:14 class, \$800; 2:20 class, Pacific State Stakes, \$2,000.

The date of closing entries to all the above named purses is set for Wednesday, April 1st, horses to be named at time of closing. Two horses may be named from the same stable by the payment of one per cent additional, but only one can be started.

The program is an excellent one and has been arranged so as to accommodate as many horses as possible and should attract a large entry list. We hope other associations in California will now arrange programs, select dates and announce them early, so that horse owners may decide what horses to keep in training. The outlook for a good season in California is first class so far as farm products are concerned, and with half an effort on the part of those who direct the management of the different trotting tracks in California, a good and successful circuit of harness racing can be given

THE APPELLATE COURT, sitting at Los Angeles, has rendered a decision which holds it to be the duty of automobilists to look out for pedestrians and keep from running them down. A track oiler named Stanley King had been run down and badly injured by an automobile driven by E. K. Green. King brought suit for damages and got a verdict for \$7,000 in the Superior Court. Green appealed the case and made the plea that King was guilty of contributory negligence, as it was his duty to be on the lookout for automobiles and other vehicles. The Appellate Court sustained the verdict of the lower court, and held that it was the duty of the drivers of autos and other vehicles to keep a lookout for pedestrians and to avoid running over them. The courts all over the country are holding that pedestrians have some rights that the automobilists must respect.

Fred Helwig, who is at the head of the Helwig Meat Company owns a Zolock filly that has a stake winner for a dam, and Henry Helman who is going to break the filly pretty soon, says she will be faster than her mother, and Helman drove the mother fast enough to win a \$1,000 stake with her when she was a three-year-old. Mr. Helwig, who supplies the meat for the construction gangs working on the Western Pacific Railway in Niles canyon, says they eat a beef a day, and it keeps him rustling to get enough to supply the demand.

When the Grand Circuit trotter Turley 2:07½ was struck off to Dr. R. C. McCully, at the closing out sale of F. G. Jones' stable, last fall, a great many horsemen wondered where the old campaigner was going. It now turns out that he was bought for C. K. G. Billings, who is using him as a saddle horse in Central Park. He is a fine looking bay gelding, sixteen hands high, and is said to be a perfect riding horse. He is probably the fastest trotter ever used for saddle purposes. In the three years that Ed. Geers campaigned him he won nearly \$20,000, and was only twice behind the money.

The gamblers that Governor Folk drove out of St. Louis do not seem to be meeting with much success in their efforts to transplant the "game" in Detroit. That community has never permitted them to hold a running meeting at the Grosse Pointe course, for which the "Cella confederacy" outbid the Detroit Driving Club at the foreclosure sale a year or two ago. Trotting meetings with poolselling and bookmaking have gone on unmolested at the same track, but these lasted only six days, instead of thirty. They were not run for revenue only, and they were managed and patronized by representative citizens, D. J. Campau being the president of the Driving Club. This year the Cella crowd refused to hold a trotting meeting at the Grosse Pointe track, and themselves made overtures for dates in the Grand Circuit. These they were unable to obtain. With the resourcefulness of an experienced political manager, Mr. Campau checkmated them by transferring the annual "Blue Rippon Meeting" of the Driving Club to the fair grounds track in Detroit, and according to the present outlook the Grosse Pointe course will remain idle, a white elephant on the hands of its owners.

The death of the noted thoroughbred stallion Pietermaritzburg, at Buenos Ayres, Argentina, a few days ago, draws attention to the growing importance of the South American republic as a field for horse racing and racehorse breeding. In the last few years the Argentines have paid in England \$170,000 for Val d'Or, \$150,000 for Diamond Jubilee, \$100,000 for Pietermaritzburg, \$90,000 for Kendal and but little less fabulous sums several other thoroughbred stock horses. There are now about two thousand thoroughbred mares in the Argentine stud book, and nearly one thousand colts are raised annually. About six thousand horses were raced last year at 110 meetings for stakes and purses aggregating \$3,000,000, while six hundred thousand spectators wagered \$50,000,000 on the result of seven hundred and fifty races run.

As the result of two years' breeding at the Fort Collins experimental station of the Department of Agriculture there are now thirty-one colts and fillies of the trotting bred coach horse type on the farm. All are by the Government stallion Carmon, better known to Eastern horse fanciers as Thunder Cloud, of Thomas W. Lawson's show stable. Colorado horsemen say they are uniformly handsome, showing the beauty as well as the action and speed of their sire.

In a letter to the American Horse Breeder, James Y. Gatcomb, owner of Audubon Boy 1:59½, suggests an innovation in harness racing which Grand Circuit track managers would do well to consider if they expect either the horse owners or the public to liberally support the trotting meetings. Directing attention to the hardships and the hollow contests growing out of the existing system of entering horses in the spring and racing them all summer in the same class, Mr. Gatcomb advocates a uniform program of early closing races for all meetings in the circuit and a provision in the conditions governing entries, that when a horse has won in the slower class he shall progress to a faster class at the next meeting by operation of the rules, and so effect a fresh grouping of the trotters, besides affording an opportunity for the previously beaten horses to win. Amateur reinsmen will recognize the principle involved as one which has been tried with general satisfaction at the matinees for several years.

SCARED AT SOUTHERN SPEED.

Pleasanton, January 29th, 1908.

Editor Breeder and Sportsman:—Since reading Jack Fronefield's report of the tremendous speed being shown by the trotters and pacers at Los Angeles and other southern towns, the trainers here at Pleasanton are looking a little pale around the gills and some of them are thinking of turning all their horses out and not trying for the purses on the circuit this season; 2:10 doesn't seem to be anything for a trotter or pacer down there, and quarters in 30 seconds are too common to be worth mentioning more than casually.

Since reading about those Los Angeles flyers, I am more pleased than ever that I sold my pacer, although I still believe he will beat 2:10 as a three-year-old.

Yours truly,

THE HORSE SHOER.

THE MORGAN HORSE.

I have been a breeder and admirer of the Morgan horse for the past twenty years, and have read everything I know of regarding them.

Justin Morgan, the founder of the Morgan family of horses was foaled at Springfield, Mass., in 1789 and carried to Randolph, Vermont, in 1793 by his owner and breeder, Mr. Justin Morgan, and was kept in service as a stallion in this State until his death at the age of thirty-two. Justin Morgan was practically a thoroughbred.

His sire, True Britton, a thoroughbred, was captured from Col. Jas. DeLancy, an officer of the British army in the war of the Revolution at King's Bridge, near New York City, and ridden within the American lines at White Plains.

His dam was a daughter of Diamond by Churches' Wildair, a famous thoroughbred. In color Justin Morgan was a bay with black joints and heavy black mane and tail. He was about fifteen hands high and weighed 1,000 pounds—a bunch of bone, muscle and sinew placed together in most graceful

curves. It was said of him that he could outwalk, run or trot, and outpull any horse of his weight in his day. No other horse has added so much to the American breeds—the Standard Bred and the Saddle Horse as Justin Morgan, and the greater portion of the famous ones carry some of the blood of Justin Morgan in their veins. The Morgans are more prepotent than any other breed of horses, and the Morgan stallion that carries only one-sixteenth of the blood of Justin Morgan will stamp his characteristics on his progeny with greater certainty than and other horses in existence. It matters not how many years they have been bred pure, or in straight line.

The Morgan is an all purpose horse; he can work the plow or wagon every day in the week and step along with the carriage or buggy on Sunday at a clip that cannot be surpassed by the best of them.

They have longer lives and have greater endurance than any other breed of horses. I have Morgan horses that have worked constantly on the farm for fifteen years whose legs are as smooth as colts' and if you give them a few months' rest they step higher and prouder at this age than three-year-olds of some breeds.

In size the Morgan horse has been bred much larger than formerly in the past twenty years and to-day they range from fifteen to sixteen hands in height and weigh 1,000 to 1,350 pounds, yet have all of the style, snap and endurance of the original Morgans. I know of Morgan stallions of the latter weight that will drive fifty miles in a day, repeat it several days in succession and come in with their heads and tails up as they started out; yet are so gentle and tractable that any lady can drive and manage them. The Morgan horse is long in the body—though extremely short in the back, owing to his great length of hip and slope of shoulder. His chest is broad and his legs well set apart with a greater heart girth than any other family of horses for their size.

The Morgan horse has a lean head of medium size, straight in front and broad between and above the eyes, indicating his wonderful sense and courage. His eyes—generally hazel in color—are prominent; his ears medium in size and well set apart. In color they are bay, chestnut, brown and black. A book on Morgan horses was published by D. C. Linsley of Middlebury, Vermont, in 1857, after which time the Morgans were somewhat neglected until 1884 when the Hon. Joseph Bartell of the same place began collecting data for our present "Morgan Horse and Register," so ably gotten up by him. Two volumes have been issued and the third is expected soon. The interest in Morgans has been very much revived in recent years, between five and six thousand have been registered up to the present, and the number will increase very fast in the future.

Within the past five years the national government has started two breeding stations for the breeding of distinctly American horses. The first in Colorado was started with a band of large standard bred mares, with Carmon, the famous stallion, formerly owned by Tom Lawson of Boston, at its head, for the purpose of establishing a purely American breed of carriage or coach horses. Carmon has a Morgan cross in him. The other and second station was started in Vermont for the purpose of breeding Morgan horses, on which they have placed the best Morgan blood that could be found.

I will close with a few extracts from articles by eminent horsemen on the Morgan horse. Mr. James D. Ladd, in an article in Wallace's Monthly, August, 1882, after telling of seeing General Gifford, Black Hawk and Green Mountain Morgan, three famous Morgan stallions at the New York State Fair, speaks of them as follows: "I have been with horses from childhood. I was familiar with the best horses of Virginia, Maryland, Pennsylvania and Ohio, but in these I saw what impressed me as the most horse to the inches I had ever seen, and from that day to this I have known a Morgan horse wherever I have met them. I cannot say so of any other family of horses, not only so, but whenever I have used him I have found the same form, the same condition, the same disposition, the same general character. I see horses every day with perhaps a thirty-second part of the blood of Justin Morgan, but then it is predominating, there is the Morgan still so plainly seen that he who runs may read. Every close observer, every discriminating judge of horses I meet, be he an admirer or a despiser of the Morgan, always admits this wonderful tendency of the blood."

Mr. J. H. Wallace, in his "Wallace's Monthly," says of the Morgan horse: "In the relations, duties and pleasures of the road and family horse, the Morgan has never had his equal in this country, no difference what the blood."

The veteran horseman, Mr. W. H. H. Murray, says: "The Morgans are the very best embodiment of every quality and characteristic which is called for in a roadster. In them the poetry of equine nature and motion is expressed and set to music. In action they make a heroic appearance and their hoofs beat melody from the path. In them is dash and shine and rhythm. They strike the road with the same nervous stroke with which the pigeon in full career strikes the air, and like that tense-winged carrier of the sky, they laugh at hills, and mount them with a dash of spirited flight."—Dick Sellman, in Farm and Ranch.

Only One "BROMO QUININE."

That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the world over to Cure a Cold in One Day. 25 cents.

FROM PASADENA TO FRESNO.

[J. R. Fronefield.]

Mr. William Morgan of Pasadena well deserves the good luck—no, the good results that have come his way in turning out race horses during the last few years. When horses are bred right, fed right and handled and trained right the good results obtained should not be dubbed luck. It isn't fair to anyone connected with this business to so express it.

Under the hand of Frank Williams the horses of Mr. Morgan are now all in first-class condition, and will soon be moved to Los Angeles, where the younger division will be tried out and the older ones made ready for the coming campaign. The stables, besides several young horses, included the following:

Era 2:11½, the champion Coast trotter of 1907; Sona 2:16, the only unbeaten trotter on the Coast last season, starting in three races and winning them all; Una K. 2:14½ (trial 2:12½); Grace McK. 2:21½, an own sister to Coney 2:02; and the "bear" Queer Knight 2:13½, with a trial of 2:09½.

Crisis, full brother to Era, has been a mile in 2:25 with very little work. Signet, a green trotter, looks like a good one for next season, and is by Danube, out of Nellie K. A yearling colt by Direcho, out of Grace McK., has good looks also. A wonderful thing about the very handsome trotter Era 2:11½, who was timed separately in her Woodland race one heat in 2:10, is that she never made a break during her entire campaign. She comes by her trotting instincts naturally, as she is by Zombro 2:11, out of Nellie K., by Gen. Grant Jr., and that the latter mare transmits speed uniformly is shown by the fact that besides Era 2:11½ she has produced Una K. 2:14½, Sona 2:16, Signet (trial 2:24½), and Crisis (trial 2:25). This last mentioned colt has all the earmarks of a high-class horse.

Several good horses are at Visalia, where the best of roads to jog on can be found at almost any time of the year, and the track at Tulare is not far away.

Mr. L. A. Dollner, the jeweler of Visalia, owns a very promising three-year-old stallion by Robert Direct, out of a mare by Iris, that will be handled for speed after making a light season in the stud.

Dr. C. E. Johnston has four stallions, headed by old Iris, sire of Jasper Ayers 2:09, etc. A five-year-old son of Iris is a pacer and has been a mile in 2:20, another is a trotter, a full brother to Jasper Ayers 2:09. The other stallion is a gaited Kentucky saddle horse and a nice one at that.

Pat Sweeney has Lady R. 2:11½ and Mamie S., trial (3) 2:22½. Lady R. is due to foal soon to Athadon, and Mamie S. is in foal to Robert Direct. D. G. Sanders, partner of Sweeney, owns Cuckoo 2:09½, and is using him as a business horse, so when any racing comes off in the valley this horse will be ready. He is a nice going pacer and always has his step with him.

J. W. Martin, Supervisor from the Fifth District in this county, and a resident of Woodville, owns McKinley, a registered stallion with a standard record, that is by McKinney 2:11½, out of Vendome by Richard's Elector. This horse has a lot of good colts throughout the county that have all the qualities necessary to prove him an excellent sire.

Mr. R. O. Newman has Robert Direct and Best Policy, two grandly bred stallions, and a band of registered mares. Robert Direct is by Direct 2:05½, out of Daisy Basler by Robert Basler 2:05½, Doctor W. 2:08½, and of the dams of My Way 2:15½ and Stonelita (3) 2:15½. He is getting some very fine colts here that show great speed.

Best Policy is a young horse and a great bred one by Allerton 2:09½, sire of 178 in the list, out of Exine by Expedition 2:15½, second dam Euxine, the dam of five in the list by Axtell (3) 2:12. This stallion represents a great combination of the very best race winning and record holding blood. The mares are Daisy Basler, in foal to Best Policy, Dewdrop Basler, dam of Andy Direct (half-mile in 1:13 as a yearling), in foal to Best Policy; Elizabeth Direct by Robert Direct, in foal to Best Policy; Stonelita 2:15½ in foal to Robert Direct; Zephyrous by Zombro, out of Daisy Basler, in foal to Robert Direct; Ida Stoneway by Stoneway, out of Ida May, the dam of Homeward 2:13½, sire of George G. 2:05½, in foal to Robert Direct; Peerless Maid, the dam of one with a three-year-old record of 2:16½, by Strathway, in foal to Robert Direct. These mares are all nominated in the Breeders' Futurity and are the kind that improve the breed of harness horses.

All things come to those who wait. Hanford is to have a mile track. Mr. J. M. Daggs decided recently that the time had fully arrived when a mile track at Hanford would be appreciated by the horse-men, and has already set to work in earnest with eighty head of the best mules and equipment to be found in this or any other State, on a site about a mile west of town and close to the old half-mile track. The entire plot has been plowed, leveled and surveyed, and Mr. Daggs guarantee is out that the entire plant will be as good as the best when completed. If his dairy plant and mule stables on his farm are any criterion of what he will build, all can rest assured and "leave it to him." A stable accommodating 104 head, all well ventilated, neatly kept and lighted by electricity, is no mean country stable.

Good trotters and pacers are thick in this valley, and plenty of the necessary enthusiasm abounds. Mr. Daggs has one standard mare, Pansy, dam of Lady Raga; 2:18 and Gateway 2:12½, that is a regular breeder. She is now in foal to Del Coronado 2:09½.

Moody Liggett is working a stable of seven head, and has charge of Expressive Mac, the grandly bred stallion by McKinney 2:11½, out of Expressive (3) 2:12½, by Electioneer. The bunch in training are all youngsters, two and three-year-olds by Doctor W., Glenway, Jonesa Basler and Athby, and show lots of natural speed.

P. C. Byrne has three, including the stallion Billups 2:20½ by Boydehl, that is owned by J. L. Davis of Colusa county, J. W. McNeer by McNeer, a son of McKinney, out of a mare by Venture 2:27, and a three-year-old filly by Glenway 2:17½, out of Lady Anna by Sidney Arnett, sire of Joe Wheeler 2:07½.

Moody Liggett and G. D. Young own a very promising two-year-old gelding by Doctor W. This colt with little handling has been a quarter in 46 seconds and is gaited like a fast trotter.

Lloyd Trewhitt and William Bernstein are enterprising horsemen of Hanford, who breed, train and handle show class roadsters and saddle horses. A real good one can be found in their stables at any time.

W. R. McKay, the horseshoer of Hanford, is interested in the game and drives regularly a promising three-year-old filly that is a square trotter and bred to make good, being by Athadon, out of a mare by Apex, second dam by Sidney Arnett.

Miss Idaho 2:09½, owned by Mr. S. C. Kimball, one of the leading business men of Hanford, is wintering at the stables of Anderson & Taylor on Seventh street. The mare is looking fine as silk, getting regular light exercise, and an occasional pleasure spin to road wagon, driven by her owner.

W. Smalley was unfortunate recently in having a promising four-year-old gelding shot about the head while at pasture, causing the probable loss of an eye. The gelding is by Strathway, out of a mare by Nicodemus, son of St. Nicholas. Mr. Smalley has a few well bred and handsome youngsters by Hambletonian Wilkes. The get of this horse has had much to do with improving the trotting stock of this section, and his death was a loss to the community.

P. M. Richardson has Stamboulet 2:10½, by Stamboul, out of Lady Escott 2:26½, the dam also of Ellert 2:11. This horse will make the season at Hanford. A two-year-old by him here is very handsome and very promising.

At Fresno, H. L. Parady is working a stable of eight. A two-year-old filly by California Guide, out of a mare by Athadon, is a nice going pacer. A chestnut stallion by Lynwood W., out of a mare by Dawn, has been a mile in 2:26 as a three-year-old, with the last quarter in 33 seconds. A two-year-old filly by Lustredon, son of Athadon, is a nice trotter that is learning fast.

G. C. Owens is working two head. Nettie T. 2:35 by Milton Gear, out of a mare by Nephew, has been a mile in 2:15, with the last half in 1:04, and the last quarter in 29 seconds. She will be raced and should make it interesting for the green pacers. Loleta, a two-year-old filly by Zolock 2:05½, out of Stonelita (3) 2:15½, shows an inclination to pace, but will probably trot by the time the real racing begins. She is well staked and will be given every chance. She is owned by Dr. Johnston of Visalia.

J. W. Zibbell & Son have twenty-one head of horses in their stables, including the youngsters, and these are the ones that seem up to the races right now. The older division is going easy. Adam G. 2:11½, Fresno Girl 2:10½, Diabloss 2:11 and Katalina 2:22½, last year's winner of the two-year-old division of the Breeders' Futurity, and her every start, have been jogging since the first of the year, and are all in fine condition. They have four green trotters that have been miles lately around 2:25 and 2:20. In this lot is the mare Lady Seymour, that was recently bought for Mr. George Estabrook of Denver. I had the pleasure of a ride behind this mare, and really consider her an impressive trotter, as a 2:20 shot is very simple for her. In a bunch of five green pacers the one that stands out by herself is the half-sister to The Donna 2:07½ and Queen Pomona 2:07½. She worked a full mile this week in 2:24, last quarter in 32 seconds, and she squares away like a real fast one. In the colt division are three pacers and two trotters. Two of the pacers are by Diablo 2:09½, and one by Kohlan King, son of Simmicolon. They have all been quarters in from 37½ to 40 seconds. One of the colt trotters is an own brother to last year's Futurity winner, Katalina 2:22½, and is a lusty colt that shows more than the sister with the same amount of work. The other was christened "Shags" on account of his trampy looks when brought in from the farm, six weeks ago, but it is different now. He has taken on looks, manners and race horse airs, and the best is none too good for "Shags" since he has stepped a quarter in 36 seconds, well in hand. He is a full brother to the Estabrook mare and they are a good pair to draw to. A three-year-old full brother that everybody about the track is talking about and none seem to know the real owner of can trot, and no mistake. The Zibbells have also in their stables the stallion Advertiser, son of Advertiser 2:15, and the pride of the stable, Tom Smith 2:13½ by McKinney.

Out at the home farm, Mr. Geo. L. Warlow has Stanford McKinney, Athabio and Athadon, three as fine stallions as can be found anywhere. Nogi (3) 2:17½, winner of all the three-year-old stakes last year, is still enjoying the freedom of his paddock, and is big and fat, but his work will soon be cut out for him. Schuyler Walton does not hesitate to say that he really never had so much good timber for the colt stakes in his stables as he has this winter. He has fourteen head, with more to come

later. A two-year-old colt by Athadon, out of Besie, is developed like one a year older, has been been a quarter in 40 seconds at the trot, with an eighth in 19 seconds. He is owned by C. H. Warlow, and is entered in all the stakes. Silenta, a two-year-old by Stanford McKinney, out of Sextette, is a sure pacer, can show a 2:20 shot now and is turned right for a record breaker.

Parana, another two-year-old by Stanford McKinney out of Strathalie by Strathway, second dam Athalie, dam of Athonio 2:10, Athadon (1) 2:27, Ira 2:10½, and four more in the list, represents a combination of trotting blood from which something extra good has resulted.

Directine is a green trotter by Direct 2:05½, out of Donnatrine by Athadon, that has shown good enough to take to the races, and will be one of the mainstays of the string this year.

A three-year-old filly by Sidney Arnett, out of a mare by Starboul, also shows fast at the trot and will be given every chance.

A good looker is a two-year-old filly by Kinney Lou 2:00½. She is entered in several stakes, and promises to be one that will be ready to race.

The pacing brigade will have a fast one in the two-year-old colt by Diablo 2:09½, out of Edna R. 2:11½, and notice is served right now for the boys to keep their eyes open for this fellow.

Sadie B., the two-year-old full sister to The Donna 2:07½, seems to be an exact counterpart of that fast mare except that Sadie is a trotter.

An Athadon two-year-old of wonderful size, out of a mare by Eclectic, own brother to Arion 2:07½, can trot and looks like a good, big prospect. As a rule the Athadon's never lack size.

Miss Dividend, the two-year-old that raced well last year will fill her three-year-old stake engagements this season. She should be among the money winners.

Topsy is a green pacer that has been a mile in 2:17, last half in 1:08, last quarter in 32 seconds, and will be raced this season.

Mr. D. L. Buchant is wintering Athasham 2:09½ (the fastest five-year-old trotter of 1907), at the farm, and the war horse of the Grand Circuit is looking his best. He will make a season in the stud and most likely race again this season, as he is sound as a bullet. The horses at the farm are under the care of Chas. Middleton, and get regular road work.

Joe Depoister will make a season with Milton Gear 2:16½ at the Fresno race track. This stallion took his record last fall and several of his get are showing great speed. Nettie I. by him, has been a mile in 2:15 over a slow track, and has paced a quarter in 29 seconds. Milton Gear won three races the week he took his record.

AEROLITE IN THE STUD.

The four-year-old stallion Aerolite, that was the sensational three-year-old pacer of 1907, will be in the stud this year at Pleasanton, limited to twenty mares, and we predict right now that his book will be full before the season is more than fairly opened. All our readers know of his two and three-year-old performances, of his taking a race record of 2:15½, when winning the Breeders' Futurity as a two-year-old, and one of 2:11½ when winning the Petaluma stake for three-year-olds, the largest stake for three-year-old pacers on the Coast, last year. Then after his engagements he paced a public trial in 2:05½ over the Woodland track, equalling the world's record for that age and showing his ability to pace much faster had he been driven out. He is a perfect horse without a blemish or a fault, goes without hobbles and is a race horse from his head to his heels. His breeding is of the best, as he is by the great Searchlight 2:03½, his dam by Nutwood Wilkes, his grandam by Director, and thence on through strains of those great pacing sires Flaxtail and Blue Bull to good thoroughbred blood of race winning kind.

Aerolite's owner, James W. Marshall, of Dixon, has made the terms for this great young horse's services not only liberal but fair. The fee will be \$50, and if mare fails to get with foal, \$40 will be returned to the owner. These terms are so liberal that there will be little or no trouble in filling his book with the names of choice mares. Aerolite will be in the hands of Sutherland & Chadbourne, of Pleasanton, who have trained him since a colt. Good pasture will be furnished at \$5 per month.

ABSORBINE INCREASED COLT'S VALUE \$50.

Mr. Joseph Crooker, Kingman, Me., writes under date of November 26, 1907: "I got my local dealer to send to you for a bottle of Absorbine and used it with great results. I had a colt that had a bunch on the hock joint, and your Absorbine cured it so there is not a blemish to be seen on her now. My colt will sell for \$50 more to-day than she would before I used Absorbine."

Now is the time to get your stock in proper condition for the season's work or for the sale. A lame, blemished horse can be made sound and smooth with Absorbine without laying up the horse. No blister, no hair gone.

Look over your stock to-day, so that when the horse buyers are searching your country you will have good, sound stock, and get a price accordingly. Absorbine cures lameness, kills pain, removes bog spavins, thoroughpins, splints, wind puffs, shoe boils, enlarged glands and similar blemishes in a mild, pleasant manner. Two dollars per bottle at all druggists, or express prepaid upon receipt of price. W. F. Young, P. D. F., 54 Monmouth St., Springfield, Mass.

The Mid-Winter Horse Auction opened this week at Madison Square Garden, New York, with nearly 500 horses catalogued.

HAS ANOTHER CALF EXPERIENCE.

W. J. Speers presented himself at the office of the Breeder and Sportsman last Saturday with a set of badly bowed tendons. He has had another terrible calf experience, two calves this time, however, with no ears. The editor not being in, Mr. Speers left the following characteristic note:

"I have just ridden across the Santa Cruz mountains on Belle W., delivering her to Mr. S. B. Wright of Santa Rosa at the home of Mr. Brace at San Jose. It's the first horseback ride in twenty years. My action would suggest that I had been using spreaders. Next trip I make on horseback I expect to use pneumatic pants. I walked the last three miles of my journey. It has been my habit for a number of years to nod a salute to every person I meet, and as I saluted one man on the outskirts of Santa Cruz, he said: 'How do you do, sir?' I replied: 'I don't care to discuss the situation, sir.' My one object in getting the saddle back to my mountain ranch is that I may be able to break up any setting hen that may give me confusion in future.

"A word about Belle W.: I have owned her for two months and a half and if anyone may be interested in the temperament of the dam of Bolivar 2:00½ I would say she is one of the most amiable and faithful animals I have ever owned, a rugged, strong, powerful mare, though high spirited, very gentle, and I found her serviceable in the saddle, single harness or double harness, wherever placed.

She stands 15.2½ hands, weighs 1,200 pounds and is the last beast that will be picked as the mother of such a pacer as Bolivar 2:00½. I doubt if there is an expert breeder in the United States, looking at this mare in repose, who would select this rugged, strong boned, heavy chested, big footed, lazy walking mare to be the dam of the invincible Bolivar, but when called upon to pull a load or climb a hill the arch of that neck and the snap of that eye would suggest possibilities. To me nature is an unknown quantity. I would not pretend to be able to select the choicest producers. I can only be guided by what weak judgment I have and the paths that other men have trod. I shall expect to hear of her duplicating such a horse as Bolivar, as she has passed into the hands of one of the greatest breeders in the State, Mr. Wright. The lightning movements of this mare when called upon prove to me the wonderful nerve force she possesses.

"I have just visited the Santa Clara track, and find three very promising young stallions working there, two sired by Greco B. and one by Guy McKinney, all three showing varied but beautiful action.

"There is a possibility and prospect of something doing in Santa Cruz, I am glad to say, as a county fair is being agitated. Will report to you later on this matter."

W. J. SPEERS.

SAN JOAQUIN VALLEY DRIVING CLUB.

At a well attended meeting of members of the San Joaquin Valley Driving Club, held at Jury's hall, on Monday evening, January 20th, the following officers and directors were elected to constitute the Board of Directors for the ensuing year:

A. B. Sherwood (Manager of the Flint & Bigelow Co.), President

F. W. Johnson (Deputy County Clerk), First Vice-President.

G. F. Wille (Agent for F. J. Ruhstaller), Second Vice-President.

F. A. Murray (Horse Shoer), Treasurer.

Frank Lieginger (Proprietor of the Goodell Transfer Co.), Secretary.

Directors: A. W. Cowell (Contractor); A. L. Archambeault (Manager of the United Harness Co.); George Harrison (Farmer and Breeder); W. H. Miller (Conductor in the employ of S. P. R. R. Co.); Frank Donovan (Proprietor of the Blake Transfer Co.); Chas. Helms (Trainer and Breeder).

The election being over, a recess was granted and all retired to the banquet hall where a good spread was enjoyed.

After the banquet regular business was resumed and the proposed new By-Laws were read and the meeting adjourned until Monday, January 27th, at 8 P. M.

FRANK LIEGINGER, Secretary,
24 W. Weber Avenue,
Stockton, Cal.

There should be some fast time at the matinee of the Los Angeles Driving Club to-day. The feature will be a free-for-all pace, in which will be seen Seigfried, Silver Dick and Cleopatra, and as each of these stepped a mile in 2:12 at the last matinee, their meeting should furnish some exciting sport. Silver Dick has already won two legs of the \$200 Clark cup, and his owner needs but one more winning to make the trophy his property. Several new club members will make their debut. W. E. Morris of Montana will start two new ones. One of these is a pacer, with a mark of 2:12, that has been converted into a trotter and recently stepped a quarter in 32 seconds at the new gait. Another new member, Jake Levy, of Albuquerque, will start his horse Shecam, which has a record of 2:12½.

The Marysville papers are advocating the holding of a fair and race meeting in that thriving town.

FROM GREAT FALLS, MONTANA.

Breeder and Sportsman:—There are more harness horses being worked and trained in Montana than any year since the death of Marcus Daly, whose Bitter Root Farm was the home or birth-place of many great trotters, stallions and broodmares. The boys in Great Falls are coming to the front as owners of good roadsters and track horses.

Thomas Couch has six head at the track which are under the charge of his trainer, Mr. Smith.

They are the stallion Tom Couch 14,493, that was bred at Larabee's Brook Nook Ranch, and is a producing sire.

Tommie Aftene, a four-year-old colt by Tom Couch, is a trotter and a good prospect.

Ben Walker is the name that has been given a three-year-old trotter by Montanus 2:17½.

There are also two or three green ones in this string that have not had much work as yet, but will be regularly handled later on.

Herman Johnson has a green trotter by Senator H., dam Olga B. by Tom Couch, and she is always right up there where he asks her to go when taking her work. Johnson also has Directus J. by Montana Director.

Mr. E. Z. Rierachel owns a grand young trotter by Tom Couch, out of Adwilt by Advertiser. William Splan is jogging her and others belonging to Mr. Rierachel in town and on the roads.

Mr. D. McFalls has Flor Direct 2:13½ pacing, and has put her to trotting; she shows up well. A three-year-old pacing filly called Dolly Dimple is a good one, and an eight months old colt by Directus J., that can step a quarter in 44 seconds. What do you think of this one?

Mr. Jinks is working a green trotter by Phall, Mr. Little is working a filly by Bozeman that looks like a sure trotter, and Mr. F. Van de Putte is working Fitzsimmons by Simmons.

Burns & Cullen own some of the finest bred youngsters in the State, and McCullen is devoting all his time and attention to them. There are five of them and they look like winners. They also have Gold Finder, he by Hal Ensign. Others in the stable are Sugar Beets by Ponce de Leon, dam Sally Popp, one of the Marcus Daly prize mares, Whitelark, a green trotter by Danhope, and Chevy Walcott, a green pacer by Danhope.

There are other well-bred horses owned in this vicinity, but I will have to defer notice of them to another time.

Yours truly,

SPECTATOR.

TRACK WILL BE BUILT AT CHICO.

The good news has reached us that after two months of negotiations, the deal between the Chico Driving Association and J. F. Entler for the purchase of sixty acres of land south of that city for the establishment of a race track, athletic grounds and training quarters, has been settled and the transfer was formally made January 20th. Work will be commenced on the grounds as soon as the present stormy weather ceases, and they will be available for training purposes this spring, and for a race meet next fall.

This cheerful news was given out Saturday night after a meeting of the association in the afternoon. An agreement was reached whereby a part of the purchase price is made in cash at once, the remainder to be in installments.

The tract is situated one mile south of Chico, immediately adjacent to the Butte County Railroad and Northern Electric lines, and the best of transportation facilities are afforded. Since the old Sanborn racing track was subdivided into Barber lots, Chico has been without a track.

Hon. H. A. Jastro of California was elected president of the National Live Stock Association at the meeting held in Denver last week.

It is probable that colts from the Government breeding farm in Colorado will be exhibited at the Chicago International Show this year. The oldest of the colts are yearlings.

Red Bow 2:09¼, the pacing mare that Dick McMahon has secured for his stable, looks like a real crack for the 2:10 classes. She raced well the past season, her campaign having been largely over half-mile tracks. At Dayton, Ohio, she made her best minor track performance, winning in 2:10¼, 2:10¼, 2:09¼.

Secretary Hanrahan of the Windsor, Ont., Association announces that they will give a big meeting on the Canadian side preceding Detroit in the Grand Circuit.

Friends of Henry Titer, who is on his way to Russia, and has probably now reached his destination in the Southern Crimea, state that while the passage from New York to Hamburg was a rough one, both he and the \$15,000 colt, Blue Hill 2:15½, arrived at the latter point in good condition.

Five record sons of Bingen are now owned across the water, viz: Codero 2:09¼, Captain Bacon 2:10¼, Gay Bingen 2:12½, Lord Revelstoke 2:12¼, and Blue Hill 2:15½. There is also over there a non-record son of Bingen and the trotting mare Totara 2:09¼.

PLEA FOR PATRIOTISM.

The following, which appeared as an editorial in the Chicago Horseman of last week, should be read by every American:

The breeders of no animals in America have as good a right to make a plea for patriotism as those who breed the trotting horse, for the good reason that the American trotting horse is the only breed of animals on American soil that is the product of American breeding genius. Within a period of time not beyond the memory of living men this handsome, useful horse has been created and improved until he is a part of a special breed group, with breed qualifications. Horsemen are proud of this breeding achievement. So are others who are familiar with the excellence of the work done. But the great American public does not yet quite understand that there is such a distinctive American breed group as the American trotting horse. And to this great public, quite as proud of American achievements as are the people of other nations, an appeal should be born for that encouragement and support which is born of true patriotism.

Somehow horsemen themselves have not quite fully realized what an important piece of Americanism is a well-bred trotting horse. In a general way the truth is acknowledged and advertised modestly. But modesty has no place in patriotism. School boys will fight if the beauty of our flag is questioned. Men of ripe years will forsake home and friends to battle for that flag when it is insulted, and old men will tremblingly wish themselves young again that they too might shed their patriotic blood. Our distinctly American institutions are not to be spoken of with a temperance inspired by modesty, but in those positive terms which are born of patriotism. Our corn yield is the biggest and our people the best in the world. It is impossible to find a rule of measurement that will prove the contrary to the true American. As a last argument his patriotism will make him dispute the rule that proves his Americanism at fault.

We horsemen who really know how great is the trotting horse as an American product need just a little more patriotism. We are not quite proud enough of our horse creation to think about him in a way to move our own blood a little faster and stir the sluggish blood of our neighbors. Let the running horse men worry about the reformers and their laws to abolish betting on racing. They have good need to worry, for the thoroughbred is largely a raring toy, whose existence will be threatened with racing toy, whose existence will be threatened with the destruction of the pool box. But the trotting horse is something more than a mere racing tool, and will live and thrive without the betting stimulus. He has an individuality, distinctly American, and besides being a useful animal himself has the potential quality for begetting other useful horse groups. Only we do not realize this quite as fully as we should and we do not preach it from the housetops as becomes patriotic Americans, with a distinctly American product, useful in all parts of the world.

In the trotting horse we have a creation that will live without the pool box. Perhaps he will do better without it than he will with it, for the sooner we get rid of the idea that we need a betting stimulant to develop the trotting horse the sooner will we stand squarely upon our patriotism and promote the trotting horse on his merits as an American breed product. Sentiment of the right kind will do more real permanent good for the trotting horse than the pool box.

The Germans and the French are very proud of their coach horses, and where is there an Englishman who would not quarrel about the quality of the great English thoroughbreds? These men have no commercial interests in the horses of their country, but they are a part of their country and are entitled to patriotic respect after the flag. We have a better horse than the thoroughbred and out of our trotters we can create a better horse than the German or French coach horse. But the public does not quite know the value of our horse product, and as American citizens we have not yet learned to shout and work patriotically for the American horse, which is the trotter. The public must be taught to regard the trotting horse as something distinctly American, and when the public gets that idea well fixed in its mind there will be good citizens on every street corner ready to shout the praises of a praiseworthy American creation.

The feeling among the people at large was very well expressed during last season in every part of the country where trotters were raced. Successful meetings were held without the aid of the pool box, and this year plans are afoot to give still more meetings without public betting. The public has a liking for the trotting horse. This will be increased if those who are directly interested in the trotting horse will appeal to the patriotism of the American people by inviting them to witness speed contests between horses which are distinctly an American creation. Let the plea for patriotism take the place of the pool box.

Mr. Frank Drake of Vallejo writes that he met with a great disappointment last November in the death of his colt Count Leadbetter from pneumonia. This colt was a foal of 1905, and Mr. Drake fully expected to see him give a good account of himself in the three-year-old stakes this year, as the colt was very promising. He was by Count Hannibal, out of Florista, she by Admiral.

NOTES AND NEWS

Fred H. Chase & Co. will hold their combination sale February 24th. He has thirty head of good horses consigned. Catalogues will be out soon. Send for one. See his advertisement.

The Oregon State Fair will give a big purse for a 2:05 class pace this year. Those Oregon folks are enterprising and know how to secure attractions that will draw the crowd.

Joe Cuicello was down from Pleasanton this week, and is living in hopes that all the associations that give harness meetings this year will provide races for four-year-olds. He says that there are a large number of four-year-olds in training, and from the outlook races for this class should fill well.

If you want a good stock stallion, speed prospect, or business horse, be at Fred H. Chase's combination sale, February 24th. Thirty head have been consigned. This will offer an opportunity to get good ones at your own price.

The name of the full sister to Sonoma Girl 2:05½, that is owned by Mr. Geo. A. Pounder of Los Angeles, has been printed very often as Lotta Dillon, which is incorrect. Lottie Dillon is the correct spelling of the filly's name, and those who take occasion to write it in the future will please take notice. They say she is about the handsomest yearling living.

The next meeting of the Pacific District Board of Appeals, National Trotting Association, will be held late in February or early in March. Several cases of more than ordinary interest are to come before the Board, nearly all of them relating to matters that occurred on the circuit last year.

Kinney Rose, the McKinney stallion out of a Falrose mare, owned by William Hashagan of Woodland, is trotting smoothly and with plenty of vim for Chas. DeRyder, who will probably take him east this year. Kinney Rose raced well through the California Circuit last year, and while he did not get a record, he was close up several times when the heats were in 2:15. He is a fine individual and a good gaited horse.

Barney Simpson will return to Chico this spring with his stallion Arner 2:17½. Now that a track is to be built at Chico, Mr. Simpson will have a chance to train several colts by his horse that are showing great promise. Arner is very popular with Butte county breeders and during the past two or three years has been bred to a number of high class mares there, from which some fast performers should certainly come. There are three or four in training now that will enter the list this year.

A round barreled, smooth turned pacer by Searchlight, out of a mare by Guide, turned the Pleasanton track in 2:19 last Wednesday, pulled almost to a walk on account of another horse being turned in front of him in the stretch. Lou Crellin bred this fellow and sold him to a gentleman named Murray, who certainly has a fine prospect.

The mare Freely Red, owned by Mr. A. G. Dahl, that was campaigned up north last year, where she took a pacing record of 2:19½, is now in Henry Helman's string at Pleasanton, and looks as if her mark will be pretty close to 2:10 before the summer is over. She is by Red Medium 2:23½, a son of Red Wilkes that put four new ones in the list last year and had three that reduced their records. Another one in Helman's string that looks good is a large black mare called Carrie S. She is a trotter, green as a gourd when she was started up, and in two months showed a nice mile in 2:32 without much effort. She is by Zombro 2:11 out of Ferina 2:27 by Montana Wilkes, the dam of Sophie R. 2:14½, a mare that raced on the Coast here ten years ago. Carrie S. is owned by Mr. A. R. Shreve of Cathlamet, Washington.

The announcement of those two grandly bred and fast stallions Bonnie Direct 2:05½ and Bonnie Steinway 2:06½ appear in our advertising columns this week. They will stand at Pleasanton this season, Bonnie Direct at \$100 and Bonnie Steinway at \$40. Both are out of the great broodmare Bon Bon by Simmons, one of the very greatest broodmares recorded in the books. Both are magnificent individuals, and sire fast, handsome and well made colts. Bonnie Direct has already sired one in the 2:10 list and that a three-year-old. He is destined to be represented by several more 2:10 performers, as there is not one of his get that has been worked but can show a high rate of speed. Bonnie Steinway has been in the stud but a short time, but his colts all show well. No one can make a mistake in sending good mares to either of these stallions.

Chas. DeRyder purchased this week from the estate of James Coffin a piece of pasture land near Pleasanton that will make a fine place for the mares which are sent to Star Pointer 1:59½ and other stallions that Mr. DeRyder will handle this year.

Chas. Towson, the Pleasanton track harness maker, has invented a heel salve that all the trainers who have used it on their horses say is the best thing they ever tried.

Al Charvo now has charge of Bonnie Direct 2:05½, and Bonnie Steinway 2:06½, at Pleasanton, and will manage them during the stud season for their owner Chas. Griffith. Mr. Charvo's trotter, Peter Pan by L. W. Russell, out of Biscari, dam of of eight in the list, is moving like a winner. He worked fast last Wednesday and went smooth and easy all the way.

There will be big money up north this year for the trotters and pacers. The Oregon State Fair will give two \$5,000 stakes and it is said the Washington State Fair will do the same thing. If the new Portland association gives the big stakes talked about, there will be a Grand Circuit in the Northwest that will rival the one in the East.

The Stam B. colt Ben Hur, owned by S. K. Trefry of Pleasanton, should win some of the four-year-old trots this year. He has a world of speed and is game enough to race against aged horses.

Four good young jacks and three large jennies are offered for sale. See advertisement.

When the Western Pacific gets its trains running through Pleasanton, its depot will probably be on a lot close to the racetrack, and will be very convenient for people visiting the training centre.

Mr. C. J. Grubb, of the firm of Justice & Grubb, who own the fast Allerton stallion, Redlac 2:07½, that made a season at Los Angeles last year, was in San Francisco last week on his way to Oroville, where he will visit his son for a few days before returning to Iowa. Mr. Grubb has been looking over the horse market in San Francisco and may conclude to bring out a few car-loads of business horses, for which there is a demand at ordinary prices. Should he come, he will probably bring Redlac with him, and this magnificent stallion will doubtless be well patronized here, as he has many admirers. Redlac put five new ones in the list in 1907, among them the three-year-old pacer El Red 2:10½.

Henry Helman is getting out some nice folders for his two stallions, Baron Bowles and Alconda Jay. The latter is by Jay Bird, out of a Baron Wilkes mare, and Helman is receiving letters nearly every day from breeders who ask for a tabulated pedigree of the colt. It will tabulate all right, as Alconda Jay is one of the best bred colts in the United States.

They say that Capt. Williams' yearling filly by Unimak, now in John Phippen's string at Pleasanton, is the fastest thing of her age on that track. Unimak is an own brother to Sterling McKinney 2:09½, the horse that is pointed for the stallion record this year.

Dr. F. A. Ramsey of Riverside met with a severe loss January 21st, when his magnificently bred stallion Baron of Glenwood was found dead in his stall. An examination by Dr. Ramsey and another veterinarian showed that the horse died from heart failure. Baron of Glenwood was a magnificent individual, coal black, sired by Oakland Baron 2:09½, dam Alma Wilkes by Baron Wilkes, second dam Almata by Almont 33, third dam Alma Mater by Mambrino Patchen 58. He was bred by Col. R. G. Stoner of Paris, Ky., and foaled in 1897. Baron of Glenwood was undoubtedly one of the best bred horses ever brought to this State, and would have made a reputation in the stud. The loss is a severe one to Dr. Ramsey, as he had already booked several mares for this season, with the prospect of doing a large business with him. Baron of Glenwood was a half-brother to Henry Helman's young Jay Bird stallion, Alconda Jay, both being out of the same mare.

Beside Frank Turner, with his big stable of colts, broodmares and stallions, Tom Holmes is the only trainer now wintering at the Santa Rosa track. Holmes' bunch includes McMyrtle, a McKinney stallion, that has been a mile in 2:18 for him, a good two-year-old by him, that is a trotter, and the two-year-old by Lynwood W., out of Maud P., by Idaho Patchen, belonging to S. B. Wright. This colt is large, a trotter and is pointed for the big stakes.

Henry Carlton has leased the "Round Barn," known as the I. De Turk stable, in Santa Rosa, and there Lynwood W. will make the season of 1908. This stable, with the lots, paddocks, foaling stalls and other conveniences is an ideal breeding place. In the stall next to Lynwood W. will be the son, Sir Lynwood, that in later years is to take up the work of his sire.

Parties at Petaluma have recently bought of W. C. Helman a two-year-old stallion by Wayland W., price reported to be \$500. The colt is large, made on fine lines and should make a good stock horse. Wayland W. not only sires extreme speed, but handsome, serviceable horses.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

William Cecil is at the Brace track, near Santa Clara, training a public stable. He has a fast green pacer by Nearest.

At the auction sale of E. Stewart & Co., on February 28th, halter-broke, double-square chunks brought \$85 to \$125.

T. W. Barstow of San Jose will have Nearest McKinney and Nearest 2:22½ in the stud at his home place this season. He is working a few youngsters by Nearest, and among them is a green trotter that is said to be very fast.

Budd Doble has Kinney Lou 2:07½ and Diamond Mc nicely quartered at Mr. Brace's Home Park Stables, at the head of Franklin street, in Santa Clara, Cal., where these two choice stallions will make the season of 1908. Several mares from Washington and Oregon are being booked to Kinney Lou.

W. R. Johnson is in charge of the Brace half-mile track, near Santa Clara, and will have the young stallion Sadi Moor there during the season of 1908. Johnson will train several good prospects there, and after the stud season will point Sadi Moor for a low record.

The McKinney mare May N., dam of Direcho, sire of Danube 2:12½, etc., is offered for sale by Mr. Geo. A. Pounder, of Los Angeles. May N. is along in years, but looks and acts like a colt and is absolutely sound. She has an Audubon Boy colt at her side now, but it is not for sale.

The four-year-old Nutwood Wilkes mare owned by James Smith of San Francisco, is trotting like a winner at Pleasanton. Joe Cuicello has her in his string and worked her out last Wednesday, one heat being in 2:22½, with the last half in 1:08. Chas. De Ryder worked one of Dr. McLaughlin's gray trotters with Cuicello one heat, and the McKinney stallion Kinney Rose another. The little mare carried the gray to a break in the stretch, and as De Ryder dismounted from his sulky after the heat he remarked: "That little mare of Joe's is about the 'busiest' thing I've seen lately." She certainly looks and acts like one that can win races when she is seasoned.

A very handsome and perfectly sound little brown mare, 14 hands high, that can be driven by a child, and that can pace a 2:20 gait any time, is offered for sale by an advertiser. This mare is such a nice driver that she would be just the thing for a lady to drive in the Park who enjoys letting her horse step fast at times. She will be sold very reasonable. Apply at this office.

The pacing mare Salva, by Dictatus, owned by Mr. Ed. Wright of Hollister, is now in Charley Whitehead's hands, to be worked for this season's races.

Without disparaging any of the sons of McKinney in the least, it can be stated that the stallion Washington McKinney, recently purchased by Mr. Frank J. Kilpatrick, and in Dick Able's charge at Pleasanton, is the very handsomest son of the greatest sire of 2:10 trotters. His beautiful head, tapering to the muzzle and set with a pair of eyes that a painter would give half his life to be able to reproduce on canvas, a neck that has a most beautiful crest and is perfectly arched, clean limbs and feet, a flowing tail that is carried high, yet almost touches the ground, he is a dress parade and show horse that could take prizes anywhere. His coat is a glossy black, which his star and white hind ankles only accentuate. He is undoubtedly one of the most beautiful stallions.

The stallion Dictatus Medium 32499 is offered for sale by Mr. R. P. Lathrop of Hollister, whose business interests are such that he has no time to devote to this fine horse, and as the Hollister track has been sold and will be cut up into lots, he has decided to offer both his stallions Dictatus Medium and Mestoe for sale. Dictatus Medium is a grand individual, a beautiful bay with flowing mane and tail, stands 16 hands and weighs over 1,200 pounds. His disposition is perfect and he is a sure foal getter. He is a comparatively young horse, being but nine years old, and his colts that are old enough to train show remarkable speed. Dictatus Medium is beyond all doubt one of the best bred young stallions in America and with opportunity will sire great trotters and pacers. He is by Dictatus 2:17, that is by Red Wilkes, out of a Dictator mare, and Dictatus has sired two 2:10 performers. Dictatus Medium's dam is Belle Medium 2:20, the dam of Stam B. 2:11½, by Happy Medium. Happy Medium is regarded very highly, and appears in the pedigrees of such high class trotters as Nancy Hanks 2:04, Lou Dillon 1:58½ and others. The second dam of Dictatus Medium is Argenta by Almont Lightning, sire of the dam of Zombro, McKinney's greatest producing son. Dictatus Medium has been very popular with breeders in San Benito county for the past three years, and has many yearlings, two-year-olds and three-year-olds that are showing speed. His individuality alone will bring patronage to this horse in any community where high-class road and track horses are bred. Write to Mr. R. P. Lathrop, his owner, for a price on this horse.

CORRECTING FAULTS OF GAIT.

[Marque in Horse Review.]

For a long time I have had in mind a series of articles by prominent trainers on the practical part of the business; that is to say, shoeing, balancing and rigging. The value of such articles coming at first hand from the men whose daily work it is to study and devise ways and methods of remedying faults of gait, is naturally great. However, there is one handicap to be met with, viz.: trainers, generally, while good conversationalists, either find it a difficult matter to put their knowledge on paper, or else claim this to be so. In order to facilitate matters, I therefore asked the leading reinsmen to answer two specific questions—these, in my opinion, covering the most important features of their profession. I am pleased to say that several interesting answers have been received for which the authors have my sincere thanks. Of these, several appear herewith. Others will appear from time to time and after the whole have been published, I will ask several critics that I have in mind to make an analysis of them, embodying the chief lessons which they teach.

The two questions were as follows:

1. What is the greatest improvement that you have ever known a trotter or pacer to make in a short time, as the result of change in shoeing or rigging?

2. What do you consider the worst fault of gait in a trotter or pacer, and what remedy, in the way of shoeing or rigging, do you apply?

Kindly give examples of cases drawn from your personal experience.

Millard Sanders.

Freedom of action has done more to perfect the gait of the trotter and pacer in late years than breeding. What first called our attention to this was the amateur matinee driver. He would buy a horse that had been raced two or three years to a high wheel, close-hitching sulky, driven by a professional, and given a record of 2:12. The first thing the amateur driver would do would be to hitch him to a low wagon with long shafts, which gave the horse every freedom of action, and the horse would trot a mile in 2:10 or 2:11. For a long time it was a great question in the mind of the average trainer why a horse could pull a wagon with four wheels faster with an amateur driver than he could pull a sulky with two wheels with a professional driver.

Ordinarily a horse hitched to a sulky has the saddle girthed very tight and the shaft girths pulled together to make the sulky run steady; and, in the second place, the driver generally sits on the tail of the horse, which makes a horse feel cramped, and with every effort that he makes feels a resistance, all of which goes to retard his flight of speed. To prove this, a man cannot even sing well unless he has freedom of movement in order to throw every bit of expression and sentiment into the song that he is singing. Neither can a man play baseball with a stiff shirt and high collar on, because when he goes to run he does not want to feel as though he was hampered in any way. The latest sulkies built by our best sulky builders are constructed with reference to freedom of action and freedom of the tail of the horse. The tail, I believe, to be the rudder, as every animal that runs, including the deer and the rabbit, use their tails while running. The coursing greyhound, I believe, is the speediest dog, and he invariably uses his tail. While running straight ahead after the hare he keeps his tail straight, but when the hare turns to the left the dog unconsciously switches his tail to the right before changing his course to meet that of the hare. The running horse uses his tail in getting away from the post, and if he gets tired he uses it at the finish. The old expression, "he threw up his tail," may be instanced as an illustration to prove that the tail of the horse is necessary to him as the rudder is to the boat, and to have a horse properly balanced for a high rate of speed he must not be cramped in any way.

The very smallest thing that causes friction will retard the speed of the trotter, consequently freedom of hitch is absolutely necessary. A horse properly balanced will not pull hard enough on the bit to exhaust himself. Whilst I am an advocate of short toes and light shoes, I shall always remember what Mr. Robert Bonner told me twenty years ago, "that he believed in a great many cases that a toe weight, if necessary, increased the endurance of a horse." As an example he gave Edwin Forrest a trial of 2:15 without toe weights, and the horse was very much exhausted and distressed because he had to depend upon taking hold of the bit to steady and balance himself. Twenty minutes later he gave him another trial with four-ounce toe weights, and to his surprise the horse trotted an easy mile in 2:14½ and was not distressed at all. From the fact that he was properly balanced and his gait was frictionless, he did not have to exhaust himself by taking hold of the bit.

Balancing a horse is one of the most important features that a trainer has to contend with, as everything depends on perfection of gait with each individual horse. With some horses you can rig their mouths so that they will not require as much weight to balance them as they would if you did not have

them properly bitted. What I want to impress on the mind of the reader is this: If the feet are not properly balanced, a horse will take an unnatural hold of the bit, but the very minute you get your horse perfectly balanced he will take a nice loose, elastic hold. The man with the lines in his hands can feel the very instant that his horse is balanced. It is exactly like a fiddler with his bow; the instant he touches the strings he knows whether his fiddle is properly tuned or not. If it is not properly tuned up he cannot play without great effort.

In the majority of cases a horse will require less weight with a low head than he will if he is checked up. We do not wear as much weight on trotters now as we did fifteen or twenty years ago, and I account for that partially because we do not check horses as high as we did in those days. The higher you check a horse the more weight you throw on his hind quarters, consequently you unbalance him in front and he will go short and stilty with his front feet. It is surprising to know of the number of horses that I have obtained the best results from by letting their heads down.

You will often get a horse balanced by accident. As an example, I had a yearling pacer, and at that time we all thought pacers had to go with a close-fitting quarter-boot. One morning I accidentally broke one of this colt's close-fitting quarter-boots. I went to the stable and told the groom to put on another pair, and through some mistake, he put on a pair of bell boots with six ounces of lead in each one. Up to this time this colt had never been a quarter better than 39 seconds, but wearing the heavy quarter-boots he stepped one in 35 seconds. I then kept those boots for his individual use and he continued to improve, and in the fall I gave him the world's record for a yearling pacing stallion—Rosedale 2:22.

I believe that Jack Axworthy (3) 2:15¼ was one of the most difficult horses to balance and rig that I have trained. In the first place he scalped very hard, which made him very timid and caused him to trot with his right hind foot inside of his front feet. He also had a peculiar mouth, being inclined to pull on the right line. In addition he brushed his knees just enough to interfere with his speed. But his natural disposition was to be good-headed, and all his faults could be rectified by very careful shoeing and judicious rigging.

To overcome the scalping I checked him up rather high, so as to throw as much weight on his hind quarters as possible, and I used a side-pole on the near side to keep him straight. For his knee-hitting I lowered the outside of both front feet and shod him with a long inside heel, with sharp calks on the hell of the shoe to prevent him from twisting his foot when it left the ground. I also cut the toe of the shoe square off about one-half inch back from point of toe for two purposes; one to make him break very quickly, and the other to compel him to break over square and straight. When he was rigged and shod just that way he could, in my opinion, beat any two-year-old that ever looked through a bridle. I worked him a mile in 2:14, last half in 1:04, and the last quarter in 31½ seconds, and he never made a break with me after I got him properly rigged and balanced.

The trotting mare Robizola 2:12¼ was a very difficult mare to train, as she had excessive action behind and scarcely any in front. I got her shod and rigged after a great many efforts. She also had a very bad mouth and pulled very hard. I put a straight bit in her mouth and used a lip strap and no check, which seemed to suit her exactly. I also shod her with an 8-ounce rolling-motion shoe in front, which quickened and elevated her gait at that end. To retard her gait behind I put on a five-ounce rim shoe, which seemed to hold her just enough to allow her front feet to get out of the way of her hind feet.

The pacing stallion W. W. Foote 2:15¼ was a very peculiar horse to balance. I raced him through the California Circuit in the two-year-old stakes and won with him at San Francisco, Santa Rosa, Napa, Stockton, Sacramento and Los Angeles. San Jose was to be my last race and I was very anxious to win with him there, but the day before his race when I was going to blow him out, to my surprise he could not pace a mile in 2:30. I was naturally very much disappointed but not discouraged, as I knew the very minute that I got everything just right he would show his old-time form. I was carrying my own blacksmith with me and had depended on him to a certain extent to keep my stable shod properly, but by some oversight, through a mistake which should be more properly called carelessness, we had allowed the toe calks or grabs, on his hind shoes to become too much worn and he could not get any grab or hold, consequently could not pace a step. After trying him a great many times and by having his front shoes removed, I had the smith put sharp calks on the toes of his hind shoes, and he was an absolutely changed colt and the next day won his stake, pulled up in 2:15¼.

I bought Anzella 2:06¾ for Mr. Henry Pierce, of San Francisco, in 1902. Up to that time she had been wearing a McCormick check, which rested her neck, acting as a prop under her chin. When I shipped her east she was the hardest mare to drive I had ever handled, as you could not take her back and it was impossible to control her or keep her from rushing and making breaks. But instead of propping her head up, I tied it down with a halter and used scarcely any check, and the change was

beneficial, as she beat most all of the good horses out that year, winning something like \$21,000. Indianapolis, Ind.

J. B. Chandler.

Your first question is a very broad one.

I saw a pacer once when his trainer was giving him a trial and about 2:40 was where he wanted to pace. They took him to the barn and put the hobbles on him and came out and he worked a mile in 2:10. That was Tom Ogden 2:07.

Trotters we often change by taking up their heads or letting them down, putting on weight or taking it off. But after a horse has been taught to trot say to beat 2:20, and thoroughly educated to stick to the trot, it does not make much difference how they are rigged, who drives them, who takes care of them, or who shoes them. They trot anyhow and continue to improve just as long as they keep sound.

I knew a couple of men, in high-wheel days, who had a good trotter, but they could not get him balanced right. They kept changing his shoes every week, and he could trot in 2:25 every time they would try him. One Sunday morning I saw them have him at the shop changing his shoes. I knew he would get another trial and so I watched them. They put sixteen-ounce shoes on him in front and four-ounce toe weights. Those days we used the spur welded to the shoe a great deal, and that was what they used. The horse was gotten ready, the track being good and the day ideal. They gave him a couple of warming-up heats, and we all went out to see him step. He went away good and trotted a mile in 2:20½. That was awful those days. The driver got down and slapped his partner on the back and said, "We have him now" When they started to walk away the driver turned around to the caretaker and said, "Hitch him up again in about 25 or 30 minutes." The caretaker responded, "Are you going to work this horse another heat with that shoe off?" "Has he got a shoe off?" "Yes, sir; he threw one of his front shoes, weight and all, just as he went away; here it is, sir." Now this horse had been taught to trot, to trot shod anyway, with his head up or down, and when the day and track were perfect he could trot close to 2:20 with one shoe off.

I was convinced that day that a good horse, after he had been educated to trot, needed no particular driver, caretaker or blacksmith capable to make a good trotter out of a truly bad horse. There are some cases. I reckon, where shoeing and rigging have made trotters, but I think these horses would have been trotters with just good training without the rigging.

Your second question, "What fault of gait I have had the most trouble with," I will answer by saying, in keeping the pupil straight.

Without any apparent cause, horses will get to holding their noses to one side, and if that is not stopped instantly they will carry their hind parts to one side, and then my trouble begins. Unless I can get them straightened they will not improve for me.

The most trouble, I think, that I ever had to keep any youngster straight was with Alix 2:03¾. She was open-gaited behind, also going very wide in front—she hit her shins so hard that it was a difficult matter to keep her straight. I went at her to close her up in front, and after I got her front feet so she would toe out a little and brush her knees, I had no more trouble with her. I have had less trouble with the Baronmores in this respect than any family I ever worked. The reason is, they are rapid, round-going colts, keeping their front ends out of the way all the time. As I said before, going sideways is the worst thing I have to contend with in gaiting trotters, and the way I try to overcome it is to quicken the front action so as to make the horse clear himself.

Riverside Park Farm, Berlin, Wis.

BERTHA THE GREATEST BROODMARE.

The old mare Bertha by Alcantara, owned by Mr. C. L. Crellin, of Pleasanton, is the greatest of broodmares in more ways than one. Besides being the dam of nine with records below 2:30, of which four are in the 2:10 list, she is the dam of more foals than any mare of her age. Bertha was foaled in 1884, and is now 24 years old. She has produced nineteen living foals, and is now carrying a foal by Aerolite 2:11¼ that is expected in March. She is strong and robust, eats well and carries plenty of flesh. Her first foal, Diabolo 2:09¼, was dropped in 1889 when she was a five-year-old, and we believe she has never missed since. Bertha represents a remarkable case of fecundity, and has founded a family that already numbers fourteen 2:10 performers. She has herself produced four, her son Diabolo 2:09¼ has sired seven, her son Demonio 2:11¼ has sired one, her son Don Derby 2:04¼ has sired one, and her grandson Inferna 2:15¼ has sired one. And a peculiar thing is that while Bertha is trotting bred, every one of her fourteen descendants in the 2:10 list is a pacer.

The firm of Singmaster Brothers have at their sale stables in San Jose sixteen head of German and French Coach, Percheron and Shire stallions from three to six years old. It is safe to say that no other importing company have on sale a better lot of young stallions. Mr. C. O. Stanton, the manager, believes in making a low selling price at the barn, saving to the buyer all the cost of peddling around the country.

Peach Maid (Sports Count Danstone-Ch. Peach Blossom), whelped ———. J. E. Lucas, handler.

Sunlit Kennels' (Post and Taylor), Sacramento, white, black and tan English Setter dog Singol (Don Jose-Gleam Girl), whelped July 22, 1906. Hon. Chas. N. Post, Sacramento, breeder; J. E. Lucas, handler; with

J. W. Considine's, Seattle, black, white and tan English Setter bitch Thier's Dot (Thier's Dan-Melrose Toodles), whelped June 21, 1906. J. W. Considine, breeder; W. B. Coutts, handler.

J. W. Considine's, Seattle, white, black and tan English Setter dog Policy Boy (Avalon-Policy Girl), whelped March 17, 1906. California Kennels, Redwood, Cal., breeder; J. E. Lucas, handler; with

W. H. Easterbrook's, Boston, liver and white Pointer bitch Santa Rosa (Recruit-Fandango), whelped February 14, 1906. W. B. Coutts, handler.

J. G. Roberts, Madera, black and tan English Setter dog Madera Dick (Uncle Jimmie Whitestone-Belle Fontaine), whelped March 2, 1906. S. Christenson, breeder; F. Coutts, handler; with

Jos. E. Terry's, Sacramento, black, tan and white English Setter bitch Kil's Linda (Ch. Kilgarif-Iona S.), whelped April 5, 1906. Jos. E. Terry, breeder; W. B. Coutts, handler.

H. H. Abbott's, Vancouver, B. C., white and black Pointer bitch Sallal (—————) W. B. Coutts, handler; with

J. W. Considine's, Seattle, white and black English Setter bitch Kil's Jessie (Ch. Kilgarif-Melrose Nora), whelped January, 1907. J. W. Considine, breeder; J. E. Lucas, handler.

E. Courtney Ford's, San Francisco, white, black and tan English Setter bitch Tiburon (Uncle Jimmie Whitestone-Belle Fontaine), whelped March 2, 1906. S. Christenson, breeder; W. B. Coutts, handler; a bye.

St. Ives with Peach Maid.
Tiburon with Santa Rosa.
Boy Blue with Sallal.

III.
St. Ives with Boy Blue.

Result.

St. Ives first, Boy Blue second, Tiburon and Peach Maid equal third.

The All-Age.

The first brace down in this stake were two Pointers, Joe and Point. The heat was started on section 20 and finished in section 21 at 4:26, the route now being towards town. The heat did not develop much on the lines desired. Sent away first on open ground, Jock showed best pace and range, Point being very methodical and companionable. At that up north he is looked upon as without a peer on Mongolian pheasants. Birds were found first in the heavy cover among the trees and then near the boundary fence, where a bevy flushed; both dogs missed chances, Joe favors fur at odd times.

Tod Sloan and Kil's Viola were put down at 4:30, sent off on a south-east course from where the prior brace were taken up. Tod set off at a merry, swinging clip, ranging wide and quartering as if he meant business. Viola was also an excellent goer, odds here were about even. Swinging around to the trees and back to where birds were located in the previous heat, the best work yet shown soon materialized. Viola pointed and was backed by Tod, the latter could not refrain from a rabbit sprint now and then. Viola snapped into a pretty point and was staunch and steady. Tod found a single in brush cover, also steady and under control. Lots of birds were in the heavy cover. Viola nooded, but the birds outfooted her, she dropped to command when her handler found out what was going on. Viola pointed a single, Tod finally back on course, but was not steady, breaking in on point. Viola made five singles, Tod being credited with one point. The Setter's work throughout was snappy and evinced much bird sense; toward the close of the heat she performed in green grass close of the heat she performed in green grass covered ground interspersed with bare trees, sparse cover, that under the circumstances was difficult to work. Ordered up at 5:05.

During the two days' running there was very little wind, a circumstance that, no doubt, affected results to quite an extent.

Wednesday, January 22.—A heavy fog blanketed the valley this morning, which delayed the start from the north-west corner of section 17 until almost 10 o'clock. A cold wind from the south-east prevailed.

Sport's Bad Boy and Baywood were cast off at 9:55, course east over open ground with low, dry cover. Three fields were traversed and drew blank. Baywood had the superior speed and range, both dogs worked their ground well. Working south into scattered trees and dry tumble weeds. Boy pointed a single, was unsteady and flushed. Finding another single he broke shot. Birds were flushing numerously now, more by reason of the following crowd than anything else. The heat was rather tame. Up at 10:45.

McCloud Boy and Ramona, the next brace, were cast off at 10:50, practically over the course followed

in the previous heat. Both cut out a wide, speedy pace, neither dog located birds, a half dozen quail were flushed from weeds, near a ditch, through which the dogs had gone. Ordered up at 11:32.

The third brace, cast off at 11:40, Belle Fontaine and Ventura. Away on a south-west course in section 17, both showed style, speed and excellent range, Belle excelling here. They went away in wide casts over open ground, through two fields, but drew blank until taken into ground near sparse trees. Birds were flushed from dry weeds the dogs had gone through. Why this should be so in this case was a puzzler, the dogs were experienced field trial dogs in familiar ground, which by the way was exceedingly dry, the sun too was getting very warm. Belle pointed a bird in the dry weeds and quickly dropped to an excusable flush. Birds were soon found scattered and laying close. Belle drew into a snappy point and was steady and under control when handler Coutts shot and the quail took flight. Ventura meanwhile had run off the course and was away about ten minutes. Both dogs worked together on course again, but nothing further that was expected or desirable transpired. A large bevy was flushed from the cover the dogs went through. The duration of the heat was fifty minutes.

After luncheon new ground was prospected, section 20 being selected. Colton and Veronica were cast off at 1:35 and ran forty-five minutes. Both dogs ran off course for several minutes. Opportunities for bird work were plentiful, but neither dog made good. Veronica pointed, Colton backed and broke in on a false point. A bevy and singles were flushed from cover both ran through.

Spot's Rip Rap and Abbott's Jock were cast off at 2:25 in the north-east corner of section 20, going away over open, burnt ground. Both were speedy wide rangers, stylish and covered ground intelligently. Jock was the speedier dog. Spot's work in this heat gave no indication of the work he was capable of and which he demonstrated in the final of the Champion stake. He was slower and hard to keep on the course. Finally birds were located in grassy, open ground but neither dog scored. The heat was indifferent. Up at 3:05.

The next brace, the eighth, Shasta Daisy and Keepsake were sent away at 3:20 on new ground in section 21. Birds were soon located, but the two dogs failed to produce the goods looked for. A large bevy took flight from dry weeds the dogs had gone through when the teams and pedestrians followed after. Near the south end of the section the only interesting feature of the heat occurred. The dogs routed out an enormous-sized coyote that failed to notice the approaching cavalcade, so intent was the animal in stalking a bunch of quail, from which he intended to get his supper. The reception and yells with which the coyote's advent was received sent the marauder away on a sprint that probably ended in the next county. Although a large bevy of birds was now flushed from the heavy grass, neither dog did better than show up on false points. Up at 4:23.

Avalon, the bye dog, finished the first series, cast off at 4:23, sunset concluded the heat. Senator ran as a brace mate. Avalon started, nearer town, from the southeast side of section 16, and was soon lost to view in the trees. Senator did some excellent work in close view of the spectators. Avalon found birds, but not in view of the judges.

In the evening the judges announced the following dogs in the second series: Kil's Viola with Ramona, McCloud Boy with Sport's Bad Boy, Tod Sloan with Shasta Daisy, Belle Fontaine with Keepsake.

Thursday, January 23.—Heavy fog and a slight sprinkling of rain early this morning threatened to put a quietus on the running of the second series and finals in the All-Age stake to-day. The temporarily dampened ardor of the sportsmen did not prevent a fairly early start for the selected ground, section 16, about seven miles southwest of Bakersfield. Shortly after reaching their destination the weather conditions, although rather moist and chilly, were favorable enough to continue operations.

Kil's Viola and Ramona were cast off on open ground in section 16 and thence into section 17. Viola had the speed and range over her rival. She located a bevy and followed with two singles. She worked merrily and stylishly all the time. She made one single flush, but was obedient to command. Ramona pointed a single, but did not hold. The ground worked was very favorable. Up at 10:30.

McCloud Boy and Sport's Bad Boy, cast off at 10:40, west of where prior brace stopped, worked ground already gone over. Both dogs missed many chances. Birds were flushed repeatedly from cover the dogs had worked. The cover generally was exceedingly dense and hard for the dogs to get through. Up at 11:20.

Tod Sloan and Shasta Daisy were cast off in the west half of section 17 at 11:43. Both went away over open ground until taken on a southerly course where birds were known to be in the tumble weeds. Tod pointed, but broke to shot. Tod pointed again and was steady—Daisy pointed and Tod backed. This was on running birds, probably, for the handler was not able to flush. Going on, Tod pointed as birds flushed, pointing another single; Daisy backed. Daisy then pointed, backed by Tod at command. This last was on running birds, there being no chance to road in that cover. Daisy made the final point, staunch and steady. The heat was hers decidedly. Up at 12:15.

After luncheon the party drove to the Canfield School-house, section 23 being selected for the next brace, Belle Fontaine and Keepsake. They were cast off at 1:50. Going north at a merry pace over the open ground, the course swung around to the right. Birds were found in weeds near the east fence, after crossing a water ditch. Both dogs quartered their grounds in workmanlike style. A small covey was located, Belle pointed staunchly, steady to flush and shot. Keepsake made two false points; once she was prettily backed by Belle. Keepsake afterwards came to a neat point, which she held and was steady to shot and wing. Up at 2:45.

Kil's Viola and Tod Sloan were now called for, the intention being to run a two and a quarter-hour heat, under the rules. As they have come together previously this heat, it was decided, would only develop a mere matter of conventionality. After being down five minutes they were ordered up.

The judges shortly announced the winners: Kil's Viola first, Tod Sloan second, Belle Fontaine and Shasta Daisy equal third.

Summary.

Bakersfield, January 21, 1908.—Pacific Coast Field Trials Club's twenty-fifth annual All-Age Stake, open to all Setters and Pointers; \$10 to nominate, \$10 to start; cups to winners, purse divided 50, 30 and 20 per cent; 17 nominations, 17 starters (10 English Setters, 7 Pointers). Judges, H. L. Betten, T. J. A. Tiedemann, J. M. Kilgarif, San Francisco.

I.

Dr. H. Hendrickson's, Hanford, white and black Pointer dog Joe (Dr. Daniels-Fan Go). Fred Coutts, handler;

with

D. G. Macdonnell's, Vancouver, B. C., white and black Pointer dog Point (Sport-Periot's Daisy); owner, handler.

D. G. Macdonnell's white and liver Pointer dog Tod Sloan (Bolin's Duke-Whisper); owner, handler;

with

J. W. Considine's, Seattle, black, white, ticked and tan English Setter bitch Kil's Viola (Ch. Kilgarif-Roxane). J. E. Lucas, handler.

D. G. Macdonnell's white and black English Setter dog Sport's Bad Boy (Marie's Sport-Jackson's Dot); owner, handler;

with

Lloyd Tevis, Stockdale, liver and white Pointer dog Baywood (Ch. Cuba of Kenwood-Petronella). M. A. Dodge, handler.

J. W. Considine's white, black, ticked and tan English Setter dog McCloud Boy (Tony Boy-Sadie Hopkins). J. E. Lucas, handler;

with

Jos. E. Terry's, Sacramento, white and ticked English Setter bitch Ramona (Ch. Kilgarif-Belle of the Ball). W. B. Coutts, handler.

E. Courtney Ford's, San Francisco, white, black and ticked English Setter bitch Belle Fontaine (Count Whitestone-Gracie Gladstone). W. B. Coutts, handler;

with

W. G. Kerckhoff's, Los Angeles, white and lemon English Setter bitch Ventura (Harry H-Peachmark II.) J. E. Lucas, handler.

S. H. Smith's, Colton, liver and white Pointer dog Colton (Dr. Daniels-Lottie Ripstone). Chas. Babcock, handler;

with

W. H. Keller's, Santa Monica, white, ticked, black and tan English Setter bitch Veronica (Count's Mark-Amanda). J. E. Lucas, handler.

H. H. Abbott's, Vancouver, B. C., white and liver Pointer dog Abbott's Jock (Imp. Wasco-Alberta Queen). W. B. Coutts, handler;

with

Dr. Dennison's, Chicago, white and black Pointer dog Spot's Rip Rap (Four Spot-Queen of Letitz). D. G. Macdonnell, handler.

Jos. E. Terry's, Sacramento, black, ticked, white and tan English Setter bitch Shasta Daisy (Ch. Kilgarif-Iona S.). W. B. Coutts, Handler;

with

W. W. Van Arsdale's, San Francisco, white, black and ticked English Setter bitch Keepsake (California Bell Boy-Peach Blossom). Chas. Babcock, handler.

Geo. B. M. Gray's, Oakland, Cal., white, black and ticked English Setter dog Avalon (California Bell Boy-Peach Blossom). Chas. Babcock, handler; a bye.

I.

Kil's Viola with Ramona.
McCloud Boy with Sport's Bad Boy.
Tod Sloan with Shasta Daisy.
Belle Fontaine with Keepsake.

III.

Tod Sloan with Kil's Viola.

Result.

Kil's Viola first, Tod Sloan second, Belle Fontaine and Shasta Daisy equal third.

The Members' Stake.

The first heat in the Members' Stake was between Sadie B. and Lemonade. The dogs were cast off at 4 o'clock in a vineyard opposite the Canfield Schoolhouse. Sadie was handled by her owner. Lemonade was in charge of E. Courtney Ford, in the absence of her owner. In this stake retrieving is a feature of the work required. A large bevy of quail was soon located. The dogs showed good range and plenty of speed. Each dog scored a number of points. Lemonade proved to be steadiest on point and under gun fire. Sadie B. was the best retriever. Both dogs are high class for work to the gun on upland birds.

Friday, January 24.—A bright, sunny morning with the atmosphere crisp and clear, after the rain of the preceding night, was assuring to the sportsmen of a most favorable day for continuing the trials. A favorable breeze also prevailed during most of the heats, which was another acceptable factor in bringing about good results.

The first brace down, Oakwood and Margaret, cast off at 10:10, in the southwest corner of section 21, developed some work that appealed to the sporting blood of those fortunate to be onlookers. The dogs broke away on most desirable open ground with plenty of weed and tree cover close by. Margie had decidedly the best foot and widest range. As a close and intelligent worker she fills the bill amazingly well for so old a bitch. Working south a large bevy was discovered in high weeds, but flushed on the approach of dogs and men. The birds had been marked down, but were too wild for effective work. A bevy of over 200 birds were seen in the adjoining field, the dogs were working up to them through a corn stubblefield. Shots were fired to scatter the birds. Then ensued a series of field pictures for the next twenty minutes in and about the corn stubblefield, such as seldom falls to the lucky view of the sportsman. Margie made point after point on close laying birds, was steady to flush and shot and a fine retriever, save when Oakwood ran in. Oak was not steady and broke in to shot several times. Up at 10:53.

The last brace in, Senator and Ivywood were cast off nearby on similar ground at 11 A. M. Ivy was sent on through weeds, across a ditch to open, burnt-over ground, where he quickly found a fair sized bevy. He was staunch and steady to shot and wing and retrieved properly. Senator failed to back. A field to the north drew blank, as did the corn stubble. Across into an alfalfa field Ivy pointed again, and also missed several chances. Senator snapped into a nice point, was steady and tried to retrieve his bird from the top of a tree, where it lodged. Ordered up at 11:50.

After a few minutes consultation the judges announced the winners: Margaret first, Ivywood second, Sadie B. third.

Summary.

Bakersfield, January 23, 1908.—Pacific Coast Field Trials Club's twenty-fifth annual Members' Stake; cups to winners, \$10 to start; 6 nominations, 6 starters (4 Pointers, 2 English Setters); handled by owners. Judges, H. L. Betten and T. J. A. Tiedemann.

I.

Jos. E. Terry's, Sacramento, white and lemon English Setter dog Lemonade (Ch. Kilgarif-Belle Fontaine). E. Courtney Ford, handler;

with

H. W. Keller's, Santa Monica, black, white, ticked and tan English Setter bitch Sadie B. (Sir Roderick-Sombra).

Gordon Tevis, Stockdale, white and liver Pointer dog Oakwood (Ch. Cuba of Kenwood-Petronella);

with

Lloyd Tevis' white and black eared Pointer bitch Margaret (Cuba's Zep-Jingo's Bagpipe).

J. W. Flynn's, San Francisco, white and lemon Pointer dog Senator (Ch. Senator P.-Dolly Jingo);

with

Lloyd Tevis, Stockdale, white and liver Pointer dog Ivywood (Ch. Cuba of Kenwood-Petronella).

Result.

Margaret first, Ivywood second, Sadie B. third.

The Champion Stake.

The draw for the championship stake took place on the field—three braces and a bye, run as given below. The general average of work in this stake was most excellent, individual performances being brilliant at times. The surprise of the running was the splendid showing of Spot's Rip Rap, who developed something hardly suggested by his prior heats in the All-Age. Taken all together, the dogs in this stake were considered by more than one authority present able to hold their own in any trials, certainly it was the best champion stake the club has had for years. With many present, it was believed that Belle Fontaine should have got first place, but, however, the judges were always up and saw what was going on and the decision was not criticized. In the last heat the dogs were handled by their owners, two gentlemen amateurs. Both handled their charges in orthodox style, although Spot's director might have refrained from a rather continuous use of the whistle, which several times rattled Belle, still this

was rightly attributed to eager enthusiasm and keen interest in getting his Pointer to take advantage of every chance, which assuredly did, proving himself a grand performer, and that without lowering Belle's colors to any noticeable degree.

Spot's Rip Rap and Avalon were cast off at 1:20 for a two-hour heat. Section 17 was selected for the opening heat, the brace broke away at a merry pace ranging in wide casts over open grassy ground. After running over a mile they drew up to trees along the edges of a wide swale. Spot snapped into a staunch point and then roaded in, probably on running birds, for there was no find. The Setter had a shade the best in range and pace. Spot now buckled down to work and put up a series of workmanlike performances that was not suspected in him from his previous showing. Birds were soon located among the trees. Spot snapped to a point in cover, where birds had flushed from, Avalon backed at command. Following on through heavy matted weeds, the sun's heat getting stronger all the time, Spot false pointed again, shortly after he came to a staunch point on a bevy. The false points, it was conceded were on running birds, roading was impossible in the heavy cover. Avalon pointed two singles off to the right, and was steady to shot and wing. Spot scored another single, but was a bit unsteady. He then made a big covey find and held on staunchly for several minutes until his handler came up. It was believed at first he was lost, but he was attending strictly to business. He followed with some excellent roading and then worked back to where he knew birds had been laying. Pointing a single, he was a trifle unsteady. He then found a small bevy and scored another single, which Avalon backed. The latter pointed several close laying singles. Both were in good fettle when ordered up.

Belle Fontaine and Ramona were cast off in section 16 at 3:30. They broke away stylishly and fast over open ground in wide casts. Coming up to trees and tall, dry weeds Belle worked out for a bevy find. Going over to section 21 she made two bevy points and three singles. Ramona scored one single and was well worked out when ordered up. Belle was in good fettle.

Saturday, January 25.—Another clear morning with the ground well conditioned after the rains of the preceding night.

Abbott's Jock and McCloud Boy were put down at 10:48 in section 17 going over familiar ground they were fast and rangey. Birds were soon located, but a bit wild, quickly flushing to the trees. Jock scored two singles and was steady to shot and wing. He followed with several false points in cover from which birds had recently flushed. McCloud scored a single, steady to wing and gun. He then found a bevy, steady as before. Birds were fairly numerous now in excellent working cover. Jock pointed, steady to flush and shot. McCloud ran over birds, then pointed twice, but was a bit unsteady. He then made a bevy find across a ditch in heavy dry weeds. Jock worked stylishly and with a high head. Next dropping to flush, McCloud pointed Jock backed, both steady and under control. Both scored singles which were not seen by the judges. Jock now tried to break in on several false points. The Pointer was in grand shape when ordered up. McCloud showed the pace he had gone through.

Tod Sloan was put down for the bye at 2:25 first on open ground in section 20. Uncle Fontaine was his running mate. After ranging in wide casts for ten minutes, Tod scored a point and was steady to shot and flush. He then pointed a single in thick brush and was steady, twenty yards farther on he made a covey find, pointed a single but broke in, another point was steady and staunch. Tod was fast, high-headed and fairly staunch. Uncle's chances were limited, what he did was creditable.

Belle Fontaine-Spot's Rip Rap.—The judges now called for this brace to run the final, which determined first place. They were sent away at 4:45 and ran till 5:10. Section 16 was selected for the starting point. Both broke away fast and ranged far out over the open ground. Drawing around to the left and up to a swale fringed with cottonwoods and willows, Belle made a wide cast to the right, soon locating running birds among the trees. Here she roaded, without fault, for over a hundred yards, scoring a point in the thick brush, steady to shot and flush, under good control. Spot was busy off to the left in the brush cover, where he found a bevy and scored several singles. Sent on, both dogs were soon on birds and worked beautifully in a give-and-take race. At one time each scored a point from opposite sides of the same brush cover. Belle was under the best control. A few minutes before they were ordered up Spot scored another bevy point and several singles, which Belle backed prettily. After nearly a half-hour's run they were ordered up.

When the judges compared notes, the decision was in favor of Spot's Rip Rap for first place.

Summary.

Bakersfield, January 24, 1908.—Pacific Coast Field Trials Club's twenty-fifth annual Champion Stake, open to all placed winners at recognized trials in the United States or Canada. W. S. Tevis Challenge cup to winner, cup to runner up; \$20 to start, one money. Judges, H. L. Betten, T. J. A. Tiedemann.

I.

Dr. Dennison's, Chicago, white and black Pointer dog Spot's Rip Rap (Four Spot-Queen of Letitz). D. G. Macdonnell, handler;

with

Geo. B. M. Gray's, Oakland, white, black and ticked English Setter dog Avalon (California Bell Boy-Peach Blossom). Chas. Babcock, handler.

E. Courtney Ford's, San Francisco, white, black, and ticked English Setter bitch Belle Fontaine (Count Whitestone-Gracie Gladstone). Owner handler;

with

Jos. E. Terry's, Sacramento, white and ticked English Setter bitch Ramona (Ch. Kilgarif-Belle of the Ball). W. B. Coutts, handler.

J. W. Considine's, Seattle, white, black, ticked and tan English Setter dog McCloud Boy (Tony Boy-Sadie Hopkins). J. E. Lucas, handler;

with

H. H. Abbott's, Vancouver, B. C., white and liver Pointer dog Abbott's Jock (Imp. Wasco-Alberta Queen). W. B. Coutts, handler.

D. G. Macdonnell's white and liver Pointer dog Tod Sloan (Bolin's Duke-Whisper). Owner handler; a bye.

II.

Belle Fontaine with Spot's Rip Rap.

Result.

Spot's Rip Rap first.

NOTES.

At the annual meeting of the club, held Tuesday evening, the officers elected for the ensuing year were: Elmer H. Cox of Madera, president; Jos. E. Terry of Sacramento, first vice-president; Hon. Chas. N. Post of Sacramento, second vice-president; E. Courtney Ford of San Francisco, secretary-treasurer. Executive Committee—V. A. Cagliari of San Francisco, John Schumacher of Los Angeles, J. W. Considine of Seattle, D. G. Macdonnell of Vancouver, B. C., H. L. Betten of Alameda and T. J. A. Tiedemann of San Francisco.

The club trials for 1908 will take place the last full week of January.

Derby entries will close August 1st; \$10 first forfeit, \$10 to start.

All-Age entries will close December 1st; \$10 first forfeit, \$10 to start.

The Members' and Champion Stakes will close the night before they are started. Members' Stake, \$10 to start; Champion Stake, \$20 to start.

The proposed riding on horseback by handlers at the next Coast trials was referred to the Executive Committee for action.

The following named sportsmen were elected to membership of the club: D. G. Macdonnell, W. H. Easterbrook, Gordon Tevis, Lansing Tevis, Jos. Eastland and Col. E. A. Forbes.

In the next trials of the club retrieving will be a feature of the Members' Stake only.

The prizes in the events run off last week were cups donated by the following named sportsmen:

Derby Stake—Joseph E. Terry of Sacramento; H. M. Keller of Santa Monica. A third cup for the Derby will be announced later.

Members' Stake—Elmer H. Cox of Madera, the President's cup; E. Courtney Ford, the Secretary's cup; J. W. Considine of Seattle.

All-Age Stake—J. W. Flynn of San Francisco, W. H. Easterbrook of Boston, Sievers Floral Company of San Francisco.

Champion Stake—W. S. Tevis, Perpetual Champion cup; J. G. Roberts of Madera, cup for runner-up.

All events, except the Members' Stake, are open to all Setters or Pointers complying with the rules.

The Southwestern Kennel Club's annual meeting was held January 25th. The following officers were elected for the ensuing year: Paul Piepers, president, in place of Arthur Letts resigned; W. K. Peasley, first vice-president; B. MacDonald, second vice-president and William Kennedy, secretary.

Judges for the Pasadena show are announced as follows: James Ewins (English and French Bull Dogs); G. Fred Herr (all Toy and miscellaneous classes); Arthur G. Bennett (Mastiffs, Great Danes, Newfoundlands, St. Bernards, Collies, old English Sheep Dogs, and all sporting breeds); G. S. Halliwell (all Terriers and unclassified specials.)

The Utah Kennel Club of Salt Lake has been incorporated with a capital of \$2,000. April 4 to 7 are the dates for the spring show.

Drink Jackson's Napa Soda.

THE FARM

DAIRY FARMING.

The following address on "Dairy Farming," was delivered by ex-Governor W. D. Hoard of Wisconsin, before the Iowa Dairymen's convention, held recently at Des Moines:

I have been a close student of dairying, particularly from the farm end, for nearly fifty years. In all this time I have been greatly impressed with the fact of the ignorance of men who keep cows, concerning what I may call the foundation principles of dairy practice. My greatest hindrance has been my own ignorance. In my lecture work in most every state in the Union and in Canada; in my study and work as editor of a dairy paper; and on my dairy farm with a herd of forty registered cows, everywhere, has this question of the necessity of more and better light, better understanding of plain, simple dairy truth been constantly before my eyes. Everywhere do I see farmers struggling to win success with cows, and everywhere do I see only a very meagre reward. All the time I have been convinced that there is from 100 to 600 per cent more net profit for any farmer to receive if he will but cast aside his prejudice and look at the question in its right light.

The more I investigate this question of net profit, the more astounded do I become at the tremendous difference that exists between the men who think and those who will not think. Here is an illustration: There are two patrons of the Hoard's creameries living a half mile apart. One has thirty cows and the other nineteen. To the man with the thirty cows the creamery paid the sum of \$35 per cow for the milk of one year. To the man with the nineteen cows was paid \$60 per cow. It cost each of these men \$30 apiece to keep their cows for the year. One man got \$30 above the cost of keeping; the other man got \$5. Thirty dollars is 600 per cent more than five dollars. Think of what an interest that is. What was the matter with the five-dollar man? A lack of dairy understanding. What did it do? It caused: First, poor cows; second, poor stabling; third, poor feeding. The best cow in the world could not do good work unless well cared for and rightly fed.

I used to spend hours with that five dollar man to get him to see the truth about himself, his ideas and his methods. He would not read or inform himself. He was trying to do his work with too little exercise of brains. There were three factors or causes for that man's loss of good reward; poor thinking is first. Now that caused poor cows, caused him to provide poor stabling and poor feeding. Did you ever think of what would happen if a man went on to the race track with a 2,000-pound draft horse to compete with a standardbred trotter? Would such a man get any sympathy from the crowd if he lost his money, which he would be sure to do? All over Iowa, as well as other states, do we see farmers working hard to win on this dairy race track, with just about such an equipment of ideas, cattle and fitness of things.

In my cow census work, from the Atlantic States to the Mississippi river, I am overwhelmed with the poverty of ideas, cattle and care that farmers invest in this business; and I am amazed that they do not see where the trouble lies. Let me explain what a cow census is. I send an expert into a creamery neighborhood to investigate the year's business of 100 farmers who have been patrons of a creamery for a full year. I want to dig down to the very bottom of each farmer's business. The expert is to find how many cows he milked for the year; of what breed they are; how they are fed, stabled and cared for; and finally what was the cost of keeping those cows for a year, counting pasturage at \$5. After all this knowledge has been obtained, at the farm end, he goes to the creamery and finds out how much milk was received and how much cash the patron got for the year. Then he figures

up from that how much the patron's cows earned at the creamery for every dollar spent in feed. Lastly, he inquires into how the farmer fed his own mind; whether he was a reader of dairy papers. This was to find whether he took any pains to be a well informed dairy farmer and note what effect that had on his fortune. Then the expert writes ten letters to Hoard's Dairyman describing the work of ten patrons in each letter. These patrons are described by number from 1 to 100 and not by name.

Now, you see that from 100 average patrons I can obtain a very fair idea of what the great body of dairy farmers in a state are doing. In Iowa two of these cow censuses have been taken of 100 herds each. The first was taken in 1900, the last in 1906. Each farmer may learn his number if he desires it, but not his neighbor's number. Heretofore all that has been done to get at the real truth of what the farmers were getting from their cows at the creamery has been the poorest kind of guess work. Creameries are not organized to help the farmer look into the conduct of his end of the business, and besides most of the time he does not care to know. But every creamery ought to be a dairy center from which should radiate all the knowledge and information it is capable of giving back to the patrons.

Think of what a flood of light would be poured out of the creameries of Iowa upon its patrons if a thorough cow census was taken each year by each creamery and the farmer had a chance to see squarely and truthfully (1) what their own cows were earning for every dollar spent in feed; (2) what their neighbors' cows were earning. Don't you think it would stir thousands of farmers to change their ideas, their cows and their methods? It would be a great thing for the creameries too, but they do not see it. They will twist and wring to get an additional patron, but they will not do a thing in a practical way to greatly increase the amount of milk that will come from their present patronage. That is something so close to their feet that they do not want to see it. Meanwhile the patrons are getting only about a tenth they might get at the same expenditure for feed and the creamery is complaining of small profits.

Let me read you some of the deductions from the last Iowa cow census.

Territory: Three counties in northeast Iowa, including patrons of eight creameries, average price of butter fat 22.7 cents per pound. Of these 100 herds 83 numbering 890 cows are of the dual purpose type, 633 of them are earning a profit above their feed. Twenty-five of these herds, numbering 257 cows, over 33 per cent are not paying for their feed. Seventeen herds numbering 172 cows are of the dairy type; of these 16 herds numbering 163 cows are earning a profit above the cost of their feed. But one herd, consisting of 9 cows, of this group, failed to pay a profit.

The average cost of keeping the dairy breed cows was \$28.33 per cow. The cost of keeping the dual purpose cows was \$27.23. The production of the dairy-bred cows over the dual purpose was 68.1 pounds of butter fat, or \$13.91. But four herds fed ensilage. They made \$18.37 per herd more net profit. The 172 dairy-bred cows, nine of which did not pay for their feed, produced \$19.59 more net profit than the 890 dual purpose cows. That is a fact worth considering, when just the difference in breeding will make 172 cows earn \$19.56 more net profit than 890 dual purpose cows.

Now we come to the effect of reading dairy papers in its influence on a dairy farmer's profit. Fifty of these farmers read such papers. How did it affect their profits? They returned 24 cents more for each \$1 spent in feed and their reading reduced the food cost of the butter fat over 2½ cents a pound. The average cost of keeping both dairy bred and dual purpose was \$28.23. I told you that the mere act of reading on dairy subjects added 24 cents more for each \$1 spent in feed. Multiply \$28.23 by 24 and you have \$6.77. Did it pay these men to spend a dollar on the enlightenment of their minds? Does it pay to buy \$6.77 for one dollar? Yet

nearly one-half of these 100 farmers do not believe it pays to buy \$6.77 for one dollar. Of the forty-six farmers who did not read dairy literature, nineteen did not get enough from their cows to pay for the keeping. Of the fifty-four who did read only six did not receive enough from their cows to pay for their keeping.

Now here is the actual condition of things in one of the most prosperous dairy sections of Iowa. Does it afford any food for thought and action? It should. Never again ought we to hear an Iowa patron of a creamery say: "It don't pay to breed in dairy blood," or "It don't pay to read a good dairy paper."

THE GOAT DAIRY.

Goat dairying has been ushered into existence in California as a commercial enterprise under auspices that promise well for the industry. So far as the average citizen realizes, the only figure that the goat cuts in our industrial economy is the occasional "nanny" securely tethered by a rope in some vacant lot in the outskirts of our cities, the security afforded by the rope being protection from her taste for bill posters, the contents of back yard wash lines and the pasturage that often grows on the roofs of the humble homes in those parts of our cities where the milch goat is tolerated.

The goat is said to be the "poor man's cow." Well, our California goat dairy in its inception is on altogether another basis. Instead of being confined to the outskirts of the city among the poor whose invaluable family friend the goat has proven to be, she is to make her debut as a commercial proposition in Pasadena, America's exclusive millionaire city. If reports are correct, the invasion of goat's milk may prove the undoing of the cow in that aristocratic burg, which has always insisted upon its authorities turning the cow inside out and examining every bone and sinew in her make-up to be sure that she is hygienic and a safe source of milk for retired pork-packers, brewers and other blue-bloods. An enterprising firm of young men, Winthrop Howland and H. C. Hurd, of that city, have had an eye open to the bad reputation the dairy cow has acquired among the Pasadenans, and they lost no time in getting in on the ground floor with a source of milk not open to the criticism that has been laid to the cows of that section. From the success of the undertaking so far, and the eagerness with which the present output has been snatched up at good prices, it would seem that Pasadena had accepted the goat as a milk proposition at par value.

It is stated that the firm of Howland & Hurd have on hand a fair-sized goat herd, but they claim more in the way of dairy quality than for numbers. Included in their herd are a number of imported Swiss Tottenburgs, a breed famous for milking capacity. They are reputed to yield from three to six quarts a day, and keep up a good flow for eight or nine months a year and with less feed than a cow requires to produce the same amount. The present herd of Howland & Hurd is kept in Pasadena, but when their herd reaches the desired number it is their plan to secure land in the near-by mountains, so as to give the animals as near as possible their natural environment. It is also their plan to expand the business, and from the inquiries the firm is receiving for stock, it is expected that the demand for the increase will be a source of profit. Inquiries have already been received for goats from Mexico and Japan. With such economic producers as goats, a demand for their milk by those who are able to pay good prices for it, and the fact that physicians recommend it in preference to cow's milk on account of its composition and easy digestibility, these enterprising young men of Pasadena ought to succeed—unless they are up against a mere rich folk fad.—Pacific Dairy Review.

THE VALUE OF BREEDING.

At a meeting of the Mississippi Farmers' Institute, W. G. Harding, general live stock agent of the M. &

O. Railway, made an address on the subject of grading up cattle, in the course of which he said:

"Having been raised in the vicinity of the blue grass farms and stock raising establishments which were all handling the pure breeds of stock, it did not occur to me that any one would handle scrub stock unless they were so unfortunately fixed as to prevent them handling any other kind.

"I do not remember when the first question was put to me in regard to pure bred cattle, but I always asserted that good cattle were the best, to raise before I could find data to convince people that I was right.

"Only one experiment has been conducted to my knowledge for the distinct purpose of ascertaining the difference in value between the blooded animal and the scrub, and done with car lots of cattle. The experiment to which I refer was conducted in the State of Illinois for the express purpose of determining how much difference there existed from a feed lot standpoint between common cattle on the one hand and choice to fancy beef cattle on the other.

"What were considered choice and fancy cattle were such as can be produced by two or three crosses of Shorthorn, Hereford or Angus blood on the common cattle of the country. And what were classed as common were scrub things without any grading or character and did not show any sign of good breeding. In the summary of this test the experimenters said more rapid and much larger gains may be secured on the better than the more common grades. We find on a fair basis of calculation that the choice to fancy steers made a gain of 9.74 pounds, whereas the common cattle made a gain of 7.61 pounds for every bushel of grain consumed.

"This shows that the choice cattle produced 2.13 pounds more beef per bushel of corn consumed than did the common cattle.

"When sold, the choice cattle brought \$5.40 per hundred pounds and the common cattle, being fat and no longer common, sold for \$4.80 per hundred pounds. The 2.13 pounds of choice beef which the common cattle did not produce was worth 11½ cents in all, and this was the value of good blood over the scrub on every bushel of corn fed.

"The choice cattle realized 46½ cents per bushel for the corn fed, while the scrub cattle realized only 35 cents per bushel. One of the recent sales of cattle at St. Louis was a load of Mississippi beef cattle, which averaged 1517 pounds and sold at 5 cents, or \$75.85 per head. They were Mississippi bred, Mississippi raised and Mississippi fed—they were high grade Shorthorn cattle, raised and fed by Colonel F. M. Abbott, Abbott, Miss. This shows the value of good breeding on the one hand, and that what can be done in Illinois or Iowa can as well be done in any Southern State. There is one step further in the life of the cattle in which the value of blood is apparent. In the stocker and feeder trade the cattle graded by any of the improved beef breeds are worth from three-fourths of a cent to two cents per pound in market over and above the cost of the common cattle, according to grade, quality and condition of offerings and the condition of the market."

In conclusion the speaker said:

"It is plain to me that under no reasonable circumstances does blooded stock fail to pay.

"The planter-stockman who has cows and wishes to sell his calf crop annually gets more for half-breed calves by four or five dollars per head than his neighbor who has a grade bull.

"So it runs through every branch of the cattle business. Men may reasonably differ as to which breed is best for their purpose or locality, but no difference can longer exist as to the expedience and necessity for raising high-bred cattle through the length and breadth of the South, where, in my opinion, the highest development of blooded stock can be attained."—Texas Stockman.

Palatable rations suitable to growth as well as to fattening are of more importance than the chemical composition of the ration.

HOW TO SELL BREEDING HOGS BY MAIL.

The following paper was read by Geo. P. Lillard, at the Texas Swine Breeders' meeting:

Each section of this subject will naturally divide itself into several heads. In buying a hog by mail, first decide what breed you want and contemplate the purchase of nothing short of the very best individuality and breeding of the breed you have selected. Have for your motto, "The best are none too good," and stick to it. There is a great deal in a right start on any proposition, and this adage is doubly true in the hog raising business.

Now don't expect to secure this class of hogs at a cheap price, for there is no truer philosophy than the fact that you cannot get something for nothing. Don't expect to buy a first-class pig of up to date breeding for \$10. Let me say right here that I believe the failure of many in the hog business is due to the fact that the price influenced them in the purchase of inferior animals. That the highest priced animals are the cheapest in the end, if they possess corresponding quality, is a fact that cannot be disputed.

Now that we have decided what to buy, and that only the best, the next question that arises is where can we find the desired class of stock? While you might occasionally secure a first-class animal from a trader or speculator—I do not call them all breeders—my advice is to trust your money and selection of individual to some reliable breeder who advertises in the leading livestock journals, and better a breeder who has exhibited and won at the state fairs, for we all know that in this day of strong competition the man who wins the ribbons must have the goods. Don't be deluded with the impression that to secure first-class hogs you must send your money a long way from home, for it has been clearly demonstrated that Texas has as good hogs of all the leading breeds as can be found in the United States.

The record of awards at our state fairs for years will attest to the fact that Texas bred and raised hogs have more than held their own against the best specimens from some of the leading herds of the north. And further, at the San Antonio International Fair in 1904, Texas raised hogs won every first prize in competition with winners direct from the St. Louis World's fair. In years past it was necessary for us to send north for first-class stock, and thanks to our brother northern breeder for often furnishing us the right kind of stock. But as before stated, Texas now has as good swine, both in breeding and individuality, as can be found in the world, and we are glad to note the fact that Texas hogs are now being shipped north. You will pardon me for being personal in men-

tioning the sale of a herd boar at the recent San Antonio International fair to an Illinois breeder and judge of national reputation. This boar was shipped to his new northern home and placed in the stud at the record price of \$100 a service.

We will now discuss the selling side of our subject. I am often asked the question, "How is it that you are able to dispose of your large annual crop of Berkshires with so little difficulty?" The story is told in a few words. Keep the very best breeding stock, and with proper mating and judicious feeding and handling you have first class stock to offer, for which there is always demand at fair prices. Have enthusiasm for your business and the breed you represent. Let the public know the class of stock you are breeding by making a creditable exhibit at your county and state fairs, and advertise judiciously in reliable and influential farm and stock papers. If you want to be neglected and forgotten, isolate yourself by not advertising. Be prompt and courteous in your correspondence, using as few words as possible. Keep an exact copy of what you have written. Often we get an order days after answering letters of inquiry and by referring to copy book see exactly what was offered.

In describing stock do not exaggerate their quality and value, and if you haven't what the prospective buyer wants say so. Offer nothing but first-class stock of up to date breeding and in good thrifty growing condition. Let the butchers and packers have the culls. Treat your customers fairly, always striving to give them value for their money, and if nature has endowed you with average intelligence and plenty of energy your efforts will be crowned with success.—Texas Stockman.

It requires twelve to sixteen weeks to get lambs that have never had grain in good condition for market. Under good management lambs will gain one-quarter to one-half pound per day, or twenty-five to thirty pounds during the feeding period. It requires eight to nine pounds of dry feed to produce one pound of grain.

FILES CURED IN 6 TO 14 DAYS.

PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50 cts.

"SAVE-THE-HORSE"

From
RAY WARNER

A Noted Michigan Owner and Trainer,
Known Throughout the Country.

Coldwater, Mich., Jan. 4, 1908.

Troy Chemical Co., Binghamton, N. Y.
Gentlemen: I believe "SAVE-THE-HORSE" is the best remedy made for bone spavin. In the spring of 1903 I started to train a mare with a well developed bone spavin. She was so lame that we turned her out and gave her repeated blistering for a year. The following spring she was still lame. We decided to try "SAVE-THE-HORSE" and went right on with her work. Before we started her, about the first of July her lameness entirely disappeared. She has raced very successfully for the last three years and has a record of 2:11½ over a half-mile track.

Yours truly,

RAY WARNER.

"SAVE-THE-HORSE" permanently cures Bone and Bog Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness, without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express Paid.

DICTATUS MEDIUM FOR SALE.

The highly bred producing stallion Dictatus Medium 32499 is offered for sale. He is a grand individual, very popular with breeders and his colts all show speed. He was sired by Dictatus 2:17 (son of Red Wilkes and Miss Lollie by Dictator), sire of Funston 2:08½, Dictatress 2:08½, etc., dam Belle Medium 2:20 (dam of Stam B. 2:11½), by Happy Medium, sire of Nancy Hanks 2:04, etc., second dam Argenta by Almont Lightning, sire dam of Zomoro 2:11. Is 16 hands and weighs 1,200 pounds; nine years old. Sure foal getter. For price and full pedigree, address **R. F. LATHROP, Hollister, Cal.**

MADE FOR SALE.

Brown mare, five years old, absolutely sound, afraid of nothing, and can be driven by a child. This mare is but 14 hands high, but is elegantly formed and handsome in harness. She is a pacer, and can show better than a 2:20 gait at any time. Will be sold very reasonable. Apply to **BREEDER and SPORTSMAN, Room 366, Pacific Building, corner Fourth and Market Streets.**

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.

PRICE—25c, 50c and \$1.00

NEW WORLD'S RECORD 15,000 Targets Without a Miss

J. W. Akard's claim to the title, "The King of Rifle Shots," is well earned. His performance of breaking 15,000 regulation clay targets without a miss is the greatest exhibition of skill on record. He used one shot only for each target. He threw his targets with his right hand, holding his gun with his left. He used

U. M. C. .22 SHORT CARTRIDGES

whose perfect quality supported his perfect aim. A great per cent of the targets were broken edgewise, so that the diameter of the disc does not truly represent the size of the moving target in the air. Mr. Akard's earlier run of 1,659 small marbles without a miss is nearly twice as long as any previous record on similar objects. In this case, also, he did his own tossing. Remember that Mr. Akard's run of 15,000 targets was unfinished. Mr. Akard is now giving demonstrations on the Coast.

U. M. C. CARTRIDGES EXCEL IN CLEANLINESS AND ACCURACY

A RECORD THAT IS A RECORD

Adolph Topperwein makes Straight runs of 14,540, 13,599, 13,292 and 13,219 on 2 1/4-inch wooden blocks at 20 foot rise, and misses only 4 out of 50,000 and 9 out of 72,500, shooting

WINCHESTER SMOKELESS POWDER CARTRIDGES AND .22 CALIBER RIFLES

Just to show that all things ARE POSSIBLE with Winchester .22 Caliber Cartridges and Rifles, and also to prove "Who's Who" in making rifle records IN PUBLIC, Mr. Topperwein recently shot for ten consecutive days at San Antonio, Texas, and made the above world's records for wing shooting with a rifle. He used only two rifles and loaded them himself. These record-breaking, history-making scores were made, without the aid of a notary public, before large crowds of people in a public park—not in a far-away back lot or down on the farm behind the barn.

The Stallion Number

OF THE

Breeder and Sportsman

Will be issued February 15th, 1908. It will have a handsome cover in colors, contain many illustrations and be replete with matter interesting to breeders and horsemen.

If You Own a Stallion

Don't fail to advertise him in this issue, as an advertisement of your horse in this number will reach every man on the Coast who owns a good mare.

If You Own a Mare

You will find this number very interesting, as it will contain the stallion announcements giving particulars as to description, pedigree, terms, etc., of all the best horses on the Coast, and from these announcements you can decide on what stallion will nick best with your mare.

ARE YOU INTERESTED IN HARNESS HORSES?

If so, you will be interested in reading this number, as it will contain statistics and news that will be valuable and entertaining.

In place of getting out the usual large Christmas number of the BREEDER AND SPORTSMAN last month, it was decided to make a special effort and get out a handsome stallion issue, and the date of February 15th was selected as Christmas comes too early for an issue of this description. Owners of stallions who wish illustrations of their horses to appear in this issue should have photographs prepared without delay and send in their orders for space. A specially low price has been decided on for advertising in this issue, placing it within the reach of all. Write for price and particulars.

Entered as Second Class Matter at San Francisco Postoffice.

Terms—One Year \$3; Six Months \$1.75; Three Months \$1
STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

AN INTER-CITY MATINEE, in which representative horses from the different amateur driving clubs in California would compete for prizes, would prove a most attractive entertainment and arouse a spirit of generous rivalry between different sections that could not help result in increased interest in the driving horse. San Francisco, Los Angeles, Riverside, San Bernardino, Fresno, Pleasanton, Santa Rosa, Sacramento, Stockton and other places all have well organized and thriving clubs, and it should be easily possible for a convention of these clubs to be held, at which a series of inter-city meetings could be arranged and cups provided for the winners of the principal events. After classes were arranged and a place and date selected each club could name the horses to represent it at the meeting, and when the date arrived there is little doubt but one of the largest crowds ever seen on a California trotting track would be present to see the sport. The Eastern matinee clubs have made a great success of these inter-city matinees and the fastest trotters and pacers in the country have competed for the cups. The League of Amateur Driving Clubs, to which the leading Eastern organizations belong, is a very strong body, and wields a large influence in all things that relate to the improvement and the management of amateur harness racing. If the California clubs could come into membership with this league, and hold all their races according to its rules, it would be possible in the future for California to be represented in the big annual meetings held at Cleveland and other points, and our horses might be able to bring some of those elegant challenge cups to California. We advise the members of our California amateur driving clubs to give the project of an inter-city matinee due consideration, believing that it will lead to excellent results in the near future.

ANOTHER RACE at six furlongs, in which the winner was donated to the New California Jockey Club Breeding Bureau, was held at Emeryville on Tuesday last. It was won by the four-year-old stallion Galvestonian by Galveston-Dovey Montrose. In its form chart on the races that day, the San Francisco Chronicle made this comment on this race: "A very poor lot, and little or no form obtainable on them." And this is the sort of stallions that are to be used to "improve" the breed of California horses. The Chronicle suggests that it would be better if betting were cut out of these Breeding Bureau races, as "this race had a bad look to it, and the same thing was true of each of the other two donation races," that have been held. The Chronicle also adds: "It would do away with scandal if the association were to cut out the betting feature in connection with the Breeding Bureau races. Surely any owner who, under existing conditions, is willing to contribute a horse to the Bureau for \$500 would not shy at putting his horse in a race of this kind if there were nothing more in sight for him than the \$500 purse. In that event the ostensible purpose of the Breeding Bureau races would be just as well served as it is now." We commend the Chronicle's comments on these races to the farmers and horse breeders of California who are being asked to send mares to these thoroughbred stallions that are finding it difficult to defeat one another in six-furlong races with light weight up.

THE HORSE FOR THE FARMER to breed and raise is the horse that will sell most readily and at the most profit on the market. The wealthy farmer who has plenty of money and time to devote to developing his ideas in regard to horse breeding, can afford to experiment, but the average farmer who must sell the surplus stock not needed in working his land, should aim to produce the sort that there is a constant demand for. Good individuals of any distinct breed, will always bring a fair price in the salesring, but the ordinary one is slow sale except in boom times when "everything goes." If a farmer owns mares of the draft type, even though they be only grades, he should select the very best stallion of that type within his reach. If his mares are trotting-bred he should send them to a good trotting stallion, and always breed to improve what he has in beauty, conformation and soundness. He should avoid being led astray by the man with a grade stallion, or one of a different type than his mares, who will argue that the cross will make ideal carriage horses. Ever since horse-breeding has been carried on in America, there have been men engaged in breeding big, coarse mares to thoroughbred stallions with the idea of producing carriage horses, and where one animal suitable for a carriage has been produced by such mating, there have been a hundred nondescripts which reached the peddler's wagon before they were five years old. If a breeder desires the thoroughbred cross in producing harness horses of any description, let him start with a thoroughbred mare, or one that is part thoroughbred, but not with the thoroughbred stallion. Breeds of horses for different purposes are too well established to go back to cross breeding at this time. Men with plenty of money to spend, who have certain theories of breeding which they desire to develop, are the ones to try these experiments, not the farmer whose time is mostly taken up with making a living and trying to save a little for the proverbial rainy day. The wise farmer who engages in horse breeding, will post himself as to the sort of horse that is in demand every day, which is the one that is a high type of some already established breed.

THE TIME IS HERE when those who have control of the trotting tracks in California should make some move toward announcing harness meetings for 1908. It is worse than foolish to wait for two or three months and then rush through a program, half advertise it, and expect horsemen to fill the purses. The time to act is now, and the tracks making the earliest announcements will secure the largest lists of entries, and therefore stand the best chance of making a profit. Salinas, Pleasanton, Santa Rosa, Woodland, Stockton, Fresno, Los Angeles and other points can give successful meetings and probably will, but the earlier they act in the way of making and advertising programs, the better for all concerned. A complete circuit, early arranged, will put twice as many horses in training as will be worked if the matter is put off for two or three months. The majority of owners who are willing to pay for the training of a horse want to see a few purses in sight, by entering in which they stand a chance to get some of their money back. We hope the California Circuit will some day be so organized that all dates will be selected and all programs announced by the middle of February, and when that is done this State will be one of the most important harness racing centers in the whole country. We have the tracks and the horses, but for some reason we lack the men with sufficient enterprise and energy to bring this condition of things about.

ANSWERS TO CORRESPONDENTS.

S. G. Cousin, Cucamonga—The Joe Wheeler that sired your colt is bred as you state. The horse Joe Wheeler 2:07½ was sired by Sidney Arnet, and his dam was by Grand Moor. He was a gelding and was sold to Honolulu parties several years ago.

Frank Malcolm, Fresno—We cannot find any record of the stallion you mention. The burning of all our records in the big fire of 1906 makes it almost impossible for us to trace the pedigrees of unregistered horses.

S. J. W.—We do not know the breeding of Lady Signal any further than that she was by Signal 3327. Signal was by Bunday's Bob Roy, a running bred horse, and his dam's breeding was untraced. A colt that is not registered can start in his first race under any name his owner desires to give him, but having once started the name cannot be changed without a payment of \$50.

THE HARVESTER BRINGS \$9,000.

At the Midwinter Horse auction, which opened at Madison Square Garden in New York on Tuesday of last week, The Harvester, a three-year-old colt, consigned by Walnut Hall Farm, brought \$9,000. This colt is a brown stallion, foaled in 1905, and while broken, has never been trained. He is a fine looking colt, however, well bred, and can trot fast, and is entered and paid up on in \$47,000 worth of stakes, as follows: Kentucky Futurity, \$21,000; Horse Review purse, \$10,000; American Horse Breeders' Futurity, \$10,000; Kentucky Stock Farm purse, \$6,000. Mr. Harkness stated that The Harvester could lead faster than any colt he ever saw. He was consigned to the Harkness sale last year, but had to be withdrawn on account of illness. The Harvester is by Walnut Hall 2:08½, dam Notelet by Moko, second dam Tablet by Cuyler 100, third dam Prefix by Pan-coast, fourth dam by Messenger Duroc, fifth dam by Volunteer, and sixth dam the famous broodmare Clara (dam of Dexter 2:17¼, Dictator and others), by American Star. The price paid for the horse furnished one of the odd incidents of the offering. According to the judgment of the veteran driver, Splan, the breeder profited by something like \$8,500 because of the sickness that prevented The Harvester from going into the sale two years ago, as he then would hardly have commanded a price above \$250 to \$500.

Three wealthy patrons of harness racing were contenders for the horse—J. W. Daly of Mount Kisco, N. Y.; W. D. Sherman of Port Henry, and Mr. Uihlein bidding against each other through the contest, Mr. Sherman's last bid being \$6,000, and Mr. Daly's last bid \$8,600. Then the successful buyer jumped the price to \$9,000 and took the horse. The entire consignment of Walnut Farm horses, numbering sixty-five, head brought a total of \$27,245, averaging \$420.

WORLD'S RECORD FOR STAR POINTER'S DAUGHTER.

The Cleveland Leader says that a world's record made the past season and one that has been overlooked up to date by the usually alert turf scribes and statisticians, should be credited to the Cleveland pacing mare Alice Pointer 2:05½, daughter of Star Pointer 1:59¼, and out of Alice M., the dam of Red Seal 2:10, Ballerton 2:17¼ and Allawood 2:17¼. Alice Pointer is a Cleveland product in every sense of the word, having been bred by Two Minute Farm, being owned by David Shaw, having been trained and driven to her record by Mike McDevitt and all of her work the past season having been over the Glenville track.

The world's record referred to is that for the fastest consecutive three-heat race by a green pacing mare and was made at the Cleveland Grand Circuit meeting last Summer, when the daughter of Star Pointer won the \$1,500, 2:11 pace in 2:05½, 2:06 and 2:07, an average of 2:06 1-6. The following week at Buffalo she captured the \$10,000 Dominion of Canada stake in straight heats, in 2:05½, 2:07½ and 2:06¼, an average of 2:06 1-3. The Cleveland race was the mare's second start, the first having been at Detroit the previous week, where she got the word on a break in the opening heat and was distanced.

THE BEST EVIDENCE.

The proof of the popularity and desirability of an article is always to be found in the demand for it. The demand for the No. 15 Perfected Racing Sulky, together with the Buckeye Carts and Speed Wagons, made by the McMurray Sulky Co., Marion, Ohio, is proof positive that they are popular, becoming more so every day. It is our candid opinion that any man having need for anything in the way of a sulky, cart, speed or road wagon should by all means get a catalogue from the above firm. It will pay you. Mailed free upon application. Orders placed at this time can have special attention given to the finishing, etc., which is quite an advantage to the purchaser.

OUT OF CALENDARS.

New York, January 31, 1908.

Breeder and Sportsman: Please say to your readers that our supply of Axworthy calendars was quickly exhausted, but we have ordered another edition, which will be ready to mail in a very few days. Very truly yours,

THE EMPIRE CITY FARMS.

Coney 2:02 is dead. He was found dead in his stall soon after being fed, and died with his eyes wide open and his limbs in a natural position as if lying down. He was the fastest pacer ever sired by McKinney, and was named by the late Tom Keating for his friend, Al Coney of San Francisco.

Persimmon, the stallion owned by King Edward of England, with which he won the Derby in 1896, fractured his hip recently and his subscription list for the coming stud season has been cancelled, entailing a loss to the King of fully \$80,000. It is thought the horse will recover, but it will take at least six months before he is sound again.

Only One "BROMO QUININE."

That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the world over. Cure a Cold in One Day. 25 cents.

NOTES AND NEWS

Get the Stallion Number next week.

Salinas will be in the circuit again this year. The old war horse, Mr. J. B. Iverson, will see that it is not left out.

When you want a good rig of any sort to drive in the Park or elsewhere, call at the Dexter Prince Stables, corner Grove and Baker streets, San Francisco.

Thirty head of good stallions, speed prospects and business horses, to be sold at Fred H. Chase's pavilion on Valencia street, Monday evening, February 24th.

Geo. A. White of Salinas has purchased from the estate of M. J. Smeltzer the seven-year-old chestnut horse Dictatus S., with a trotting record of 2:27¾, made at Salinas in 1906. Dictatus S. is out of Fanny S. by Brown Jug, second dam Lady Lightfoot by Re Echo.

Rain necessitated the postponement of the matinee races which were to have been held last Saturday by the Los Angeles Driving Club. The postponement was until to-day, but a very heavy rain there early in the week will probably cause another postponement.

The heavy rains of the past two weeks have caused the speed track in Golden Gate Park to be closed to all drivers. As soon as the rainy season is over the road horses will be kept very busy, however, and by April, when the Park Amateur Driving Club will resume its matinee racing, there will be many horses in training for the cup events.

A stupid blunder was made in these columns last week in attempting to correct the spelling of the name of the sister to Sonoma Girl 2:05¼, which is correctly written Lottie Lynwood. In former issues the first name was spelled "Lotta," which is incorrect, as Lottie Lynwood is the name given her, and as she is the handsomest filly in California and a natural trotter, she and her owner, Mr. Geo. A. Pounder of Los Angeles are entitled to have her name correctly spelled in the newspapers.

Fred Chadbourne is training for Mr. E. A. Servis of Butte county, former owner of Edwin S. 2:08, a fine-year-old by Kinney Lou 2:07¾, that is a natural pacer of the smooth going, oily kind, that gives every indication of being a fast one.

Frank Work, of New York, has presented to W. E. D. Stokes the chestnut trotter Peter Stirling 2:11½, winner of the Kentucky Futurity of 1901. Mr. Work paid \$9,200 for him at auction shortly after this race, buying him, it was said, because he looked so much like Edward 2:19. Several attempts have been made to train him, but without much success. Mr. Stokes hopes, however, to yet see him fulfill the promise of his three-year-old form. Peter Stirling is a living illustration of the old saying, "No foot, no horse." His feet are as small as a mule's and are badly contracted at the heels. Otherwise he is said to be as good as ever he was.

William H. Taft, Secretary of War and candidate for President, is an admirer of the American type of saddle horse. He recently purchased one that goes all the saddle gaits and that is up to carrying three hundred pounds. The animal is sixteen hands high, weighs 1,200 pounds, and is by Rex McDonald, a noted Missouri sire that was a lineal descendant of Gaines' Denmark.

It is a curious fact that in Australia mules are scarce as the proverbial hens' teeth. With 3,000,000 horses that progressive country has only 1,000 mules. South America is the stronghold of the equine hybrids, that continent having 7,000,000 head. North America, including Mexico and Canada, has about 4,000,000, Europe 1,500,000 and Africa 280,000.

L. E. Brown, proprietor of Maple Lawn Farm, has purchased the great roan three-year-old Trampfast 2:12¾, and will use him in the stud as a private stallion this season. He will be bred to a number of the highly bred mares on the Maple Lawn Farm. It will be recalled that Trampfast took his record in the Kentucky Futurity for two-year-olds at Lexington last Fall, winning the first heat in 2:12¾ and the second in 2:16¾. In this race he lowered the race record for two-year-olds which has stood at 2:13¾ for a number of years. Trampfast is a rugged colt and comes from stout blood, being a grandson of Jay Bird.

A three-year-old trotting bred colt sold for \$9,000 at the Midwinter sale in New York last week. None of the thirty head to be sold by Fred H. Chase & Co. at the pavilion, 478 Valencia street, on Monday evening, February 24th, is expected to bring that amount, but some good ones are in the consignment that will develop into \$9000 horses in the future. You can get them at your own price.

Elisa S. 2:16½, the dam of the unbeaten pacer Sir John S. 2:04¾, dropped a colt on the night of January 23d, which W. L. Vance writes is "a born trotter or something else, which we will find out later." The colt is brown, with both hind feet white.

S. K. Trefry has placed his fast four-year-old trotter Ben Hur in the stud this year at the low fee of \$20. Ben Hur is not only a trotter himself, but he comes from a family of trotters. His sire is Stam B. 2:11¾, and his dam Mountain Maiden by Cresco produced Kenneth C. 2:13¾, and the two pacers Tom Carneal 2:08½ and Miramonte 2:24¼.

A New York paper says: "When the biennial turf congress of the National Trotting Association is held in New York on February 12, it is almost certain that every driving club or association in this section of the country will be represented. The amateur clubs will be found lined up in favor of a change of the rules that will permit the driving clubs to hold regular meetings where money is taken at the gate and prizes offered and the horses winning heats not being penalized by the time made by them constituting a record or bar. While a great many horsemen doubt the wisdom of such a rule, it is quite sure that the amateurs will be solidly in favor of the concession to them.

Mr. W. P. Murray, a prominent manufacturer of Cleveland, Ohio, and one of the leading members of the Driving Club there, has been spending the Winter with his family in Pasadena, and the other day saw a horse come tearing down the street, with a frightened small boy making a frantic but futile effort to stop him, while an old lady was lying on the floor of the vehicle overcome with fright. Mr. Murray weighs about 250 pounds, but is very active, and watching his chance as the horse approached him, made a lunge for the bit, and after being dragged a short distance brought the runaway to a standstill.

Over at the Alameda track Mr. H. Busing has a couple of stallions in the stud that are worthy of attention from breeders. One, Bonnie McKinney 41383, is a standard and registered son of the great McKinney, his dam a fine mare by Rustic, second dam by Whippleton and third dam by Gladiator, all three sires being producers. Bonnie McKinney is a large horse of fine proportions, and Mr. Busing has four or five of his colts to show prospective patrons and others how he breeds. The other stallion is Bonnie Searchlight 34899, a registered son of Searchlight 2:03¾, sire of Arerolite (3) 2:11¼ and Ray o'Light (2) 2:13¾. The dam of Bonnie Searchlight is Rita B. by Boodle Jr., second dam Gabilan Girl by Gabilan, and third dam Clara by Elmo. This breeding is excellent, and Bonnie Searchlight shows it. Mr. Busing will be pleased to show these two stallions at any time. Alameda track is very easy of access, trains running to within a few blocks every twenty minutes, and electric cars every five minutes. See the advertisement in this issue.

Eight thousand dollars is the price that L. O. Brown paid for Trampfast (2) 2:12¾, according to latest reports. It was first given out that \$16,000 was the price paid, but just half that figure is now said to be the correct one. It pays best to give the right figure first.

William Matheson has purchased from Mr. H. W. Meek of San Lorenzo the stallion William Harold 2:13¾ and will keep him at Danville, Contra Costa county, during the season of 1908. William Harold is by Sidney, and his dam, Cricket 2:10 by Steinway, was the first mare to pace in 2:10. Cricket is now the dam of six in the list. William Harold has sired Janice 2:08¼ and several other fast ones, and his get are good sized, smoothly turned trotters and pacers.

Mr. Geo. H. Estabrook of Denver, Colo., has added a new one to his already formidable string of high class young trotters and pacers. The latest purchase is a two-year-old filly by Tregante 2:09¼, son of Simmons. The filly is out of Miss Fanny Summers 2:26¼, by Bow Bells 2:19¼, second dam Florence D. 2:29¼ by Jay Gould, third and fourth dams both producers. Mr. Estabrook purchased this filly from Mr. J. L. Tarlton of Lexington, Ky., on the advice of Gus Macey and Robert Strader, who say she is the best colt trotter they ever saw. She is now two years old and is engaged as follows: Kentucky Futurity, \$20,000; Horse Review Stake, \$10,000; Western Horseman Stake, \$7,500.

Every person who visits Pleasanton and sees the champion three-year-old Aerolite 2:11¼ (trial 2:05½), now in his four-year-old form, marvels at his great muscular development and his rugged health and perfect soundness. When he is looked over in his stall or examined as he is being jogged on the road or track, a stranger would never guess that he has been raced both as a two and three-year-old, as he looks like a green four-year-old. Sutherland & Chadbourne have certainly taken good care of him and his condition shows it. His owner, Jas. W. Marshall of Dixon, has had correspondence from the owners of some of the greatest mares in the country, who desire to breed them to Aerolite this year. His book will fill soon.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

A subscriber of this paper desires to learn the present address of Mr. E. B. Smith, formerly of Knights Landing, Yolo county. Can any of our readers furnish it?

Mr. C. D. Evans, the Haldsburg, Cal., druggist, writes us that he owns a mare by Milton Medium that will be thirty years old this spring and will have a foal in April. Mr. Evans does not state in his letter what stallion this old mare was bred to, but she certainly is a remarkable mare to breed at that age.

W. J. Kenney, "the bike man," has just received a consignment of 1908 speed carts, sulkies and runabouts, which are a decided departure from the old-style of vehicles. Kenney is always in the lead in introducing innovations for the use of trainers and drivers. His repair shop is the best place on the Coast to get a bike fixed so that it will run true and not wear the tire unnecessarily.

The old pacing champion Flying Jib 2:04 is still hale and hearty at Pleasanton. Where he is still owned by Mr. C. L. Griffith, whose father owned him before him. The Jib now occupies a comfortable box stall at Lee Wells' livery stable and the latter gives the old fellow regular airings to a light buggy when he shows all the style and fire of his youth, but is never allowed to go far enough or fast enough to tire him. He is now 23 years old, and if allowed his own way would not let any horse pass him on the road without a contest to see which was fastest.

The Baron Wilkes family has become known as the Futurity winning family. Henry Helman of Pleasanton has two young stallions that are members of this famous family—Alconda Jay, who is by Jay Bird, out of a Baron Wilkes mare, and Baron Bowles, who is by a son of Baron Wilkes and out of a mare by Dignus, sire of Johnny Agan 2:05¼. Both these young stallions are bred well enough and have class enough to maintain the Baron Wilkes family reputation.

If you want a good draft stallion or a coach stallion, write to C. O. Stanton, 497 North Fifth street, San Jose, and he will quote you prices that will seem small beside some of the prices that are being paid for horses of the same breeds. He invites inspection of his stallions, and will sell them worth the money. He is the Coast agent for the big Iowa firm of Singmaster Bros.

Uhlan, a black trotting gelding by Bingen 2:06¼, obtained a wagon record of 2:13¾ last year as a three-year-old, and now \$6,000 has been offered and refused for him.

Two stallions that were prominent at Pleasanton a few years ago were shipped to Europe the other day. They were Lecco 2:09¾ and The Phantom 2:10¼.

The horse is always the best drawing card at a live stock show. At the big live stock show held in Denver last month, the record crowd of the week was on Friday, when the horses were shown and judged. Twenty-six thousand people attended that day.

An exchange tells of a horse that after being badly cut on one leg by a barb-wire stood on the other three for eight weeks without once lying down.

We acknowledge with thanks receipt of an invitation to attend the horse parade and stallion show to be held at Livermore on Saturday, March 7th. With fair weather there will be a large attendance, and as there have been many new stallions brought into Alameda county during the past two years, the exhibition will doubtless be a most creditable one, and well worth seeing.

The advertisement announcing his stallion Dictatus Medium for sale has been withdrawn by Mr. R. P. Lathrop of Hollister, as he has leased this magnificent horse to "The Paicinas Rancho Company," a corporation that has recently purchased the well known Grogan ranch of San Benito county, and will engage in the breeding of draft horses, roadsters and fine cattle. The company could not have selected a better bred or finer individual than Dictatus Medium, and with the right sort of mares he will sire horses that will attract attention in the show ring and sell for good prices.

There is a filly by Stam B. 2:11¼, out of the good broodmare Henrietta by Boodle 2:12½, consigned to the Chase combination sale for Monday evening, February 24th, that should bring a good price and attract many bidders. She is entered and paid up on in the Pacific Breeders' Futurity and Stanford Stakes for this year. She is a trotter and showed very fast when being handled a little last year, and has been up since last November, and not been given much work yet, but is ready to begin on right now. She should trot below 2:20 by June, and win more money than she will sell for at this sale, but her owner has more colts than he can care for and must sell some. This filly is a good enough prospect for a stake winner. Her legs and feet are like iron and there is nothing wrong with her in any way. Here is an opportunity for some one to get a stake winner.

Geo. T. Beckers, owner of Zombro 2:11, announces that he will pay the transportation bill one way on all mares shipped to Los Angeles from this section of California this spring to be bred to his great stallion. The get of Zombro grow more popular with breeders every year, as they are not only fast and good gaited trotters, but uniformly handsome and of good size.

Hymettus 2:08½, the champion pacing three-year-old gelding by Zombro 2:11, is still the property of Mr. L. H. Todhunter of Sacramento, and has not been sold to Mr. Geo. H. Estabrook of Denver, as stated by several Eastern journals. When Mr. Estabrook purchased through J. W. Zibbell the four-year-old mare by Seymour Wilkes 2:08½, dam by Silver Bow 2:16, sire of the dam of Hymettus 2:08½, one of the Denver daily papers got the item so badly mixed that it gave out the news that Hymettus was the horse purchased by Mr. Estabrook. Hymettus is still the property of his breeder, Mr. Todhunter, and has been romping around in a big paddock all winter. He has not been sold although Mr. Todhunter will sell him if anyone will pay the price asked. Hymettus is now four years old, and one of the best prospects for a two-minute pacer there is in America.

The filly by John A. McKerron 2:04½, out of Lou Dillon 1:58½, owned by Mr. C. K. G. Billings, of Cleveland, is now being broken by "Doc" Tanner at the Cleveland track. She is a yearling now, and is large for her age, stoutly built and trotting gaited.

Nearly 200,000 trotters and pacers are registered. Of these about 50,000 are stallions.

Hawthorne 2:06¼ has missed twice to McKinney 2:11¼ and will be bred to Moko this year. Her dam now twenty-two years old, is now safe in foal to Moko.

J. J. Jermyn of Scranton, Pa., owns the gray pacing stallion Kendig 2:18¼ that took his record in 1906, and is thought to be a 2:05 horse. Kendig is by the California bred pacer Rokeby 2:13¼, son of Director 2:17 and Lilly Stanley 2:17½. Kokeby was bred by Hon. Frank L. Coombs of Napa, who also bred Lilly Stanley.

The last fast mile the great sire McKinney 2:11¼ trotted was in the spring of 1900, when Chas. A. Durfee's youngest son, Vincent Durfee, then a mere boy, drove the old stallion a mile in 2:24 at Pleasanton track. That was the year when the Tanforan Fair Association was organized to give a big fair, horse show and race meeting at the then newly constructed Tanforan Park, twelve miles south of San Francisco. A free-for-all trot for stallions was advertised for this meeting, and as McKinney was but thirteen years old, Mr. Durfee concluded he was about good enough to win that race were he trained for it, although the stallion had not been trained for years. Durfee had McKinney's son Ben Liebes in training that year, and after McKinney had been given some stiff jogging, young Vincent got up behind him one day while his father drove the colt and they worked a nice mile together in 2:24, the old horse fighting for his head all the way through the stretch at the end of the mile. It was afterwards decided not to race him, however, and he was never put in training again. His youthful driver maintains to this day, however, that if they had gone on with him he would have lowered his record to a certainty.

The California State Agricultural Society has decided to open the State Fair of 1908 on August 29th and close it September 5th. This will give a seven days' fair, both the opening and closing day being on Saturday. The Oregon State Fair will open September 14th, thus giving a full week for exhibitors at the California Fair to ship their exhibits to Salem and get them placed in time for opening day.

Plans for the new Manufacturers' Building, to be erected at the State Fair grounds at Sacramento, have been accepted by the State Board of Agriculture. The building will be 300 by 100 feet in width and will cost \$30,000. It will be built by day's work. Plans are being prepared for another building, to be known as Machinery Hall, and it is expected that both buildings will be finished in time for use during the fair this year.

A representative of one of the largest carriage and buggy factories in the United States says that the outlook at the present time is that the public will purchase more buggies and carriages in 1908 than they did in 1907, and that last year the sale was very large.

Sonoma Girl 2:05¼ is still at the Crabtree farm, at Neponset, and will probably remain there with all the other horses of the stable and not be shipped south to winter, as first intended. It is said that her feet and legs were never in better condition, and she is looked upon as certain to reduce her record materially this year.

The mare Lady Zombro, owned by F. H. Holloway of Hemet, Cal., slipped a filly foal by Geo. W. McKinney 2:14¼ last week. As this foal was entered in several rich Futurities, Mr. Holloway greatly regrets the loss, expecting something extra good and speedy to result from this cross.

Thos. F. Adkin of Rochester, N. Y., makes the following excellent suggestion in a letter to the Horse Review: "The three-year-old colt which I sold to Count Hauser of Vienna, Austria, in 1906, stepped a mile last year as a three-year-old in 2:15¼. This would give his dam, Liska 2:28¼ (dam of Lisonjero 2:08¼ and three others), another one in the list, if the record had been made in this country. It seems to me, in view of the fact that so many of our fast mares and stallions are going abroad, that the Register Association should make some arrangement to credit them and their produce with their foreign records. I believe that if you would advocate this you would be doing the breeders of this country very great service."

Will Logan, so well known as a writer and photographer for different trotting horse journals, has quit journalism and entered the employment of William Bradley, the millionaire New Yorker, who recently established Ardmere Farm in New Jersey, and placed at its head Todd 2:14¼, for which he paid \$30,000, and Guy Axworthy (4) 2:08¼.

The famous New York speedway along the Hudson River is to be used in the near future as a connecting road between the Boulevard and Seventh Avenue, and will then be open to vehicles of every description, thus spoiling it for a speedway. The Road Drivers' Association are to ask that a half-mile track be built for them by the Park Commissioners, who have already set aside grounds for polo, baseball, tennis and other sports.

Swanhilda, the pacing mare by Orkney Wilkes, that Chas. De Ryder took East in 1906, was sold at the Midwinter auction last week, bringing \$610. She was purchased by Louis Berger of Brooklyn, N. Y. Swanhilda was bred by W. S. McDonald of Concord, Cal., and is a very fast green mare, being credited with a trial of 2:08½ and a half in 1:00½. De Ryder sold the mare for Mr. McDonald for more money than she brought at this sale.

Riley Kent of Utah has a string of six or seven good trotters and pacers at the Pleasanton track and is getting them in shape for racing this season.

W. T. McBride of Aberdeen, Wash., who purchased the promising two-year-old pacer Bonnie Antrim from A. P. Church of Pleasanton, will spend the winter at the horse center. Henry Helman says the pacer steps a little faster every time he is hooked up.

Mr. R. P. Lathrop of Hollister has sold his stallion Mestoe to Mann & Cowell of Watsonville, who will use him in the stud. Mestoe sires horses of good color, size and nice trotting action, and many of his get make fine carriage horses.

Mr. T. H. Ramsey, superintendent of the Cone Ranch at Red Bluff, was operated on at St. Francis Hospital in this city on January 20th for an injury received some time ago. His leg was broken, but the bone had not united properly, so the surgeons made a new fracture, and Mr. Ramsey is getting along nicely, with a prospect of getting out within the next three or four weeks. His many friends hope for a full and complete recovery for him, and that in due time he will be serviceably sound on this injured leg.

Dr. Summerfield of Santa Rosa has purchased the mare Alix B. 2:24½ and will breed her to his elegantly bred young stallion Lord Dillon 3:587, he by Sidney Dillon, out of Roblet 2:12 by Robin, second dam Eveline, the granddam of Sonoma Girl 2:05¼, by Nutwood. Alix B. is herself an exceptionally well bred mare, as she was sired by Nutwood Wilkes 2:16½, and is out of a full sister to Little Albert 2:10. Dr. Summerfield has a small but very choice collection of broodmares on his farm near Santa Rosa and we expect to hear of stake winners being sent out from there within the next few years.

The stables of James Y. Gatcomb at Concord, New Hampshire, were burned last week, but all the horses were saved.

The citizens of Santa Cruz have asked the City Council to build a speed track in Laveaga Park, where it is said there is one of the finest locations in the world for a training track. It is to be hoped that the Council will see its way clear to grant the request.

The Columbus Driving Park Association may offer a \$10,000 stake for 2:10 or 2:12 trotting stallions.

The Midwinter sale at New York last week showed that the prices of horses are keeping up well, and the average was good in spite of the fact that several consignments of young unregistered stock were offered.

"Thirty head of good ones" are to be sold at Fred H. Chase & Co.'s sales yard on the evening of February 24th. Here is the chance to get one to drive on the road.

Gambetta Wilkes, who now has about 200 in the list, is out of a mare by Gills Vermont 104, a grandson of Black Hawk 5. A full brother to Gambetta Wilkes, called the King, was said to have been the handsomest son of George Wilkes.

BIG SALE AT PLEASANTON.

The enterprising citizens of Pleasanton have decided to hold an annual sale of horses there each year, and have organized and set the inaugural dates for April 16th, 17th and 18th this year. The Pleasanton Times of February 1st says in this connection:

Pleasanton is to have a horse sale. It will be the first and greatest of its kind ever held in California. It will last three days, April 16th, 17th and 18th. It will be in charge of a committee whose chairman is Chas. De Ryder. One hundred horses have already been consigned for the sale. It will be a great success.

This movement has been inaugurated under the auspices of the Pleasanton Chamber of Commerce. It will immediately be widely advertised and will attract attention everywhere. The name and fame of Pleasanton is heralded wherever good horses are bred, and it is quite appropriate that this town should inaugurate a movement of so much importance to all lovers of any and all kinds of horse flesh.

The advantages to accrue to Pleasanton from such a sale held annually are bound to be very great. The fame of Pleasanton will be spread even further than it is to-day, and it will stand out in even a stronger light than ever as the greatest horse center, not only in California, but on the entire Coast. The fact that the sale is to include all kinds of horses is one of the strongest features connected with it. It will stimulate the raising and cultivation of better horses in every section where people come in touch with the movement. Heretofore we have centered almost entirely upon racing horses. Now Pleasanton is to be made the greatest market in all California for all kinds of horses. These annual sales will gradually take on the proportions of the fairs of the older countries and the court days of our own Southern States. Properly directed there is no doubt that these sales will mean much for Pleasanton and the entire valley.

The idea originated with the horsemen themselves. It was brought to the attention of the Chamber of Commerce, and that body, ever ready to promote the material welfare of the town, promptly acted. On the invitation of President H. W. Furlong, a number of prominent horsemen met at the Rose Hotel Wednesday evening. After first thoroughly discussing the feasibility of the project and arriving at the conclusion that a success could be made of it, the meeting promptly organized a strong committee to take charge of the sale.

Charles De Ryder, who is one of the best and most favorably known horsemen in the United States, was made chairman. With him is associated Henry Helman, whose practical experience and great success has given him such a high standing among horsemen everywhere. Other members of the committee are R. C. Peach, the secretary, and F. P. Hellwig, Charles Griffith, Lee Wells and J. C. Kirkpatrick.

The committee has decided to hold the sale April 16th, 17th and 18th. Immediate steps will be taken to advertise the sale thoroughly all over the Coast, and to secure a large consignment of good horses. As already mentioned, over 100 head of draft and trotting bred horses have been consigned for the sale. The committee hopes to secure at least 150 head more. Parties desiring to consign horses for the sale should do so early, in order to get the value of the advertising. No horses will be barred, but all entries will be scanned very critically by the committee in order that misrepresentation may be avoided, and all who buy or sell may be assured of every market benefit.

Entry blanks will be sent out immediately. The enthusiasm with which the event has been received by the horsemen, the fame of Pleasanton as a horse center, and the broad gauge character of the men in charge all mean that Pleasanton has inaugurated an event that will become a feature of Northern California.

HORSE PARADE AND STALLION SHOW.

Arrangements are now under way whereby Livermore will, on Saturday, March 7th, hold a horse parade and a stallion show, and as it is now two years since an affair of this kind has been held, everything that can be done will be done to make the coming show one of the best ever held in the Livermore Valley. The horse shows heretofore have always been productive of much good to the horse interests of this section and horsemen can further their interests in no better way than by encouraging and keeping alive the horse shows. Many of the stallions that have made the Livermore Valley famous as a horse-center are dead, but as there have been a number of new stallions brought to this section farmers through the coming show will be given a chance to inspect the new stock and select stallions with which to mate their mares the next breeding season and such of the new stallions as have colts old enough to show will be given an opportunity to show them.

"The coming show is not to be restricted to stallions alone, but owners of mares, geldings, colts, fillies, saddle and driving horses are requested to make entries. No entrance fee will be required. The committee having the management of the show in hand earnestly ask the co-operation of all horsemen throughout the county. The officials are: H. M. Christensen, president; Max Berlin, vice-president; Theo. Gerner, secretary; John Sweeney, treasurer; Frank Fennor, marshal; Wm. McDonald, announcer.

THE HALF-MILE TRACKS.

It is the opinion of those best posted on harness horse affairs that the half-mile tracks which are so numerous all through the country east of the Mississippi river, do more to foster and build up harness racing and harness horse breeding than all other things combined. The fact that a half-mile track can be sustained as a training track with but little expense, keeps it in existence in hundreds of towns where mile tracks could not possibly be supported. For this reason this journal has often advised organizations that were limited as to capital to construct a half-mile track for training as well as racing purposes, instancing the fact that some of the greatest fairs and race meetings in the Eastern country are held on grounds where there is only a half-mile ring. In this connection we take occasion to reproduce from an Eastern exchange the following article, written by Mr. Amos Whitely, one of the owners of White River Stock Farm, Muncie, Indianapolis:

The very best way to advance the breeding interest is through the half-mile track meetings, and anything that tends to build up the interest in racing on the half-mile tracks meets the approval of White River Stock Farm.

I have, during the past three or four years, given this subject very careful consideration, and my observations while attending meetings of the Grand and Great Western Circuits, and a number of the most prominent half-mile track meetings, has fully convinced me that the interest in the breeding and developing of high-class, useful horses, and race horses, can best be promoted through the race meetings on the half-mile tracks.

While the Grand Circuit and Great Western Circuit meetings, where the phenomenal trotters and pacers (the real racing machines) are practically in evidence, attract and interest a class of horsemen who are out for the big stakes, and I may say a class of good breeders, they do not interest the general breeder, including the small breeder, all of whom must be depended upon to advance the breeding interest. Comparatively few breeders attend those meetings, and the pace is too strenuous to interest them.

What we need is high-class racing on the half-mile tracks that will attract and interest the horsemen generally, and cause the breeder generally, additional individual farmers to want to get into the game, at least to the extent of securing, for breeding purposes, one or two high-class, standard bred mares, to be bred to high-class sires every year, so the farmers and the farmer boys will be interested in the breaking and educating of colts every year, to prepare them for the races.

What the managements of the leading half-mile tracks have been doing is good. Stakes for the green ones, and purses for the faster ones are all right. But in addition to this, in order to attract and interest the people and the local breeders who do not attend the great mile track meetings, special attention should be given to the free-for-all classes. Everybody wants to see some fast racing, and if the half-mile track managements will arrange for a free-for-all pace for one day, and a free-for-all trot for another day, with reasonably liberal purses that will secure high-class horses, such racing will attract attendance, interest the people, and largely increase the gate receipts.

Give the people something in the nature of Grand Circuit racing on the half-mile tracks and they will do the rest. I believe I voice the sentiments of a number of breeders and horsemen when I say that while the White River Stock Farm does not care to maintain a racing stable to compete with the phenomenal trotters and pacers gathered from the whole United States in the Grand Circuit meetings, we will do our part in helping to boom the racing on the half-mile tracks.

A STAKE WINNER.

It has been often said of the Directs that they have "the winning habit," and there is a son of Direct 2:05½ now at Sacramento that has helped add to the truth of this statement. Almaden 2:22¼, winner of the two-year-old trotting division of the Pacific Breeders' Futurity, and of the Occident Stake the following year, is the horse we refer to. This young stallion was bred by Mr. C. A. Durfee, and is out of a fast mare by McKinney 2:11¼, thus combining the blood of the two greatest 2:10 sires ever in California—Direct 2:05½, sire of twelve in the 2:10 list, and McKinney 2:11¼, sire of seventeen in that list. Almaden is a trotter, one of the good gaited sort, that will sire trotters. He would have been taken East last year by Chas. De Ryder, but was taken sick with impaction of the bowels, and for many days his life was despaired of. He recovered, however, and is now at Sacramento for the season of 1908, in the hands of M. L. Lusk, and never looked finer in his life. There is a chance here to breed to a horse at a moderate fee that is certain to become a popular horse at a much higher fee before long. His colts show that they are the sort that will do to train, and while none are old enough to race, ask any horseman who has seen them and they will say no greater prospects are to be found in the State.

THE MIDWINTER SALE.

At the Fasig-Tipton Midwinter sale held in New York last week five hundred horses were sold. There were many very ordinary horses consigned to the sale, and they brought little money, the average for the first day being but \$143 per head, 104 head selling for a total of \$14,865. In this first day's sale were a lot of two-year-olds by an unregistered stallion of no reputation and there was absolutely no demand for them, weanlings and yearlings selling at from \$15 to \$75.

During this first day of the sale Stambou, a seventeen-year-old stallion by Stamboul, out of Bon Bon by Simmons, sold for \$150. The old pacer Perhaps 2:08, whose famous ringing tour in California as Walter K. is fresh in the memory of every Coast horseman, brought \$160. He is ruled off all tracks and is now sixteen-years-old.

Crown Princess, a mare bred by Mr. A. B. Spreckels and foaled in 1899, was purchased by J. W. Daly for \$415. This mare has a record of 2:13¼. She is by Dexter Prince, out of a mare by Antevolo, and was purchased by Mr. Daly for a broodmare.

Swanhilda by Orkney Wilkes fetched \$610, and the fact that a few good ones were in the day's sales was what brought the average up to \$143.

On the second day the Walnut Farm horses were sold. There were sixty-four head in the consignment, and they brought a total of \$27,085, an average of \$425 per head. Those by Moko brought within a few cents of \$300 each, those by Walnut Hall averaged \$606 and those by Mobil sold for an average of \$186 per head.

The star of the lot was The Harvester, three-year-old colt by Walnut Hall, dam by Moko. He sold for \$9,000.

On Thursday, the third day of the sale, good prices were received for many, the day's average being over \$500 for the 112 head sold during the day. The sales for the three days up to Thursday evening were 356 head for a total of \$124,860, an average of \$347.

Among the highest priced horses on Thursday were the following:

Wilteen 2:15¼, trotting stallion by Wilton, seven years old, \$8,000.

Palerna, bay mare, five years old, by Bingen, \$2,725.

Rex McKinney, black colt, three years old, by McKinney, dam Haughty by Baron Wilkes, \$2,600.

Princess Helen 2:05¼, pacer, by The Beau Ideal, \$2,600.

Locust Jack 2:11, trotting gelding, seven years old, by Keller Thomas, \$4,000. This horse made his record last year over a half-mile track.

Thornway 2:05¼, pacing stallion, ten years old, by Steinway, \$850.

The stallion The Bondsman was very sick on Thursday and it was not thought he would be offered for sale.

A summary of the sale will appear in our stallion number next week.

MAKING HIS WAY.

For years the stallion Iran Alto 2:12¼, bred at the famous Palo Alto Farm and sold to James W. Rea of San Jose when a colt, was raced on the circuit, and then placed in the stud and bred to his owner's mares. His opportunities were very limited, as Mr. Rea had many things to attend to in a political and business way, and the horse was really neglected so far as securing mares for him was concerned. A few years ago H. S. Hogoboom of Woodland, who is a pretty good judge of a horse, leased Iran Alto from Mr. Rea and since then has kept the stallion at woodland, where he has been bred to some good mares, and the colts are now beginning to show that Iran Alto is bound to be one of the best producing sires of California. From Mr. Rea's mares Iran Alto sired Dr. Frasse 2:11¼, Thomas R. 2:15 and other fast trotters, and now that his produce are owned by a large number of breeders they are not only being entered in the colt stakes, but in their training are showing such speed that the horsemen all over the Coast are talking about them as certain future race winners. Iran Alto is by a stallion that held the world's stallion record in his day, Palo Alto 2:08¾, and is out of a mare that held the world's record as a three-year-old, and has since produced four with standard records and is the grandam of twelve. For his breeding and performances on the track and in the stud Iran Alto is standing at a very low fee, \$30, but "live and let live" was always one of Mr. Hogoboom's favorite mottoes and he is helping the horse toward a reputation that is bound to be world wide. Iran Alto has never been pushed to the front by favoritism, but won his way there when on the track and is doing it again in the stud.

SADDLE GALL AND TUMOR CURED.

Col. G. W. Jordan, Hawkinsville, Ga., writes: "With Quinn's Ointment I made two tests, one of which removed a saddle gall that I considered removable only by the knife, the other was an application to a small tumor two or three inches above the nostril of a favorite horse, this also disappeared after a few applications. I consider the remedy invaluable." For curbs, splints, spavins, windpuffs and all blemishes use Quinn's Ointment. If cannot obtain from druggist or dealer, address W. B. Eddy & Co., Whitehall, N. Y. Price \$1 delivered.

BIG MATINEE PLANNED.

Plans are well under way which, if carried to a completion, will give New York the greatest amateur light harness meet ever held in that city, says the New York Times. With the elections of the New York Driving Club and Road Drivers Association completed, horsemen will now turn their attention to the successful consummation of the project to bring together at the Brighton Beach track all the best amateur drivers in the country, in an inter-city matinee to last three days. The Road Drivers will hold their annual parade and speedway matinees during the Spring, but the New York Driving Club is in a quandary as to where to hold the Summer trotting and pacing races. For several years the club has held its matinees at the Empire City track, but the fact that two running meetings under the Jockey Club rules and sanction will be held during the Summer and Fall makes it necessary for the members of the organization to look for another home where the harness sport may be carried along uninterrupted. Several tracks are under consideration. Those being mentioned are Poughkeepsie, White Plains, Elkwood and Mineola.

The location of the track is of second consideration to the plans for an inter-city meet. It is expected that the meeting will do much toward giving the harness horse sport a big help. The plan has the approval of all local light harness horsemen, and is the most ambitious ever attempted by a New York club.

During the annual election of the Amateur Drivers' League of America, which was held in New York during the latter part of November, President George W. Grote of the New York Driving Club suggested to a number of Eastern club representatives the idea of holding the event in New York, and they all promised a hearty support without any reserve. It is suggested to secure if possible Brighton Beach track as the most convenient and best suited for the meet as well as the date question.

According to the rules of the Amateur Drivers' League, the big event must be held at Cleveland, but there is every likelihood of a change being effected, which will transfer the event to Brighton Beach. In case the other members of the league insist upon enforcing the rule it is proposed to hold a big inter-city matinee in any event, inviting all the recognized driving clubs to participate in it.

The cups and trophies are to be made tempting enough to draw to the events all the leading amateurs from all over the country, including Boston, Philadelphia, Pittsburg, Chicago, Cleveland, Syracuse and Memphis. The entries would include some of the best light harness horses now in training and make the meet the best ever held.

President Grote's idea of a big inter-city meeting lasting three days, to be held at Brighton Beach, is universally indorsed by all leading members of the New York Driving Club and Road Drivers' Association. The question has also been discussed favorably for the reason that at the next meeting of the National Trotting Association it is believed the question of amateur driving club meetings will be passed upon and rules similar to those now enforced by the American Association adopted.

In that case the proposed meeting can be given by charging admission at the gate, without incurring records or bars for horses raced in the contests. One of the most enthusiastic backers of President Grote's project is W. F. Bradley, who has promised that if the plan is carried through he will enter Major Delmar and George G., while it is certain that E. T. Stotesbury of Philadelphia will send over Sweet Marie, and other trotters and pacers of note will be here to race for the prizes. Similar promises have been made by all the leading horsemen of the city, so that big fields of starters are assured.

Speaking of the plan of holding an inter-city meeting, a local horseman who has long been identified with road driving and matinee racing said:

"When Grand Circuit meetings were held two weeks each year at Empire City and Brighton Beach, interest in the harness horse and sport was naturally kept up, but now that they have been abandoned perhaps for good, something must be done to keep the sport alive, or one might probably say to revive it.

"I think the idea of holding an inter-city meeting of the magnitude as planned by President Grote is an admirable one, and the most feasible means of increasing the popularity of the sport. There is absolutely no reason why New York should depend upon outsiders to make this meeting, or a series of meetings, a success, as there are enough horses owned in Greater New York and nearby cities in Jersey to furnish more entries than are needed. Every season one hears of challenges among different amateur clubs and this will be an excellent way to bring horsemen together for all the racing they want.

"As long as racing rules permit the charging of admission such meetings can be made to earn expenses and offer handsome prizes for each race, while it will prove most attractive to that class of the public who love the harness sport when conducted in the right manner."

Before the Spring is advanced something of a more definite nature will be known of the proposed meeting, and if the present sentiment remains as it is there is every insurance that the amateur sport around New York this year will be livelier than any past season, while the half-mile tracks will give many professional matinees.

THE STORY OF CONEY 2:02.

[G. H. Perrigo in Chicago Horseman.]

"On January 18th the famous gelding Coney 2:02 died at West Newton, Mass. He was apparently in good health, but after partaking of his meal laid down in his stall and when an attendant went to speak to him he did not respond, and an examination showed that he was dead. A peculiar phase of the affair was that his eyes were open and his limbs were in a natural position, not stiffened as is usually the case when death occurs. An autopsy will be held to ascertain the cause of his death." Such was the meager report announcing the death of what was in the early portion of the season of 1899 the most talked of pacer in America. It will be noticed that even in death Coney was different from other horses, a fact that was in keeping with his entire career.

It is doubtful whether there have been any horses of recent date which have caused greater joy and grief to their various owners than did Coney. With him; as with Ryland T. 2:07½, a meritorious performance was almost always followed by a total disappointment. Perhaps Coney was not entirely to blame. A terrible attack of distemper the spring preceding his four-year-old debut left his constitution so undermined that he was hardly physically able to cope with the Grand Circuit stars, which he met in that eventful first year's campaign. Coming as he did from the stable of the late Thomas E. Keating, the California manager, who was at that time ably taking the place of the late Monroe Salisbury as the leader of the annual invasion from the Golden State and whose stable had brought East such stars of the pacing brigade as Anaconda 2:01½, Klatawah (3) 2:05½, Searchlight 2:03½ and such trotters as Dione 2:07½, Owyhee 2:11, etc., he was naturally very much in the limelight from the day he began to show such astounding bursts of speed in his work in his native State, up to the time of his first start at Denver in June. Only his vast amount of speed tempted Mr. Keating to race him in 1899. He had, however, been heavily staked down the circuit and it was in the hopes of saving some of this entrance that any effort was made to race Coney at all. It is probable that the black gelding never entirely recovered from the grueling campaign he underwent that season when in no condition to race. His efforts in after years seemed to bear out this assertion. His brilliant performances did not follow one another with the regularity of those of Star Pointer, John R. Gentry, Joe Patchen and Robert J., but were occasional dashes which gave but an indication of what the black whirlwind would have done had he been in perfect condition.

Coney was foaled in 1898 and was bred by John W. Gardner, Los Angeles, Cal. His breeding was excellent and he was sired by the great McKinney 2:11½ (the leading sire of 2:10 speed), while his dam was Grace Kaiser, also the dam of McZeus 2:13, a son of George Wilkes, while the second dam was Grace W., by Comet. He was a good sized black gelding of a decidedly racy conformation and was a very fast, rapid gaited pacer. In his early training he gave great promise and Keating, always on the lookout for budding phenoms, soon arranged to manage him. That was in 1899. The gelding came fast all that winter and spring until late in the spring when he was taken with the distemper. But as before stated so many valuable dates had been made for him that it was determined to race him anyway. As usual the Keating stable made its first starts at Denver, where M. E. McHenry took charge of them to do the driving. There Coney was put in three races and while he won them all did not by any means create a favorable impression. His first start resulted in an easy victory, but in the second he showed what he would do when pinched. In the first heat he made two bad breaks and just beat the flag. After that it was easy for him although he stepped the first quarter of the second heat in :31, the half in 1:02½, and then pulled up and came home in 2:14½. In this third attempt he made a very poor showing although his enormous burst of speed made it possible for him to win after acting very badly.

These races showed Keating that something radical would have to be done with Coney if he was to make even a creditable showing in his next race, the Chamber of Commerce stake for \$5,000 at Detroit in July. After a great deal of deliberation it was decided to put the hoppers on him. McHenry somewhat reluctantly consented and the day of the race made his first public appearance behind a hopped pacer. The field was made up of twelve pacers which included Shade On 2:08; Carmelita 2:09½; Annie Thornton 2:10½; Wandering Jew 2:09½, and The Private 2:07½. Despite the uncertainty as to how he would behave with the new gear Coney was made the favorite, selling for \$75 to \$100 for the field. In the first heat all went well, Coney winning it handily in 2:09. But in the second heat the trouble began. Coney was stepping down the backstretch with a comfortable lead of several lengths when the public began to see that he was trying to break. Try as he would McHenry could not ward off the inevitable and at the five-eighths pole Coney went up in the air in a lunging tangle. The entire field passed him and it was with difficulty that he beat the flag. In the third heat he made a jump at the quarter from which he recovered handily but another at the three-quarters destroyed his chances and he finished third. In the fourth heat he kept his feet but tired in the stretch and Shade On beat him home.

The following week at Cleveland he had a new driver as John Kelly had the mount behind him. Again Coney was the choice, bringing \$40 while the field brought \$50. Among his opponents were Bob Fitzsimmons 2:07½, Shade On and Wandering Jew. His manners were much improved and pacing to the half in 1:03 he walked home in 2:13½. Kain then fell and the race went over until the following day. Coney won the second heat in 2:19½ but tired badly and Bob Fitzsimmons won the next three. It was a good performance and had the gelding had sufficient work he would probably have won in straight heats. He was laid up the week of Columbus, but at Buffalo, with McHenry back in the sulky landed the stake in 2:13½, 2:09½ and 2:12½, pacing the first half of the second heat in 1:02¾ and beating Toboggan 2:08½, Lizzie Wilkes 2:08½, Wandering Jew and others. He repeated at Glen Falls by pacing in 2:07½, 2:09½ and 2:08½. The rules barred the hoppers at Readville, hence it was not surprising that Coney should have made breaks there and finished behind the money. At Hartford they were put on him again and he gave Billy Andrews 2:06½ warm argument, making him go in 2:06½, 2:07½ and 2:10 to win. In the last heat McHenry made a try and went to the half in 1:02. There Coney tired and was eased up, finishing third. The hoppers were barred at Empire City also and the son of McKinney finished behind the bunting. He was the favorite in the Roger Williams stake at Providence and won the first heat in 2:08½ but was then taken sick and the race went to Island Wilkes Jr. His last start of the year was at the Parkway half-mile track, near Brooklyn, where he finished fourth in a star field of free-for-all pacers to Prince Alert 1:59½; Roan Wilkes 2:04½, and Democracy 2:07. In that race he was driven by Bert Shank. Coney was consigned to the Old Glory sale that fall along with some others from the Keating stable and was bid in by D. W. Maloney for \$1,160. During the year he stated in twelve races, won five, was second in four, fourth in one, and twice unplaced, winning \$5,925.

The following year was probably his best as in ten races he won five, was second in three and unplaced in two, winning \$4,675 against the best pacers of the day and 1900 boasted of some giants among the side-wheelers. He opened at Windsor where he finished second to Billy Andrews, three heats in 2:07½, 2:07 and 2:06½, driven by Bert Shank. M. E. McHenry then took the gelding again and at Detroit started him in the 2:06 pace against William Mac, Prince Alert and others. In the first heat he made a break and finished sixth, but in the second he trailed William Mac, Billy Andrews and Free Bond to the quarter in :30, the half in 1:00½, the three-quarters in 1:32½, and then moved up to the leaders for the final brush home. The heat appeared to be his when he caught William Mac at the distance, but Ben Walker was coming fast with Prince Alert and Coney seemed to hang so the hopped Prince was able to beat him a nose in 2:05. In the third heat Coney broke his hoppers on the first turn and was laid up. That race put him on edge for his record breaking performance the following week at Cleveland, when he lowered the world's record for five-year-old pacing geldings to 2:02½, where it still stands, and scored his greatest victory. The field was a hard one, it being made up of Prince Alert 1:59½; Ace 2:05½; William Mac 2:05½; The Maid 2:05½; Indiana 2:04½; Don 2:07½; Billy Andrews 2:06½; Exploit 2:08½; Eyelet 2:06½, and Free Bond 2:04½. The betting was heavy and public interest ran high. Prince Alert and Coney were about equal choices, bringing \$200 each, while the field sold for \$300. McHenry never made a move the first heat and Prince Alert won it in easy fashion. He then sold for 2 to 1 against the entire field. The moment had arrived for Coney's star to reach its ascendancy and McHenry was not slow to take advantage of the opportunity. Prince Alert sailed away in the lead, with Free Bond at his side and Coney at the latter's wheel. The quarter was in :30½, the half in 1:00½, and the three-quarters in 1:31½. The Alert horse was flying a 2:00 clip himself, but McHenry sat down on Coney and made his drive. The black fellow answered the summons like a cyclone and was soon catching Prince Alert at every stride. The grandstand rose to its feet as one man and watched the duel between the two hopped kings with breathless anxiety. At the distance Coney's nose showed in front and from there home McHenry began taking him up and he finished in 2:02½, merely jogging. It was said at the time that no horse had ever paced so fast a mile and finished so easily. Prince Alert and Billy Andrews lead to the stretch, where Coney passed them and won the next heat and race in 2:04½. That was the day of Coney's triumph. The critics who had been terming him soft hearted and unreliable changed their tune and at once proclaimed him a star of great magnitude. He followed that up by two easy victories at Columbus and Olean, N. Y. At the former city he won the 2:07 pace in 2:06½, 2:07 and 2:05½, and at Olean beat his stablemate Anaconda in an exhibition in 2:08½ and 2:10½ over a half-mile track. In the latter race he was driven by Billy Andrews. But at Glen Falls he passed into a partial eclipse, for he acted very bad at the score and was finally sent away on a standstill break. Although he paced fast the distance was too great and he got the banner. He was then laid up for a few weeks, making his next appearance at Hartford, against Prince Alert and Indiana. The race was supposed to be between Alert and Coney, but the Prince was sick and to the surprise of the talent the rank outsider Indiana

won, with Coney second the last two heats, in 2:05, 2:04½ and 2:08. At Terre Haute, Coney was driven by Edwin Gaylord, of Denver, in a successful effort to lower the world's record to wagon for amateur drivers, at the time held by Mr. C. K. G. Bilings, with Free Bond by a mile in 2:04½, and succeeded by stepping one in 2:03½. He also made two starts at St. Louis in match races. The first of these he lost to Joe Patchen in 2:05 and 2:04½, but two days later beat his stablemate, Hettie G., in 2:05½ and 2:05½ to wagon. His last race was at Los Angeles, Cal., where he won a \$2,000 free-for-all, driven by Johnnie Blue, from Little Thorne 2:07½, Anaconda and Clipper 2:06, in 2:09½, 2:08½, and 2:08.

Thomas E. Keating had died during the 1900 meeting at Lexington and James Butler concluded to sell the bulk of his horses as he had difficulty in securing a man to take Keating's place as manager of his racing stable. The horses were sent to the Midwinter sale. Coney elicited spirited bidding and brought \$4,100. His career that year opened brilliantly, but was not sustained. He was driven by Andy McDowell and started but twice—at Detroit and Cleveland—finishing second and third. The free-for-all field at Detroit that year was made up of Anaconda 2:03½; Indiana 2:04½, and Coney. Anaconda, "the snake horse," was the favorite, but for a while Coney made his backers feel uneasy. Indiana drew the pole, but when the word was given Coney took it at once and waltzing over to the quarter in :29½, the half in 1:00, the three-quarters in 1:31½ and home in 2:02, equaled the world's record for a pacing gelding and lowered the Grosse Point track record. Anaconda tried to catch him, but failed. The clip in the second heat was even faster. Anaconda was in hot pursuit of Coney and they were at the quarter in :29. Down the back stretch Anaconda kept gaining and at the half in :59½ Coney became dizzy and made a bad break. By the time he had caught Anaconda was far in front, but as neither Indiana nor Connor could force Anaconda out McDowell tried again with Coney. He cut down the long lead to two lengths and then gave up the task, Anaconda winning in 2:02½. Again in the third did Coney try to keep foot with his rival, but it was no use and he tired badly, Connor beating him for the place and Anaconda winning in 2:05½. At Cleveland he showed only flashes of his speed and won third money to Anaconda and Connor in 2:06 and 2:08½.

Coney did not start in 1902. In 1903 he made but one start and that was at Cleveland. He was but a shadow of his former self and in no condition to race. During the race he bled badly and was distanced by Dan R. and Anaconda in 2:05½. His next appearance at the races was in Dakota early in June of 1904. His campaign also extended into Nebraska, but it was not a success as out of five races he was fourth three times and unplaced twice. In 1905 he also started three times over the Nebraska bush tracks and was second twice and third once. In 1906 he was matinee in Illinois and in the spring of 1907 was purchased at the Indianapolis sale by A. H. Merrill, of Danvers, Mass., and taken to New England, where he died. A complete recapitulation of his career shows that he started in thirty-three races, won ten, was second in ten, third in two, fourth in four and seven times unplaced, winning \$11,820.

Such is the story of Coney. Fast as he was it is probable that had he not been raced during his four-year-old season before he had recovered from the effects of his illness, he would have at least touched the 2:00 mark. During his career on the Grand Circuit he was always a sensation and caused the bettors many an anxious moment. But now all is ended and the great pacer has gone the way of all things mortal. "After life's fitful fever he sleeps well."

CHICAGO HORSE MARKET.

As the spring approaches, says the Breeders' Gazette, the tone of the horse market improves. Never in the history of the trade in the West has there been such an insistent inquiry for farm workers. Not only has this demand developed unprecedented proportions, but it has begun much earlier than usual and more farmers are visiting the cities in person to make their selections. In some instances farmers in a locality have pooled their money and sent representatives, taking carloads. This early purchasing is very sensible indeed, but it is quite plain that as February passes the farm demand must assume much larger proportions. This certainly does not look as though there can be much of a surplus concealed in the breeding districts. Another feature of the trade just as present is the number of farmers who are seeking to buy second-hand horses that have been used in cities. Carload after carload of these animals, all more or less sore footed, has gone into the country and at prices not much lower than first cost in the rural regions. The cessation of activity in teaming circles during the last three months of last year threw many good workers onto the market. The big teaming concerns, always eager to buy "hard" horses accustomed to city feed and life, snapped up the better offerings of this kind quickly, leaving only the sorer sorts to go back on the land. Prices are advancing all along the line, and no one would be surprised to see them back on the old high level by March 1st.

The Stallion Number of the Breeder and Sportsman, out next week, should be read by every horse owner.

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

REDWOOD PARKS AND FOREST RESERVES.

One of the most public spirited gifts ever made to the Government has come from William Kent of Chicago, who has just deeded to the United States 295 acres of primeval redwood forest on the southern slope of Mt. Tamalpais, about six miles from the city of San Francisco. The land was deeded to the Government with the approval of Forester Gifford Pinchot, Chief of the United States Forest Service. The papers have now gone to the Secretary of the Interior and a proclamation declaring the canyon a National Monument will be signed at an early date.

This means that more of California's redwood giants will be saved for the scientific study and pleasure of the whole country, in fact, the whole world, for the great sequoias are only found in the Golden State. This grove given to the Government by Mr. Kent is one of the few tracts of redwood forests to be found in its natural state in California to-day. The land is said to have cost Mr. Kent \$47,000 some years ago, but its stand of redwood timber alone is now valued at more than \$150,000 on the market.

The canyons of Tamalpais, which drain into San Francisco Bay, were cut clean years ago, the redwood obtained from them went into the construction of the old San Francisco. The giants on this new reserved tract, to be known as "Muir Woods," escaped the axe, however, chiefly because the outlet is on the ocean side instead of the bay side, and also because the various owners of the land have for sentimental reasons jealously guarded the timber from harm or destruction. Modern methods of logging would make short work of the timber, and would besides put a handsome profit in the hands of the owners.

It is the intention to name the National Monument "Muir Woods," after John Muir, the noted naturalist. The giants of Redwood Canyon will now be given permanent protection by virtue of the act of June 8, 1906, which provides that objects of scientific interest may be declared National Monuments for their preservation and protection. This 295-acre tract will be a pleasure ground as well as a place for scientific study for the people of the whole of California, for within a radius of 52 miles of the canyon two-thirds of the population of the entire State are centered.

The chief reason for the permanent protection of the land by the Government is that there is no other redwood grove in the whole world more accessible to so many people. The canyon is in absolutely primeval condition, not so much as scratched by the hands of man. It lies within an hour's ride of San Francisco, at the very doors of hundreds of thousands of people.

So long as the land remains in private ownership there is always danger that the trees will be attacked, and Mr. Kent feared this, but as a National Monument they will be safe for all times. There are, of course, many finer stands of redwood in California, but there are no typical groves owned by the United States, nor are there any which might be acquired by the Government except at great expense.

Originally this land was part of the old Spanish grant, Rancho Sausalito. Mr. Kent purchased the land some years ago for a sum said to be about \$47,000. To insure the preservation of the redwoods for the instruction and enjoyment of all the people for the years to come, he has now deeded the tract to the United States as a gift. The largest redwoods are eighteen feet in diameter at the butt and will approach three hundred feet in height, rising with perfectly straight and clean stems. As none of the big trees have been cut, their age is, of course, somewhat problematical, but it is safe to say that the veterans have stood from one thousand to fifteen hundred years.

The total stand of redwood, roughly estimated, is about 30,000,000 feet, with some 5,000,000 feet of fir and a very considerable amount of tanbark oak. The redwood alone, at a fair valuation has a market value of \$150,000, as it stands. Except for a narrow strip of brush along the east border and a fringe along the southwest line, the whole canyon is covered with a dense forest growth. The stand is heaviest along the creek and on the lower slopes, becoming poorer above. Redwood is the dominating tree, towering high above everything else and forming fully three-fourths of the whole forest. Douglas fir is next in importance, and scattered over the entire tract are all the various hardwoods common to the region, chief among which are the numerous oaks, madrone, alder, maple and mountain laurel, all of which form a kind of dwarf underwood to the lofty redwood and fir. The redwood occurs both in big and small groups, and by single trees, while the other species are sprinkled throughout.

The destruction of redwood by lumbering has been so rapid in the last decade that it is now only a question of years when the original growth will have wholly disappeared. Its extraordinary scientific and educational value, along with the fact that it is

a pleasure ground for all of the people who live in or visit this part of California, makes the wood an ideal National Monument.

In response to a recent rumor that many of the Big Basin redwood trees were being cut down and other damage being done in this magnificent public domain, the San Jose Herald sent a special correspondent who visited the State Park at Boulder Creek recently, with a view to ascertain the truth of the reports that "the woodsman's axe threatened the big trees and action on the part of lumbermen threatened to rob the park of its interest."

The writer's story states: "As we sped down the hill into Camp Sempervirens, we met the Warden, S. H. Rambo, and Park Guardian J. Creed, and our credentials presented to the Warden gained us every facility, that we might present to the readers of the Herald a clear, unbiased statement of actual conditions and the necessities arising that created them. The woodsman and his axe were there, but, unlike the ruthless slaughter of the average woodcutter, here a different system prevails. Each axe that flashes its shining blade, each saw that steadily cuts its swath, is guided by the hands of workmen whose every move is under the personal direction of the Warden.

"Not a tree is being cut except those withering and useless, a constant menace to life and limb; and the dead trees, splendid specimens of the Sempervirens, towering hundreds of feet in the air, black, gaunt and limbless, stripped of their foliage until like huge darning needles they pierce the sky, are carefully exempted from the woodsman's axe. No live standing timber is being cut, except in two or three instances where they lean dangerously over the road or camps, and the safety of visitors and campers demands their removal.

"At Camp Sempervirens, a beautiful spot, aptly chosen by A. P. Hill of San Jose as the camping place for the Sempervirens Club, is where the woodsman are now located. Five years ago, when I was there with the Sempervirens, this spot was the admiration of all. Two years later fire had left naught but the blackened trunks of the forest monarchs, set in an ash-begrimed waste.

"The fire raged with terrible fierceness in this particular locality, and, seeking an explanation from old woodsmen and forest fire-fighters, we found it was owing to the vast accumulation of limbs, dead and rotten wood, shavings, slabs, logging and waste material left lying on the ground by shake, post and tie makers. In some places these piles of debris were ten feet deep, and so covered by underbrush and new growth as to be entirely concealed from view. Vast quantities of this material lay on the ground under the trees in the vicinity of Camp Sempervirens for years, with never an effort to remove it. Dry as tinder, it became a scorching, searing fire that swept the trees from ground to sky line, denuding them of every vestige of foliage and killing many; and there they stand to-day, mute but eloquent witnesses of misdirected forestry work. In many cases the thick redwood bark saved the heart of the tree, and slowly the frightful scars of the fiery holocaust are being concealed by a graceful drapery of young shoots from the trunk that will in time develop limbs.

"To prevent a repetition of such destructive fires is the object of the present operations within the park. Park Warden S. H. Rambo said: 'No contract has been let for burning over the area of the park. No cutting is allowed where it will endanger standing growth, such as madrone, oak, lilac, azaleas, the graceful huckleberry, ferns and other natural coverings of the ground. On the other hand, the accumulation of dead growth, limbs, tree tops and entire trees that have been shattered and riven by flame and decay will be worked up into wood, and the debris burned. Where this burning is intelligently done, no damage results to other growth, and the following spring the scar of ashes is covered by Nature's green coating of ferns and trailing vines. By these means we hope to protect these beauty spots, such as Camp Sempervirens and the like, from other destructive visitations by fire, and, incidentally, in certain localities, provide additional camping grounds. No lumbermen are in the park cutting out the timber; and such ruthless, wanton destruction as their operations entail will not under any possible conditions be tolerated, but at all times the natural beauty of the park will be conserved and encouraged to its highest point of development, ever keeping in view the fact that this vast playground has been set aside by the State for the pleasure of the whole people.

"And in the fire-swept gulches and on the barren denuded slopes of the hills every chance will be given the new, oncoming undergrowth to re-carpet and restore to its original primeval beauty the glories of this vast forestic panorama.

"W. M. Elsom, who has the contract for cutting up the dead and down timber in the Big Basin State

Redwood Park, laughs at the report that good trees are being cut down in California's famous park, the pride of Santa Cruz county.

"The Sempervirens Club of San Jose, which made the park its special care since it was bought by the State a number of years ago, has been investigating the matter, and Mr. Elsom is curious to know how this report, like so many false rumors, got abroad. Said he:

"There is not a tree being cut in the park except those that are marked by the Warden as thoroughly killed and useless. There are a few dead trees which have fallen or are leaning against live trees, and you may be sure that Deputy Warden Creed, who is a thorough woodsman, would never mark a tree for cutting unless it was dangerous to keep it there.

"If the Sempervirens Club would come in full force to the park, I would be delighted, and I'm sure that they would be pleased with the work that has been done. I'm just as much interested in preserving the beauty of the park as anyone, for I take hundreds of tourists to the park every year in my livery business.

"The taking out of these trees not only prevents fire from spreading, but will enable the fire fighters, in case there is any fire in the surrounding country, to get from one ridge to another with wagons and teams.

"Creed knows trees as well as any member of the Sempervirens Club, and he loves trees and wants to preserve them. I don't believe you could offer him any inducement to mark a tree that shouldn't come down. I don't believe there is anybody who would attempt to get him to do such a thing. The Sempervirens Club can rest easy. We're only cutting up the dead and down timber, and the park will be better for it."

A decision of great importance not alone to this State, but to every section of the country containing forest reserves and game laws was unanimously arrived at during the forest rangers' sessions at Santa Barbara, January 29th. It is that the reserve men will in future decline to act as game wardens, and that each county must appoint its own special officers for the purpose of enforcing local or State game ordinances, without looking to the rangers for direct assistance, although it was the sense of the meeting that there would be no objection to acting indirectly in co-operation with properly appointed game wardens.

The impression has prevailed from the very initiation of the service that the work of game warden was practically part of a ranger's duties. The regulations say nothing of the sort. It is true, the service has in the past shown a willingness to assist in enforcing the game laws, and accepted appointments as deputies under the State Fish Commissioners, but for various reasons which were fully threshed out during the rangers' sessions they will do so no longer.

In the first place, if the rangers are to keep an eye on the hunters it keeps them hopping, and it will be practically impossible to do anything else at the season when they are most needed at their proper duties of patrolling to guard against fires, keeping up the trails, seeing that the ranges are not overstocked and so on. In the second place, experience has shown that the rangers can make more enemies to the square inch acting as game wardens than in any other known manner. Such unpopularity seriously impairs their efficiency.

The next matter in point of consequence was the attendance at the sessions of President Eastman of the Santa Barbara Stockmen's Association. The regulations require that if any stockmen's association exists in the locality, a representative shall be requested to attend the rangers' meetings. Mr. Eastman is manager of the Sisquoc Cattle Ranch, which not only has large holdings of patented land, but also a permit to run cattle on a portion of the reserve. This portion extends up the Sisquoc Canyon clear to the summit of Big Pine Mountain.

Mr. Eastman addressed the meeting, expressing his personal appreciation of the work of the forest service, and assuring it of the support and hearty co-operation of his association. The value to the country in the preservation of brush and timber Mr. Eastman said could not be estimated in dollars. But the great and signal benefit of the reserves from the association's point of view lay in the fact that the rangers set a limit to the depreciations of sheepmen and put down any trespassing on the part of these undesirable denizens of the stock world with a stern hand.

Discussions brought out the fact that no sheep are allowed in the Santa Barbara reserve save in a portion of Kern county, lying northeast of Mt. Pinos, on the extreme northern extremity of Ventura county. Here there have always been several Basques, who used to get periodically roped and dragged around the ranges they invaded with their flocks by exasperated cattlemen before the reserves were created.

A curious regulation in connection with grazing rights was brought to light in the requirement that the rangers watch those who have permits and see that they salt their cattle. Now that regulation, as many rangers in this reserve testified, was evidently drawn up in Washington without knowledge of conditions existing in California and the Santa Barbara reserve in particular. Natural salt licks abound on the reserve, and the creeks are lined with alkali that in many places forms a crust half an inch thick.

A RE-HABILITATED HUNTING GROUND.

Isolated and remote from the whirl and noise of civilization is the Elk River Valley, in the southeastern part of the Kootenay District of British Columbia, northeast of Spokane, which to-day is declared by seasoned sportsmen to be one of the most prolific and varied big game ranges on the American continent. Elk roam the valley in bands of hundreds, and beavers have colonized by the thousands. This is due largely to the restrictions adopted by the Provincial Government, and the excellent grazing range afforded. Elk and beaver have been protected since 1905, and the close season will continue until 1911.

R. L. Laird of Spokane has explored parts of the valley. He declares that the measure of protection afforded the big game in the preserve has not been half-hearted; in fact, he adds, it is the belief of Government officials, guides and others familiar with the district that the law has been strictly observed, with the result that the deer, elk, bear, goats, mountain sheep, beaver and other fur-bearing animals have increased at so rapid a rate that they are to-day probably more abundant than at any other period within the last half-century.

The valley stretches eight to ten miles wide and is abundantly watered by the swift Elk River, which is literally alive with the gamest trout that ever fought for the angler's fly. On the uplands are thousands of acres of grazing land, covered with a thick growth of grass, resembling the prairie wool, which makes the cattle ranges of Alberta and Saskatchewan unrivaled, horses preferring it to timothy. This grass cures itself and affords an ideal range for elk, deer, goats and big-horn sheep.

For countless years, the valley of the Elk River was the famous hunting ground for Indians, who annually gathered there to restock their larders for the winter. When the white men arrived and began their usual tactics with regard to the elk and beaver, the game dwindled rapidly and there was grave danger of the extinction of both varieties. Realizing this, the Canadian Government declared a long close season and the game obtained a fresh lease of life.

California Rod and Reel Club.—The Rod and Reel Club rounded out the first year of its prosperous existence last week with an annual meeting, at which officers were elected and matters put in shape for the coming season.

The new officers elected are: E. L. Hedderly, president (re-elected); E. E. Salyer, vice-president; Roy Shaer, recording secretary; H. W. Coomber, treasurer.

President Hedderly in a brief address outlined the plans for the coming season and reviewed the work of the past. The club has been a success in every way and has a constantly growing membership.

A committee was appointed to confer with David Starr Jordan and learn from him when it would please him to meet the club at a dinner, to be given in his honor at some future date. Among those on the committee are Judge H. H. Rose, Max Loewenthal, O. R. W. Robinson and Prof. Charles F. Holder.

Many subjects of interest to the club were discussed in a general way.

The club is in a very prosperous condition and has a membership of about 250, which is almost double the number on the list at the last annual meeting. About a dozen new members were taken in last night. There were some preliminary arrangements talked of for the annual fish tournament during the summer, but nothing definite was decided upon. It is possible a club-house will be erected this year and this subject will be fully discussed at the next meeting, to be held in about a month.

A San Antoine Idyll.—Charley Landresse is responsible for the following, overheard on the San Antoine recently:

Willie Heelygrass, "How's the fishing?"
Garge Hooks, "Good!"
Heely, "Catch anything?"
Hooks, "Nope, ————!"
Heely, "Then why do you say its good?"
Hooks, "It must be, for the fish are all there yet."
Landresse and pardner laughed so much that they missed the train and stayed over night in the chicken metropolis.

Fish Law Violated.—A reliable report comes from Marin county that the proprietor of a hotel at Camp Taylor in making a swimming pool in Lagunitas creek neglected to put in a fish ladder as required by law. Fish recently were unable to get above the dam. This is a matter that the Fish Commission should take up at once.

That portion of the Chamberlain tract upon which are located the Cordelia, String, Fair and President ponds, which was recently purchased by Louis Titus from the present owners of the entire tract, has just been leased to the sportsmen who formerly comprised the Cordelia Club. The members are Charles W. Kellogg, Capt. H. F. Portman, W. B. Tubbs, W. B. Bradford, Dr. George E. Davis.

A. K. C. (INCORPORATED), VICTORIOUS.

The internecine troubles of the American Kennel Club were brought to a close January 22d, when the administration scored an emphatic victory over the Ashland House Committee by electing eighteen members of the arbitration committee, against two elected by the rival faction. It was a complete vindication for August Belmont, the president, and his associates on the board, states the New York Times. The arbitration committee, which will adjust the differences between the rival factions, is composed of thirty members of the club. The administration will have twenty-three votes and the Ashland House Committee seven. These include the three members elected two weeks ago, who were nominated on both tickets.

After the vote was announced the tellers agreed to appoint the lawyers representing each faction a committee to agree upon a date to call the arbitration committee together to organize and make a final disposition of the policy of the club. According to the terms of agreement between the factions, the arbitration committee will meet as soon as possible and elect a chairman and secretary. A mail vote will then be taken of the entire committee to determine whether the club as it now stands is properly incorporated, or whether it will be for the best interests of the club to reincorporate, and if so, upon what lines.

Should the arbitration committee decide that the club should be reincorporated, it will have full power and authority to do so and adopt a constitution. It will also elect a Board of Directors and take over the assets, effects, and name of the American Kennel Club. An effort will be made to secure the recommendations of the committee before the annual meeting of the club, which takes place February 13th.

There is a difference of opinion as to the future of the policy of the club. The administration asserts that it is a complete, sweeping vindication for it. The members of the Ashland House Committee regard the result of the election as a triumph for their long-continued efforts, and say that the club will positively be reincorporated. They admit that they did not expect to win the majority of votes at the election, but declare that the sentiment among the members of the arbitration committee is overwhelmingly in favor of reincorporation. It was denied by several of the Ashland House Committee that there was any opposition to the administration of the affairs of the club, but that the fight was waged entirely on the method adopted to incorporate the club.

The election board met at 11 o'clock on the 22d at the club offices, 55 Liberty street. Pinkerton detectives were stationed at each of the doors leading to the committee room, where the ballots were opened and counted. At the last minute it was decided to make the session a closed one. Laurence M. D. McGuire and Howard Willets acted as tellers, Attorneys G. H. Taylor and R. D. Murray watched the interests of the American Kennel Club and the Ashland House Committee, respectively, and Secretary A. P. Vredenburg opened the ballots.

The task was a tedious one, and after nearly three hours' labor seventy-six ballots had been counted, with the vote nearly even. The final ballot was recorded shortly after 5 o'clock. A total of 146 ballots were opened, which is five in excess of the actual club membership. This was due to both clubs and delegates voting in several instances. Where this happened the club vote received the preference over that of the delegate. George Greer of Rye, N. Y., received two complimentary votes, the only member outside of the regular nominations to receive recognition. Thirteen votes were thrown out, making a total of 135 votes counted. Samuel N. Cutler, who was on both tickets, headed the list with 125 votes, and George Lauder Jr., and John G. Bates, both of whom also received the double nomination, were tied for the second highest vote with 122. President August Belmont and Winthrop Rutherford led the candidates, who were divided by the strictly party line, each securing seventy-five votes. W. W. Stettheimer and C. F. Drake were the only candidates of the administration to meet with defeat, each man receiving sixty-three votes. J. Sergeant Price and W. C. Codman were elected from the Ashland House Committee, with sixty-four votes each, securing their election by the narrow margin of one vote over the two defeated administration candidates.

It was reported during the balloting that the members of the Ashland House Committee would secede in the event of defeat at the polls and organize a new club in opposition to the American Kennel Club. This was denied by the leaders of the opposition movement, who stated that they would abide by the result. After the election it was announced that the Ashland House Committee, having accomplished its object, would formally disband in a few days, but that, should the arbitration committee decide that the incorporation was legal, a minority report will be filed. The result of the vote follows:

Administration.		Ashland House.	
Name.	Vote.	Name.	Vote.
August Belmont	75	J. Sergeant Price	64
W. B. Emery	70	R. Stewart Edson	60
Edward Brooks	72	W. C. Codman	64
C. W. Keyes	68	D. Murray Bohlen	61
J. W. Appleton	70	H. Johnson Jr.	59
George B. Post Jr.	70	J. B. Thomas Jr.	60
Thomas Cadwalader	68	W. N. Kimball	56
Winthrop Rutherford	75	M. N. Palmer	61
James Mortimer	73	Richard H. Hunt	61
W. Rauch	66	W. L. Barclay	56

J. H. Brookfield	66	I. W. Warner	55
C. F. Drake	63	Dr. M. A. Stivers	54
Chetwood Smith	65	S. W. Groome Jr.	55
H. K. Bloodgood	67	Dr. O. H. Albenesius	56
S. Van Schaick	67	W. S. Gartner	56
H. H. Hunnewell	69	James Jenkins	52
W. W. Stettheimer	63	John F. Collins	55
*George Lauder Jr.	122	George Lauder Jr.	122
*Samuel N. Cutler	125	S. N. Cutler	125
*John G. Bates	122	John G. Bates	122

*Nominated on both tickets.

An interesting fact developed during the present controversy, showing the remarkable development of the club. In 1886, when the club was struggling to retain its hold on the dog interests, Secretary Vredenburg had a surplus of \$49.15 to conduct the business of the club for one year. This amount has grown yearly, and the treasurer's report, which will be read at the annual meeting of the club, February 13th, will show a balance of \$20,640.24, with the disbursement of \$23,979.59 for the year, while the club does not owe a cent. There were twelve members in 1886, while at present there are 141 active and over 600 associate members.

DOINGS IN DOGDOM.

The pleasing report is that a large entry of dogs for Oakland will be sent from Salt Lake, Seattle, Portland and one or two from Boston. Oakland is deserving of the support of Coast fanciers.

At a meeting of the Pacific Pointer and Setter Club the following named fanciers were declared the club's official judges: Dr. L. G. Spriggs, R. H. Groves, Frank Mayer, Fred P. Butler and W. E. Chute.

The club will offer a cup for nearly every class in those special breeds at the Frisco show, and top this off with a \$50 cup for the best specimen shown.

Al Stuart is now a member of the Executive Committee, vice W. H. McKay.

The Santa Rosa bench show project, it is now reported, will not take definite form as a fixture.

Fresno is waking up, or rather, the fanciers of that beautiful city are now wide awake and are arranging the details for another bench show in the raisin county, to take place in the near future.

Oakland Kennel Club dates are announced April 7th, 8th, 9th and 10th. L. P. McConnell will judge bird dogs.

Portland will show April 29th, 30th, May 1st and 2d right after Frisco. Geo. S. Thomas is scheduled for the premier ring function.

Vancouver, B. C., will show, C. K. C. rules, May 13th-16th, closely following Seattle. Geo. S. Thomas and Major Taylor, report has it, are the judges selected.

Victoria, B. C., will hold the annual spring bench show April 1st-4th.

New Westminster Kennel Club announces the show dates for four days—May 21st-23d.

The San Francisco Kennel Club announces the spring show dates for a four-day exhibit—April 22d-25th.

At the annual meeting last week the following officers were elected for the ensuing year: John L. Cunningham, President; W. S. Kittle, First Vice-President; Lloyd Baldwin, Second Vice-President; Fred P. Butler, Secretary-Treasurer. Bench Show Committee—John L. Cunningham, Fred P. Butler.

Chas. Lyndon of Coleman, Ont., will judge all breeds. Address all communications to Fred P. Butler, Secretary-Treasurer, office 469 McAllister street, San Francisco.

Pasadena entries closed on the 8th inst.

The popularity of Nairod Kennels' Young Mahomet has increased to such an extent that Mr. Dorian has been compelled to increase his fee to \$35 in order to carry out his expressed purpose of limiting his closely. This vigorous young dog is getting remarkably big boned, vigorous youngsters, and plenty of them; and there are several now in the kennels that should be heard from before the year is out.

Mr. Frank Yarrick's good bitch Lady Swettenham recently presented him with a splendid litter from Young Mahomet, two of which (now three months' old) are cokers. The dog, an almost perfect little specimen of the true cart-horse type, is a miniature duplicate in markings and general appearance of Champion Mahomet, and the bitch (an all-white one), is equally massive, and if anything even shorter in muzzle and heavier in bone.

Dr. John H. Ruhl's nice imported bitch Tiger Flo also has a new Young Mahomet litter (the second) of six, born late in December, in which there are said to be several good ones.

The "best ever," according to Mr. Dorian, arrived January 23d in the form of a litter of five (three dogs) by Young Mahomet ex Mrs. Cawthra Mulock. Their fortunate owner considers this the greatest litter he has ever seen. The litter as a whole is remarkable in bone, substance, and general promise, but there is a brindle and white dog and a white

bitch in the lot that will not be sold. Mrs. Mulock is a splendid mother, and the puppies are in the pink of condition. This good brood bitch was sold and paid for at a good price several months ago, but owing to delay in her coming into use, Mr. Dorian cancelled the sale and refunded the purchase price. He is now congratulating himself on this streak of what he calls Nairood luck, and Mrs. Mulock has been permanently withdrawn from sale, as he is convinced that he has not her peer as a brood bitch and mother among his twenty-odd Bulldogs.

Mr. Geo. W. Ellery, president of the Oakland Kennel Club, writes that "the Oakland Kennel Club has decided on April 8th-11th as its dates, show to be held at Idora Park, an ideal place on account of its pleasant surroundings, excellent street-car facilities and grand exercising grounds for the dogs.

"I am going to New York to-day (February 5th), and will while there arrange for as many new things as it is possible to learn from our friends of the East. Shall return about the 1st of March, and our premium list will be ready for distribution soon after. The cups will be up to the excellent standard of the last show, but will be greater in number, and given free for all, no dog is barred, and we invite the whole West to make this fixture one to be remembered in doggy circles. The list of judges will be announced as soon as possible."

The office of the club is located for the present at 1491 Post street, San Francisco.

Mr. E. B. Pixley, who was largely responsible for the success of the 1907 show in Oakland, has charge of arrangements across the bay. The Oakland Tribune has offered a \$50 cup for the best "hunting dog."

Mr. J. I. Sparrow is looking after a handsome litter of nine Bull Terrier puppies (five dogs), whelped January 13th by Judge Shortall's Silkwood Ben Ali, out of Silkwood Rosamond. These pups are all white.

His good bitch Silkwood Peggy, the dam of Ben Ali, whelped on January 19th nine puppies (two dogs) to Silkwood Chaderwild, his imported stud dog.

Ch. Edgewood Jean II., the dam of many good ones, was due to whelp to Silkwood Chaderwild on February 5th.

Silkwood Mona (a sister of Ben Ali), will whelp to Chaderwild about March 1st.

The first step toward the establishment of peace on a permanent basis in the American Kennel Club was taken January 31st at a meeting of the Referendum Committee, held in the club's committee room, 55 Liberty street. Twenty-two of the thirty members were present and the best of feelings prevailed during the discussion, which lasted several hours.

According to the terms of agreement between the American Kennel Club and the Ashland House Committee, the committee met for the purpose of effecting an organization. William G. Rockefeller, New York, was elected chairman, and John G. Bates, Cedarhurst Kennel Club, secretary. The question of the advisability of reincorporating the club was thoroughly discussed, during which there was an entire absence of factionalism and a general desire shown to adjust all differences with a view to establishing the best interest of the organization. It was agreed to submit the question to a sub-committee of twelve, to be appointed by the chairman, which will draw up a report of recommendations to be considered and acted upon by the Referendum Committee at its next meeting. This delay will prevent the subject being finally adjusted at the annual meeting of the American Kennel Club, which takes place the middle of this month as a mail vote will follow the acceptance of the report of the sub-committee.

Those in attendance at the meeting were: William G. Rockefeller, New York, chairman; John G. Bates, Cedarhurst Kennel Club, secretary; August Belmont, New York; Winthrop Rutherford, Allamuchy, N. J.; Wwright Moore, New York; William Rauch, Westminster Kennel Club; Lawrence M. D. McGuire, Irish Setter Club; Edward Brooks, Ladies' Kennel Association of Massachusetts; James W. Appleton, National Beagle Club; Chetwood Smith, New England Beagle Club; W. B. Emery, New England Kennel Club; Samuel R. Cutler, Revere Kennel Club; Howard Willets, San Mateo Kennel Club; Marcel A. Viti, Spaniel Breeders' Society; James Mortimer, Ladies' Kennel Association of America; B. S. Smith, Welsh Terrier Club of America; J. Sergeant Price, Jr., Atlantic City Kennel Club; H. H. Hunnewell, American Fox Terrier Club; F. H. Osgood, Boston Terrier Club; J. H. Brookfield, Airedale Terrier Club of New York, and H. K. Bloodgood, American Spaniel Club.

The special prizes and cups to be awarded at the coming bench show of the Pasadena Kennel Club, on February 14th and 15th, were arranged on the evening of January 31st. One of the features will be several handsome silver medals and a cup offered by the Boston Terrier Club of America. This will be the first time that this famous dog club ever offered specials in any bench show west of the Mississippi River. The list as completed then is as follows:

The President's trophy (J. B. Vandergrift) for the best dog or bitch of breed in the show.

The Arroyo Kennels' challenge cup for the best dog or bitch born in California. This cup must be

won three times at bench shows of the Pasadena Kennel Club. It was won in 1907 by Mrs. George E. Montieth with the Bull Terrier bitch Judy Monte.

Hotel Green cup for the best dog or bitch owned and shown by any non-resident exhibitor.

R. C. Halsted Company offers a cup for the best rough-coated St. Bernard.

Pasadena Kennel Club offers cups for the best Great Dane, Wilfhound, English Foxhound, Pointer, best Setter other than English, best Spaniel other than Cocker, black Cocker Spaniel, Dachshunds, for the best Collie of opposite sex to winner of Tod Ford's cup; Dalmatian dog or bitch, Bulldog, Bull Terrier of opposite sex to winner of the Pasadena Hardware Company's cup, French Bulldog or bitch, Fox Terrier of opposite sex to winner of Fred Herr's cup, Wire-hair Fox Terrier of opposite sex to winner of Freeman A. Ford's cup, Irish Terrier of opposite sex to winner of H. M. Robinson cup, best English Toy Spaniel and cups for the veteran, champion, variety, brace and team classes.

Hotel Maryland offers cup for best American Foxhound, Pasadena Ice Company for best English Setter, Kendall & Smith for best red Cocker Spaniel, Tod & Ford for best Collie, Nordlinger & Son, Los Angeles, for best Bulldog, San Gabriel Valley Bank for best Airedale dog or bitch, Pasadena Hardware Company for best Bull Terrier, Brook & Feagans, Los Angeles, best Boston Terrier, First National Bank for best dog of opposite sex to winner of the former, G. Fred Herr best smooth Fox Terrier, Freeman A. Ford best wire-hair Fox Terrier, H. M. Robinson best Irish Terrier, Kingsley N. Stevens best Welsh, Skye, Scottish or black and tan (Manchester) Terrier, Popkin & Nestor best dog or bitch owned and shown by a lady.

The specials offered by the Boston Terrier Club are silver medals for the best puppy, novice, limit and open dogs, and a cup for the best brace owned and shown by an exhibitor.

The Pasadena bench show officials have announced a change in judges. It was first reported that dog-broker Bradshaw would judge all breeds. This program was evidently found so unpalatable to intending exhibitors that other and more acceptable judicial talent was secured. Arthur Bennet, for sporting dogs; James Ewins, for Bulldogs; George Fred Herr, for Boston Terriers, and G. S. Halliwell, for Bull Terriers, is now the card and a very acceptable one for the southern fancy, it is claimed.

Among the San Francisco dogs that will be sent to the Los Angeles show, February 19th-22d, are: Hon. E. P. Shortall's Silkwood Ben Ali, Dr. J. A. Wilborn's Bulldog Walsingham Roy, Judge Cook's Foxhounds Ned, ueenie, Prince Louis and two others, A. Balfour's Field Spaniels Inchkeith Billy and Chesterton Bess and Jack, a Pointer, Victor Kuehn's English Setter Malwyd Beau, Mark Manning's Lady Dorrie M., Robert Wallace's Collie Dictator, I. C. Ackerman's Humberstone Kennels' string of wire-haired Fox Terriers, W. W. Stetheimer's Tallac Kennels' string of smooth Fox Terriers, A. H. Hayes Jr.'s Bulldog St. Queenie, Robert A. Roos' Bulldog Hartford Ted, A. L. Stuart's Gordon Setter Ch. Doc Watson, George Flexnor's brace of Bull Terriers, R. H. Groves of Stockton will send St. Lambert's Phyllis, a newly imported Irish Setter. This list will be materially augmented by a number of other high-class dogs taken down south by the individual owners. Handler Al Stuart will have charge of the dogs listed above.

Geo. A. Nieborger and Alex. Wolfen will send down several Cocker entries; Wonderland Kennels will have several of their Bostons and a Bull Terrier or two on the benches.

Taking it all together, the outlook for the largest show ever held in the south is very good.

AT THE TRAPS.

Present indications point to a lively trap shooting season on the Coast for 1908.

The local trap shooting season will open on Washington's Birthday at the Ingleside trap grounds. The Trap Shooters' League announces a two days' program of diversion with shotguns at clay pigeons that will undoubtedly draw a large attendance of local experts and visiting competitors from many interior points.

The first day's schedule calls for ten events—four 15-target races, a 20-bird race for the Roos trophy, a 20-bird event for the Hunter Arms trophy, a 20-bird shoot for the Peters Cartridge trophy, following with three 15-target events.

On Sunday, the 23d, the card embraces four 15-target shoots, 25-bird matches for the Reed, Du Pont, Sorenson and Balliste trophies, and also a 20-target shoot.

Purses will be divided under the Rose system, moneys in 15-target events, 10-7-3, moneys in 20 and 25-target races, 12-8-5-3. Side pools, \$1 entrance will be optional, high guns, four moneys. Trophy winners will receive 50 cents on each entry. Interstate Association rules will govern.

Further information inquiring sportsmen can receive by addressing Clarence C. Nauman, secretary, 8-11 East street, this city.

The California Wing Club on January 29th held the club's thirty-sixth annual meeting. Clarence A. Haight was elected president, Phil B. Bekeart, vice-president; C. C. Nauman, secretary-treasurer, and Tony Prior, Frank Turner and W. W. Terrill, directors.

The initial club shoot this season will, as usual, be held on the first Sunday in March. There will be seven monthly club shoots during the year—each on the first Sunday of the month. The club races will embrace two 12-pigeon shoots at each meet at Ingleside. The board of directors will announce before the first wing shoot the amount of purses and trophies to be hung up this season. This veteran pigeon-shooting club is the oldest live-bird shooting club in the United States. There has not been a famous or noted expert with the shotgun who has visited the Coast during the club's existence but what has taken part at one time or another in the club's pigeon shoots.

The opportunity for trap shooting provided by the Channel City Gun Club at the club grounds in Santa Barbara has not been thoroughly appreciated in the past, but a vigorous campaign for increased membership promises an awakening of local interest in the sport. As a result of the campaign now in progress, it is probable that the membership of the club will be doubled, perhaps more than doubled.

At present there is practice shooting every Sunday morning, and a number of the more enthusiastic members are always on hand to test their skill. The Sunday shoots now comprise the active work of the club. With the new growth, however, there will be work at the traps during the week, and this is winning members in Montecito. All that is necessary for an hour or two of sport with the blue-rocks is for two or three of the members to pick up a boy to load the traps and go out to the grounds.

There will be an early meeting of the club at the store of the Santa Barbara Sporting Goods Company for re-organization and to outline plans. Later it is probable that a tournament will be arranged. Any one who wishes to become a member can obtain particulars from A. D. Bellman, 722 State street, Santa Barbara.

DUCK HUNTING NOTES.

Has the good duck hunting ended for the season or is it yet to come, is the question that many of the powder burners are now asking each other. At least that is what they asked after spending Sunday in the marshes and bagging but a few scattering birds. But there is a wide difference of opinion on the matter and it is left to the ducks to solve it within the next two weeks.

There were no limit bags, for instance, killed Sunday by Sacramento hunters in the grounds where they usually hunt. The birds were simply not at home and in many cases the visit of the nimrod was fruitless. The reports from all the marshes around that country tell the same tale of poor hunting and there were not many birds that made toothsome meals for Monday. A string of twenty birds was a treasure and there were few hunters who killed that number. Hence the question mentioned above.

The general excuse given for the scarcity of ducks on the preserves is the large amount of water on the overflow lands. The birds that have heretofore rested and fed on the hunting grounds have gone to the overflow where they find plenty to eat. Not only do they eat there, but spend all their idle time over the large areas of submerged lands. It is almost impossible to reach them here, for they scatter easily from one extreme of the waters to the other. But it is apparent that the market hunters have found a way of reaching them for limits have been made each day for the past week by this class of hunters. Most of the birds killed are blue bills.

The heavy storms of last week scattered the ducks badly and with the added amount of water they have not returned to the grounds which they left. A good spell of weather might result in enticing a considerable number of them back, but a stiff north wind would do the trick and drive them from the unprotected waters of the overflows and bays.

One well known hunter gave it as his opinion that there would be no duck hunting to any extent for the rest of the season and said it was owing to the general scarcity of the birds in almost every section this year. He was positive that there was no comparison in the hunting of this and last season, the latter being much the better. Another equally as experienced nimrod says the best shooting of all will come within the next seventeen days. He expects canvasback and all the big northern birds to come this way by that time and firmly believes that the last week, February 8th-15th, will afford some first-class sport on the big species of ducks.

So there is an example of the different views of the situation held by two different hunters. It is surely up to Mr. Duck to decide the merits of the arguments.

One exception to the general absence of ducks at the shooting resorts last Sunday is the result of a shoot had by members of the Empire Gun Club on the Elkhorn Slough preserve last Sunday. Ten members present nearly all got limit bags. Blue bills, in extra good condition, were most in evidence, fat mallards, sprig and teal, however, were also fairly plentiful.

A southeaster prevailing sent the birds in clouds from Monterey Bay to the shelter of the Elkhorn Creek sloughs and ponds. Among those present at the club on Sunday were: J. B. Hauer, J. Peltier, Dr. E. H. Hopkins, W. Irving, Floyd S. Judah, F. L. Houpt, F. F. Connor, Milton Pray, Bert Patrick and F. S. Chase.

THE FARM

LAMB FEEDING IN OHIO.

At the Wooster, Ohio, experiment station, B. E. Camichael has completed an experiment in fattening range lambs, and summarizing results, says:

"Neither high-priced feeder lambs nor high-priced feeds, nor even both together, render it impossible to secure profits from fattening lambs. It is equally true that neither low-priced feeder lambs nor low-priced feeds, nor even both together, insure the feeder against loss from his operations. After the feeder has done all in his power to buy feeds and feeder lambs 'worth the money' and to produce gains and finish economically, the price for which he may sell his fat lambs finally determines whether his operations shall prove profitable. The influence of varying market conditions as regards both feeder lambs and feeds is a factor in lamb feeding which cannot be controlled by the feeder. Even though it cannot be controlled, it has an important bearing upon the lamb feeding business, and it is highly desirable for the feeder to know how various market prices affect the probability of financial profit from his feeding operations.

"Since the lot which received stock food made slightly more economical gains from the standpoint of food consumed for a given gain, than the lot which did not receive it in 1905-06, and in 1906-07 made slightly less economical utilization of the food consumed, it is not possible, on the basis of these experiments, to say that stock food is either beneficial nor harmful.

"The results of one experiment indicate that lambs fed upon a heavy grain ration will produce gains with a lower consumption of feed than will lambs fed upon a moderate grain ration. The plan of the test, however, was interfered with somewhat and further work is needed before definite conclusions may safely be drawn.

"Wethers made approximately 10 per cent greater gains in live weight than did ewes. These results were very uniform in three different pens, each of which contained 22 ewes and 22 wethers.

"Data secured in both of the tests show that manure from fattening lambs has a very high fertilizing value, on the basis of its nitrogen, phosphoric acid and potash content.

"The manure from the lots fed cottonseed meal or linseed oil-meal, carried in every instance more nitrogen, phosphoric acid and potash than did that from the lots fed a grain ration consisting solely of corn. In both experiments the added value of the manure was more than offset by the increased cost of the linseed oil-meal or cottonseed meal. The increased value of the manure produced from different feeds is worthy of consideration, since market conditions might vary sufficiently to justify the feeding of linseed oil-meal or of cottonseed meal and from the standpoint of manure production alone.

"If sheep manure is to be handled by a manure spreader, it is well to supply a fairly liberal amount of bedding. It was found that when only a moderate amount was used, the manure was too solid to be handled well by the spreader.

"In all instances where medium grain rations were fed the lots fed corn alone shrank somewhat less in shipment, but the difference was very slight.

"The cost of feeder lambs and of feeds has a direct and important bearing upon the fattening of lambs. The feeder of live stock should study market conditions and should know how various changes in them affect his operations."

NEEDLE KILLS BULL.

The Nebraska Experiment Station lost a valuable animal recently in the death of Sir Skylark Johanna, the Holstein-Friesian herd bull. The animal died suddenly and upon a post-mortem examination it was discovered

that a large darning needle, which the animal had evidently swallowed several months previously was the peculiar cause of its death. The needle had worked its way to the heart and pierced the lower lobe of that organ, causing internal bleeding.

In commenting on the strange cause of Sir Skylark's death, Prof. A. L. Haecker of the dairy department gives some good advice urging carefulness in all matters connected with the handling of valuable animals.

"During the summer fly season," said Prof. Haecker, "all hands were employed making fly blankets out of bran sacks, and the work required the use of several large needles for sewing up the sacks. It seems that one of these needles was lost upon the barn floor, and, as the sweepings of each day were put into the bull stall as bedding, evidently the needle was swept into the stall, and the hungry animal took the needle in while eating his beeting. It required five months for the needle to find its way to the heart. During this time he seemed to enjoy good health and was never sick until the needle reached the vital spot, when sickness resulted. He recovered for a few days, but was again taken sick and in a few hours died.

"We find frequently on post-mortem examinations of stock that the stomach contains various articles of hardware including nails, wire, and in fact almost any metal that might get into the hay or feed. Rocks are often found the size of hens' eggs.

"It is strange, but true, that the bovine is liable to take in all kinds of things with their food, almost as a chicken would do, and in many cases these things prove fatal. It is therefore advisable to use every precaution in keeping stock food free from anything that will injure the animal if taken internally. Mangers should be made tight, and should be cleaned every day. All loose boards containing nails and bolts should be kept out of the hay field, and great care should be exercised if any repair work be undertaken in the barn or manger to see that nails are not dropped in the hay.

"Bits of wire from baled hay are particularly disastrous and perhaps cause the death of as many cattle as any of the diseases. It seems to me the time is coming when we must use some less dangerous metal for bailing hay than wire. We found a six-inch bailing wire in the stomach of the bull Skylark, along with four nails, some tacks and several pieces of lead. The veterinary who made the examination said it was a mild case, that he had often found several pounds of hardware, and that it was almost the exception not to find some dangerous metal in the stomach. We have always used great care in avoiding this trouble, and still we have this loss, and I know of many cases in this locality where people have lost valuable animals in this way."

PRODUCING EGGS FOR HATCHING PURPOSES.

Egg production is of vital interest to the poultryman, whether eggs are to be used for selling or hatching, but there is some difference in the methods necessary for producing eggs for the later purpose than the former. For selling, an egg is an egg composed of a relative proportion of yolk and white and shell, and all we are interested in is to get the greatest possible number, as that is what counts. To do this, of course, the fowls must be kept healthy and must be fed such rations as will produce eggs, and the better balanced these rations are the larger will be the yield and the smaller the expense of keeping the fowls, and we help the natural production along by occasional tonics and stimulants.

When we come to eggs for hatching purposes then we must look out and take more care. We want chicks that will be strong and healthy and not those that will "fall by the wayside" when a few weeks old.

To that end we shall select hens, not pullets, and mate them with a young but full grown cockerel, and we will feed clover, alfalfa, bran, ground meat and bones, wheat and oats with some corn at night, and give whatever roots or green food on hand.

Make the hens take plenty of exercise by scattering all grain into leaves or straw so they must scratch for it. Give plenty of warm water to drink. Mix mash with a weak lime water twice a week or put a little pulverized charcoal instead.

Give just as much variety in food as possible and the appetite and digestion of the fowls will be good, and as a consequence their health is all right and healthy breeding stock means strong chicks that will not die if a cold wind strikes them or if their feet get wet with dew.

Keep draughts out of the hen house, also dampness, so the fowls cannot take cold, and then there will be no ropy hens to transmit weakened constitutions to their offspring.

Keep the nests nice and clean so there will be no soiled eggs to be washed, thus hurting them for sitting, as claimed by some breeders, and last, but not least, gather the eggs before they are "stone cold" if possible and keep them at a temperature of not lower than is comfortable to sit in when dressed in ordinary house apparel, and we can promise good hatches and healthy chickens if the sitting hens and incubators know their business.—Coleman's Rural World.

TUBERCULOSIS IN DOMESTIC STOCK.

H. L. Russell of the Wisconsin Experiment Station, who is co-operating with the Live Stock Sanitary Board of that State with the object of eradicating tuberculosis in that State, says the dairy herds of Wisconsin may be kept free of the scourge if owners will do three things. They are:

1. Find out the actual condition of their herds by applying the tuberculin test.

2. If found free, buy in the future only tested stock or test them before admitting same to herd.

3. For young stock and hogs use skim milk separated at home, or pasteurized properly at creamery or factory.

If disease is found, reacting animals should be separated and disposed of properly and the barns adequately disinfected. In the case of valuable animals, healthy calves may generally be secured from reacting cows, if calves are separated at birth and fed on boiled milk of mother or milk from non-reacting animals. Remember the danger from tuberculosis lies in its hidden course of development, and for the sake of the herd itself, as well as for human beings consuming the products of the herd, one cannot afford to neglect taking such steps as are necessary to find out positively the condition of their herd.

There has been no little dispute as to the frequency of the disease. On this subject Dr. Russell says:

"For the past two years particularly, the College of Agriculture and the State Live Stock Sanitary Board have actively pushed the use of this test in the State. As a result, over 25,000 tests have been performed, and it has been definitely determined that the disease occurs most frequently in the older dairy regions in the south and east portions of the State. Certain counties are very severely infected, and in some regions it has been found that the creamery by-products are actively spreading the disease far and wide. In nearly 1,000 different herds tested under the auspices of the College of Agriculture over one-third were found to contain the disease. The percentage of diseased animals is much less than this, as in many cases infection was recent and only one or two were involved at time of examination, but unless immediate measures are taken to check the spread of the disease, the whole herd thus exposed will gradually decline. The newer dairy regions do not as yet contain so large a percentage of affected animals as the older sections, but with infection already established it will only be a short time before the conditions are as bad in this region as elsewhere."—Live Stock World.

FILES CURED IN 6 TO 14 DAYS.

PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50 cts.

THE ADVANTAGES OF BEAUTY.

Whenever a trotter of great reputation appears in competition with others of less fame yet better conformation, the plain horse suffers by comparison and only on the race course is he supreme, says the Stock Farm. Numerous instances could be named of high-class trotters being shown either at fairs or larger exhibits against those especially qualified by reason of their beauty of form to win a premium and the famous race horses have frequently felt the ignominy of being excluded from the final exhibit. It will be remembered that Borlma, fresh from his victories in classic events, was shown at Madison Square Garden in the roadster class, and as he was plainer in appearance than others in the same class, he was forced to the fate that has befallen so many others and received the gate. It was, of course, bad judgment to have placed such a horse in such a position, yet how much more desirable Borlma would have been, how much greater his value, if after leaving the scene of his many victories he could have aroused the admiration of the spectators by his grace, his beauty of form and his quality. The trotter has so many uses and fits well so many places that if he is produced with a view of giving to the world in addition to a stake winner a type that is useful as well as ornamental, his value becomes just that much greater. Silko never could have been sold for anything like the price he realized had he not been very nearly a perfect model, for his new owner would not care to run the risk of being ridiculed by showing in England anything in harness that lacked beauty. Breeders would do well to remember that coarse, defective, misshapen stallions are almost sure to reproduce themselves, and the more numerous the defects, the more undesirable is the foal for any purpose other than that of racing. In this era of extreme speed any youngster who is not built on lines that indicate the possession of strong constitution, perfect balance and some degree of quality, cannot withstand the task that is now put to colts inheriting extreme speed.

CONGESTED UDDER.

When it is noticed that the udder is attacked with congestion, which soon runs into the inflammatory stage, characterized by increased heat, swelling, tenderness, etc., prompt action should be taken. In full, fat, heavy milkers it is wise to administer a full dose of cathartic medicine (epsom salts, one pound; fluid extract of goldenseal and fluid extract of ginger, of each one-half ounce; hot water, one pint. Apply warm fomentations to the udder for at least one hour, twice a day, and after each bathing with warm water rub the udder gently with a liniment made of camphorated oil, eight ounces; extract of belladonna, one ounce; mix. Draw off the milk four times a day, carefully using a teat syphon if necessary. When these precautions are taken in time, as a rule, it saves further trouble. When neglected—pathological (diseased) changes—the products of inflammation are liable to follow, and there appears to be no end to the trouble, inconvenience, and loss that usually is experienced in such cases. In the advanced stages it is so difficult to comprehend the real condition of the parts from a written statement, which is so often devoid of necessary details, that is not always an easy matter to describe the necessary treatment.

If one or more of the quarters of the udder are indurated (hard), causing some pain on pressure, apply warm fomentations, and if supuration follows open freely with a sharp knife.

There is rarely any hope of restoring the milk secretion to a normal quantity, and the better way is to let the cow go dry as soon as practicable. What the cow will amount to in the future as a milk producer it is impossible to predict. Much depends on the present condition of the udder and the chances of its being restored to a normal state.—Dr. Tuthill.

FEEDING PRIZE CATTLE.

A reader giving no name or address writes: "How are prize winning show cattle fed? I am told they are fed much stock foods and such concentrates as oil meal. Is this true?"

Dan W. Black, of Ohio, and who had a car of prize winners at the recent International gives his methods of feeding as follows: "To describe or lay down a positive rule as to how and what rations to feed a load of high class cattle is one of the impossibilities. I have fed quite a number of prize winning loads, and no two have called for the same treatment, as conditions in regard to grass and feed are so different that it is impossible to make a specified rule to go by. A feeder must study his cattle, feed and weather conditions for each lot he undertakes to mature. The load I showed at the recent International was the short aged, blocky end out of a short aged drove of calves. In other words, the cutbacks out of the famous J. A. herd bred by Mrs. Cornell Adair, Palosuro, Texas, Mr. Richard Walsh, manager. I have fed these cutbacks for a number of years and the improvement has been very marked. I consider them today up-to-date and modern Herefords. I have all breeds as good as I can get.

"The load I showed at the recent International arrived at Lyndon, Ohio, December, 1905. These calves were very young, and on account of long, hard shipping, were badly shrunk. The entire lot of 100 would average less than 300 pounds each. They were placed on corn fodder, had a good shed for shelter with access to straw stack, of which they ate a great deal. They were started on ground corn and cob meal, gradually worked to three pounds per day. This ration was continued until March 1st, when the calves were turned to grass. They ran on clover and timothy through the summer and bluegrass in the fall until the latter part of November, no grain being fed these calves during the entire grazing period. The latter part of November the calves were started on shock corn and were never fed on full feed during the entire winter, but just fed a growing ration and right here let me say I have found by experience that the full gaining capacity of the steer at certain stages of his career does not require every mouthful that can be stuffed into him. Young cattle of good breeding and thrift will gain as much per day on a growing ration at certain periods as cattle that run to a self-feeder, and eat twice as much grain."—Dan W. Black in Stock Farm.

DIFFICULTIES IN CHURNING.

Sometimes after the churn has been in operation for half an hour it is noticed that the cream has foamed up in the churn, and often the butter will not come after several hours of churning. If cream is churned at an extremely low temperature, the agitation of the cream serves to incorporate bubbles of air in the cream and the foamy condition results. When this takes place, little can be done except to allow the cream to stand for several hours and then gradually warm it up a few degrees before again starting the churn.

The difficulties considered thus far have been due either to some improper condition or treatment of the cream. There are some difficulties in churning the cause of which is due to the handling of the cow which produced the milk. Two important conditions can be cited. Cows on dry feed; cows in latter part of their milking period.

In winter when the cows are on dry feed, the butter fat in the milk is harder than when the cows are on green feed. Difficulty is often experienced in churning the cream from such milk because the fat is so hard it will not mass together into butter. The remedy in this case is to feed as much succulent food as possible during the winter. Silage and roots are excellent for this purpose.

Cream from cows in the latter part of their milking period is often difficult to churn. The milk at this stage seems to be thicker and more condensed in comparison with the more liquid

milk just after the cow becomes fresh. The cream from this condensed, viscous milk is often hard to churn because the fat cannot move in it very freely, so a longer time is required for the particles of fat to be massed into butter during churning.

After the butter comes, another difficulty is often encountered. The butter comes in very small hard granules and refuses to gather in anything like a reasonable time. This condition may be caused by either churning at too low a temperature, or churning too thin cream. It is best remedied by removing about half of the buttermilk, when the granules should gather after a few more revolutions of the churn. If this treatment is not sufficient, the fat should be warmed by adding to the buttermilk a small quantity of milk or water at a few degrees above the temperature of the buttermilk. Care should be taken in adding this water, for if the fat is warmed too much, the texture of the butter will be injured. As little milk or water as possible should be added to the buttermilk in order to warm the fat, as this makes the buttermilk thinner and thus retards the gathering of the butter.—H. S. Wayman, Instructor in Dairying at Missouri Agricultural College.

HOW TO EXAMINE A SICK ANIMAL.

[By Dr. David Roberts, Wisconsin State Veterinarian.]

First take the temperature of the animal by placing a self-registering veterinary fever thermometer into the rectum, allowing it to remain there for from three to five minutes. The normal temperature of a cow is 100 degrees Fahrenheit and the normal temperature of a horse 100 degrees Fahrenheit; hog 100 degrees; sheep 101 degrees.

Second, take the pulse of the animal, which can be found at the angle of the lower jaw bone. The normal beat of a cow's pulse is from 40 to 50 per minute and that of a horse is from 33 to 40 per minute.

Third, count the respirations of the animal, or number of times it breathes by watching the sides or flanks, or by pressing the ear to the side. The normal respiration of a cow is from 15 to 20 per minute, while resting.

If the temperature, pulse, or respiration are found to be higher or faster than above described, you will know that the animal is ailing.

Oats is the greatest grain feed for horses. Other feed stuffs may be equal as heat and fat producers, but they do not possess the stimulating qualities found in oats. This is supposed to be due to a specific albuminoid which is found only in the oat grain. It gives the horse the fire and snap so desirable in the saddle or driving animal. Some other food stuffs can usually be added to the oat ration and by so doing, reduce the cost. Some bran, shorts, corn, barley, wheat and a great variety of other feed stuffs might be mentioned in this connection. Oats should always constitute at least one-half and better still two-thirds of the ration. Three parts oats, two parts corn and one part of bran or shorts will give good results. The amount of roughness and grain to be fed will vary, some depending upon the labor to be performed. It is not best to feed over ten or twelve pounds of hay and from twelve to fifteen pounds of grain to a horse doing regular work. For horses which have light work give about the same amount of roughage and from six to ten pounds of grain. It is not necessary to cut the fodder or grind the grain for horses which have good teeth and plenty of time to feed. Steamed feed or a mash of some kind should be fed at least twice a week. During the winter season roots should be supplied as they have a favorable influence on the health of the animals.

The champion carload of fat steers at the Denver stock show was composed of Aberdeen-Angus bred by P. H. Boothroyd of Larimer county and fed by H. W. Moore of that city at his ranch in Morgan county. They were sold at \$8.10 per cwt. The champion load of feeding steers were Herefords bred by Al Marr of the North Park

DISINFECTING HARNESS.

Horses are subject to diseases that are not only highly contagious to other animals, but to man also.

Any article that animals so afflicted come into contact with are infected and as a measure of precaution should be disinfected as soon as it can be done.

A glandered horse, for instance, will infect halters, bits, harness, etc., and communicate the disease through the subsequent use of these articles.

To disinfect a harness, it should be thoroughly soused in boiling water in which has been dissolved two or three grammes (not grains) of bichloride of mercury to the quart of boiling water. Then let the leather dry for two to three days. Then unbuckle and put the parts into a box that is air tight. This can be accomplished by pasting paper on the outside of the box, and after the lid is on, pasting paper over the cracks of the lid. Place in the box a sulphur candle (procurable at any drug store), light it, close, and let it burn so that the fumes of the sulphur will permeate every particle of the harness. The fumes will discolor the metal work, of course. One day will do for this.

Take out harness and give it another bath of boiling water, to which is added 10 grammes of phenic acid to 1 quart of water. After air-drying, it is then completely disinfected, and can be oiled, rebuckled, the bright work polished, and it is ready for service.

The harness-maker who undertakes this work should charge a round price for the job.

It may be well to add that the bichloride of mercury is a deadly poison and should be handled with care. See that there are no cuts or open wounds of the skin when handling the work, or stir the leather about with a stick.—Harness Gazette.

HOGS ARE MONEY MAKERS.

"What every farmer ought to do," says the Drovers' Telegram, "is to raise his own hogs, and not buy them at high prices, as some farmers frequently do. I actually believe if a man would take up hog raising and feeding, and devote his entire time to it for say ten years, he would make enough money at the business to retire rich. There is a profit in raising and selling hogs at \$4.50, provided the farmer gets it right. As a rule, most of the hogs make their owners a nice profit, and if the farmers would give them more attention and raise their own hogs, and then keep them in good shape, they will pay out every time. We are too apt to look upon the hogs as a sort of side to cattle or something else, while in fact they ought to be the whole thing. The sudden break in the hog market, coming as it did after several years of dangerously high prices, was a great shock, but when we get things adjusted we will find the hog our best friend still."

Some concentrated grain is always necessary to be given in connection with alfalfa, and this in itself should be equally as well balanced as the roughage which the cow consumes. Some corn meal may be used, but in small quantities and the larger proportion of the ration should be made up of such foodstuffs as are rich in protein as bran, ground oats, middlings, shorts, and cotton seed meal according to the capacity and the milk-producing ability of the individual under consideration. Wheat and oat straw are not very valuable feeds and should not be relied upon for furnishing much of the nutriment. Cattle will eat some straw and it probably serves its purpose, but the energy required for extracting the nutriment is very nearly equal to that furnished by the straw. A mixture of equal parts by weight of bran and corn or bran and barley will go well with straw and alfalfa as the roughage. If the supply of alfalfa is scant add more of the grain feed. In feeding cattle it is well to watch the condition of their bowels. When the droppings have a dry and hard appearance they are not properly nourished. Their hair will indicate their physical condition, by looking rough and lacking luster. When these conditions exist the cattle should receive more grain and usually a combination richer in protein.

There is no profit in shearing sheep during the fattening period. Early shearing of lambs in October has given favorable results in some instances.

The cheapest grain ration for lambs either before or after weaning, is corn, but it is not so safely fed or so greedily eaten as when oats or peas are added.

Warranted to give satisfaction.

GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

Iran Alto

Reg. No. 24576 Trotting Race Record 2:12 1/4

IRAN ALTO is the only stallion with so fast a record and whose sire and dam both held world's records. He is sired by Palo Alto 2:08 3/4 (to high-wheeled sulky) by Electioneer. His dam is Elaine 2:20 (to high wheels), which was the 3-year-old record of her day. She is the dam of four and granddam of 12 in the list. Dr. Frasso 2:11 1/2, winner of the 2:12 trot at Lexington, 1906. His get are all large, handsome, high-class roadsters and race horses.

TERMS: \$30 for the Season. Usual return privilege. Pasturage \$5 per month.

SAVE-THE-HORSE

Registered Trade Mark
SPAVIN CURE

THESE TELL THE STORY OF ITS POWER.

WM. H. COOPER, D. D. S.,
11 Sand Beach Avenue.

Bad Axe, Mich., January 15, 1908.

Gentlemen: If you ever want a recommend for your "SAVE-THE-HORSE," use me. I sent for a bottle sometime ago for a valuable mare which had a very bad bog spavin. She was so lame on the right hind leg that she could hardly walk, and then only with urging. After I had applied "SAVE-THE-HORSE" as directed twice, I hitched her to my runabout, and have been driving her every day and no one could ever tell she had any such trouble. Everyone here said I would never be able to use her again, as she was so bad, but now is as frisky as a colt. My neighbor is using "SAVE-THE-HORSE" on my recommend, and it is doing the business. Yours respectfully,
W. H. COOPER, D. D. S.

Winnipauk, Conn., Jan. 2, 1908.

Gentlemen: I enclose order for dollars, for which send me half-dozen boxes of Condition Powder, 50-cent size. "SAVE-THE-HORSE" cured a ringbone on a horse owned by a local blacksmith, to whom I sold a bottle some time ago. As both the horse and his owner are well known, it has proven a great advertisement. Yours respectfully,

W. J. ANDERSON,

Care of Anderson Stock Farm.

"SAVE-THE-HORSE" permanently cures Bone and Bog Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness, without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

616 Golden Gate Ave.,
San Francisco, Cal.

STALLION FOR LEASE.

Not wishing to train him this year, I will lease to a responsible party on liberal terms, for the stud season of 1908, a five-year-old stallion by Sidney Dillon (sire of Lou Dillon 1:58½), dam Ladywell 2:16½ (dam of Local 2:19½), by Electioneer; second dam Lady Lowell, dam of two in list, by Schultz's St. Clair. This young horse is a solid built fellow, well made all over, and will weigh about 1,000 pounds. Should sire speed from all sorts of mares. For further particulars address JOE CUI-CELLO, Pleasanton, Cal.

HIGH-CLASS CARRIAGE TEAM FOR SALE.

Geldings, solid bay, handsome, perfect match, five and six years old, 16 hands, weigh 1,200 pounds each. Very toppy, rapid walkers and travelers. Fine knee and hock action, broken single and double, not afraid of cars or automobiles. Gentle disposition, absolutely sound, guaranteed without blemish.

Also two single driving horses, seal brown and a bay. Four and five years old, 15.3 to 16 hands high, weigh 1,100 and 1,150 pounds. Either one can trot a three-minute gait. Very handsome, gentle and sound. All these horses are in first-class condition. Apply to H. OLSEN, 814 E St., Haywards, Cal.

FOR SALE.

Beautiful black mare, standard bred, height 16 hands, age five and a half years; fast walker; can trot or pace. Has shown as good as 2:35 on three weeks' work. For further particulars enquire at H. KATSER, Russ House, San Jose, Cal.

NEW WORLD'S RECORD 15,000 Targets Without a Miss

J. W. Akard's claim to the title, "The King of Rifle Shots," is well earned. His performance of breaking 15,000 regulation clay targets without a miss is the greatest exhibition of skill on record. He used one shot only for each target. He threw his targets with his right hand, holding his gun with his left. He used

U. M. C. .22 SHORT CARTRIDGES

whose perfect quality supported his perfect aim. A great per cent of the targets were broken edgewise, so that the diameter of the disc does not truly represent the size of the moving target in the air. Mr. Akard's earlier run of 1,659 small marbles without a miss is nearly twice as long as any previous record on similar objects. In this case, also, he did his own tossing. Remember that Mr. Akard's run of 15,000 targets was unfinished. Mr. Akard is now giving demonstrations on the Coast.

U. M. C. CARTRIDGES EXCEL IN CLEANLINESS AND ACCURACY

A RECORD THAT IS A RECORD

Adolph Topperwein makes Straight runs of 14,540, 13,599, 13,292 and 13,219 on 2 1/4-inch wooden blocks at 20 foot rise, and misses only 4 out of 50,000 and 9 out of 72,500, shooting

WINCHESTER SMOKELESS POWDER CARTRIDGES AND .22 CALIBER RIFLES

Just to show that all things ARE POSSIBLE with Winchester .22 Caliber Cartridges and Rifles, and also to prove "Who's Who" in making rifle records IN PUBLIC, Mr. Topperwein recently shot for ten consecutive days at San Antonio, Texas, and made the above world's records for wing shooting with a rifle. He used only two rifles and loaded them himself. These record-breaking, history-making scores were made, without the aid of a notary public, before large crowds of people in a public park—not in a far-away back lot or down on the farm behind the barn.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

"CALIFORNIA HAS MORE GOOD GREEN TROTTERS than any State in the Union," was the remark made by one of the best posted horsemen in the country to the editor of this journal the other evening. The speaker was a man who has trained and driven many celebrated trotters and one who knows the trotting horse business from start to finish, and while not now engaged in it, can be said to speak as one in authority. After making the above quoted remark, he added: "I have been all over this State, and in every county that makes any pretensions at all to horse breeding, there are many well bred, good looking young trotters and pacers. Even in some of the mountain districts I have seen trotting bred horses that would be a credit to any breeding farm, and it is so everywhere one goes in California, but the trouble is the owners will not spend money to have them trained." There was much truth in the remark of this horseman, but the horse owners can hardly be blamed for the condition that no doubt exists. In the first place a vast majority of these breeder-owners are men of moderate means who cannot afford to have their horses trained for racing with so little prospect of being able to race them at home, while to send them across the continent is to them out of all question because of the expense. The majority of farmers and others who raise trotting bred horses, do so for the roadster instead of the track market and are content to sell them at roadster prices after they are broken "to drive single and double" by a ranch hand. There is a goodly proportion of these breeders, however, who would be willing to pay training expenses if there were enough race meetings held in California each year to insure them a chance to start their horses a few times near home, where they could put them to the race test without incurring the expense of long railroad shipments and other bills which make the campaigning of a trotter that goes through the circuit a very expensive affair. The trotting horse breeding interests in this State are much larger than anyone would imagine who is unacquainted with it, and in every county where these horses are bred there should be an annual fair and race meeting where they could be shown and raced. A properly conducted county fair at which a program of harness racing is given, and generous cash prizes offered for the best breeds of harness horses, will add thousands of dollars to the tax roll of the county giving it. Horses that prove their ability to win in the show ring or on the track always find ready sale for a much higher price than they would have commanded without that prestige. We suggest to the horse breeders of every county in California that they organize and hold a fair and harness race meeting each year. It will pay if properly conducted and managed, and will do as much to advertise the county as anything that can be done. California is beyond all question the best horse breeding country in America, simply because the climate and soil here make it possible to raise horses to maturity at less cost than anywhere else on the continent. With thirty or forty annual county fairs in this state, at all of which harness racing would be held, and one main circuit furnishing eight or ten weeks' racing for good purses, California would be the leading horse breeding State in the Union, the prices obtained here each year would increase until buyers would be looking for sellers instead of the shoe being almost constantly on the other foot.

MANY ASSOCIATIONS in California that would otherwise give harness race meetings every year, hesitate to announce programs because the directors are afraid to offer purses equal to those given by the principal associations, and have an idea that smaller purses will not fill. This is a mistaken policy, and if the associations will post themselves on the horses in training and offer as much money as they know they can afford to give, there will be no trouble in securing sufficient entries and holding meetings that will leave a cash balance in the treasury after all bills are paid, and this is what makes any meeting successful in the eyes of those on whom the work of managing and financing it falls. Large purses and stakes attract the best horses, but no association should offer any larger purses than it can afford to give. Every horse breeder and owner desires to see the fairs and race meetings financially successful, as he knows that these meetings will not be given every year if they show a deficit. Where the tracks are located in towns of small population, and low transportation rates from other points are not given by the railroads, directors should make up their programs accordingly. Some of our California horsemen ship all the way across the continent to race for \$500 purses, and do not hesitate when there to start their horses in purses of \$300 and less. There are many places in California at which meetings have not been held for years, where a three-days' meeting for purses ranging from \$200 to \$300 would attract large lists of entries and if properly conducted be very popular with the public and be financially successful. The advice we would give all associations is: Give meetings—with large purses if you can, and if not with small purses—but give meetings and give them this year.

SAN FRANCISCO HORSE MARKET.

The San Francisco market at the middle of February is not brisk, but the improvement shown in last two weeks bespeaks a strong spring trade. Prices are about as follows:
Halter broke.....1000 to 1200 lbs. \$75 to \$125
Broke double.....1000 to 1200 lbs. 100 to 150
Broke single and double.....1000 to 1400 lbs. 125 to 175
Drafters.....1400 to 1600 lbs. 200 to 300
Lame mares that will do for ranch work are being picked up at \$50 to \$100, and considerable activity is shown in horses broke single that weigh around 1300 pounds suitable for bakery and laundry wagons, at prices around \$200 per head. Drafters are slow, but those who are buying fresh horses are paying close to the \$300 mark for big stuff that can handle heavy trucks.

MONTEREY 2:09¼ at SANTA ROSA.

The trotting stallion Monterey 2:09¼ will make the season of 1908 at Santa Rosa, where I have been asked to bring him, being promised the support of some of the most prominent breeders in that section, who will send their good mares to him. For terms and particulars apply to P. J. Williams, San Lorenzo, California.

NORTH PACIFIC COAST CIRCUIT.

Salem, Portland, North Yakima and Spokane Announce Big Purses.

The North Pacific Fair Association met at Portland, February 6th, and after assigning dates to the different fairs the following programs for the racing season of 1908 were announced:

Salem, Oregon.

Monday, September 14—		
Pacing, 2:12 class	\$1,000	
Trotting, 2:27 class	600	
Tuesday, September 15—		
Pacing, 2:25 class	600	
Trotting, 2:16 class	1,000	
Pacing, two-year-olds	400	
Wednesday, September 16—		
Trotting, two-year-olds	400	
Trotting, three-year-olds	500	
Pacing, 2:08 class	5,000	
Thursday, September 17—		
Pacing, three-year-olds	500	
Pacing, 2:20 class	800	
Trotting, 2:14 class	5,000	
Friday, September 18—		
Pacing, consolation	1,000	
Pacing, 2:05 class	1,000	
Trotting, 2:20 class	800	
Saturday, September 19—		
Trotting, 2:09 class	1,000	
Trotting, consolation	1,000	

Portland, Oregon.

Monday, September 21—		
Pacing, 2:14 class	\$1,000	
Trotting, 2:16 class	1,000	
Tuesday, September 22—		
Trotting, two-year-old class	400	
Pacing, three-year-old class	500	
Trotting, 2:27 class	800	
Wednesday, September 23—		
Pacing, two-year-old class	400	
Pacing, 2:09 class	2,500	
Trotting, 2:20 class	1,000	
Thursday, September 24—		
Pacing, 2:20 class	1,000	
Trotting, 2:13 class	2,500	
Trotting, three-year-old class	500	
Friday, September 25—		
Pacing, consolation	500	
Pacing, 2:25 class	800	
Saturday, September 26—		
Trotting, consolation, 2:13 class	500	
Pacing, 2:05 class	1,500	
Trotting, 2:10 class	1,500	

North Yakima, Wash.

Tuesday, September 29—		
Trotting, 2:20 class	\$1,000	
Pacing, 2:35 class	500	
Wednesday, September 30—		
Three-year-old trot	500	
Pacing, 2:09 class	2,500	
Thursday, October 1—		
Trotting, 2:12 class	2,500	
Three-year-old pace	500	
Friday, October 2—		
Trotting, 2:30 class	500	
Pacing, 2:09 class, for non-winners of \$2,500 Stake	500	
Saturday, October 3—		
Trotting, 2:12 class, for non-winners of \$2,500 Stake	500	

Spokane Interstate Fair.

Monday, October 5—		
Trotting, 2:14 class	\$1,000	
Pacing, 2:35 class	500	
Tuesday, October 6—		
Pacing, 2:05 class	1,000	
Trotting, 2:40 class	500	
Wednesday, October 7—		
Trotting, 2:10 class	1,000	
Pacing, 2:20 class	700	
Thursday, October 8—		
Trotting, 2:25 class	1,000	
Pacing, three-year-old class	400	
Friday, October 9—		
Pacing, 2:25 class	1,000	
Trotting, three-year-old class	400	
Saturday, October 10—		
Pacing, 2:14 class	1,000	
Trotting, 2:18 class	500	

Mr. Frank Lieginger, secretary of the Stockton Driving Club, has been in the city this week and while here purchased from W. Kenney, 531 Valencia street, a 1908 model No. 50 McMurray speed cart that is a dandy. Mr. Lieginger owns the trotter Bob Ingersoll 2:14¼ and as he will have to start him against pacers in the matinees, he wants the Nutwood Wilkes gelding to have the advantage of a good vehicle to draw.

NOTES AND NEWS

Read the stallion advertisements.

Book your mare to the one you like best.

Nominate the foal in several of the Futurity stakes.

Have the colt nicely broken and trained, and if he is fast enough to win part of the money, you will be pleased, and if not, will have a lot of fun, anyway.

Consuella S. 2:07½ is now owned by J. W. Daly, Mount Kisco, N. Y., who has been a heavy buyer lately.

The mare Vision 2:09¼ by Vanquish, that was raced in California two years ago, is now a member of Jas. Hogan's string at Memphis.

G. H. Lowney of Napa will send a very stylish driving horse to Fred H. Chase's sale, to be held on the 24th inst.

Among the mares bred to Audubon Boy 1:59¼ last year were Inferlotta 2:04¼, Maxine 2:07¼, Miss Williams 2:09¼, Arguonot 2:10¼, Birchbud 2:11, Homespun 2:11¼ and Belle Archer 2:12¼.

In the sport of light harness horse racing, where H. K. Devereux has long been a conspicuous figure, it is not generally known that he is quite as conspicuous a figure in another world of sport. Mr. Devereux has the same kind of admiration for the highly bred setter and pointer that he has for the trotter and pacer. Recently he judged the All-Age setter and pointer stake at Grand Junction, Tenn., where the biggest field trial event of the season is held annually.

C. R. Bentley, for several years business manager of the Buffalo Horse world, has purchased Geo. E. Lattimer's interests in that publication.

A Western buyer of Shetland ponies at a recent public sale sold forty-nine head of those miniature horses for \$4,159, an average of \$155 each. One three-year-old filly brought \$415, and several others brought over \$300 each.

Two fancy gaited saddle horses and three fine drivers- are at the Dexter Prince Stable, corner Grove and Baker streets, for a few days on sale. See advertisement.

During the winter Argot Boy 2:03¼ has taken on a lot of flesh at Pleasanton, Cal., and it looks to be on to stay. The change of climate and feed will no doubt benefit this fast gelding, as he will get to the races this season high in flesh, and ready at that. This being so, what 2:04 pacer will beat him? Frank Jermy, who saw him race last year, says he is the next two-minute horse.

S. Christenson of San Francisco has sold the chestnut mare Catherine A. (matinee record 2:19¼), full sister to El Diablo 2:11¼, by Diablo 2:09¼, out of Elwood 2:17¾ by A. W. Richmond, to P. H. Smith of Santa Monica. Probably no better road mare was ever sold out of this city, as she has both speed and manners.

When the first matinee race of the season is called Dick Ables will have the F. J. Kilpatrick string ready. He has been a mile recently in 2:28½ with Lady McKinney, the last half in 1:10 and the last quarter in 34 seconds. Princess W., a mile in 2:28, half in 1:10, last quarter in 33½ seconds. Don Diablo, mile in 2:24½, last half in 1:09. McKinney Belle, mile in 2:32¼, quarter in 36 seconds. The Kinney Lou two-year-old trotter is not to be overlooked, as he has been a full mile in 2:50, and a quarter in 40 seconds.

Mr. Thomas Ronan's Birdson is so far doing everything asked of him, and in De Ryder's hands may turn out to be a good trotter. He has been a mile in 2:17 very handy.

The Pleasanton Matinee Club will hold a matinee next Saturday afternoon, Washington's Birthday, and an excellent program has been prepared. There will be at least three races and probably one or two more, and the horses will be so classified that good contests are certain to be seen. This will be the first matinee of the season, and if the weather is good there will be a large attendance.

Wm. E. Detels, the harness man of Pleasanton, is the owner of a colt that is bred to trot, and will be given a chance to make good in the stakes. He is by Bon Voyage (3) 2:12, out of La Moscovita, dam of Yolanda 2:14¼, by Guy Wilkes; second dam Moscovita (3) 2:28½, dam of Mamie R. (3) 2:15½, by Belmont 64; third dam Mosa, dam of Mosale 2:15¼, Murdock 2:22¼, Incand 2:26½, Moquette 2:27¼, Moscovia (3) 2:28½, by Edwin Forest; fourth dam Hermusa, dam of Hermes 2:27½, by Tom Teems; fifth dam Black Rose, dam of Darkness 2:27.

Don't miss seeing Ibis and Ides of March, a pair of hackney bred gellings consigned to Chase's sale on the 24th inst. They were bred at Baywood Stud and are a nice pair. A "T" cart and a set of fine harness for them will also be sold. The outfit is consigned by Mr. Geo. A. Newhall of this city.

The Horse World says: "M. E. McHenry is having such good luck with the runners that he may not be seen at the harness races this year." The racing season with the runners is not over yet, and by the time the harness racing begins Mac's luck may turn. It did last year and the year before.

Secretary W. H. Smollinger of the Great Western Circuit has issued a call for the annual meeting of the circuit members at the Sherman House, Chicago, at 10 o'clock A. M., on February 17th.

A number of correspondents who have sent in questions to be answered will have to excuse us from answering them this week, as the extra work and rush of getting out this number has given us no time to dig up the facts and statistics which the answers to some of them require.

Dumont S. 2:20, own brother to Sonoma Girl 2:05¼, has been sold to F. E. Alley of Roseburg, Oregon, who has been getting together a collection of fine broodmares recently. Dumont S. is a splendid type of horse and will sire speed to a certainty. His breeding is choice (Wilkes on the sire side and Electioneer and Nutwood on the dam's side), and he has already shown that he can sire good ones, as a nineteen-months-old colt by him has stepped a quarter in 37½ seconds. We hope Mr. Alley will have the best of luck with this handsome horse, and get some stake winners from his produce. Thos. Charlton & Son of Ukiah, who sold Dumont S. to Mr. Alley, only parted with him because they had no mares of their own and are living in a section where there are very few standard bred mares, consequently the horse has had no opportunities to speak of. Dumont S. is eight years old.

The attention of horsemen is called to the fact that John A. McKerron, the well known harness and horse-boot manufacturer, makes the very best and safest stallion hoppers in the world. He has also a splendid assortment of horse clothing, horse medicines and all the paraphernalia needed by trainers. For nearly thirty years he has been in business in this city and his goods are to be found not only in all parts of America, but in Europe and Australasia.

One hundred years ago on the 28th of January the death occurred of imported Messenger, the gray thoroughbred stallion whose blood is part of the foundation of the American trotting family of horses.

Ground was broken this week on the new track at Chico. It is an ideal location, the soil is excellent and a fine track and fair grounds are assured.

Secretary Nathan A. Cole announces that arrangements have been made for a trotting meeting to be held at Peoria, Ill., July 3d to 10th; \$30,000 will be offered in stakes and purses. There will be one stake of \$5,000 for 2:16 trotters and nine others of \$2,000 each. A fall meeting will also be held the third week of September with stakes and purses aggregating \$25,000.

The Ferndale (Humboldt county) Agricultural Association has selected the dates of September 7th to 11th inclusive for its fair and race meeting this year. There will be four days of racing, a big barbecue and many other attractions. This association is prosperous and gives a good fair every year, and is located in one of the finest dairying districts in California. Secretary W. B. Alford writes that the fair will not only have a good arcing program this year, but a pavilion at which the display of big pumpkins, beets and carrots, will be equal to any, and there will be also be pretty girls in abundance.

Here is an opportunity to get a possible stake winner at a low price. Officer William Van Keuren of the San Francisco police force owns the Alex Button mare Mattie B. 2:15 and used her for several years as a buggy horse. He bred her in 1906 to Prof. Heald's fine McKinney stallion Ed McKinney, an own brother to Adam G. 2:11¼, and the result was a fine stud colt, that will be a year old May 1st. Corporal Van Keuren owns no farm or stock ranch and has no place to keep Mattie B. and her foal (she is in foal again to the same horse), consequently wants to sell. He will sell either or both and is not asking a big price. The colt is said to be a very handsome and robust youngster, and as he is entered and paid up in the Breeders' \$7,500 Futurity and the Canfield Stake, he has a good chance of being a money winner if trained. Corporal Van Keuren cannot keep this colt and its mother in a city lot, and his salary won't justify him in buying a ranch just now, so he says he must sell. Read his advertisement in this issue and write to him for a price on the colt or its dam.

A. H. Scofield bought Rey Direction at the last Chase sale and turned him over to parties at Redwood City. This gelding has been a mile in 2:20, and being by Rey Direct 2:10, out of Babe Marion 2:17½; second dam Ida Wood, the dam of Owyhee 2:11, is the kind that a dealer doesn't need to hold long.

William Watt of Napa has consigned to the Chase sale for the 24th inst. three nice saddle horses that should attract buyers who want something good that they can either ride or drive.

At the public sale of horses, colts, cattle, etc., held by Charles Lippincott, Woodstown, N. J., January 15th, a nine-months-old colt by Chimes 5348, dam Maud Mullin by Guy Wilkes 2:15¼; second dam Maid Marion by Le Grande; third dam by Del Sur, brought \$605. He was purchased by Collins B. Robbins of Swedesboro, N. J. This fellow is a grand individual, beautifully gaited and very fast, being regarded by horsemen as a great prospect for track and stud.

The stallion Tom Benton 15705, that sired Ned Winslow 2:12¾, Shylack 2:15½ and Mary Lou 2:17, the dam of Kinney Lou 2:07¾, has a couple of fast performers for which he has never gotten credit in the table of sires in the Year Book. Mr. Dana Perkins of Rocklin, Cal., writes that Tom Benton is the sire of Bensurba 2:16, pacing, and Albert 2:14. We find in the Year Book that Bensurba made his record in a winning race at Portland, Ore., in September, 1903. This race is reported in the Year Book, but Tom Benton is not given credit for him in the Great Table. We do not find any report of the race where Albert took his record.

Charles James, who was formerly with John Goldsmith at the Corbett Farm, San Mateo, and afterwards with Salisbury and Millard Sanders, has returned to California after an absence of thirteen years. Mr. James has been handling some of the leading matinee horses for members of the Amateur League during the last few years, and has prepared many of the fastest ones for their contests. He will be in California until the weather gets warmer over East, and thinks this State is good enough for any person to live in.

Henry Miller, of the firm of Miller & Lux, the greatest cattle dealers on the Coast, has booked several mares to Kinney Lou 2:07¾. This son of McKinney started the season of 1908 the first week in February, when he was bred to a mare owned by Mr. R. E. DeB. Lopez.

It is stated that W. A. Clark Jr., who is collecting a small but select stable to campaign on the Grand Circuit, will hold an auction sale of all his breeding stock, as well as a number of his horses in training at Los Angeles in March. Mr. Clark has some very choice animals, and the sale should be a record-breaker for Southern California.

Charles Mabrey, the Indiana trainer, is now in charge of MacFarland Park, Lang Branch, N. J., the home of the stallion Owyho 2:07¼. Among the colts that Mabrey will train are promising youngsters by Owyho, Direct Hal 2:04¼, Nervolo 2:04¼, Rhythmic 2:06¼, Be Sure 2:06¼, Jay McGregor 2:07¼, Axtell 2:12 and Axworthy 2:15½. Mr. William G. Layng of San Francisco while in the East last summer purchased no less than thirty fine broodmares for Mr. MacFarland, selecting many of them especially to be mated with Owyho, who is out of Lou Crelin's old mare Bertha, the dam of Diablo 2:09¼, Don Derby 2:04½, etc.

When \$9,000 is paid at auction for a three-year-old untrained colt it cannot be said that the trotting horse has fallen from favor with horsemen.

Jack Curry, who has been ill for several weeks, is now recovering rapidly, says an Eastern exchange. He is at Excelsior Springs, Missouri.

There is some talk of the Detroit's M. and M. being changed to the 2:11 class, and its Chamber of Commerce Stake to the 2:07 class.

Several good stallions will be sold at Chase's on the 24th. There is one by Gossiper, one by Lynwood W. and one by St. Whips. Look them over before the sale.

A request has been made of the Breeders' Association to change the 2:10 class trot to a free-for-all, and the matter will be taken under consideration. Among the horses that might be entered in a free-for-all that cannot start in the 2:10 class are Wild Bell 2:08¼, Kinney Lou 2:07¾ and Redlac 2:07½. The last named horse will probably come to California for a stud season this spring and his owners are believed not to be averse to racing him. Then Col. Kirkpatrick might be induced to bring John Caldwell 2:08½ back here if there were races for him throughout the circuit.

The time is coming when there will be big stakes for the fastest classes on the Grand Circuit and elsewhere, and then prices of the best trotters and pacers will advance. It is the earning capacity of a race horse that brings the money for him.

Hopples are barred for registration purposes. The American Trotting Register Association will hereafter refuse to recognize records made by horses wearing the straps when said records are part of the requirements for registration. For instance, if the owner of a mare by a registered pacing horse desires to put two of her produce in the list so as to register her, the records must be made without the aid of hopples.

Audubon Boy 1:59½ had a close call when fire destroyed the Gatcomb stable last week.

Sterling R. Holt, owner of Sidney Dillon, has recently completed a covered track 700 feet long to exercise his colts in during the winter. In the spring he proposes to add 300 feet to it, which will give him a track of 1,000 feet on which colts can be speeded.

It is stated that Mrs. Jos. Thayer will not bring his stallion The Bondsman with him when he comes to California, but will leave him in Kentucky for the breeding season of 1908.

Bud Crooke 2:15½, pacing, one of the few surviving sons of Geo. Wilkes, died two weeks ago at the farm of his owner, Ed Meyer, of Canton, Ohio. Bud Crooke was foaled in 1880, and sired twenty-one standard performers, the fastest being Hontas Crooke 2:07½ to wagon, that was Mr. C. K. G. Billings' favorite roadster.

The American Trotting Register Association has resolved that by 1913 all rules for registration, except rule 1, will be abolished. This rule says: "The progeny of a registered standard trotting horse and a registered trotting mare," is entitled to registration. Breeders will therefore have to have all their horses registered by that time to enable them to register their produce.

The new stables to be built on Fulton street, just north of the speed track in Golden Gate Park by the Park Amateur Driving Club, will be ready for occupancy by the time the first matinee of the year is held in April. Everything points to a very successful and interesting season of amateur racing.

Washington McKinney stands next to Zombro 2:11 among the sons of McKinney that sired new standard performers in 1907. Washington McKinney put two new ones in the list—Lady McKinney 2:19½ and McKinney Belle 2:30. One has only to see the get of this horse to know that he will be a great sire of speed.

It is said that Harry Jones of Rushville, Indiana, will probably race Magladi 2:10½ in the East this year.

W. C. Bradley, who recently purchased Todd 2:14¾ for \$30,000, has now bought Sweet Marie 2:02. After her exhibition days are over he will probably breed this great daughter of McKinney to Todd.

Mr. John F. Boyd has brought suit against William R. and Lena Humphrey and the Oakwood Stock Farm Company, to foreclose a mortgage on 5833.44 acres of land in Contra Costa county, known as the Oakwood Stock Farm. It will be remembered that the Humphreys purchased this magnificent property a few years ago and it was announced that it would be turned into a cattle breeding farm and stocked with Herefords. The breeding of trotting bred horses there has been gradually lessened every year, and several sales of broodmares and young stock have been held. Oakwood Park is one of the most beautiful estates in California, and as the home of Steinway 2:25½ and Chas. Derby 2:20, achieved fame in the production of horses with extreme speed at the trot and pace. Among the 2:10 performers foaled there are the trotters Brilliant Girl 2:08¾, Derby Princess 2:08½, Tuna 2:08½ and the pacers Don Derby 2:04½, Klatawah (3) 2:05½, W. Wood 2:07, Much Better 2:07½, Owyho 2:07½, Derbertha 2:07½, Diablo 2:09½ and others.

At the annual meeting of the directors of the Utah State Fair Association held last week, the annual report of the secretary on the receipts and disbursements at the last fair was presented. It showed that the receipts at the last fair were \$26,047.10 from general admission, grandstand, entrance fees, and the sale of pools, concessions and advertising. The disbursements were \$22,090.80, leaving a balance of \$3,956.30. The dates of the next fair will be from October 6th to 11th. If the present plans of the management are carried out the fair will doubtless surpass all others ever held in Utah, and the attendance will be even greater than last year. The board appropriated \$6,000 to be given in purses for the horse races next fall. This is the largest amount ever given in prizes at any race meet in Utah, and it will insure some fast races.

A writer in the New York Herald says: In these days of monuments and testimonials ad nauseam, why not perpetuate the memory of the individual who organized the first country club? Here's to him, whoever he was, wherever he is, and whatever else he did or failed to do. What a boon such institutions have proved to all ages and each sex—introducing open air sports, outdoor life, good-fellowship, real sporting spirit; cheating doctors and undertakers of many a fat fee, breaking down social fences, cementing friendships, preserving present generations and building up the best material for future sturdy, broad-gauge Americans! Wherever these clubs start they endure and furnish rich dividends in health and harmless recreation and a valuable example to the general public of all such favored communities. Here's to the man—he must have been big enough for capitals—and if ever anyone "builded better than he knew," 'twas he.

The Unbeaten Champion of 1907

California has produced many champions of the race track, and hardly a year passes but trotters and pacers bred and reared here in the land of sunshine occupy the "spot light" on the leading Eastern tracks, and sell at prices that set the sales record of the season. There have been sensational horses many times on the California Circuit, but the most sensational, all things considered, that ever flashed his marvelous speed and great racing qualities before the eyes of horsemen here, is the unbeaten champion of last season, Sir John S., bred and owned by the Stevenson Estate, and raced by W. L. Vance, of Marysville.

Sir John S. was endowed by nature with grand proportions, standing just sixteen hands high and weighing 1,200 pounds, with muscles, bone and flesh distributed as they should be, and a head that has every feature of a great stallion. He came down from Marysville in 1906 and started at the Breeders' meeting at Woodland without a reputation. He had won a free-for-all pace at Marysville in June, taking a mark of 2:18, but few there were who had any idea of his class as a race horse. The 2:16 class at Woodland was the occasion of his appearance. Sir John S. was a four-year-old, and it was evident that driver Vance did not want any faster record than it was necessary to give the horse to win. The first heat he was finishing rather easily and in an attempt to draw the finish fine, Lady Shamrock made a dead heat with him in 2:14½. Vance took no further chances, however, and the next three heats were easy for him, the last in 2:10½, which was the fastest heat he had to pace that year. There was but one more race for him that year which was at the State Fair, where he beat a field of seven others in straight heats, the fastest in 2:13.

Last year, as a five-year-old, he had to meet all the fast record horses on the Coast. His first start was at Pleasanton, where Miss Georgie 2:08½, Miss Idaho 2:09¾, John R. Conway 2:09, Delilah 2:08, Kelly Briggs 2:08 and Cresco Wilkes 2:10¾ made up the field against him. Straight heats were the result of this race with Sir John S. heading the summary and the time 2:08½, 2:07¼ and 2:06¾, lowering the track record three times. The way he raced and finished in this event immediately stamped him a phenomenal horse, and from then on through an unbeaten campaign of five more races, he won first money every time for his owner and did it handily. At Santa Rosa it was three heats in 2:07, 2:06¾ and 2:06¾. At Petaluma he made two starts during the week. On Wednesday he made a break going away in the first heat, was an eighth of a mile behind when he reached the first quarter, but paced the balance of the way over that rough track in 1:33, saved his distance and took the next three heats easily. On Saturday it was three straight for him again.

When Woodland was reached the track and weather were ideal for racing and here he once more ended the race in straight heats, pacing the fastest race ever seen on the California Circuit and lowering the track record to 2:04½ the first heat, then coming back the second heat in 2:04¾, and the third in 2:05¾, the fastest three heat race ever paced on the Coast.

The following week he started in the 2:08 class at Sacramento and three straight once more was the rule, 2:07¾ being the fastest heat. This was on Wednesday and next day he was put on the cars and shipped to the Oregon State Fair at Salem, where the \$5,000 stake for 2:09 pacers, in which he was entered, was on the program for the following Thursday. There were no less than fifteen starters in this event, among them Copa de Oro 2:07¾, Sherlock Holmes 2:06¾, Miss Georgie 2:08½, Delilah 2:08 and other crackerjacks. Sir John S. repeated his Petaluma performance there by making a break in the first heat and losing it, finishing sixth, but the next three heats were his easily in 2:07¾, 2:09 and 2:09, over a slow track. This ended his campaign for the year. He had won every race in which he had started, and lost but two heats out of twenty. He will be raced again this year and is expected to reduce his record to a mark very close to two minutes.

The breeding of this great race horse is such that his success as a sire is certain. He is by the great sire Diablo 2:09¾, who was champion of his year as a four-year-old. His dam is the trotting mare Elisa S. 2:16½ by Alcantara, Jr., a well bred son of Alcantara, and consequently Sir John S. has two

crosses to that great sire and full brother to Alcyone, sire of McKinney. The second dam of Sir John S. is by Friday McCracken, a Blackhawk stallion, his third dam by Signal, and his fourth dam said to be by Williamson's Belmont. For speed, size, color, good looks, soundness and breeding, his equal is not to be found in California. He will make the season of 1908 at Marysville and will be limited to thirty mares, as he is to be raced again this year for a lower record. He is one of the handsomest horses ever foaled, and from such breeding and make-up cannot fail to be a great sire. His oldest colts are but two years old, and are a very handsome lot. Do not breed to inferior horses when you can breed to the best at the same price.

Terms—\$50 for the season, with usual privilege if mare proves not in foal.

By donating a cup costing \$250 for the best hackney stallion shown in harness at the London International in 1908, Frederick Pabst has given to the English exhibition a new feature which promises to be one of its best. The hackney is essentially a harness horse, and it has always seemed strange

SIR JOHN S. 2:04½.

that stallions of the breed were never shown in harness, but always in hand. Many a horse that is most brilliant at the end of a lounging rein is commonplace in harness, and vice versa. The way in which a horse collects himself, shapes himself and carries himself when harnessed is one of the most important points in determining his merits for harness purposes, and it would seem like a wise course to occasionally show stallions in harness. The National Horse Show in New York has long had a harness class for hackneys, though not for stallions. Mr. Pabst's new prize at the International must be won twice by the same exhibitor before it becomes his property, and the stallions competing must be registered in both the English and the American hackney stud books.

It is small wonder, says the Grass Valley Tidings, that ranchers are closing their premises against hunters, in view of the fact that the killing and wounding of stock occurs with too startling frequency. Last Sunday a hunter whose identity has not been discovered killed a gray mare on the Dikeman ranch. The animal belonged to Henry Lane of Nevada City and had been placed on the ranch to pasture for a time. As a result, the big ranch is now closed to followers of Nimrod, and trespassers will be vigorously prosecuted. The act is charged to some irresponsible individual gifted with a desire to blaze away at anything in sight in the shape of game, without stopping to consider what may be behind a bush or whether his bullet may speed. It is this class which has caused so many of the ranchers to rise in arms against hunting on their premises.

ARE YOU IT?

(With apologies to Kipling.)

A man there was and he owned a horse,
Even as you and I;
And he thought in the Summer he'd race him, of course,
Even as you and I;
Oh, the bills he got, and the checks he wrote
In a firm and a big round hand;
But the horse never raced because he went lame;
When three legs were sound, the other was "game,"
Which he could not understand.
Another there was who owned a "skate,"
Even as you and I;
He trained him early and worked him late,
Even as you and I;
Oh, the hobbles and toe weights and checks he tried,
And the bits and the rubber bands;
But when racing as slow as a three-minute gait
That horse would "arrive" just a few seconds late;
Which he could not understand.
And it wasn't the loss of the measley dough,
That burned like a white hot brand,
But only to find that the horse couldn't go,
And the reason the trainer nor he didn't know,
Moreover they probably never will know,
Nor ever understand.

IN DAYS OF OLD.

Some Incidents of a State Fair in California Nearly Forty Years Ago.

Thirty-five years ago last September at the old State Fair Grounds at Sacramento, was held a fair and race meeting which, could it be duplicated this year, would be an object lesson by which comparison could be made with our State Fairs of more recent years, and while I looked at the exhibits and races then with younger eyes, and naturally more boyish enthusiasm than when witnessing the fair of 1907, the only thing in which the former suffered by comparison with the latter was the time made in the races. The contests were as keen, the enthusiasm greater, and the attendance larger. We rode out to the old entrance gate at the end of G street for a fare of 10 cents on a car drawn by two horses, and which was so filled and covered with a mass of struggling humanity that nothing much of the car could be seen. Fifty or more "hacks" did a land office business carrying passengers from the portals of the Golden Eagle, Capital and Union Hotels, at 50 cents a head, while hundreds of "buses" and wagons of all descriptions made money for their owners at 25 cents per passenger. The "pavilion," where were housed the exhibits other than live stock, was then at Sixth and M streets, and during the evenings was "crowded to the guards," as my old friend Captain Tom Merry would say.

The race track was the chief attraction, however, then as now, and while there were many hundreds who visited the stock pens in the forenoons, it was the races during the afternoons that caused every available inch of space in the grand stand and up and down the stretch to be occupied long before the bell was rung for the speed contests to begin. In the infield, from the head of the stretch to the first turn, buggies, carriages, surreys, spring wagons, carts and coaches were lined up three deep, while the owners, trainers and others who wanted to be at the very front of the battle, paid \$2.50 each for a blue silk ribbon on which was printed in gilt letters "Quarter Stretch Badge," the wearing of which entitled them to all the privileges which that name implied.

The President of the State Agricultural Society that year was the late Hon. Charles F. Reed, of Yolo County, a man of affairs, a large farmer and breeder, whose fine presence and commanding voice gave a dignity to the judges' stand, that it has often seemed to lack since.

In the live stock department that year premiums were offered for thoroughbreds, graded horses, horses of all work, draft horses, roadsters, carriage horses, saddle horses, roadster teams, and sweepstakes. That was before the standard bred trotter had arrived, consequently there was class for him.

Nathan Coombs, of Napa, won the prize of \$75 for the best thoroughbred stallion with Lodi, by imported Yorkshire.

John Hall, of Alameda, won first prize of \$60 for best thoroughbred mare with Peggy Ringgold.

For best thoroughbred sire with not less than ten of his colts, John Hall took first prize of \$150 with Woodburn and a fine family of ten.

In the class for "graded horses," in which were some trotting bred animals, C. P. Marsh, of Oakland, won the year-old class with High Die, by Lodi. Alex Ely, of San Francisco, had the best three-year-old in inauguration, and D. M. Reavis, of Chico, the best yearling in Blackbird, Jr.

In the roadster class Mr. Reavis' Blackbird won first prize for a stallion four years old or over. Hon. Jesse D. Carr took first for a three-year-old with Mambrino, Jr., now known as Carr's Mambrino 1789, sire of the dam of Sweet Marie 2:02.

The lists of entries in these exhibition classes were not small in those days. There were no less than fourteen stallions competing in the class for thoroughbreds four years old and over, while there were nine in the same class for graded horses.

The races began on Thursday, the 19th, and closed on Friday, the 27th. There were running and harness races on each day and both seemed popular with the immense crowds that turned out regularly to see them. The betting was all by auction and mutual pools, with Sam Whitehead, now a retired capitalist of San Francisco, as the auctioneer. It seems to me that I have never seen his equal since. First choice nearly always opened at \$100 on any race and often ran to \$250 or \$300, with an occasional race where a thousand would be offered for the opportunity to designate the name that should be on the first ticket.

On the opening day there were three races on the card. The first was a running race, mile heats, between Abi by Woodburn and Bonita by Norfolk, for a stake of \$2,000. Abi won in straight heats in 1:46½ and 1:49. Then came a stallion race for trotters, mile heats, three in five, for a purse of \$750. Ajax and General Reno were the only starters and the former won in straight heats, best time 2:35. Then in a 3:00 class for a purse of \$750, Lady Blanchard, owned by S. B. Whipple, defeated Addie Lee, owned by A. F. Smith, in straight heats, the fastest of which was 2:39. The timers for these races were George Johnson, George Gilbert and William Hendrickson.

On Friday, the second day, there were two running races. In the first Willis Hull's Target, by Rifleman, defeated Irene Harding, Sappho and Monarch in two straight heats in 1:45½ and 1:48½.

Then came a race that would probably not get an entry if offered today at Emeryville. This was

a purse of \$1,000, for runners, mile heats, three in five. There were four starters in it, and it was one of the heaviest betting races ever seen in California. The starters were C. C. Tyler's Nettie Brown by Rifleman, George A. Johnson's Phil Sheridan by Norfolk, A. C. St. John's Demorett by Scythian, and George Treat's Nell Flaherty by Rifleman. Demorett, as her name was spelled on the card (I believe she is registered as Demirep in the books) won the first heat in 1:45½, good time for those days, and came back the next heat in 1:46½. Nell Flaherty, very heavily played, then took two heats in 1:44½ and 1:47½. Phil Sheridan had been 3-2-3-2 in these four heats, and Nettie Brown fourth each time. The three mares were all very tired and the son of Norfolk won the next three heats in 1:47, 1:51½ and 1:52, distancing Nettie Brown in the fifth heat. Phil Sheridan was dog lame the last two heats, but his gameness carried him through. The timers that day were Robert Morrow, Budd Doble and J. H. McAllister.

On Saturday, Steve Whipple's Ajax and Moscow beat Yank Smith's Highland Mary and George Treat in a double team race, three straight heats, best time 2:45. This was for a purse of \$750. In the 2:50 trot the same day Lady Blanchard distanced her field the first heat in 2:26½, the fastest mile made by a trotter during the meeting.

On Monday, Irene Harding won over three competitors at two mile heats, Bonita taking the first heat in 3:40½, and the Jack Malone mare the next two in 3:43 and 3:46. In the trotting race that day Moscow won in straight order defeating Rosedale, Addie Lee, Broomcorn, and Jim Cook, best time 2:34. The last race this day was a free for all pace, in which Defiance, Billy Mayo and Longfellow started, Defiance taking the first, second and fourth heats and Billy Mayo the third. The time was 2:21½, 2:22½, 2:24½ and 2:22½ and it was considered a great race.

On Tuesday, the chestnut gelding Jerome, owned by John Boggs, of Colusa, won the free for all trot, purse \$1,000, after dropping the first heat to Mayflower, the little mare that afterwards became a great broodmare at Palo Alto farm. Mayflower took a record of 2:31½ in this race.

On Wednesday the card opened with a two mile and repeat running race for \$1,000, in which Irene Harding, Modesto, Alice May, Thad Stevens and Nettie Brown were the starters. Nettie Brown took the first heat in 3:40½, and Thad Stevens the next two and the race in 3:41½, 3:45½. The same afternoon I. Eckert's Rosedale won the 2:35 trot, purse \$750, from Jim Cook, Highland Mary, and Broomcorn in straight heats, best time 2:34.

On Thursday a free for all trot, two mile heats, was won by John Boggs' Jerome, time 5:01½, 5:02½, defeating California Dexter and Mayflower. The pacers Longfellow, Defiance and Americus started also in a two mile heat race. Defiance won the first heat in 4:49½, and he and Longfellow made a dead heat of the second in 4:47½, the third heat going to Defiance in 4:57½. A dash of one mile for two year old runners ended the day's program. Theodore Winters' colt Budd Doble winning in 1:51½, defeating Alexander Selkirk and Lady Barnes.

On Friday, the last day of the fair, there was but one race, a trotting event, purse \$750, for all horses that had never beaten 2:32½. There were seven starters in this race, which was drawn out to six heats before the winner was returned in S. B. Whipple's Moscow. H. W. Seale's Black Swan took second money, and John Boggs' May Howard third. The fastest heat of this race was the second in 2:28½, and the slowest the fifth in 2:32½.

There were but three moneys those days and in this race first horse won \$500, second \$150, and third \$100, a division which it seems to me has not been improved upon by making four moneys at 50, 25, 15 and 10 per cent.

In "looking backward" to the races of that State Fair of 1872, the wonderful endurance of Phil Sheridan, winner of the seven heat running race, has left the deepest impression on my mind, and it will be interesting to the students of pedigree to say something of his breeding, as his sire Norfolk, champion of his day, left a family of great race horses, while his dam Bonnie Bell has left a long line of descendants that have gained fame and fast records on the trotting tracks.

Bonnie Bell was a race mare herself and won at all distances. She was by Williamson's Belmont out of old Liz Givens by imported Langford, therefore an own sister to California Langford, whose blood has mingled well with that of trotting bred stock. Bonnie Bell was sold to Mr. Meek, of Haywards, who bred her to the thoroughbred horse Woodburn and got Centennial Bell; also a race winner. Centennial Bell was bred to Ulster Chief 18011, and the produce was Celerity, dam of Clipper 2:06. Mated with Mambrino Wilkes 6083, Centennial Bell produced Dusk, the dam of Fallacy 2:17½, and bred to Nutwood 600 she produced Patti, that in turn produced Lustre 2:22, Sidnut 2:25½, and Fenella, the dam of Janice 2:08½.

Bonnie Bell was bred to Chieftain 721, and the produce was Lady Bell, dam of Edwina 2:21½, and bred again to Chieftain produced Bonnie B., dam of Eric 2:17. Bonnie B. was bred to Hawthorne 10935, and produced Linda, the dam of Dan Burns 2:15. Eleanor, a sister to Eric, was the dam of Lenora 2:23, and Lenora is the dam of Opitsah 2:16½.

These are not all the record holding trotters and pacers that trace to old Bonnie Bell, dam of Phil Sheridan, winner of the greatest race ever run at mile heats in California, but this list will suffice for this article.

The State Fair in those days was an event which attracted to Sacramento nearly all the leading farmers and breeders, as well as many of the leading professional and business men of the Coast. There was no six months racing at San Francisco then to surfeit people with racing, and there were few railroads and no electric trains to carry people to the metropolis for little money, and the annual State Fair was the only "outing" many farmers and their families enjoyed. Those who lived within a radius of fifty miles of the capital drove their teams to the big exposition, and a majority of the cattle shown reached the fair grounds after a long dusty journey over the roads.

At the races, the best people in the State were in evidence, and while there was a great deal of betting there were no bookmakers, the bettors making their own odds and backing their favorites heavily. There was much "visiting" between the farmers' families during the week, and when it was all over they returned to their homes more than pleased with their few days' recreation, and resolved to be back again next year.

It was a healthy, profitable, educator along many lines, and nothing did so much to build up the herds and flocks of California to the splendid standard they now have, as did the annual competitive show for prizes. To me, as a boy, it was the great week of the year, and the day's journey to Sacramento was the only long day of the vacation. Perhaps I am so old now that I like old fashioned ways, but I certainly believe that a fair run on the old lines, and with the same generous premiums would again draw crowds of farmers, stock men, merchants and manufacturers as it did then and would be a credit and a profit to the entire State. The present Board of Directors, I am glad to see, is working along these lines, and it looks as if the California State Fair of 1908 would have many of the old time attractions and a large number of modern features that the best and most up-to-date State Fairs have found to be pleasing and satisfactory to the people. At any rate we'll all be there this year to see it.

IRONCLAD.

SALE OF THOROUGHBREDS.

The Ormondale Stock Farm will sell all its horses in training at Fred H. Chase & Co.'s sales pavilion, Tuesday evening, March 10th. There are ten head, of which nine are two-year-olds and the other a three-year-old. The list of horses to be sold follows:

Two-Year-Olds.

Duke of Milan, b c, Orsina-Spinach (winner).
Woodlander, b c, Heywood-Orellena (winner).
Argonaut, b c, Cunard-Plumeria.
Middie, ch c, Cunard-May W.
Reformation, b c, Ossary-Future Bright.
Gabriel, ch c, St. Carlo-Legare.
Golden Oriole, ch f, Heywood-Gold Lace.
Marchesa, b f, Heywood-Orsina.
Cavellena, b f, Ossary-Carmen-Sylva.

Three-Year-Old.

Orsung, b c, Ossary-Lovelight (winner).

BREEDING FOR PAIRS.

The great and steadily increasing difficulty found in "matching up" satisfactory pairs should long ago have indicated to every breeder the advisability of following some distinct type in collecting or renewing his broodmares, thereby also greatly enhancing the reputation of his stallion. The progeny would still be dissimilar in many cases, but at all events there would be a tendency to uniformity of size and type which would return its cash equivalent in due time. It is in matched pairs that the "big money" is found, and even a rumor of such a pair is enough to hurry buyers from all quarters to inspect and bid for them. The breeder and the farmer have here the opportunity to breed wisely and well and to try to cater to that vast market for such offerings, which is strong to-day and sure to so remain. Breeding from similar parents approaches most nearly to an exact science.—New York Herald.

Some of the Eastern papers have stated that the late Ben Davies bred Zephyr 2:07½. This is a mistake. Mr. C. A. Winslip, of Los Angeles, owned Gazelle 2:11½ and bred her to Zombro 2:11, and raised Zephyr. When she was a three-year-old he took her to Cleveland, Ohio, and sold her at private sale for \$10,000.

Ida F. (dam of Queen Bee 2:13½, Avana 2:18½, Bob Allen 2:27½ and Innerguard trial 2:09), is a full sister to Mr. George L. Warlow's famous mare Athalia (dam of Athanio 2:10, Ira 2:10½, Athabio 2:24½, etc.

There is no firm in America better established than "Studebakers." The immense plant at South Bend, Indiana, has a world wide reputation for its size and excellence of the vehicles of every kind that are manufactured there. On the Pacific Coast this firm has a headquarters on Market street, near Tenth, where carriages, wagons, buggies, carts and harness of all descriptions are on exhibition and the prices asked are far below those of any other establishment in California. The Toomey sulky, that favorite among horse trainers and drivers, is for sale here also, Studebaker Bros. & Co. being the Pacific Coast agents.

Drink Jackson's Napa Soda.

PAYMENTS MADE ON 58 THREE-YEAR-OLDS.

Breeders' Futurity No. 6 to Have Good Fields in Both Divisions.

Sixth payment was made February 1st on no less than 58 colts and fillies entered in Pacific Breeders' Futurity No. 5, for foals of 1905 to trot or pace this year as three-year-olds.

The list of those on which sixth payment was made is as follows:

Frank E. Alley's b f Bettie G. by Grace B., dam Kisses by Saturn.

D. L. Bachant's b f Miss Dividend by Athabio, dam Vivian by Hamb. Wilkes.

G. B. Blanchard's br c B. & D. by Kinney Lou, dam Aurelia by Nearest.

J. F. Blessing's b f Benito B. by Stam B., dam Salinas Maid by Junio.

W. O. Bowers' ch f Betty Direct by I. Direct, dam Betsy by Silver Bee.

Alex. Brown's b f Angella by Prince Ansel, dam Majella B. by Nushagak; br c Nusado by Nushagak, dam Addie B. by Dexter Prince.

I. V. Button's b c Button McKinney by Scott McKinney, dam Maggie by Royal Sid.

Cook & Webb's b f Etta Logan by Bert Logan, dam Hattie T. by Stam B.

James Campbell's blk f On Bly by On Stanley, dam Nellie Bly by Woolsey.

W. A. Clark Jr.'s ch f Chiquita by Highland C., dam Reina del Diabio by Diabio.

Robert T. Curtis's br f Hy You by On Stanley, dam Hyto by Happy Prince.

E. D. Dudley's br c Lookout by Searchlight, dam Bee Sterling by Sterling.

W. G. Durfee's b f by Petigru, dam Jessie Madison by James Madison; c by Del Coronado, dam Lulu Wilkes.

E. R. Dunn's blk f Rose Lecco by Lecco, dam Rose McKinney by McKinney; b c Starlight by Searchlight, dam Anita I. by Prince Neer.

C. H. Durfee's blk c Dr. Lecco by Lecco, dam Bessie D. by McKinney.

V. K. Dunne's b f Debutante by Kinney Lou, dam Athene by Dexter Prince.

E. A. Gammon's b f Cleo Dillon by Sidney Dillon, dam Cleo G. by Yosemite.

M. Grossmayer's rn c Richmond G. by Richmond Chief, by Bess.

Mrs. L. J. H. Hasting's b c by Del Coronado, dam Lady Gossiper by Gossiper.

T. C. Horigan's s c De Oro by Demonio, dam Hanora by Oro Wilkes.

Henry Hahn's b f Alameda by Stam B., dam Henrietta by Boodle.

J. H. Halle's b c Delmer D. by Demonio, dam Babe by Dawnlight.

Rudolph Jordan Jr.'s br c El Pronto by Stam B., dam Constancia by McKinney.

J. A. Kirkman's blk f Idolway by Stoneway, dam Carrie by A. W. Richmond.

George Kelly's br c Bonkin by Bonnie McK., dam Vantrim by Antrim.

La Siesta Ranch's b c Siesta by Iran Alto, dam Wanda by Eros.

R. P. Lathrop's b c Star Medium by Dictatus Medium, dam Diva by Mohawk Chief.

C. A. Mead's br g Boaz G. by Greco B., dam Maud by Stamboul.

J. S. Manchester's b c Dawson by Wayland W., dam Belle Cooper by Ira.

W. S. Maben's blk g Admiral Toga by Petigru, dam Dixie W. by Zolock.

J. W. Marshall's b s Moortrix by Azmoor, dam Trix by Nutwood Wilkes.

T. H. Miller's blk f Flash by Searchlight, dam Bonnie by Director.

H. W. Meek's br c Kalitan by Kinney Lou, dam Cricket by Steinway.

Frank Overacker's b f Fanny Easter by Arner, dam Fanny Vasto by Vasto.

G. W. Prescott's br c Sonlock by Zolock, dam Blondie by Prince Royal.

B. H. River's b c Burney by Dictatus, dam Flora 2d by Brilliant.

F. A. Ramsey's br c Don Reginaldo by On Stanley, dam Belle Raymon by Raymon.

F. H. Sanderson's blk f Fairfield Maid by Count Hannibal, dam Lady Woodnut by Woodnut.

W. T. Seson's b c San Felipe by Zombro, dam Ella J. by Bob Mason.

Charles F. Silva's b c by Stam B., dam Swift Bird by Waldstein.

P. R. Sim's br c Cap Gorgas by Marvin Wlikes, dam Chita by a son of Sidney.

S. S. Stiles' b f Helen Stiles by Sidney Dillon, dam Silver Haw by Silver Bow.

Daniel Sullivan's b c Starlight by Searchlight, dam Carmel.

E. McHenry Train's br c Ray o'Light by Searchlight, dam Carrie B. by Alex. Button.

G. W. Theuerkauf's rn c John Christenson by Kinney Lou, dam Pearl Dictatus by Dictatus.

P. J. Thompson's b c Welnado by Welcome, dam Delnado by Boydell.

J. H. Torrey's b f Bessie T. by Zombro, dam Manila by Shadeland Hero.

Mrs. E. S. Turner's ch c California Dillon by Sidney Dillon, dam Carlitone by Antion.

Valencia Stock Farm's br c Conqueror by Direct Heir, dam La Belle by Sidney.

M. M. Vincent's b f Vera Hal by Expressive Mac, dam Carmen by Newsboy.

E. B. Whelehan's s c California B. by Dictatus, dam Bell by Colton.

Mrs. Alma Whitehead's br f Miss Delphi by Delphi, dam The Mrs. by Derby Ash.

C. Whitehead's br g The Kid by Delphi, dam Altoonita by Altoona.

W. R. Zibbell's b f Georgie Z. by Lynwood W., dam Evangie by Shadeland Onward.

J. W. Zibbell's b f Katalina by Tom Smith, dam Kate Lumry by Shadeland Onward.

CHRONICLES OF THE CIRCUIT.

Chapter 1—The Facts.

And it came to pass that the annual meetings at which contests and trials of speed and endurance between trotting horses and also those that pace, had through the length and breadth of California lapsed into a state once described by Grover the President, as one of innocuous desuetude, which meant in the more picturesque and emphatic language of James the Swipe, that it was decidedly "on the bum."

Since the days when James, the Democrat, while seated in the Governor's chair, had run his fountain pen through the appropriation bill, erasing that portion of it which set aside certain sums of money to aid the district fairs (a course which was followed by George, the Republican); the fairs where the farmers had gathered together and vied with one another over the products of their land, had been few and far between, and there was consequently great weeping and wailing and sometimes gnashing of teeth among those who delight to sit behind fast horses and drive them to the wire where fat purses are given to those who reach it first.

And a cry went up from the owners of these trotting and pacing horses: "Give us a good circuit or the business of breeding the great American trotter will be no longer profitable in California."

And it came to pass that a number of wise men known up and down the land as the P. C. T. H. B. A. had arranged an annual colt race called a futurity, and it met with great favor in the eyes of the breeders of standard horses.

This race was held every year, and much money was paid out to the colts that came first and second and third and even to those that came fourth, and it pleased the owners greatly.

And the P. C. T. H. B. A. gave also other money for the older horses that had great speed, and the multitude came and saw the contests and were greatly interested and many who had not owned horses before went straightway and bought them.

And at a few places in the valleys and near the coast, meetings were given, at which many came to see the swift going horses. And the meetings were greatly enjoyed and the price of horses increased.

But the number of the towns where the speed contests were given were few and the tracks were far between, and there went up another great cry from the horse owners: "Give us a larger circuit, and let it be advertised early, and be an annual and permanent organization."

But the cries of the horse owners were not listened to, and there were but half as many horses trained as there should have been in such a great horse breeding State.

Chapter II—The Prophecy.

And there arose in California a man who loved the horse, especially the one that draweth the buggy and sometimes the cart or sulky at which times he goeth like the wind and burneth up the road. And this man was a leader among men and when he spoke all listened and then he acted according to the words he had spoken.

And he said: "It seemeth meet that our great horse breeding State of California should have a harness racing circuit, and it should be a good one, well managed, and should continue for at least ten weeks."

And when he had said these things the horsemen answered: "Yea, verily, it should be so. But who will organize such a circuit?"

And he said: "I will!"

And straightway he called together a few of the wise men among those who do things rather than talk about them. Among them were the Los Angeleno, and the San Berdoite and Riversidian, and the Salinasite, and the Pleasantonian, and the Santa Rosan, and the Vallejoite and the Dixonite and the Woodlandite and the Marysvillian, and the Chicoite and the Stocktonian and the Fresnoite and the Hanfordite and the Tularian and the Bakersfieldian, and a few others.

And he said unto them: "Let us form a corporation known as the California Circuit; let us elect a secretary and pay him not less than two thousand dollars per year, and let us give him an assistant whose pay shall be one thousand. Let us direct them to arrange programs and offer purses for all these places, and let us advertise the same so that all may see and all who trot or pace may read."

Let us do these things now and let us each and every one pledge from \$200 to \$500 for his town for a fund to carry these things through.

And they signed this pledge, each one of them according to his ability to pay, and there were seventeen signers.

And the amount they pledged was \$6,000, of which \$2,000 was to be paid to the secretary and \$1,000 to his assistant and the remaining \$3,000 went to advertise and boom the circuit, and guarantee the purses.

And when they had done these things, lo, the secretary and his assistant pulled off their coats and went to work, and soon the horses were in training all over the land, and there was great rejoicing among all those identified with the horse breeding business.

And when the summer came and the meetings began there was much said in the daily press about the races, and the people came in large numbers to see the contests. From July to November there was racing, but for only one week in each town and as there was no bookmaking but only the auction and the mutual pool, the tout and the tin-horn were not seen, but gentlemen and ladies attended regularly and were greatly pleased.

And the owners raced fairly and according to rule, and there were good men for judges and a man who knew how to start.

And so popular was the sport that still more people bought horses and the park and country roads and speedways were lined with fine turnouts drawn by fast and high steppers.

And the people marveled and said: "Yea, verily, the trotting horse has come to his own."

And all these things came to pass because one man was found who had the brains, the energy, the interest in horses, and the will to be a leader.

HART BOSWELL 13,699.

There are few as well bred stallions in America as this one. His sire being Onward 2:25½, and his dam Nancy Lee, by Dictator, proves this. Onward sired 198 in the 2:30 list, eleven of them faster than 2:10 and among them being some of the greatest campaigners that ever "scored for the word": Onward Silver 2:05½, Beauzetta (4) 2:06½, Margaret O. 2:08½, Pilatus 2:09½, Pearl Onward 2:06½, Gazette 2:07½, Colbert 2:07½, Miss Ophelia 2:09½, Major Mason 2:09½, Col. Thornton 2:09½ and Cornelia Belle 2:10. His daughters have produced the following 2:10 performers: China Maid 2:05½, Choral 2:06½, Symboler 2:09½, Joe Interest 2:09½ and Idora 2:09½, besides 160 others in the 2:30 list. Onward 2:25½ was by Geo. Wilkes 2:22 out of Dolly (dam of Director 2:17, Thorndale 2:22½, etc.), by Mambrino Chief 11. Nancy Lee, the dam of Hart Boswell, was by Dictator and she was a wonderful speed matron, having produced Nancy Hanks 2:04, the world's champion trotter from 1892 to 1894, and, since being retired to the breeding ranks "The Queen" has produced Admiral Dewey 2:04½, Lord Roberts 2:07½ and Markala 2:18½. Two of her daughters are the dams of Vice-Commodore 2:11 and Vanitza 2:29½. Nancy Lee also produced Nancy Stam 2:30, Dictator Wilkes (sire of 11); Director Moore (sire of 1), Meta S. (dam of Bugle 2:12½ and Enticing 2:26½ and Lady Boone, dam of 1). Dictator 117, sired Director 2:17, Jay Eye See 2:10, etc., and 60 others in 2:30. The second dam of Hart Boswell was Sophy by the great broodmare sire Edwin Forrest, and she produced Nellie B. (dam of Mike Wilkes 2:15½, Ira Wilkes 2:22½, a sire, Adrian Wilkes, sire of Roy Wilkes 2:06½, etc., Boswell, a sire, and Rivulet, dam of two in 2:30). Sophy's dam was Sophronia by Parker's Brown Pilot, and her dam was by the thoroughbred Bertrand.

The Onward-Dictator cross has been productive of splendid results and to it we are indebted for that great campaigner Gazette 2:07½ (sire of Aileen 2:07½ and four others in the 2:20 list), also for Rex Americus 2:11½ (sire of John Mc. 2:09½, Battleton 2:09½, American Belle 2:12½ and thirty others in 2:30), Liberty Chimes 2:22½ (a sire), Victoria Wilkes 2:19½, Americus 2:28½, Prince Murat 2:24½, Allethia 2:29, etc. The blood of that quartette of famous broodmares Clara by American Star, Dolly by Mambrino Chief, Nancy Lee, by Dictator, and Sophy, by Edwin Forrest, is found in hundreds of the best campaigners in America and Europe. It is the blood that "breeds on" and is always fashionable. More of the Kings and Queens of the trotting world carry the blood of some one of these four in their veins than of any other known to horsemen.

Hart Boswell has never had the opportunities in the stud his rich inheritance warrants. He is a perfect likeness of his sire, and had he been placed at the head of some large stock farm, there is no doubt that he would have many fast and reliable horses to his credit. As it is, he has been bred to comparatively few mares and the owners of his progeny had great pleasure in driving them, so much so, that very few of his colts have ever been placed in training. Everyone of his get is noted for size, splendid limbs, good constitutions, fine dispositions, gameness and perfect action. As an outcross for mares carrying the blood of Electioneer, The Moor, Steinway, Nutwood 2:18½, A. W. Richmond, Sidney 2:19½, Searchlight 2:03½, or any of the other sires recognized as "Californians," Hart Boswell should be deemed invaluable. He was injured when a yearling, consequently was never able to stand training and his owner, Mr. K. O'Grady, of the Laurel Creek Farm, San Mateo, believes he would have obtained a very low mark were it not for this misfortune. He is a remarkably sure foal getter and at the low price set for his services, \$25 for the season, his book should be rapidly filled. He is the only Onward stallion in California and as stated above, his strong breeding on the maternal side makes him one of the best bred horses on the Pacific Coast.

DAMS WITH UNDEVELOPED SPEED.

(Written for the Breeder and Sportsman.)

Mated with California broodmares, a large number of trotting bred stallions have attained fame as producers of performers with extreme speed. Ever since the days of Nutwood on this Coast many of these stallions have been exported to other States, there to be mated with the most expensive broodmares that money could purchase. For every dollar expended here in training the California progeny of these stallions, hundreds of dollars have been expended throughout the East in training progeny resulting from matings of these stallions after they left California. Colts from mares with records are usually trained and given good opportunity to also earn for themselves a record. Such being the class of mares selected for these stallions after they left California, it follows that much money in the East was expended in training their progeny. Nutwood, Sultan, Stamboul, Sidney, Director, Guy Wilkes, Anteeo, Antevolo, Direct, McKinney and Sidney Dillon are some of the stallions that have been taken across the continent for breeding purposes.

When Nutwood stood for public service in California there were but few mares with records to be mated with him. From mares sent to him, many of whom were nicely trotting bred but without records and about an equal number of whom were only strongly bred, having close up perhaps one cross of the trotter or thoroughbred, Nutwood's success in producing performers and the sires and dams of performers was almost phenomenal. It can be correctly stated that, opportunity considered, his success in California, for the brief time that he was here, was as great, if not greater, than in the East, where he was mated with a very large number of the choicest of broodmares, mares who had produced the best performers and others who themselves had low records. Sultan, Stamboul, Sidney, Director, Guy Wilkes, Anteeo and Antevolo were less successful in the East than in California, even under superior opportunities. Nor has even Direct, opportunity considered, surpassed his California record as a producer. After the lapse of three more years it is probable that it can be said of McKinney and Sidney Dillon that they have not in the East lived up to their California records.

The breeding interests of California well sustains the loss of its great sires through exportation, for every time a California sire is taken East he leaves behind in California sons and daughters who produce more speed and a higher degree of speed than the exported sire produced. This fact is remarkable, since during the last fifteen years but few trotting meetings have been held in California, stallions at public service have greatly increased in number, the number of horses in training has in number, the number of horses in training has greatly decreased, and the proportion of each stallion's produce to be trained has so greatly decreased that the several sons of an exported sire will not have in training to represent them even half the number that represented their sire.

The fact that the breeding interests in California does not get a setback by early exportation of its most successful sires has been boastfully accounted for by claims of superiority for our climate. A climate in which the very best of feed can be produced, and even grows uncultivated, and in which colts and broodmares and sires can run out in fields or paddocks every day of the year without enduring extremes of cold or heat, doubtless does contribute greatly to success in producing great sires, great dams and great performers. Horses bred generation after generation in this climate naturally advance to a higher type, capable of producing better performers with each succeeding generation. But climate alone has not done all of this. The fact that ever since the breeding of trotters was begun in California up to the present time by far the greater proportion of mares mated with trotting bred stallions were mares who had never been raced, or even trained for a record, doubtless contributed as much as did climate to produce great performers and the sires and dams of great performers. Mated with such mares in California many stallions established fame for themselves right at the beginning of their stud career, while mated with a large proportion of mares with low records, after being exported to the East, these same stallions have not lived up to their California record as producers of a large number of performers with extreme speed. It is a notable fact that mares who have been holders of the world's trotting record or who have been great performers with low records in races, have been mostly failures in the stud. Excepting Nancy Hanks, mares who have held champion records, have all been failures as producers of a high degree of speed. Of the thirty new 2:10 performers of 1907 only six were out of dams with records below 2:30, 20 per cent, yet nearly all of the broodmares in the United States with low records or even with records below 2:30 are bred each year to the best stallions that can be mated with them, while perhaps all of their progeny get the benefit of good training. Under such superior opportunities one might expect the progeny of mares with low records to have a monopoly of the new 2:10 list. In fact, after fifty years of breeding and development of the trotter, those who advocate for breeding purposes mostly mares that have records and that have performed well, should not only be able to show the 2:10 list monopolized by performers whose dams had records, but also by a very large proportion of performers whose second and

third and even fourth dams were performers with records. Of these six out of thirty mares who were dams of the new 2:10 trotters of 1907 only one had a record below 2:20 and only one other had a record below 2:25, verily a poor showing for the broodmares with records and for the very large number of their progeny that were given superior opportunities in training. Another remarkable fact is that these dams of the new 2:10 trotters of 1907 were mostly by sires whose dams also had no record below 2:30, only four, or 13.1-3 per cent, of these sires being out of dams with records, none being out of dams with records below 2:27. The sires of these new 2:10 trotters of 1907 were also mostly from dams with undeveloped speed or without records, only six out of thirty, or 20 per cent, being from dams with records, and only two, or 6.2-3 per cent, being from dams with records of 2:25 or better, and none being from dams with a record of 2:20 or better. Hence, in the pedigrees of the new 2:10 trotters of 1907 and in the pedigrees of their sires and their dams and the sires of their dams, broodmares with records make an extremely poor showing. The registry of trotters shows that but eighteen stallions have each sired as many as twenty 2:15 performers. Of these eighteen stallions only two, 11.1-9 per cent, are out of mares with records of 2:30 or better, the dam of one having a record of 2:23½ and of the other 2:29½. Nine of these eighteen stallions are by George Wilkes himself, five others are by his sons, leaving but four that are from other families. Of these fourteen great speed sires of the George Wilkes male line of Hambletonian 10, not even one was out of a dam with developed speed.

The foregoing percentages may be summed up as follows: Dams with undeveloped speed produce about 80 per cent of the 2:10 performers, about 80 per cent of the sires of 2:10 performers, about 86.2-3 per cent of the sires of the dams of 2:10 performers, and about 88.8-9 per cent of the sires of the 2:15 performers. These percentages are based upon two tables, one containing the new 2:10 trotters for 1907 and the other giving the sires that have each produced twenty or more 2:15 performers.

Since broodmares with records below 2:30 produce only about 20 per cent of the 2:10 performers and 20 per cent of the sires of these performers, notwithstanding their large number, and the superior opportunities given them in the stud and given their produce in training, the question naturally arises why are not they, as dams, the equal, if not the superior, of broodmares with undeveloped speed. Any process of training, fitting an individual for superior physical performance as to speed or endurance, develops in that individual a species of nervousness which, continued long enough to complete an adequate and even most careful and judicious course of preparation, becomes a "strain," a "nervous strain" or "tension." There becomes developed a species of nervousness or exuberance of spirits, that is usually spoken of as "feeling extra good." Every human being who has ever trained much for a physical contest or exhibition has doubtless experienced this sensation of "feeling extra good," which in reality is a species of nervousness, just as much as is worryment, fretfulness or other similar conditions. The tension, the strain, the wear and tear of any species of nervousness will sooner or later produce physiological and even pathological changes in the individual that cause a physical deterioration. From an individual that has suffered physical deterioration or even repeated assaults having a tendency to deteriorate physically, we cannot reasonably expect progeny of a superior type or even of type and quality the equal of the parent individual. Females are more sensitive in their nervous organization than males, and for this reason mares are the more intensely affected by the nervous tension resulting from training and preparation for racing and obtaining a record. It follows then that sires who have been trained and raced, even to low records, will always be more successful as producers of speed and as producers of the sires and dams of performers than mares once trained or given a record.

The breeders of California have always been very much favored by having on their farms a large number of choicely bred mares that have not been trained or raced and in having available most choicely bred stallions with which to mate these mares. Previous to depression throughout the East in the breeding of trotters, mares that here were trained and obtained good records were purchased by Eastern buyers for racing and breeding purposes, while other mares out of the same dams and by the same sires, that later were not trained, are yet doing broodmare service on California stock farms. From these mares will come great sires and great dams. Buyers for foreign markets are just now awakening to a partial appreciation of their value as broodmares for exportation, in preference to mares with records, and, unless we look carefully to our laurels, breeders in foreign lands may keep us busy trying to keep up with improvements in type and quality of the progeny of these mares. In having on hand at the present time so many of these grandly bred mares with undeveloped speed, "we have builded better than we knew."

C. E. FARNUM, M. D.

JUDGING THE BREEDING STALLION.

(Written for the Breeder and Sportsman.)

In his book on judging of live stock, John A. Craig has some good things to say in regard to judging a stallion for breeding purposes.

In the first place he says a stallion should have that general masculine appearance in every part of his make up. This is shown in his action, in that he should be active and aggressive. This does not mean that he should be vicious, but give signs of pent up energy and life that is suggestive of creative power. A male of any class should be expected to be heavier in the shoulder and wider in the chest than the female of the same breed. He should not show signs of weakness in the pelvic region but usually a male is not as wide as a female behind. In the face, the stallion should have a determined expression with hard features and a larger head and neck and higher crest than the mare. The non-development of sex characteristics in the male is indication of a lack of vigor and that in turn has a close relation to prepotency or the impressive powers. A female appearance means a lack of tone in muscle and loss of vigor and this is observed in sires lacking impressive power. The most noted sires in the history of breeding have had characteristics of masculinity unusually developed.

A correct conformation should be demanded in a breeding stallion. It is generally known that even such a slight matter as a twist of the fetlock or turn of the foot in action is very likely to pass from a stallion to all of his get. Greater defects in conformation such as a curby hock, a weak knee, etc., should be sufficient reason to condemn a breeder. It would be more justifiable to use a stallion with a spavin but with a well constructed hock than one without a spavin but with a hock poorly formed. For it is certain that the horse must have had a severe wrench or injury to bring about a spavin on a good hock while the poorly formed hock is likely to produce a spavin under most any circumstance. Breeding animals of any kind may be so carefully tended that they fail to show diseases as would be produced by their conformations under ordinary stress of labor.

It is well to bear in mind the diseases that are considered as hereditary. This term does not imply that the disease is directly transmitted but that the horse having them transmits to his get a decided tendency to contract them. The newly born foal never has them, but it has defects of conformation that makes it an easy subject for those diseases. The Royal Commission, composed of the leading veterinarians of England, have decided that the following diseases in horses are hereditary: Roaring, whistling, sidebone, ringbone, navicular disease, curb, bone spavin, bog spavin, thorough pin grease, shivering and cataract.

Pedigree and performance should be considered in the judging of a stallion. In the instance of a standard bred trotter it is assumed by some, that the fact that a stallion complies with the standard is sufficient consideration to give as to his breeding, but those who have studied the matter will concede that there is a vast difference in the value of the pedigrees of standard horses.

M. B. STEVENS.

NO CHANCE.

What chance has the horsy crank who takes up the auto craze to permanently transfer his affections to the "choo-choo" wagon, who has indelibly impressed on memory's tablets, in the language of the turf scribe "Volunteer," some horse that he carries in his heart of hearts, and will until it ceases to beat, whose image remains unfading, glorified forever by the rainbow light which gilds the brightest of his memories? His first idol after all these weary years, filled with lost illusions, he still finds was worthy his idolatry. Fast he was, and stout, and game, and true as steel, with a temper like a lion's when it was aroused, but withal so entirely lovable that one could never know him and not love him.

Fire blazed from his eyes in the heat of the conflict, but in his quiet hours within their luminous depths there seemed in very truth "some soul aglow." His Arab head, with its delicately chisled contour, its small pointed ear and nostril flaring like a trumpet, the game cock throttle, the arched neck, with its rippling mane; the shoulder embossed with supple muscle; the glorious deep quarters, fit for a sculptor's model; the fluted limbs, with every joint and tendon clean cut, as if wrought in living bronze—art were powerless to portray, language to depict, his image so that that they should make him known to those who never knew him.

As he stood under the beeches, flecked with foam, every smallest vein dappling his wine colored, satin coat in delicate arabesques, tossing his head eagerly, quivering alive in every nerve and fiber of his exuberant vitality, reaching now for a swallow of water, now restively resenting the pressure of the scraper, again quietude itself as grateful washes and skilled hands brought coolness to his broiling blood—what a picture—what a picture, haunting, unforgettable!

Your Stomach is O. K. if you drink Jackson's Napa Soda.

A rumor was afloat in town this week that W. A. Clark Jr. was trying to purchase the unmarked pacer Charely D. by McKinney from Col. J. C. Kirkpatrick, with the idea of racing him on the Grand Circuit.

Washington McKinney

An Eastern horseman said, "I consider Washington McKinney the handsomest horse in California and the handsomest trotting bred stallion I ever saw, excepting Moquette, the beautiful son of Wilton." His opinion is endorsed by all who have seen this stallion. Washington McKinney stands 16 hands 1 inch high, is a beautiful black brown in color and weighs 1,250 pounds in stud condition. Has a clean cut, fine head, beautiful ears, arched neck, great shoulders, short back, well rounded hips and magnificent quarters, legs and feet, beautiful mane and tail, in fact, he is a perfect specimen of the highly bred American trotter. In action, a line trotter, smooth gaited and powerful. His trial record of 2:22½ is no measure of his speed and his owner expects to give him a record better than 2:20 this year. His breeding is of the best and most fashionable. His disposition is kind and gentle, and these characteristics he transmits by his get. McKinney 2:11¼, his sire, is the sire of more 2:10 trotters than any other horse living or dead. He has sired, up to January 1, 1908, ninety-two in the 2:30 list and seventeen of these have records of 2:10 or better, and he is considered the greatest of trotting sires. Alcyone 2:27, the sire of McKinney, was unquestionably the most prepotent son of George Wilkes 2:22, and although he died in his prime, he has left sixty sons and daughters with standard records. He sired thirty-two dams of sixty-one standard performers and fifty-two sons which sired over 400 performers. George Wilkes 2:22, the sire of Alcyone, was the greatest son of Hambletonian 10 and he sired eighty-three, the dams of 200 and 103 sons which sired over 3,000 standard performers. Hambletonian 10, the sire of George Wilkes, sired forty standard trotters, the dams of 118; 150 of his sons sired over 2,000. He is the founder of the great Hambletonian family, the blood of which flows through the veins of seventy-five per cent of all the horses in the world which have trotted in 2:30 or better. Lady Washington 2:35, the dam of Washington McKinney, also produced that great race horse George W. McKinney record 2:14¼, (a full brother to Washington McKinney), that in the two seasons he was raced, trotted in eleven races, of which he won four, was second once, third once, fourth twice and unplaced three times—the average time of the thirty-seven heats in which he raced was 2:13½. George W. McKinney is sire of the sensational Los Angeles pacer, Silver Dick, matinee record 2:11¼. Lady Washington also produced El Molino 2:20, besides the dam of Idle Gossip, that trotted a trial in 2:20. Whipple 8957, sire of Lady Washington, was the sire of three in the list and one of which also took a stand-

WASHINGTON McKINNEY 35751.

enough are entered by April 1st to make such a race a reasonable proposition. I do this to encourage the development and training of good ones by him that I have seen or heard of in California. I will also add \$500 to a stake for produce of mares producing foals by him in 1909." To the observant, wide-awake horse owner who knows the demand is increasing for large, handsome, stylish, perfect limbed and perfect formed horses for track or road, horses that have pure trotting action and are endowed with intelligence, this is a splendid opportunity to get that kind, for Washington McKinney, with very limited opportunities in the stud, has sired them, and now that his service fee has been placed as the low figure of \$35 for the season, there should be no hesitancy on the part of owners in sending their mares to him. Anyone who can afford to breed a mare to a horse of his class, can breed to him with a certainty of getting a colt or filly that will be a pleasure to own. He will stand at Santa Rosa this season.

HORSES IN EARLY AMERICA.

Horses are not natives of America. Those running wild in South America and Mexico are descendants of the animals brought over from Europe by the first Spanish colonists, and either escaped from captivity, or were purposely turned out to take care of themselves, says an exchange. The first horses imported into New England were brought over in 1629, or nine years after the landing of the Pilgrims at Plymouth Rock. One horse and seven mare survived the voyage.

Horses were not highly esteemed nor much needed in America at that time nor for a hundred years afterward. No race courses or trotting parks would have been allowed by those stern old Puritans who first settled in New England, and the roads generally were so poor and rough that speed on them was not desirable, or possible with safety to vehicle or its occupants. Oxen were found to be far better and more pleasant for all kinds of farm work, and even for traveling on the road and drawing the family to church. Most of the land was rough, rocky, and full of stumps, so that oxen, being strong, patient, and slow, made a far better team than horses for agricultural purposes, lumbering, and clearing land. They were more cheaply kept, needed little grain when at work, and none at all when idle. They required no expensive harness (only a cheap yoke and chain, costing not more than \$4), and were quickly yoked. Under such circumstances it is not surprising that horses in America during that period were not greatly esteemed or well taken care of.

A farmer was much more proud of a fine yoke of red oxen, four years old, well matched, and well broken, than a span of degenerate horses, such as were then common in the colonies. They were seldom stabled or groomed; the colts under three years old were wintered in the barnyard in order (as was supposed) to make them tough and hardy.

Horses had degenerated to such an extent under bad treatment that in 1668 the General Court, or Legislature, of Massachusetts enacted a law with this preamble: "Whereas, the breed of horses in this country is utterly spoiled, whereby that useful creature will become a burden, which might otherwise become beneficial, and the occasion thereof is conceived to be through the smallness and badness of the stallions and colts that run in our commons and woods." Then the law goes on to fix heavy penalties against allowing "any full-grown horse over two years old to run on any commons, roads, or woods unless he be of comely proportions and of good size—not less than 14 hands high." The selectmen of the town were empowered, and, under severe penalties, required to see that the law was enforced.

This action of the General Court of Massachusetts shows that the people then believed that horses for the best service can be too small, and that they should not be less than 14 hands high. This law was no doubt effectual in making the people raise better horses, for at that time artificial pasturages were few, and the commons and woods were the main dependencies of the colonists for stock feeding during eight months of the year. It is probably better known now than it was 200 years ago that the size of animals depends in a great measure on the fertility of the soil where they are raised and the capacity of producing an abundant food supply, together with judicious care in feeding, watering, and keeping young stock growing all the time unchecked from birth to maturity. Wherever horses have been allowed to run wild, browse in the woods or on prairie grass, exposed to the cold storms of winter unsheltered and unfed, they have invariably degenerated in size, like the Indian ponies and Mexican mustangs. There is not much doubt that the diminutive ponies of Shetland and Iceland were descended from large horses taken to those inhospitable islands centuries ago, or escaped from wrecked vessels, but the scanty subsistence with which they were provided and the rigorous climate to which they were exposed gradually dwarfed their bodies to the present size.

The French who first settled in Canada brought over fair-sized Percheron horses from France, but a harsher climate and a scantier supply of food caused a gradual diminution in the size of their descendants. They became much smaller than their progenitors, but retained the shape and build, and their courage and hardness were increased.

The Germans who settled in the counties of Lancaster and Berks, Pa., brought over the heavy draft horses of their fatherland. The climate was as mild as that to which the horses were accustomed, the soil was as productive as along the Rhine, the horses, and their descendants fared sumptuously every day, and the descendants of those German horses first brought over average as large, if not larger, than their ancestors. A breed was developed in Lancaster County called the Conestoga horses. They were not a new breed, only the large German horses made still larger by breeding for greater size.

It is not known when the first horses were brought into the colony of Virginia, but Fearnought, whose pedigree could be traced back to the purest blood of England, was brought over in 1764, and left his mark on a numerous progeny of uncommon size, beauty, bottom, and speed. He was the ancestor of some notable race horses of Maryland and Virginia, which defied all comers on the track until a little mare from New Jersey named Fashion was taken to the old dominion and beat the champion runner, which belonged to John M. Potts, afterward noted for his opposition to the secession of Virginia. Some large horses were imported into New England in 1630 from Denmark, but were found to be too large for the best service there and soon disappeared.

In colonial times the stallions were kept at work nine months in the year, and this work was not only advantageous to the owners, but was undoubtedly a benefit to the horses and the colts begotten by them. Every bone, sinew, and muscle in the bodies of the sires being hardened and strengthened by labor, they were enabled to transmit a strong constitution to their colts, which were foaled in perfect health and strength. Not only did these hard-working stallions get better colts, but they were better behaved and more easily handled in the coupling season.

Dave Herspring, who is well known to a large circle of California horsemen, and who has been living in New Jersey for several years past, has returned and located at Woodland where he will practice veterinary dentistry. Mr. Herspring is a graduate of the Detroit Veterinary Dental College.

Ninety trotters and pacers were sold by the Kentucky Sales Company on Wednesday of this week for \$31,500, an average of \$350. The star of the sale was the five-year-old pacer George Gano, with a trial of 2:03¼ in a race, by Gambetta Wilkes-Credition. After spirited bidding between Charles Worthington, Dick McMahon, Lou McDonald and "Long Shot" Walter Cox, he was knocked out the latter for \$7,500.

McKINNEY BELLE.

ard pacing record. He was the sire of four dams that produced ten standard performers. Whipple's Hambletonian, the sire of Whipple, was the sire of fifteen standard performers and the dams of thirty-one, including the dams of Azote 2:04¼, Georgena 2:07½. He was by Guy Miller, a son of Hambletonian 10. Lady Mayberry, the dam of Lady Washington, produced also Lady Dey, the dam of Dubec 2:16 (one of the gamest trotters ever seen in California) and Mista 2:19. Chieftain, the sire of Lady Mayberry, was the sire of four and the dams of fourteen standard performers. Hiatoga, the sire of Chieftain, was of pacing blood and he sired Scott's Hiatoga, sire of nine standard performers and the dams of twenty-one. The dam of Chieftain was by Trimble's Eclipse, a son of American Eclipse.

BREEDING THE CARRIAGE HORSE.

Woodland Hackney Stud Achieving Success by
Mating Hackney Stallions With Trotting
Bred Mares.

To breed, raise, educate and prepare for the market a class of horses that will have the style, substance and action of the English Hackney, together with the speed and endurance of the American trotter, has in recent years been the aim of owners of breeding farms in America who cater to that class of buyers who demand fine carriage horses. Ideal animals of this description not only possess the required conformation, but have the disposition that aids them in acquiring perfect manners, and becoming fearless of all objects, at the same time possessing a style and snap which makes them the most attractive animals in the world.

It was with the purpose of breeding this class of horse that a few years ago Messrs. De Pue & Sprague of this city established near Woodland, Yolo county, the Woodland Hackney Stud, where they are attempting by the use of the best Hackney stallions and American trotting bred mares to produce horses that when grown and thoroughly mannered at the farm will be ready for sale to people of wealth who desire the most stylish of coach, carriage, park or saddle horses that are also sound and safe.

As manager of this farm they engaged the services of Mr. A. H. Brinton, an expert in his line, who understands how to break, educate and fit this class of horses for those who want the best. The first exhibit made by Woodland Hackney Stud since its establishment was at the California State Fair last September, where seven

much beyond this—quality and not quantity being the aim.

Mr. Brinton and his assistants are constantly engaged in breaking and educating the young horses for single and double harness, and teaching them to drive at all hitches that will fit them for the show ring or for gentlemen's family use. They are not offered for sale until they are qualified for the work they are to do.

Woodland Hackney Stud is located a little over a mile from Woodland, Yolo county, on a tract of fine land that is dotted with beautiful oaks, and buildings and paddocks have been constructed es-

MANCHESTER.

Registered Hackney Stallion—Twice a Blue Ribbon
Winner at National Horse Show.

Messrs De Pue & Sprague have selected an ideal place for a stock breeding farm, and as they are using animals of the type they desire to produce, seeking by proper mating to improve and perfect individuality, there can be no doubt of their success. In fact, the prize winners already turned out from Woodland Hackney Stud have already demonstrated it.

WILL TRY HACKNEY-TROTTER CROSS.

When a man who really cares for horses makes his advent on the turf he usually winds up by becoming a breeder of thoroughbreds or trotters, and the same course seems to be the rule among exhibitors at the horse shows. To perpetuate the good qualities of a favorite blue ribbon winner is a very natural and commendable desire, while the field of experiment is one of the most interesting and important in the whole range of horse breeding, particularly in this country, where a national type of carriage horse is yet to be established.

Several prominent New York exhibitors have lately gone into breeding by mating their retired show mares with hackney or trotting stallions of the same type. Among them is William H. Moore, whose stable of heavy harness horses has for years held a leading place in the list of prize winners at the National and other shows. Practically every show mare excepting Menella that Mr. Moore owned was bred last season to Whitewall Fashion, an imported English hackney stallion that was himself a prize winner in the show ring. This horse died recently, the property of Mr. Moore, who then sent his mares to Virginia to be mated this year with Matchless Dane, a noted prize winning hackney stallion owned by Henry Fairfax. Fakenham Princess, Empress, Actress, Lady Gray, La Belle Chose, Bussie,

cott, Dam of Stamboulette 2:10½, Etc.

Carriage Pair, Sired by Manchester, from Trotting
Bred Mares.

horses were shown and seven first prizes secured, among them two gold medals.

The farm's young stallion Squire of Chester, the only stallion shown by the farm, secured first in his class after a close contest, the award being made by Prof. Carlyle of Colorado University, amid a storm of applause from the crowded grandstand. Squire of Chester is a steel gray or blue-roan, with beautiful action and great style, and is one of the most attractive horses ever seen in harness. As he has been owned by this farm but two years, the only ones of his get they own are weanlings and sucklings.

The premier stallion of Woodland Hackney Stud is Manchester, twice winner of the blue ribbon in the Hackney stallion class at the great National Horse Show in Madison Square Garden, New York, and one has only to visit the farm to see how strongly he impresses his magnificent individuality and action on his get.

With a few registered Hackney mares, several of the Hackney trotter cross and a large number of fine standard bred trotting mares carefully selected for their type, style and disposition, Woodland Hackney Stud has made a start that cannot help be successful along the lines which its owners had in mind when it was established.

There are nearly 100 head of stallions, mares, matured horses and colts on the farm at the present time, and the number will not be allowed to get

Mares and Colts Under the Grateful Shade of a
Mammoth Oak at Woodland Hackney Stud.

pecially with reference to convenience in handling this class of stock. The hay, grain and grasses on which the stock are fed are grown on the place.

Whitewall Ariel and Grande Dame are among the prize winners to be bred to the son of Matchless of Londesboro.

C. W. Watson, who headed the list of winning owners at the last National Horse Show, is forming a stud of prize winning harness mares at Fairmount Farms, in West Virginia. Mr. Watson began his breeding operations last year by sending Mazie and Sue Kearsley, a well known pair of chestnut high steppers, to the court of Fred Pabst's Meanwood Majesty, a son of the famous Forest King that has twice won the championship for hackney stallions at the National Horse Show. Mr. Watson also bred his unbeaten pony mares, Chiffon and Ruffles, to Mr. Pabst's Dilham Prime Minister, sire of the wonderful little pony champion, Lady Dilham. This year he expects to add to his list of brood mares the pony four-in-hand team Norena, Kitty Gray, Ringing Bells and Chatterbox, all well bred hackneys and blue ribbon winners. They will probably be bred to Meanwood Majesty. It is possible, however, that the little chestnut mares may be kept in the show ring one year more if Mr. Watson does not in the meantime sell his geldings and retire temporarily.

Alfred G. Vanderbilt has retired Rustling Silk, Portia, Primrose and other well known show ring winners to the stud at Oakland Farm, and is now negotiating with J. Hobart Moore to breed them to the old gig horse Burlingham.

The California Circuit of 1907

Following are the complete summaries of the harness races held in California last season. The circuit opened at San Diego June 21st and closed at Tulare October 5th. To these are added summaries of the Oregon State Fair meeting, at which many California horses raced. Reports of the meetings at Rocklin, Placer county, and Ferndale, Humboldt county, are also given, as in previous reports, names of sires of the winners were not given:

SAN DIEGO, JUNE 21-22.

CALIFORNIA'S PROGRESS.

Following is the regular monthly bulletin published by the California Promotion Committee, January 31, 1908:

Seasonal rains have fallen over California during January, insuring good pasturage and good crops for the coming year. The rains have extended to the southern part of the State, and have been of incalculable benefit.

Reports from many parts of the State are to the effect that the demand for small farms is unprecedented and constantly increasing. Small holdings on tracts formerly devoted to grain raising have proven so profitable that special effort is being made to have all large tracts sub-divided. Much money formerly invested in industrial stocks is now being invested in small California farms.

The demand for dairy produce is becoming so great that special effort is being made to increase the output, and creameries in all parts of the State are increasing prices to farmers. This is one of the best opportunities offered small farmers, giving promise of quickest and best returns.

Reports received by the California Promotion Committee from its Eastern affiliations are to the effect that there is greater demand for California small farms than ever before noted. One report is that in parts of New Jersey there threatens a general exodus of small farmers and families of small means to California. The announcement of the settlement of the difficulties between transcontinental railroads and the establishment of the spring colonist rate means much for the progress of the State for this year. The reduced rates will be in force during March and April. Parties are being formed in many parts of the East and Middle West to take advantage of the reduced rates, and a large increase in population is looked for.

The following summary shows California conditions from December 29, 1907, to January 28, 1908, inclusive:

San Francisco building permits, \$1,397,958.
San Francisco building permits since the fire, \$94,674,563.
Los Angeles building permits, \$454,929.
Oakland building permits \$373,279.
San Diego building permits, \$102,910.
Sacramento building permits, \$30,815.
San Francisco real estate sales, 460; value, \$1,400,000.
San Francisco bank clearings, \$142,261,243.05.
San Francisco bank clearings, January, 1907, \$199,352, 126.14.
San Francisco bank clearings, January, 1906, \$180,177,108.67.
Los Angeles bank clearings, \$37,268,998.
Oakland bank clearings, \$6,283,235.47.
San Jose bank clearings, \$1,861,507.30.
Stockton bank clearings, \$1,940,696.96.
Sacramento bank clearings, \$3,953,214.95.
San Francisco customs receipts, \$711,303.04.

Reliable information given on all parts of California. Address the California Promotion Committee, San Francisco.

NEW OFFICERS FOR PORTLAND CLUB.

The Oregonian of February 1st says: The annual meeting and election of officers of the Riverside Driving Club of Portland was held last night. There was a large attendance of members. The reports of the retiring president, Dr. Emmett Drake, and of Secretary Dick and Treasurer Rosenblatt were read and accepted. A vote of thanks was extended to Mr. Rosenblatt for his conscientious attention to the club's finances during the sixteen years' time he has acted as custodian of the funds of the organization. He refused another term.

The new officers chosen were as follows: President, W. S. Laidlaw; vice-president, M. D. Wisdom; secretary, Paul S. Dick (re-elected); treasurer, W. S. Crane; board of trustees, Dr. A. C. Froom, W. T. Clark, M. J. Jones, A. L. Powell, A. C. Lohmire, H. T. Drennen and C. A. Harrison.

A committee consisting of M. D. Wisdom and G. A. Westgate was appointed to draw up resolutions in memory of Captain J. E. Brown and John Monthon, two members of the club who died last year.

Another committee was chosen to frame by-laws and was ordered to report at the next meeting of the club. Plans were discussed for several racing matinees during the coming summer, but definite action was postponed. The proposal to erect a club-house was also deferred pending the framing of the new by-laws.

AMERICAN CARRIAGE HORSES.

The Iowa State Fair Association has adopted a classification for American bred carriage horses and established the following as a description of horses that will fulfill the requirements:

Not under fifteen hands for mature horses; smooth, compact and symmetrical conformation; neck of good length, inclined naturally to arch; sloping shoulders; well set legs of medium length; sloping pasterns and good feet; short, strong back; well sprung ribs well ribbed up to coupling; smooth loins; full flanks; straight croup, with well set tail; full, round quarters.

Entries in all classes to be judged on conformation, style, action and manners as a suitable type of carriage horse. Special attention will be given to truthness of action. Good knee and hock action are essential. Entries in all classes should trot and walk straight and true, and judges will especially avoid horses showing any tendency to pace; mix gaits, paddle in front, or sprawl behind.

A MILLION TROTTING HORSES.

From information collected by the Bureau of Animal Industry at Washington it is shown that the whole number of registered horses of all the recognized breeds in the United States is about 308,000. Of this number no less than 195,000 are trotters, the light harness horses far outnumbering thoroughbreds, hackneys, French and German coachers, Percherons, Shire and Clydesdale drafters, Shetland ponies, saddle bred horses, etc., all combined. When it is remembered that probably not one standard bred trotter in five is ever registered, the full significance of the Government statistics is apparent, and it seems a fair estimate to say there are at least 1,000,000 trotting bred horses in the country.—Western Horseman.

TROTTERS FOR EUROPE.

When the steamship Patrica recently left New York for Hamburg, Germany, it had aboard Trainer Frank Caton and nine as high class trotters as ever left this country for Europe. The latter are heading for the breeding establishment of Count Varnsoff-Deashkoff, at Tomsk, a point three thousand miles east of St. Petersburg, Russia. Frank Caton went to Russia nearly ten years ago and has been remarkably successful. Two of his sons are also racing extensive stables in Russia, the Caton family usually getting the lion's share of honors and purse money. The trotters shipped include the following:

Goldstut Maid 2:07½ by Silverthorne 2:15, dam Mamie S. (dam of Vanita O. 2:19½), by Bobby Goldstut. Goldstut Maid is in foal to John A. McKerron 2:04½.

The mare Bi-Flora 2:09½ by Expedition 2:15½, dam Heliotrope (dam of Exalted 2:07½), by Princess.

Directum Lass 2:09½ by Directum 2:05½, dam Madeira 2:18½, by Dexter Prince. This mare is in foal to Guy Axworthy 2:08½.

The stallion Lecco 2:09½ by Bonnie Boy 2:27½, dam Lucy Homer (dam of Authress 2:09½), by Homer.

The stallion The Phantom 2:10½, by Boreal 2:15½, dam Shadow 2:28, by Night Hawk.

The stallion Captain Bacon 2:10½ by Bingen 2:06½, dam of Lichee by Arion 2:07½.

The stallion Baron H. 2:19, by Baron Wilkes 2:18, dam Ashland Maid (dam of four, including Baron Rogers 2:09½), by Ashland Chief.

The three-year-old colt by Peter the Great 2:07½, dam Lydia Thompson 2:20, by Guy Wilkes 2:15½.

1 mile to a wagon—Joe Patchen, blk h (7) by Patchen Wilkes (1896).....	2:11

FASTEST RECORDS FOR 1907.

These are the fastest records of the year at different ages.

A star (*) after a record denotes that it is a world's record for that age, sex, or gait.
The letter x indicates a time record.
A double star (**) denotes a world's race record.
The letter r denotes season's race record.

Fastest mile by a team—Prince Direct, blk s by Direct, and Morning Star, b g by Star Pointer; C. K. G. Billings; Memphis, Tenn., meeting, October 25, 1904.....	2:00
Fastest half-mile—Greenline, b g by Online; C. K. G. Billings; Cleveland, O., matinee, July 11, 1903.....	0:59¾
Fastest half-mile by a team—Prince Direct, blk s by Direct, and Hontas Crooke, ch s by Bud Crooke; C. K. G. Billings; Cleveland, O., matinee, September 17, 1904.....	1:00¾
Fastest quarter-mile by a team—Prince Direct, blk s by Direct, and Hontas Crooke, ch s by Bud Crooke; C. K. G. Billings; Cleveland, O., matinee, July 22, 1905.....	0:29¾

The name of the amateur reinsman who drove each animal in its respective performance is given, irrespective as to whether he owned the same or not.

COUNTRY RACE MEETINGS.

What we are often pleased to call country race meetings are likely to figure more prominently in the annals of harness horse racing during this year than they ever have before. The fair association managers are full of the spirit of harness horse races. They feel the necessity for such events. Their patrons desire them, and that desire the fair managers are more willing than ever to satisfy.

We do not expect to find the highest class of harness horses at the country fairs, or at the average country meeting, where the half-mile track is the rule. The big horses go down the big circuits for the big money. But there are any number of good horses just below the form to be met on the big circuits, which find a good place to race at the country race meetings. They furnish good contests for those who do not care to be at the expense of attending the larger meetings.

In a very large sense the race meetings at the fairs and half-mile tracks are schools in which a large number of desirable citizens are educated up to a love for the highly-bred light harness horse. The young man from the farm, with a desire for better bred stock than satisfied his father, learns that he can improve his horses by the use of the trotting bred horse. And if he does not succeed in producing a horse fit for the race track, he will at least improve the quality of the general service horse he has been accustomed to on the farm.

Moreover, a few days on the race track each year, where horses of good class are honestly being raced for premiums, is an indulgence that does no one harm. The races to which we refer are not the long-drawn-out affairs, which may have an evil influence on the community. They are in the best sense affairs of sport, enjoyable because they are ended before the sport is exhausted.

There appears to be a very general demand on the part of those who patronize the country race meetings for yet a little higher class of trotters and pacers. The people enjoy the good races the managers offer, but there is a strong desire to see an occasional race with horses of the highest class competing.

Of course, it is not practical for the fair associations and the managers of the half-mile tracks to offer purses and stakes that will attract the higher classes of horses. But they can provide special races among some of the star performers which are not engaged on the big circuits. An occasional race of this kind would mostly likely give spice to the race meetings as now conducted. The public, either in the large commercial centers or the country towns, likes to see horses race which are of championship class. It is very likely that there will be better horses at the country race meetings this year than were seen last year, and, no doubt, the harness horse racing at these tracks will grow in public favor.—The Horseman.

THE MIDWINTER AUCTION.

Following is a summary of the auction sale held at Madison Square Garden, New York, opening January 24th and closing January 21st. The summary does not include all the sales, but gives the principal ones of the last three days. During the four days 462 horses were sold for a total of \$146,095, an average of \$316.25. Had it not been for the fact that thirty head of very poor colts and fillies were offered the first day and sold for an average of \$63 per head, which was said to be more than they were worth, the average would have been much higher for the entire sale.

The Bondsman was very ill on the day before he was to be sold, but when led into the ring a veterinarian pronounced him well and all right. His owner, Joseph Thayer, had a reserve bid on this horse of \$8,000, at which price he was started, but there were no other bids, and Mr. Thayer retained the horse. The sales were as follows:

First Day.

Sheridan, br f (4), by King Lancelot 2:55-Queen (s. t. b. trotting bred; Lehman Straus, New York 2:30, blk h (11), by Directum 2:05-Fe-dora by Newcomb 2:29-; E. A. Wilson, Philadelphia, Pa. 205

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

DISCUSSION OF BIG GAME BULLETS.

There is a good deal of error being circulated about bullets. The Spitzer bullet, which consists of thinning the solid point, is a reproduction or resurrection of the well known Thierry bullet of the muzzle-loading days. Pointed bullets have been in use for many years. Their advantages are recognized under certain conditions, but it is simply invading the realms of the subtlest theory to say that the Spitzer point of bullet is essential in small-bore rifles; in any case it is not essential to a sporting bullet. But one might claim that this form of bullet first introduced the principle of lightening the bullet forward. Metford, we think, made a slight hollow in the front of the bullet for the purpose of lightening it. Then bullets were made with copper tubes and wooden pegs for express black powder rifles of the past. All these methods assisted in lightening the bullet forward, but the hollows in the bullet with the copper tubes and the wooden pegs were mainly introduced for the purpose of securing greater expansive efficiency. Nevertheless, the critic might say that these systems lightened the bullet forward. When the small-bore military nickel-covered bullets were first introduced, and it was desired to use these bullets for sport, what was done? In some cases the lead nose was exposed from the core of nickel and the bullet made lighter forward in this way. But the greatest expansion that was obtained with these bullets resulted from making the front of the bullet hollow, and in some cases inserting in that hollow the old copper tube or the wood peg, or some other kind of peg so well known to sportsmen of the old black powder days. Consequently, if the principle of lightening the bullet forward for the purpose of flatter trajectory was not a new principle, and was, in fact, a principle well known to gunmakers of the past, it was, at all events, only carried out to a very slight degree; and, in fact, one might say it was not a principle that was fully utilized. The bullets might be described by anyone who wished to express himself in highly refined, rigid, exact terms as of a construction that included a principle of lightening the bullet forward, and as a matter of fact, this might almost be said of any form of bullet of the elongated type that ever existed.

In the capped bullet the importance of the principle of lightening forward is recognized, and novel methods of construction brought into the fullest service that important principle. The capped bullet, therefore, remains the most important example of originating in compound bullets of a method of construction which gives the highest degree of expansion coupled with the best form of the bullet for accuracy of flight and trajectory. These advantages prove that the change from the spherical bullet to the elongated type was no more important than the change from the older forms of nickel-coated bullet to that of the capped system, which still remains the "fons et origo" of sporting bullets that all gunmakers in all parts of the world are now pushing. The value of a light fore-part is of immense importance to the shooter from the points of view of accuracy, trajectory and expansion. One can get nothing lighter than air as in the capped bullet. To substitute cotton waste, or a bit of wood, or any other light material is no invention, nor does it mark progress. The use of wood for the purpose of lightening the bullet forward does not produce expansive power. In our opinion the capped bullet is the most perfect combination of all the essentials of a successful sporting bullet.

FISH CONVENTION.

The American Fish Breeders' Association are scheduled to hold a meeting in Washington, D. C., at an early date. California will be represented by C. A. Vogelsang, chief deputy of the Fish Commission. The subjects to be considered by the association are:

First, to investigate and report on the theory and practice of breeding fish and on ways and means of promoting the improvement of fish by breeding.

Second, to indicate the relation of the breeding of fish to the breeding of other living things.

Third, to encourage the development of the technique of fish breeding so as to increase the use of improved breeds of fish.

Deputy Vogelsang will visit the Illinois Game Breeding Station at Springfield, which has been in successful operation for some years, to gather data and information with a view of assisting in the establishment of such an institution in California, where the conditions are ideal. The Fish Commissioners report that a number of public spirited citizens of this State have come forward and offered sufficient acreage of protected land free of cost for an indefinite period.

Deputy Vogelsang will visit the game farm of Wenz & Mackenzon at Yardley, Pa. This firm is under contract to deliver a large number of Hungarian partridges to the California Fish Commission during the coming spring.

CALIFORNIA DESERT BIRDS.

(By Fred W. Koch.)

I shall never forget my first night on the desert beside a smouldering yucca fire, and the early morning awakening amidst these spiny desert trees. All about me were the songs of the purple finch, the desert sparrows, and the cactus wrens. But above all, in a class by itself, were the clear notes of Le Conte's thrasher, more than rival of the mocking-bird, and a thousand times more to be appreciated in the desert waste. I could not find the singer, but a year later, when on a trip through the heart of the Colorado Desert, I came upon a veritable colony of these sweet singers, and soon spied a mother-bird trying to lure me from her nest in a palo verde tree.

Many of the desert birds are light gray in color, matching almost completely the surrounding sand, and making it very difficult to distinguish them. But here and there a flash discloses an oriole or a humming-bird, whose brilliant plumage is only matched by the cactus bloom or the swaying branches of the Mexican ocotea, the flaming candlebush of the desert. Often these orioles of the deserts cross the mountains to the west, and almost anywhere amidst the rows of fan-palms at Riverside one can find the nests securely sewed to the underside of the broad fan leaves, perfectly sheltered from both sun and rain.

Once in the Mojave Desert I was startled by the z-z-z-z-m, like the whirr of a rifle bullet, which whizzed passed my face, and, like a flash, a black-throated humming-bird curved and, mounting again a hundred feet in the air, fell toward me with a buzzing roar calculated to make one dodge. Almost at my elbow I found the female on a downy little nest secure amidst the thorns of a prickly cactus. Two days before this I was standing on a bare knoll, when away in the distance I heard the call of poor-will, a cousin to the nighthawk and the whip-poor-will. I listened as the call was repeated again and again, when suddenly, from within ten feet of me, the mate left her eggs and flew away in the direction of the call. The eggs were the exact color of the yellow clay on which they rested, without a nest, unless a mere brushing of the gray dust and dried stems from the spot constituted such. The mottled mother could not be distinguished from a dried leaf, and so had escaped by attention.

Some years ago I ran across a number of Panamint Indian boys out hunting with bows and arrows, and found that they had, together with other birds, a duck which they had killed on an alkali lake just west of Death Valley. This was the first duck I had ever seen in the desert, but later was much surprised at what I found at Owen's Lake, that remnant of the prehistoric inland sea which once covered a good part of Nevada and some of eastern California. Here I found the shores of the lake literally lined with dead ducks. I took pains to count some of them, and found 102 lying in a space 200 yards in extent along the shore. I could account for the strange occurrence in no other way than that bands of ducks had journeyed over the deserts in their migrations, and finally alighted on this great sheet of water thoroughly exhausted. The tremendous percentage of soda and alkaline matter makes the water impossible to most life; so these birds had been unable to find food after their long journey and had perished. Once I found a blue-winged teal swimming in a crater-like warm spring in the Colorado Desert, and I have little doubt that some species breed in the desert where here and there a springy marsh is found.

The Pleasanton Gun Club last week effected permanent organization and elected the following board of officers: Charles A. Gale, president; Lee Wells, vice-president; W. Graham, recording secretary; T. H. Silver, financial secretary; Bank of Pleasanton, treasurer. The board of directors consists of C. Schween, Earle Downing, C. Graham, F. M. Donohue, J. Thiessen.

The membership roll now counts up twenty-eight Pleasanton sportsmen, the limit of thirty-five members will be acquired in the near future. It is the intention of the club to secure a shooting ground along the San Joaquin River. The club has a fine ark and a launch that has been in commission this winter.

Organization of the Pasadena Rifle Club has been completed and these officers elected: E. D. Neff, president; C. S. Backus, vice-president; G. A. Gibbs, secretary; Jacob Mansar, treasurer; W. D. Morse, executive officer. Weekly shoots are to be held this season.

The Capitol Gun Club of Marysville recently elected the following board of officers for the ensuing year: President, E. B. Yerington; vice-president, George T. Mills; secretary, L. S. Sheldon; treasurer, H. R. Burlington; board of directors, W. G. Douglass, W. W. Goode, A. G. Meyers, Art Maish and H. E. Edwards.

A NATIONAL COLLECTION ASSURED.

News of interest to sportsmen and scientists is that the National Collection of heads and horns, long in existence as a project, states the Sporting Goods Gazette, is become an institution and a fact, with Dr. William T. Hornaday's valuable private collection donated as a nucleus.

Those who have favored the scheme with Dr. Hornaday, who represents the Camp-Fire Club in the proposition, are Madison Grant, Secretary of the New York Zoological Society, acting for the Boone and Crockett Club, and John M. Phillips, Pennsylvania State Game Commissioner, in behalf of the Lewis and Clark Club. In the management of the collection, members of these and of other representative big game clubs will be actively concerned, from among which a committee on acceptances will be formed to pass judgment on subsequent gifts to the collection and to purchase other specimens as needed. Sportsmen may present testimonials of their personal skill, providing these pass the committee-test, or they may authorize the committee to buy desirable specimens as they appear in the market.

The New York Zoological Society will own the collection and will take care of it. For a time it will be housed in the administration building of the society, which is now being built in Bronx Park, but as the collection grows, a new building will be required, which it is expected the city will furnish.

The necessity of such a collection has long been urged by those who note with dismay the rapid extinction of many of the big game species. It is felt that records of these animals should be obtained before they have disappeared from the face of the earth. As comprehensive a collection as possible will be gathered with a specialty made of American ferns, and this will be arranged in two series, one with an eye to the evolutionary progress of the species, the other to show the distribution of horned animals by countries and continents. Maps, charts and photographs will accompany the latter exhibition in great profusion, to further indicate localization of haunts, variations in species, and so forth. The library of the Zoological Society will be placed in convenient disposal for reference, and altogether the collection will represent a bureau of information for sportsmen and scientists such as has never before been attempted.

The nucleus collection contains 132 specimens, including 109 species of big game animals, and pretty comprehensively representing the five great divisions of the horned race—the deer, bison, antelope, sheep and goat families. A pair of elephant tusks is another feature, and perhaps the champion one, being the record set of elephant tusks in the world, over eleven feet curved length, a foot and a half in base circumference, and 293 pounds in combined weight. They were presented to the New York Zoological Society by Mr. Charles T. Barney, and were formerly the property of Menelik, King of Abyssinia.

Other prize features are a pair of horns from the great Siberian Arguli, biggest of mountain sheep in the world—horns at side of which these of our native Rocky Mountain big horn look insignificant. The big horn himself is represented by a superb head, magnificently mounted. There are deer and moose antlers in striking array. Very interesting is a rare Asiatic species known as Pere David's deer, formerly of China, now found only in zoological gardens, and also Schomburgk's Deer, of north Siam, a species likewise nearly extinct, of those antlers only eight sets are in existence. The Sitka Deer, the odd Elks, the Altai Wapiti, the Marsh, Guemal, and Philippine Deer are also represented by good horn specimens. There are antlers of the Siberian and European Moose, but as yet none of the record breaking species—the bull moose of Alaska, biggest of its kind in general bulk, the biggest of horn equipment among all animals.

A feature that it is said impossible to duplicate is a set of twelve pairs of American bison horns gathered from wild sources, showing twelve stages in the growth of the animal from a yearling to a "stub-horn" of twenty years. The collection owns some interesting examples of antelope horns, from the fifty-inch branches of the Greater Kudus—horns unusual anywhere for their great beauty—to the two and one-quarter inch projections of the toy Duiker. Of the 133 species of antelopes, 35 varieties are represented in the collection.

The first number of a publication to be devoted to the interest of the collection, and styled "The National Collection of Heads and Horns," has recently been issued, and will appear from time to time hereafter. In it Dr. Hornaday says that "in England practically all British sportsmen pour their finest and rarest horned trophies into the South Kensington Museum. Very naturally, the result is a collection of ungulates which is at once the envy and the despair of Americans. As yet no American museum possesses a collection which is even second to it; and we greatly fear that, for reasons only too apparent, no museum on this side of the Atlantic ever will rival that marvelous gathering of hoofed and horned rarities." He points out, however, that this country has the opportunity to excel in American trophies, and urges sportsmen to come to the support of the movement.

The open season for feathered game closes on February 15th, with the exception that wild geese may be shot at any time, and Wilson or English snipe may be shot until April 1st.

REGISTERED BLUE ROCK TOURNAMENTS.

The purpose of gun-clubs holding trap shooting tournaments this year under the auspices of the Interstate Association has been exploited in these columns. The project, that will place trap shooting in the United States on a basis of official regularity and mutual interest has evidently met with approval, for the support of many sportsmen's organizations in the East, Middle West and South has already been evidenced in the announcements of blue rock tournaments.

The following letter, sent to the sporting press by Mr. Harry W. Denny, secretary of the Indianapolis Gun Club, is pertinent and full of interest to Coast shooters, now that the trap season is so close at hand:

Considered from the amateurs' viewpoint, what effect will the recent action taken by the Interstate Association, with reference to registered tournaments, have? Will it be for the weal or woe of the game?

These are the questions that naturally arose in the minds of the amateur shooters immediately upon receipt of them of the widely distributed announcement explaining the innovation, realizing, as they did, that it emanated from a source that was possibly influenced by considerations of personal pecuniary gain, rather than that of the good of the cause as viewed from the amateurs' standpoint.

A more deliberate analysis of the registered tournament scheme, however, does not justify the permanency of these random conclusions. The Interstate Association in the past has always dealt with the shooters fairly, frankly and honorably, and by pursuing this policy has accomplished colossal good for the game. Therefore, until it has broken faith with the shooters, it is entitled to a continuance of that same measure of confidence which they have reposed in it in the past; and not until that time may its avowed intentions be justly discredited. Granting that the tacit purpose of the Interstate Association is that of mutual trade protection and of furthering the allied commercial interests of its stockholders by co-operative organization, or combination (which is entirely speculative, and totally at variance with the expressed object of its formation), if, at the same time, it performs for the adherents of the sport the good offices that an elective assembly or congress of their own numbers could perform, why should there be objection to an assumption of control by the association, even though it were feasible at the present to substitute therefor a representative controlling body? Thus far the Interstate Association has not overstepped the bounds of propriety in formulating rules for the government of amateurs while engaged in shooting contests; nor has it taken any action whatever with reference to the amateur class of shooters except such as their duly elected representatives might, to their great credit, have enacted and decreed—the most recent device, the registered tournament, not excepted. And as long as the association continues to exercise the same intelligent and zealous solicitude for the welfare of the shooters, as it has heretofore exhibited, it must, by perforce of its occupation of the office of control, continue in that capacity; at least until such time as a flagrant failure, either by act of omission or commission, shall bring about a spontaneous uprising of the shooters in protest thereto. Revolutionary movements are only thus born, as a responsive solution to great emergencies. The ever present possibility of such a contingency is an effective check upon the possible avarice of the association, and there is nothing in the present order of things to warrant the fear of a calamity.

The Interstate Association contrived the Grand American Handicap Tournament, and under its masterly direction this event has grown until it now occupies a position in the esteem of the shooters that is second to none in the whole world. If the association's early inventions are so signally and permanently successful, it is reasonable to anticipate that those arising from a ripper experience and a wider knowledge of existing conditions and needs shall at least bring forth equivalent results. The registered tournament scheme evidently contemplates, and is a step toward, a standard of uniformity of good practice in smaller tournament endeavors similar to that which has been accomplished in the larger.

That the association was actuated by other than ulterior motives in devising it is readily discernible, in that it has created and is to maintain what might be termed a bureau of statistics, at its own expense, and at no cost whatever to the shooter, the benefits of which will accrue as much to the satisfaction and pleasure of the shooter as it will be commercially valuable to the stockholders in the association. It also assumes a large responsibility in granting to the gun clubs of the country the gratuitous use of its honorable and exemplary auspices, thereby practically becoming guarantor of good practices and fair treatment by any club that may avail itself of the advantages that are to be derived from "registering" its tournament. It will require but very few delinquencies to tarnish the exalted reputation which such auspices now reflect to the shooting fraternity, and the association must, therefore, vigilantly guard against a possible perversion of the elementary principles upon which good tournament practice is founded when it thus hazards its good name in lending its moral support. And this centralized, zealous supervision will tend to elevate the standard of present day practices, and make it better, good though it may now be.

The primary object of a well-ordered shooting tournament is to afford the devotees of the sport an opportunity to strive among themselves for supremacy under given rules and conditions of contest. Secondary to this, in the order of that precedence, are (1) that the contestants shall have an enjoyable time socially, and (2) that the club or organization giving or holding the contest shall have commensurate return for its efforts in promoting the contest. And any attempt to reverse or interchange the given order of these objects or purposes, to that extent perverts and stultifies the functions of a tournament.

It cannot be denied that, in the past, in occasional instances, clubs have held shooting tournaments with but one purpose in view, and that simply to make as much money out of the enterprise as was possible, totally disregarding the fundamental principles upon which it should have been erected. It is true that pronounced instances of this kind have been rare, and it is indeed fortunate that it has been so. One such tournament, with all its attendant evils of "running" of its own momentum, haphazard, and without the intelligent guidance of a responsible or capable executive head or complex mass of confusion from beginning to end, will inflict more injury to personal interest and zeal for the sport than a dozen orderly tournaments can restore. An amateur's fondness for the shooting game is as much due to his fascination for congenial companionship as to his bent for firing a gun and burning up ammunition. The essential counterpart of a gun is a companion, even though he be but a dog. If there were no one to shoot with or compete against, the most zealous shooter would soon abandon the sport. The amateur, therefore, is (or at least should be) as much concerned in maintaining and stimulating a lively interest in the game as are the manufacturers whose products he consumes. It would be much better for all concerned if tournaments of the kind mentioned above, with their disastrously repellent effect, were never held. Any measure that will tend to promote good sportsmanship and elevate it to a higher plane will also be influential in attracting the novice, reclaiming the backslider, and imparting renewed zeal to the veteran; and any plan that will effectually distinguish the orderly tournament from the questionable or dangerous one will likewise serve a timely purpose. This, seemingly, is precisely the very objects that it is intended the registered tournament shall accomplish, as such tournaments must be conducted strictly in accordance with the recognized standards of good practice and under the direction of responsible management.

Then, too, the registered tournament plan seeks to supply a remedy for a woeful deficiency that has existed in club tournament experience, even when under the most competent management, ever since the game was first begun. And that is the perpetuation of its results in a feasible and an acceptable manner. Heretofore the ordinary club tournaments, at the best, have been but little better than mere farces. They have been transitory and well nigh meaningless; the contestants would today vie with each other to their utmost, and tomorrow forget all about it. The achievements which they may have accomplished during the one or two days of the competition have amounted to nothing more than to determine the relative skill or abilities of the comparatively small group of shooters who were then and there engaged in the contest—on that particular day or days, and under the conditions that then happened to prevail—alone. The scores made in these tournaments have had no bearing or relation whatever to those that were being made by a vastly larger number of shooters who were engaged in contests of similar character, at other points throughout the country; nor have they even ever had any relation to those that were made by the same individuals in preceding or succeeding tournaments. These tournaments have been utterly void of any incentive for the amateur to exercise any greater skill than was necessary to defeat an attending friendly opponent; and their value has been so fragmentary as to render them almost as useless as the old fashioned picnic—an appointed day and place for whiling away the time. All these shortcomings will be effectually corrected through the instrumentality of the registered tournament, as it embraces the feature of recording and compiling all the scores that are made therein by both amateurs and professionals, and provides for their publication at suitable intervals. The club tournaments, therefore, in the future, like the Grand American Handicap Tournament, will have a well defined, continuous and worthy purpose to fulfill—quite in contrast to the lack of an extended and definite mission to perform, as in the past.

It is scarcely possible that the betterment which the registered tournament plan contemplates shall come to pass instantaneously; the evils which it seeks to remedy are of long standing and deeply rooted in the habits of the shooters, and consequently the readjustment will, like, all meritorious reform undertakings, be more or less gradual. It cannot be expected that the plan, at the very moment of its inception, is perfect in its every detail. Its actual application will undoubtedly, from time to time, suggest certain modifications or enlargements that may be made with beneficial results. But it is a most excellent beginning. It is sufficiently well contrived to remove many of the hindrances which for years past have operated as a bar to the healthy development of the sport.

The registered tournament is destined to occupy a position among the decisive and important acts of the Interstate Association that will be second only

to one of several years ago by which the shooters were divided into two distinct classes—the amateurs and professionals. It is such an extremely, yet efficient, remedy for the ills that have for so long a time afflicted the game that we may justly wonder why the scheme did not suggest itself to our minds many years ago. The mind that did at last conceive it is certainly worthy of and is entitled to the unstinted laudation of every shooter who has a sincere interest in the promotion of good sportsmanship. Its early success will depend very largely upon the spirit in which it is received and held by the amateurs. The Interstate Association has well and fully performed its part, in formulating the plan and in inviting co-operation from the amateurs; and the problem is now up to the gun clubs of the country for furtherance. If they are keenly alert to their duty, and appreciate fully the opportunity they now have for helping in a systematic concerted way to enliven the interest in the foremost of gentlemanly sports, hereafter all tournaments will be registered tournaments.

AT THE TRAPS.

The outlook is very good for a large attendance of shooters at the Ingleside grounds for the two-day tournament of the Trap Shooters' League, February 22d and 23d.

The California Wing Club program for the season of 1908 calls for two twelve pigeon shoots on the first Sunday of each month—March to September inclusive.

The first race will be the medal shoot, starting at 10 a. m. sharp. There will be a club purse of \$50 added, high guns, one money for every four entries. At the end of the season there will be awarded three trophies to the three high guns.

The purse shoot, at twelve birds, will start at 1 p. m.; club purse \$50, high guns, one money for each four entries.

Handicaps for each monthly shoot will be the same for both events. The maximum club handicap this season is 36 yards, the minimum 26 yards. Straight scores will go back one yard and two or more misses advance one yard—from month to month.

The handicaps as arranged for the opening shoot are the following:

C. C. Nauman 32 yards, M. O. Feudner 31, Dr. A. M. Barker 30, Ed. Donohoe 30, H. C. Golcher 30, Clarence A. Haight 30, P. McRae 30, Dr. E. G. McConnell 30, Tony Prior 30, Ed. Schultz 30, P. J. Walsh 30, P. L. Murphy 30, Phil B. Bekeart 30, Dr. A. T. Derby 29, Guion W. Gibson 29, W. E. Muddock 29, W. W. Terrill 29, J. V. Coleman 28, E. A. Fano 28, W. E. Greene 28, E. Klevesahl 28, C. D. Laing 28, N. L. Nielson Jr. 28, A. M. Shields 28, Frank Turner 28, A. J. Webb 28, M. J. Iverson 28, J. K. Prior Jr. 27, J. Bermingham Jr. 26, W. L. Gerstle 26, W. E. Duzan 26, W. T. Sharpless 26, A. Roos 26.

Colton sportsmen recently met and organized the Colton Gun Club. The officers elected were: C. A. Schuessler, president and treasurer; H. S. Fox, secretary; J. R. Boynton, D. F. Gallehue and E. H. Vandermark, directors.

Trap grounds have been equipped and shoots will be held on Friday and Saturday afternoons during the season.

The members of the club are: J. R. Boynton, Fred Brownlee, J. Fouch, F. H. Vandermark, D. F. Gallehue, R. E. Williams, Louis Vaughan, E. G. Palmer, M. A. Bausch, R. D. Bailey, J. Tedford, H. E. Fouch, M. M. Larsen, F. W. Colver, R. C. Woodburn, O. L. Emery, D. Coe, Will Ferguson, E. C. Merrifield, Carl Dodson, A. Abels, G. W. De Armond, W. M. Leedom, J. A. Ferguson, C. Felton, R. Buddinger, F. H. Goode, N. Herrick, A. Jankowsky, H. S. Fox, J. Rousselot, C. A. Schuessler.

The first regular shoot of the club resulted in the following scores at 25 targets: W. Leedom 15, J. Tedford 12, H. Fox 16, M. Larsen 7, F. Brownlee 15, E. H. Vandermark 4, E. Fouch 7, D. Coe 10; G. Ferguson 13, B. Ferguson 19, G. Brownlee 11, G. A. Swing 6, A. Schuessler 1.

The Trap Shooting Review.

"Sporting Life's" famous and indispensable Trap Shooting Review for 1908, which contains the records and averages of all the prominent trap shooters of the country, has been placed between covers and is now issued in book form for the convenience of sportsmen at large. A copy of this valuable little book will be sent immediately upon receipt of an application, including two 2-cent stamps; first come, first served. Address, "Sporting Life," 34 South Third street, Philadelphia, Pa.

Reno sportsmen have started a subscription to raise a sum sufficient to place a fish ladder at Derby in the Truckee River.

The San Francisco Fly-Casting Club will hold a regular meeting and banquet on the 21st instant.

The Supervisors of the County of Maui are considering the promulgation of an ordinance prohibiting the shooting of her pheasants, as it is noticed the birds do not breed true to season. Frequently they raise and hatch their young in the open season.

LARGE JEWFISH.

Paul Delaini, a Santa Barbara fisherman, succeeded in landing a monster jewfish recently, with the help of a sailor, after a desperate struggle, during which the enormous fish came near upsetting the boat, for it weighed nearly 400 pounds and is one of the biggest seen on this coast for a long time. It was caught in a net.

This record catch was made nearly opposite the lighthouse, and is a most unusual occurrence, not only on account of the fish's bulk, but because it is not often these monster jewfish venture so near the mainland. Off the islands, at certain seasons, they are not uncommon, though not many have come to light tipping the beam at nearly a quarter of a ton.

The jewfish is excellent eating after it has been kept three or four days. Unlike most varieties the flesh of this piscatorial shylock improves with age, becomes softer and better flavored. When deemed ready for the market the fish sells readily at 10 cents per pound, so that this one fish alone netted Delaini nearly \$40.

In addition to this big fish, Delaini caught a sackful of unusually large crawfish, which corrects the prevailing impression that these toothsome crustaceans can only be trapped around the channel islands.

Two weeks ago, after fighting desperately for several hours with a monster jewfish, in the choppy sea two miles from the Redondo wharf, J. M. Fisher and A. J. Bell, of that city, brought their captive to the wharf, amid the cheers of several hundred persons who had witnessed the struggle.

Fisher and Bell were angling from wharf No. 1, at Redondo, using ordinary bamboo poles and fifteen-thread lines.

Shortly after 2 o'clock, a fish that Fisher thought to be of the shark species took his hook and made for the deep water, almost tearing the light cane rod from the owner's hands.

Calling to Bell to get a skiff, Fisher worked his reel to the best advantage and managed to hold the fish until he and his companion got into the small boat. The men then tried to get within gaffing distance of the fish, but in vain, for it swam for the open sea, dragging the skiff after it.

The news of the battle had spread throughout Redondo by this time and hundreds of persons, armed with field and marine glasses, lined the piers, watching the struggle.

After about an hour, the fish swerved in the direction of Santa Monica and swam fully a mile, then it again changed its course, returning to within a few hundred yards of the Redondo wharf.

Here there was more maneuvering on both sides after which the fish darted toward the bottom and again went out to sea, where the battle finally ended in its capture. The fish tipped the scales at 225 pounds.

SPOKANE MARKSMEN.

Dr. Henry Power, secretary of the Spokane Rifle and Revolver Club, has issued an annual statement showing that 1907 was the most successful year in the history of the organization, and that if the plans for 1908 are carried out this year will eclipse all others. He says, among other things in his report:

"The strong efforts made by the United States Government to arouse interest in the accurate use of fire arms among all classes of the public have been constantly before our minds, and in our attempts to bring these matters to the public notice we have been well aided by the press of Spokane and the sportsmen's journals in various parts of the country. We wish hereby to extend our thanks to the publishers at the same time and request that the work be again aided in the coming year.

"It is the object of the club to increase its membership and that all members take an active part in the weekly practices held at the outdoor range. While it is known that there is in some minds objection to the practices on Sunday, yet the difficulty of any other plan and the importance of the object make it proper to remind our critics that the day was made for man, not man for the day.

"The coming year will be most interesting, as besides the regular Washington State competitions and the local club program for the winter shoot, matches have been arranged or are now in process of adjustment with the Shell Mound Rifle Club of California, March 15th, the North Yakima Rifle Club at a date in the near future, also a match with the Oregon Rifle and Revolver Association of Salem and a pistol match with the Seattle Rifle and Revolver Club. To this must be added a probable match with the German Rifle Club of Coeur d'Alene and one with the Company H of the National Guard of Washington.

"To better carry out this program the club has decided to increase the initiation fee to \$4, but will continue for the present to keep the yearly dues at \$1, preferring to make up the necessary deficit as formerly by voluntary contributions from those who have the interests of the movement at heart."

Anglers in California have laid up their rods and tackle, that is the game fish anglers, until May 1st, when the trout season will open again.

Fishing in tide water for steelhead will remain closed until April 1st.

HUNGARIAN PARTRIDGES FOR SOUTHERN CALIFORNIA.

A miniature Hungarian partridge farm is to be established in the bottom of Town Creek at San Bernardino. Senator H. M. Willis received a letter from the State Fish Commission stating that the imported Hungarian partridges would be received from the East in two weeks and inquiring as to how much notice Senator Willis would need to take care of the consignment to San Bernardino County. Senator Willis has written that he will be ready to care for the birds with a few minutes' notice.

The partridges were imported from Hungary and are now in a game preserve in Pennsylvania, resting up after the long passage across the Atlantic. When they will arrive at San Bernardino they will be taken to an inclosure in Town Creek where they will be fed and cared for until they are in condition to be placed in the foothills surrounding the valley. And woe to the man who kills one out of season. He will be prosecuted to the full extent of the law. There is a prohibition measure against the killing of the Hungarian partridges until 1909 and probably in that year the season will be further closed by legislative action.

It is believed that fifty pairs of the birds will be allotted to San Bernardino County.

The Hungarian partridge is larger than the mountain quail with which hunters in this section are familiar, and not quite so large as the Eastern partridge. They have plump bodies, strong feathered legs and mottled plumage, and are distinguishable from the quail by their sharp beaks and tails. They will live where quail live, and are said to be rapid breeders.

GAME LAW VIOLATORS PUNISHED.

Persistent offenders against the fishing and game laws were assessed severe fines, with alternatives of long imprisonment, last week, while minor offenses were punished by nominal fines. D. Romi is serving two sentences of ninety days each in the jail at Fort Bragg. He was charged with having killed a doe and of being a persistent offender of the game laws. Romi pleaded not guilty, but on the evidence presented, Judge Whipple imposed a fine of \$90 or ninety days in jail for the killing of the doe, and an equal punishment for hunting without a license. Theodore Béchovitz of the same place was fined \$30 for killing a deer during the close season.

A. Napoli was fined \$100 by Judge Harrier of Solano county for using a set net in the waters of San Pablo Bay. Judge Young of Westport fined J. Merriani and U. Bertini \$20 each for catching trout in the close season. Joseph Foster paid \$30 fine, and J. Babbitts \$20, assessed by Judge W. H. Wheaton of Santa Barbara upon conviction of having crawfish in their possession of a size smaller than the law permits. H. O. Beckley paid \$20 fine, assessed by Judge Fitzgerald at Black Diamond.

L. G. Crammer was fined \$25 by Justice Phillips at Letcher for killing deer in the close season. Peter Giancoli forfeited \$20 bail, at which he was held by Judge Elmer E. Johnson of Alameda, for killing larks on Bay Farm Island. Charles Belamini and S. Carbochi paid \$10 each, fines imposed upon them by Judge Goethals of Clayton, for killing larks. J. Vincenzo paid a fine of \$10, imposed by Judge Graham of Sebastopol, for hunting without a license. Judge F. P. Beverly of San Jose imposed fines of \$5 each upon Joseph Tom and Joseph Bordi for killing robins.

HUNTING NOTES.

Marsh shooting for ducks during the past week in the resorts easily reached from San Francisco has been practically nil. In the open waters near Alviso there has been some pretty good bags shot of canvasbacks and bluebills, the latter being in fine condition.

Wild geese will be plentiful until the middle of April, there being no close season on geese, jaunts to the well known shooting resorts for this game are now in order.

The season on English, or Wilson, snipe is open until April 1st, more's the pity.

Duck shooting in the up-river districts, although birds are there in thousands, has been rather indifferent according to the following report, last week, in the Sacramento Evening Bee:

With a few days more of duck hunting before the closed season, it might be said that the shooting at the present time is so so. A batch of gunners hunting in one section of the marshes where ducks usually frequent bring back discouraging reports while on the other hand another party of hunters shooting on the same day at a different place find the ducks so plentiful that the knocking down process becomes really wearisome.

Sifting both views down the consensus of opinion is that the birds are here in great numbers and that it is purely a matter of catching them on the grounds. As a rule they are now frequenting the overflows, traveling from one side to the other, as feeding conditions prevailed. Occasionally they leave the big bodies of waters to venture into the preserves and if these ventures are made on either a Saturday or Sunday, the customary hunting days of the nimrods, mighty good sport is enjoyed.

The storms of last week did more harm than good for the various grounds and tended to greatly scatter the quackers. During Friday and Saturday

of last week hunting was good but with Sunday's heavy rainfall the birds went wild and though great numbers of powder burners turned out on the Sabbath with the expectation of getting good meals for the next couple of days of this week they were generally doomed to disappointment.

A recent Sunday shoot by Los Angeles sportsmen is described thusly:

"The Saturday squads of the various duck clubs shot off about as many hard luck stories yesterday as they ducks and are more than ever convinced that they are really up against the rag end of the season. Almost every club that reported last night, told of very few birds and as the clear weather of the past few days has not brought the mback to the preserves, the big band hts aterwe etaaao, toacui preserves, the big bands that were here ten days ago have doubtless gone to climes more congenial.

The only limit of the day was reported from the Blue Wing, in back of Sunset Beach, where George Adams was "it." Dick Stephens shot twenty-six, and Drs. Schiffman and Steen had seventeen each. They had a general variety of teal, sprig and widgeon and actually thought the birds few and far between."

The real duck mine, one that has been paying heavy feathered dividends, is evidently to be found in the Imperial Valley country.

When the great Imperial Valley reclamation scheme was first contemplated, little did the promoters dream that the conditions thus brought about would, in the transformation, prove to be a perfect haven for all the members of the great duck family.

Since the cultivation has broadened to such tremendous extent, and barley, wheat, corn and various other products have been so extensively raised, the ducks have swarmed it.

The duck shooting in this district is, to a considerable extent, regulated by the amount of rainfall on the coast.

The observations prove that after the first heavy rains of our winter season there is a wild scattering of the ducks on all the preserves along the short line south of the San Joaquin valley district. Then, almost all the ducks, with one accord, flap to the heavens and wing their way directly to the rich feeding grounds of the Imperial district. Then it is that that country becomes a paradise for the sportsman.

The shooter leaves Los Angeles via the Southern Pacific railway to Imperial junction; thence to Brawley, El Centro, Imperial, or runs down to Calexico, on the Mexican boundary. At Brawley the greatest shooting is, beginning at the railroad bridge at Alamo river and following the course of this stream all along to Mesquit lakes and, of course, hunting the country over on both sides of the river wherever any sloughs or irrigation ditches are found. Then following on down the line over the entire district as far as Calexico.

A great deal of the shooting, regardless of the State law, is done at night by moonlight. Then it is, the ducks, after spending the day on lake and marsh, far away from the cultivated districts, rise in a mighty body and string out over the fields of grain and begin to feed.

One farmer, residing near El Centro, going out one night attending the gates in one of his irrigating ditches, found one of the newly sown fields literally covered with ducks. A succession of whoops and a flash of the lantern frightened the flock and with a mighty rush the bewildered horde was upon him. Quickly setting down the lantern he swung his shovel through the rushing phalanx, killing one or two with every stroke. A party of hunters, camping near by, heard the racket made by the confused flock and opened fire.

The turmoil lasted until the ducks finally got their bearings and disappeared. Next morning the party brought a wagon load of several species of ducks to town.

At another place, also near El Centro, two hunters stood in one position on a moonlight night and shot all night. Next morning they picked up a few birds over six hundred ducks. At still another place in the same district two men, shooting on a night flight, killed over three hundred ducks. In this neighborhood J. H. Carlisle, one of the best duck shots on the Pacific Coast, has been shooting for the Los Angeles market for the past three or four years, and has done some remarkable work on the other game which abounds there.

In the section further south, between Imperial and Calexico, Augustus Knight, he of the "twisted gun stock," shot for the market last winter. Mr. Knight, while shooting along the river from a boat during one of the big overflows, was upset and narrowly escaped.

Several days later the celebrated old "Long Tom" Parker gun was fished from its bed.

It is no uncommon occurrence for a shooter to have the limits on ducks, and before the day is over shoot the limit on quail, the latter being very plentiful.

Will J. Golcher, Al. M. Cumming, M. Osburne and Ned Bosqui have been enjoying the grand quail shooting during the past week, to be had in the vicinity of Los Alamos, San Luis Obispo county. Limit bags have been the rule whenever the shooters desired to get them.

DOGS AS DETECTIVES.

To the International Police Service Magazine, Mr. Raymond Barker contributes a translation from the German of an article on "The Training of Police Dogs in the Tracking of Human Beings" by Herr Kappe, Commissioner of Police of Neuheim.

Herr Kappe says that as soon as the young dog has learnt to be obedient, to jump over obstacles, and perform other little duties is the time to instruct him in the following of human tracks. A good introduction is training in the carrying of messages, and in this work the dog should be taught to keep his head low. Five or six months is the best age to begin and the young animal should never be tired.

Before the exercise, continues the writer, it is recommended that some person who is well known to the dog, for preference the trainer himself, should caress the animal, then offer him a piece of meat and, still allowing the dog to see it, walk away in the direction of the wind and over a lawn, while the assistant holds the animal at the leash till the trainer is at first fifty yards, then 100 yards, away, and then has so concealed himself that the dog cannot see him. In this way the dog will be taught to find the trainer by means of the scent because he cannot do so by sight. As soon as he is able to track unaided, the distance should be gradually increased to 3,000 yards and more. This lesson learnt, the assistant goes away and lets the dog find him, commencing again with short distances. He orders the animal back to his trainer, who at first meets the dog in the last portion of the track with encouraging words, and if he returns to him, as the assistant did in the first lesson, rewards him with a piece of meat. As the dog grows sure on short distances the length is increased according to the performance. In case this has not been done before, the assistant should at each errand ostentatiously place in the message-box a note and give the order "off on you errand." It is plain that the person to whom the message is to be taken should be known to the dog, and the animal should before being sent on the errand be placed on his track. Here ends the preliminary exercise in the tracking of men, and now begins the special training.

The next thing is to put the dog on the track of the assistant who has gone off with some article in his hand and at some short distance away places it on his own track and runs back to the trainer.

The dog is then sent out to find the article and bring it to his trainer. Should the animal fail to discover the lost article the trainer goes with him along the track of the assistant up to the object of their search and induces the dog to pick it up and carry it back. The trainer continues the lesson in this way on his own track, so that in the course of a walk accompanied by the dog he drops something and afterwards sends him back to fetch it saying, "Back, fetch the lost article!" As the animal becomes proficient in this he is again exercised on the tracks of the assistant till he grows quite certain on his scent and does not fail.

All these lessons should be at first at short distances and against the wind in order to avoid the chance of a failure. As the animal becomes more sure the distance is increased, and finally the assistant should proceed with the breeze in order to train the animal to work under all circumstances. Should the dog still not readily follow the track he must be persistently exercised till he quickly obeys the order to go to the assistant. After this the assistant should make an attack on the trainer, and when the latter excites the dog to protect him, the former should take to his heels, if possible unseen by the animal, to a distance of, say 100 yards and conceal himself so that he is not visible to the dog. Then for the first time the trainer releases the dog and sets him to follow the assistant with the words "off catch him!" The trainer follows. When the dog has traced the assistant who should be a stranger, the latter must, with the help of a cane, keep the former off so that he cannot get hold of him but is forced to circle him barking or to stop him till such time as the trainer appears. Should the dog be inclined to leave him the assistant should follow striking the ground, not the dog, with the cane in order to attract the animal's attention to himself wholly. As soon as the trainer turns up, the dog should be excited to renew his attack till he again stops the assistant. Then the trainer chains the animal and takes the assistant back to the place where the affair started, preferably in a house. During this journey the assistant should be given an opportunity of a chance to escape, and by unleashing the dog and by his tracking and stopping the fugitive the flight should be frustrated.

The animal should be exercised each time on the track of a different and strange assistant who should hide himself sometimes in a bush, sometimes in a hollow, and even climb up a tree, so that the dog learns to find the person no matter where he conceals himself. The climbing of a tree should however, not be resorted to till the dog has been accustomed to tracking by the scent. A dog being trained in the following of human tracks often, certainly for the first time, passes the tree on which the assistant sits only to return scenting out the track or to stand fast undecided whether the man has retraced his steps or taken a turn. As soon as he finds that this is not the case he again appears at the end of the track and searches in the lower part of the tree with redoubled ardor till a favorable breeze blows the scent of the person he is after to his nose and betrays his presence. Eager dogs bark on this discovery, but the trained animal hunts

silently. When the dog growls at the man on the tree the latter should fire a blank charge at him in order to accustom the animal to firearms. At first the charge of powder should be small so that the detonation may be slight, but it should be gradually increased as the dog becomes more used to stand fire.

Another point to be remembered is that the trainer should in the beginning be present when the dog is fired at with a view to giving the animal more confidence. As the dog acquires this confidence, the trainer must keep at a distance increased always gradually. It is a very good thing to give the assistant a bundle of sticks, each about two feet in length sharpened at one end while the other is painted white. If the assistant takes a turn or climbs a fence he sticks one of these sticks to the ground and bends it in the direction he is taking. This will give the trainer who follows the track with the dog a means of checking the direction taken by the animal, although it is not always the best dog that runs closest to the track. On a fair day it is not unusual for the dogs to follow the track at a distance of fifty yards and more under the wind. When the sticks have answered the purpose for which they have been placed on the ground they should be taken up in order not to cause a mistake on another occasion. They are unnecessary if the dog has learnt to follow the track for a great distance and possess confidence in himself. He quickly learns to rely on himself and, as already remarked, to go back on the track if he has overshot it. One should on no account assist the animal if he is endeavoring to find the track. It is above all very important that the police dog should be confident. The ground should often be changed. It is not recommended that the dog should be permitted to work in the same place where he has on a former occasion been exercised.

The assistant may have for some reason, to avoid a herd of cattle, left the track arranged on. There is no greater mistake than to call the dog off the right track. A well trained dog relies entirely on his sense of smell and does not see the assistant till he smells his body or runs up against him. In order to avoid the possibility of the dog falling into the bad habit of using his eyes the assistant should always conceal himself at the end of his wanderings so that the dog will discover him by the sense of smell only. I consider it a very good thing if the police dog is taught to track while held in leash. Nevertheless, if the animal is proficient in tracking and is in the habit of doing so loose, it is not advisable to use a collar. Better than this is a strap with a hook right behind the shoulders, where it is fastened to the line.

From the preceding, one can easily answer the second question. "What points must the trainer of a police dog observe in the tracking of criminals, lost persons, etc.?" He must give the dog the scent of the person to be traced, and must endeavor to put him on the right track. This should not be too much effaced by the tracks of other persons. Should the track owing to the heavy traffic not be traceable in the place where the person last stopped the dog should be allowed to scent round about till he finds the track and takes it up.

If the track for a great distance follows a much frequented road and we can judge the direction taken, the animal should be set to scent along the edge of the road where the party has most probably left it. If the track is not picked up on this side the same should be done on the other. One should not search one side for more than one to two thousand yards and then proceed along the opposite side before going further.

Should one not be able to judge the direction taken, the road must be followed by the dog up one side and back again up the other. This probably means that the road has to be followed for a distance of 10,000 yards both ways. The thorough search of the road by the dog should not be hindered by the impatience of the trainer. The calmer and more far-sighted the latter is, the surer will the dog be.

If the person followed has made use of a conveyance and has in this passed over the portion of the road which is being searched, the dog will, if the scent has not been quite destroyed by continual traffic, obtain a trace of it in the wind at one of the two sides of the street and will follow it. A trained dog should often, at least once a week, be exercised in these difficult cases in order always to have him capable of tracking under any circumstances, and to keep him constantly in training. This is self-evident if the animal is to be useful when required for actual work.

In conclusion, I will not dare to say that each person will have equally good work with equally well trained dogs. In order to solve such difficult problems as the tracking of human beings with the assistance of a police dog one must note—first, that the dog and the trainer are well known each to the other; secondly, that the trainer is able to handle the animal with skill. That person will have the best result who has himself trained the dog. I therefore recommend that each one work with his own dog.

DOINGS IN DOGDOM.

Again a Coast bred dog has scored a signal triumph against the best the East could produce.

A brief press dispatch tells that:

William Ellery's Collie Faultless won a signal victory at the New York dog show today, (February 13th). The California dog carried off three special

prizes, which makes her the champion Collie of America. She beat Pierpont Morgan's crack Collies which were supposed to be the best kennel in this country. Ellery's V. Student, a Collie, also won the first and third prizes in other classes. Ellery will exhibit his famous kennel of Collies at Boston next week and then they will be shipped to the coast.

Congratulations to Wm. and George W. Ellery.

Mr. Frank W. Worthington of this city had the extreme bad luck to lose his grand young Bloodhound Knight Templar, which died last week after a short illness. Two puppies, a dog and a bitch, which he recently received from Glen Tana Kennels, Spokane, are coming along nicely.

Pasadena opened yesterday for a two-day show. The entry of dogs from San Francisco was rather less than originally estimated.

Nairod importations and sales have been numerous in the past few months; and with the addition of six high-class brood bitches purchased in England lately, the kennels have materially improved their already high-grade breeding stock. Four of these bitches have already arrived, and particulars in regard to them will be published later. The other two are due early in February. They are strong in the blood of Dick Stone, Hazlemere Prince, Swashbuckler, Carthusian Cerberus, and Heywood Duchess in their immediate ancestry; and though selected for breeding purposes principally, are of good show type—consequently there should be "something doing" in the Nairods shortly.

TRADE NOTES.

A Year of Superiority.

The highest amateur and the highest professional averages, also the longest consecutive runs for 1907 were all made with Du Pont powder. These facts prove, without contradiction, that Du Pont powders make and break records.

U. M. C. Notes.

Mr. George Volk broke 194 out of 200 at West Toledo, January 1, and Mr. F. A. Markman broke 95 out of 100 for the du Pont trophy. Both shot U. M. C. shells.

Mr. J. H. Cummings broke 282 out of 300 at Chicago, December 22, shooting U. M. C. Arrows. Billy Stannard broke 167 out of 175 with U. M. C. shells the same day.

On January 4, at the Chicago Gun Club, a four-man team race was shot at 100 targets each. Mr. Harry Dunnill scored 98, Mr. J. R. Graham 94, total, 192 out of 200, against Jesse Young, who scored 92, and Mr. F. W. Myrick, 85, total 177 out of 200. All shot U. M. C. shells, except Mr. Myrick. Harry Dunnill scored 97 out of another 100, or 195 out of 200 from 16 yards, shooting U. M. C. shells. Mr. T. E. Graham won one of the handicap events with a score of 45 out of 50, and was second in the other with the same score, shooting both these events from 19 yards with U. M. C. shells.

Winchester Wins.

In sunny Pinehurst, N. C., at the tournament of the Pinehurst Country Club, Winchester shells or guns won all the honors. Mr. C. W. Billings, of the New York Athletic Club, won the principal event, called the Mid-Winter Handicap, with Winchester factory loaded shells, scoring 98 out of 100 from 18 yards. High professional in this match was A. M. Hatcher, scoring 91 out of 100 with a Winchester repeating shotgun from 20 yards. The Preliminary Handicap was won by Mr. G. S. McCarty, of Philadelphia, who broke 91 out of 100 from 20 yards, with Winchester "Leader" shells. High professional in this event was Mr. Guy Ward, who scored 88 out of 100 from 20 yards, with Winchester shotgun and "Leader" shells. High amateur average was won by Mr. W. M. Foord with "Leader" shells, and A. M. Hatcher won high high professional average with a Winchester gun.

The Sunny South Handicap as well, lends its voice in favor of the Winchester forces for better shooting. At this tournament, which was held at Brenham, Texas, January 28-29, Fred King, of Delta, Col., won the Sunny South Handicap event, shooting a Winchester repeating shotgun, making a straight score of 25; W. H. McGeary, of Denver, was second, with a score of 24, shooting Winchester shells and Winchester gun. The Chronicle Cup was won by Mr. Forsgard with a Winchester gun. A shooter using Winchester shells and Winchester gun was second. Is this enough "Show-Me" news?

Peters Points.

The well known and deservedly popular ammunition man and shooter, whose home and headquarters are in Minneapolis, H. C. Hirschy, resigned from his former position some weeks ago, and has recently accepted a proposition to represent The Peters Cartridge Company, of Cincinnati, Ohio, and both he and his company are to be congratulated upon the new connection. His many friends in all sections of the country will be interested to know of this change, and will give him a warm welcome in his new capacity. Mr. Hirschy is not only conversant with the various phases of the ammunition trade, but is a shooter of no mean ability, having finished the year 1907 with 92.6 per cent, being fourth in his class.

THE LARGEST EXPORTERS OF LIVE STOCK.

To understand exactly what is wanted on the farms and plantations in our island possessions one must spend considerable time there. Mr. J. Wilson, of the well known firm of Wilson & Rooker, spent many years as proprietor of the Volcano Stables at Hilo, Hawaii, and was the largest importer of horses, mules, cattle and hogs on this, the largest of the Sandwich Islands group. His long experience has made him an authority on this subject and as he is an excellent judge of live stock, he never finds it a trouble to select just what his customers need. His partner, also a natural horseman, Mr. A. F. Rooker, has spent considerable time in Honolulu and as his long experience as a stockman in Nevada and California (in fact, his life has been spent in this calling) enables him to select what is needed. As his partner and he have worked together for years in this business, they are better prepared to buy live stock and ship them with less liability to injury than any firm of horsemen in San Francisco, and it is not surprising that they have through honesty, square dealing and a thorough knowledge of the requirements of the planters and live stock owners built up the largest exporting business on the Pacific Coast.

The selection of mules for working on the large sugar plantations has been reduced almost to a science. The little "cotton" mule used in the Southern States is perfectly useless there, the great large sixteen and seventeen-hand mules so much in demand in the large American cities will not suit, so that the chunky, well-formed active mule, such as is used by the United States Army is the one most sought after. These mules must be absolutely sound, and this firm has shipped thousands of them. On some of the islands the business of breeding mules has been started and for this purpose Messrs. Wilson & Rooker have shipped some of the finest, largest and best-boned jacks ever brought to California. They have also shipped hundreds of draft horses to Honolulu and Hilo, and scores of standard-bred stallions and mares have been selected from our leading stock farms by them. On many of the islands thousands of cattle are raised, and the vast improvement in them is attributed to the splendid additions of choice Herefords, Shorthorns and Devons which this firm has shipped. Dairies are being established on a most extensive scale near Honolulu and Hilo, and for these registered Holsteins, Ayrshires and Jersey cattle have been sent. Some islands are peculiarly well adapted for sheep raising and on almost every vessel leaving this port for the islands Messrs. Wilson & Rooker have consignments of thoroughbred rams and ewes.

The shipment of stock on such a long journey is quite an item, and, to see that there is plenty of feed and that the animals are properly tied on board so that all danger of injury is avoided, is something that their long experience has taught them how to do to perfection. The loading of mules, to one who has not seen it done, is very interesting, especially if the animals are only halter broken. In the thousands that have been shipped, there has never been one injured, and the rate of fatality even during the heaviest weather is so light that it is never feared. Large shipments of hay, grain and bran go with them and generally the stock sent arrives in better condition than when placed on board.

The firm also carries on an immense livery and boarding stable business at Birch avenue and Van Ness avenue, between Fulton and Grove streets, San Francisco. Nearly 250 horses are stabled there, and this establishment is conceded to be one of the healthiest, best ventilated and most central stables in San Francisco; but the trouble is, it is not half large enough, so numerous are the applicants who desire to have their horses boarded there. The attention of horse and cattle owners is called to this firm, for when orders arrive it is well for these gentlemen to know where to look for the best, and it is for such owners to know where they can be had. They attend to the selection and shipment of all stock personally and in that way assume all responsibility and do not leave it to their employees.

BREEDING BUREAU CONDEMNED.

Francis M. Ware, New York Dealer and Judge, Says Thoroughbred Type is Without Market Value for Riding or Driving.

Through its Breeding Bureau the Jockey Club has distributed throughout the State of New York some forty-five thoroughbred stallions for public use at a nominal fee, and at first glance the layman would be inclined to applaud such evidence of an intention to "improve the breed of horses," for which purpose alone the Jockey Club assumes to foster the sport of riding and driving.

It cannot be denied, however, that the purveyors—the dealers to whom farmers and breeders must look for patronage to dispose of such progeny from their mares of trotting and draught families—view with considerable apprehension the effect of such breeding upon the "up State horse," as the trade classifies him, and predict that the sturdy "New Yorker," full of trotting blood, good action and speed, and with substance and harness conformation, will, in at least the first few removes from his ancestor, be "honored in the breach" of all those qualifications which make for a high-class harness type upon a captious and critical market. The dealers point out that the demand, the only demand worth while, is for one or two sorts—either harness horses or ride and drive horses. They justly argue

that the Westerners and Southerners are too far definite types, too securely founded to allow Eastern breeders a chance to cope with them at that branch of the business. They also know that the market for hunters is too trifling for active consideration, and they are aware that, so far as cavalry and police horses go, the West can always undersell the East; while everybody understands that not one farmer in ten thousand has any idea how to "make" a fashionable saddle horse or how to "school" a hunter. Therefore the farmer must fall back upon either draught horses of some grade, always salable and easily trained, or upon a horse of size, speed and action which he can sell when he "has a full mouth" at five years and use for light driving, etc., for two years before that period.

Now, what does the thoroughbred do to help on this end? He is so prepotent that he "breeds off" the best action in the dam and substitutes his own long, leisurely swing at the trot, good enough up to eight or nine miles the hour, perhaps. But what will any horse bring that can go no faster than that? Why, nothing, or next to it. How will a dash of his hot blood—his extreme nervous irritableness—work out in a beast intended for family carriage purposes? What will his rather light bone, narrowness and legginess do to his progeny, and what will their values be when the checks are drawn? That is the practical final test.

Who uses half-bred horses for driving and riding? Do any members of the Jockey Club? If they do on any appreciable scale, and find them satisfactory, will they not inform an anxious trade and a bucolic community where such specimens may be seen in active work and what is the percentage of successes? If these gentlemen do not so breed from and make use of the animals they foster, by what right do they strive to foist them upon an industry which already staggers under all the troubles it can uphold, or assume to know whether such a cross is useful, or to deny it is, in at least the first five removes, strictly detrimental and destructive to all that has been done before with breeds proved suitable to the market demands, and likely to graft upon a helpless posterity and an unsuspecting public some or all of the many infirmities of temper and physique from which the latter day thoroughbred in far too many instances acutely suffers?

Will the Breeding Bureau assert that all the stallions now in service are free from transmissible unsoundness and come from ancestors similarly blessed?

Can anyone look over the cowering, hooded rogues, cringing about the paddock; at the hopeless cripples of all ages; at the total want of any horses of class more than four years old; at the average physique of the entire breed; at the unbroken yearlings disfigured with ringbones, spavins, curbs and other chronic unsoundnesses—can any one with the sincere wish to "improve the breed of horses" recall these wrecks and derelicts and then declare that he honestly believes such parents or sires from such relationship are calculated to attain the ends at which the Breeding Bureau claims to aim?

Thoroughbred sires were used broadcast throughout Canada. Has any one seen any Canadian harness horses of class upon the market in the last fifteen years, except a very few by hackneys, and fewer still by trotters? Of ordinary horses we have had some from that section, but the market always has been and always will be glutted with the common or garden horse. Has Canada any saddle horse trade, or any hunter demand really worth while? Is the inconsequent and trifling opportunity of selling direct by the farmer to the private owner worth considering? Not for a moment.

The middleman and the dealer are the men who buy and fit the horses for the trade which they have possibly given their lives to acquire. The farmer cannot get that trade, and could neither prepare his offerings nor handle his customers if he could. It is a business in itself and one at which very few succeed. Do the members of the Jockey Club mean to help Mr. Farmer dispose of the commodities he has through their beneficence acquired? If so, how? For certainly dealers will have no use for animals with the low thoroughbred action, lack of speed at the trot, temper and physique. Nothing "brings the money" but speed at the trot and all-round high action. Where will you find the thoroughbred sire who will transmit these two essentials, or who will not so outbreed any mare through his prepotency as to prevent or modify any accomplishments of her own in these two details?

Thoroughbred horses, or animals with this action and conformation and flighty disposition, are absolutely unsalable for anything like a price in New York or any other market. The public are afraid of and will have nothing to do with them. For the last two years a bunch of them have been shown before Mr. Gooch in the Garden as saddle horses, but only because there was a prize offered for them and it was well known that he liked them. The light hearted fashion in which these specimens strewed their riders on the tan bark or forced them to hold on with hands, legs and teeth, was a most elaborate object lesson to the average equestrian, and one not soon effaced.

The writer yields to no one in his love for, and admiration of, the thoroughbred horse—in his place. He has owned and handled quantities of them for many years, but those same thirty-five years have been spent in handling all other kinds for both development and sale. He hopes for what is best for the horse, the broad gauge American horse and his producers, but he is unable to discern one single

advantage accruing to the animals as we breed them from any admixture of any alien strain, and least of all the thoroughbred. We have in the American trotting-bred horse the most versatile, enduring, docile, speedy, high actioned animal of his species in the world. Why not devote and restrict our efforts to further refining this almost pure gold? And why should not the Jockey Club distribute choice specimens of this variety where they would be eagerly patronized and produce results practical, comprehensible, manageable, salable and profitable? By so doing it would strengthen its position, prove its sincerity and receive the indorsement of the men who really count—those who are actively and practically interested in buying, selling and developing horses—and of the breeders and farmers, who must absolutely depend upon them for patronage.—N. Y. Herald.

THE NEW TRACK AT PORTLAND.

Will G. McRae of Portland writes as follows in the Oregonian of the progress in building the Country Club's new track, near that city:

Work on the Country Club race track has been pushed with great rapidity and a large force of men has been at work for months past on the track, which will be ready by the last of April. Last week a building committee was appointed, which has been in consultation with E. M. Lazarus, the club architect, and has passed upon the plans for the clubhouse, grandstand and stables.

It is the intention of the Country Club officials to have the track, stables and grandstand ready in time for the spring meet of the Portland Hunt Club and to have everything complete for the fall races and live stock show. It was originally the intention of those behind the Country Club to secure dates for the holding of the live stock show from the National Live Stock Association, and M. D. Wisdom was sent for that purpose as a delegate to the convention that was held in Chicago. Mr. Wisdom attended the convention, but while there the so-called "rich man's panic" was at its height, and the stockmen were unable to say whether they could come to Portland this year.

Mr. Wisdom's visit, however, was not without results, for he secured the promise of a number of imported breeders of fancy live stock to ship their herds to Portland this fall. He was unable to secure dates under the auspices of the National Live Stock Association for 1908, but the association did map out a Western Pacific Fair Circuit for 1909. This circuit will start at Hamline, Minn., and will include Helena, Spokane, Seattle, Portland, Boise, Salt Lake City, Denver, Kansas City and close in Illinois. This circuit will bring to the Pacific Coast the cream of the Eastern live stock, for breeders who have been carrying off all of the prizes year in and year out are looking for a new show field and Mr. Wisdom found them more than anxious to come to the Coast with their herds.

Behind this plan are the big packers of the country, who, because of the keen competition in meats for foreign markets and the embargo on American meats in Germany, are anxious to develop the breeding of a better class of steers and beef cattle. It was this same movement upon the part of breeders and packers that relegated into the past the Texas longhorned steer, with the result that Texas to-day ships the finest beef cattle sold. In Texas the cattle are fed on cotton seed, which was formerly thrown away.

In Oregon, with its vast irrigated tracts that produce the finest alfalfa and barley, the same results can be obtained here. Packers, realizing the importance of the Oriental market, have taken a keen interest in the Portland Country Club and Live Stock Association, and together with the breeders will send cattle, swine and sheep herds to Portland in 1909, which will far surpass those shown during the Lewis & Clark Exposition.

Now that the Country Club has promises from a number of big breeders that they will ship to Portland in 1908, it has decided to offer in cash prizes more than \$40,000. In addition to the Eastern herds that will be shown here, the show has been arranged so that the breeders from California, Idaho, Montana, Washington and Oregon can exhibit at the same time and also take part in the various State Fairs held throughout the Northwest. The matter of having the California breeders ship here has already been taken up, and it has been planned to have the Portland dates follow the closing of the California State Fair, September 5th.

The live stock show will not be the only feature of the fall meeting of the Country Club. The association will give a week's harness racing at the same time and will distribute more than \$20,000 in purses and stakes to the light harness brigade. This small fortune, coupled with the big stakes that the Oregon State Fair Association will give, will bring to Oregon all of the crack trotters and pacers that are wintering in California and will keep them on the Coast instead of invading the East and racing on the Grand Circuit. There will be a \$5,000 trot and a \$5,000 pace.

MARE AND COLT FOR SALE.

A handsome bay colt, foaled May 1, 1907, by Ed. McKinney (own brother to Adam G. 2:11½), and out of Mattie B. 2:15. Entered in Breeders' Futurity and Canfield Stake. Dam is in foal again to same horse, and either or both are for sale at a reasonable price. Colt is pronounced a fine prospect. For further particulars address WM. VAN KEUREN, 412 Cole St., San Francisco.

ANOTHER GOOD SON OF McKINNEY—KINNEY AL 2:14 1/4.

Kinney Al 47167, record 2:14 1/4, one of the fastest and best bred sons of the great McKinney, will be in the stud during the coming season at Berrendos Park, Red Bluff, Cal., the former home of Budd Doble's great trotter, Kinney Lou 2:07 3/4, under the management of the veteran horseman, Lon Rowley, who developed Kinney Lou and Kinny Al, and if the breeders in that section of the State show proper appreciation of this magnificent son of the greatest of all trotting sires, he will have a full book to a certainty. There is not another trotting stallion in California that combines the speed, breeding and individuality of this young horse whose services are offered at so low a fee. A bright bay in color, 15.3 hands in height, of lofty carriage, symmetrical conformation, pure trotting action, extraordinary intelligence, level head and kindly disposition, combined with plenty of bone and substance and limbs that have never had a puff or pimple on them.

In point of speed inheritance there are few stallions his superior. His dam is a developed mare with a record of 2:30 sired by the great speed sire, Altamont 2:26 1/4 to wagon, and is besides the dam of the green trotting mare Velma Z. (trial 2:17), Moline 2:32 (trial 2:23 1/4), Sadie C. 2:33 (trial 2:25), and other foals that show unusual speed at the trot. In fact, everything that she has produced is fast. His second dam is Daisy, a producing daughter of Kisbar 2:27 1/4, son of the great progenitor of trotting speed, Hambletonian 10, and Lady Fallis, a producing daughter of the famous broodmare sire, American Star 14; third dam by Paul Jones and from there his breeding runs into thoroughbred lines. His sire, McKinney, and Altamont, the sire of his dam, are the two greatest extreme speed sires that have ever been owned or kept for service west of the Rocky Mountains. Their combined 2:10 list have 24 members and their sons are sireing and their daughters producing 2:10 speed. They have established families that are breeding on and each year their blood lines will become more

valuable, more highly prized and more sought after by up to date breeders who desire to produce the best with the greatest degree of certainty and let the other fellow experiment.

Kinney Al's record was made last November at Phoenix, Arizona, in the second heat of a winning race, the first he ever started in, and Budd Doble said of him that day that he thought he could trot in 2:20. This will be his first season in the stud, but he has, at Red Bluff, a few two-year-olds that are very promising and show the size, quality and individuality that will recommend their sire to the breeders of that vicinity.

As before mentioned, Kinney Al will make the season of 1908 at Berrendos Park, Red Bluff, California, under the management of Lon Rowley at the extremely low fee of \$30 per season, usual return privilege or money refunded at option of owner in case mare does not get in foal. Pasturage at \$2 per month, but no responsibility for accidents or escapes. For further particulars apply to or address,

LON ROWLEY,
Red Bluff, Cal.

— FOR SALE —

**The Imported German Coach Stallion
RAMM 2637.**

Approved and inspected by the Oldenburg Government Coach Horse Association, February 4, 1903, at Aurich, Germany, and awarded the government premium passed on free entry for Mr. William Eaton Moore, of Springfield, Ill., August, 1903.

Ramm 2637 is six years old, color, black; weight, 1,450 pounds; height, 16 hands; a great all around actor with plenty of speed to produce fine road horses as well as high class coach teams, which always sell for big prices in the cities. He was awarded several premiums in Germany as a three-year-old and won fourth premium at the Illinois State Fair of 1904, one of the largest fairs held in the United States; also complimented by the Breeders' Gazette as being one of the best models of the German coach horse breed ever exhibited at the Illinois State Fair.

For further particulars address the owner,

JOHN MIDDLING'S

High Grade

Sulkies

and Carts

MIDDLING'S TWO-WHEELERS have been popular with the horsemen for the past 17 years. We do nothing but build Sulkies and Carts, both winter and summer, and our prices are always the same, and we can sell cheaper than any of our competitors, for the reason that we build our own wheels, bend our own shafts and all other parts, and can produce the highest grade sulky or cart for less money than any other manufacturer in the U. S. to-day, quality considered.

If you need anything in Sulky or Cart line you cannot afford to overlook this.

Every Two-Wheeler guaranteed

The Handsome and Sound Stallion

CRESCO WILKES 2:10 3/4.

Record Made as a Four-Year-Old in a Winning Race Against Aged Horses.

Having a three-year-old full brother to this stallion, I offer Cresco Wilkes for sale. He is a bay with black points, has fine conformation and is all right every way. He weighs 1,200 pounds. Last year he was started without proper preparation against Sir John S. 2:04 1/2, Miss Georgie 2:08 1/2 and others at Pleasanton, and was separately timed the first heat in 2:08 1/2. In condition he should pace a mile in 2:06. He is now seven years old, and in competent hands has a good earning capacity in the stud or on the track. Cresco Wilkes was sired by Nutwood Wilkes 2:16 1/2, sire of John A. McKerron 2:04 1/2, etc., and his dam is Allie Cresco 2:13 1/4, by Cresco 4908, sire of five in the list. He can be seen at my place in Alameda. For price and further particulars apply to

ALMADEN 2:22 1/4

Stallion Produce Stake

In September, 1908, \$100.00 will be deposited in the California National Bank, to be raced for as two-year-olds, for the get of Almaden 2:22 1/4 and Zeloso, season of 1908. Race will take place in Sacramento in 1911, after July 1st of that year. Entrance fee, trot or pace, mile heats two in three, no distance. Money divided as follows: \$40 for first, \$30 for second, \$20 for third, \$10 for fourth. If less than four starters the money will be divided pro rata. If there are more than ten starters the judges may inaugurate a "try-out," best four in each division to choose for positions and start together in race.

You are expected to make your entries ten days before the race and give three days' notice of withdrawal.

This stallion produce stakes was suggested by an active member of the local Driving Club, so I take no credit for this small effort, only hoping the parties interested will make it a success. **M. L. LUSK, Sacramento.**

THE WOODLAND STOCK FARM.

In 1904 Mr. Alex. Brown, of Walnut Grove, Sacramento County, purchased the Woodland Stock Farm. Mr. Brown is a well known horseman and the breeder of Aristo 2:08½, one of the greatest trotters on the Eastern circuit that year and winner of the Occident and Stanford Stakes. He was sold to Mr. James Butler, of New York, for \$10,000. The Woodland Stock Farm is an ideal breeding and training farm. On it is located the Woodland race track and it lies but one mile from the town. It comprises about sixty acres of as fine land as lies outdoors, and the track is known as one of the fastest on the Coast. The stallions that will be at the Woodland Stock Farm are Nushagak, Prince Ansel and El Rio Rey. Prince Ansel, registered number 29222, has a two-year-old trotting record of 2:20½ and should, by all laws of heredity be a great sire of extreme and early speed and from the showing of his oldest colts, lack of opportunity is the only thing that will stop him. There probably never was a two-year-old that took a record of 2:20½ with as little training as Prince Ansel. He was not broken until the spring of his two-year-old form and he took his record in August, winning the race in straight heats, 2:22½ and 2:20½. There have never been but seven of Prince Ansel's colts trained and they have shown as follows: Prince Gay (5) trial 2:12¾, last quarter 0:31½; Princess Mamie 2:27½, trial (4) 2:18½, last quarter 0:31¾, last eighth 0:15¼; Prince Lot (2) 2:29, trial (3) 2:15¾, last quarter 0:32¾; Harold M. worked two months as three-year-old, trial 2:42½, last quarter 0:35½; Anjella, two and one-half months' work as two-year-old, trotted half on April 25th in 1:15½, last eighth 0:17¼; Bigelow, three-minute gait as yearling when being broken, and Ansell, showed an eighth in 0:19½, three weeks from the first day she

was shod last fall as a yearling. To show just what opportunities Prince Ansel has had in the stud, here is a list of his get up to 1908: 1901, three foals, ch g leg broken; br f Broodmare, untrained; Prince Gay, trial 2:12¾; 1902, three foals, b f untrained, sold; b g, untrained; Princess Mamie, trial 2:18¾, last quarter 0:31¾; 1903, made season at Mayfield, got six or seven foals; 1904, three foals, Harold M., two months' work, quarters 0:35½; b f, untrained; Prince Lot (2) 2:29, trial (3) 2:15¾, won third money in Breeders' Futurity as two-year-old, won third money in Breeders' Futurity as three-year-old, was second the third and fastest heat in the race and would have won second money if it had not been for a collision in second heat which caused him to break; after catching, he trotted the middle half in 1:05¼ and went five-eighths of the mile right at a 2:10 gait; was second three heats at Petaluma, winning third money, and won second money in Stanford Stake at Sacramento and could have trotted that track in 2:16; 1905, five foals, b g, untrained; b f, untrained; b g, untrained; b f, untrained, and Anjella, trial half, April 25, 1907, 1:15½, last quarter 0:36, last eighth 0:17¼, and we believe that, barring accidents, the three-year-old that beats her will beat 2:15; 1906, four foals, b f, unbroken; ch e, unbroken; b f, unbroken, and Ansell showed eighth in 0:19½ as yearling; 1907, four foals, b f, unbroken; br f, unbroken; ch f, unbroken; b f, unbroken and five foals from outside mares. His service fee for 1908 will be \$30.

The great Wilkes stallion Nushagak 25939 will make the season at the Woodland Stock Farm. Nushagak is one of the best Wilkes stallions on the Coast. During the season of 1906 there were sixty stallions that had sired five or more standard performers and Nushagak was one of them. Of the sixty stallions there were only four that had five of their get that were four years old and under to take

standard records. Nushagak was one of the four, the other three being Axworthy, Oakland Baron and Parole, three of the most noted sires in America belonging to the wealthiest trotting horsemen in New York, consequently they had every advantage that money could get, which makes Nushagak's showing all the more remarkable in comparison. Another remarkable thing is that Nushagak's five performers were the only ones by him that were trained during that year. Nushagak is the only stallion standing in the vicinity of Woodland that has sired a 2:10 trotter and he probably has more of his get in the list than any other stallion in the State in proportion to the number trained. His get all possess style, good size, game racing qualities and a high rate of speed. His fee will be \$50 for the season.

Another of Woodland Stock Farm's stallions is El Rio Rey 2:23½, registered number 42780. He is a handsome bay stallion, 15½ hands, sired by Nushagak, dam Piocha by Dexter Prince; next dam Pico 2:11¼ by Electioneer; next dam Penelope by Mohawk; next dam Planetia by Planet (thoroughbred). It is the intention to train and race El Rio Rey this season, consequently he will be limited to ten outside mares of approved breeding and individuality. Barring accidents, it is confidently expected to give this young horse a mark of 2:12 or better this season. As a two-year-old he trotted a trial mile in 2:26 and as a three-year-old in 2:18½ over the Woodland track on the 9th day of June, and he would have trotted last season in 2:15 or better, if he had not been taken sick. He is a grand cross of the Wilkes-Electioneer blood, backed up by thoroughbred on his dam's side, and has every prospect of being a great horse both on the track and in the stud. Terms \$50 for the season. For further particulars in regard to the Woodland Stock Farm's stallions address, C. A. SPENCER, manager, Woodland, Cal.

FAIRHILLS 42617.

An Electioneer Stallion, and a Choice Collection of Trotting Bred Stock From a Model Farm.

Hopland Stock Farm, the property of The Foster Company, owned for nearly twenty years by Mr. A. W. Foster, until recently president of the California Northwestern Railway Company, is one of the best equipped farms for stock breeding in the State, having many paddocks, a three-quarter-mile track and commodious barns. The farm is now used almost exclusively for the breeding of Hungarian ponies, of which there are over one hundred on the place. Mr. Foster has taken great pains in their breeding and will not permit a pony to leave the place until thoroughly broken and safe for children's use, hence the demand is greater at times than the supply. Since his retirement from the railroad, Mr. Foster has not given the attention to horse raising he formerly did, and feels that without proper attention the raising of trotting horses is not satisfactory, hence it is his intention to devote the ranch exclusively to ponies. He therefore intends disposing of his entire stock of broodmares, colts and stallions, amongst the most notable being Fairhills 42617, a very handsome bay stallion, bred at Palo Alto and foaled March 9, 1903. He was sired by Mendocino 2:19½ (sire of twelve in 2:30, including Monte Carlo 2:07½, Mendolita 2:07½ and Idolita 2:09¼), out of Erac (sister to Mary Osborne 2:28½, dam of Dorothea A. 2:29¼) by Azmoor 2:20½ (sire of ten in 2:30, including Betonica 2:09¼, he also sired the dams of Rowellan 2:09¼ and Little Louise 2:17); second dam Elsie (dam of Palita 2:16, Rio Alto 2:16½, Novelist 2:27, Mary Osborne 2:28¼ and Salvini 2:30) by Gen. Benton; third dam Elaine 2:20 (dam of Iran Alto 2:12¼, Palatine 2:18, Anselma 2:29½ and Altoaine 2:29½); fourth dam Green Mountain Maid (dam of Electioneer, Prospero 2:20, Elista 2:20½ and seven others in 2:30), one of the most famous broodmares in the world, by Harry Clay 45. Mendocino 2:19½ was by Electioneer, out of Mano (also dam of Electant 2:19¼) by Piedmont 2:17¼; second dam Mamie (dam of Mamie W. 2:17¼, Hyperion 2:21¼, Memento 2:25¼, Mithra 2:14¼) by Hambletonian Jr. Azmoor 2:20½ was by Electioneer, out of Mamie C. (also dam of Don Monteith 2:29½, a sire, Electric King 2:24, a sire), by imported Hercules. Every broodmare in Fairhills' pedigree is in the great broodmare table. He was trained a little as a two-year-old and showed that it would not be a difficult thing for him to get a mark of 2:20 or better if he continued to improve, but owing to an attack of distemper his training was discontinued. He was sent to the farm and has been kept in a paddock since, being bred to a few mares. He is an exceptionally good individual and has a fine disposition. Among the standard mares also for sale is En Cimo, a blood-like bay mare, foaled March 31, 1903, sired by McKinney 2:11¼ (the champion sire of 2:10 trotters), out of Lucyneer 2:27 (dam of Lucrativa 2:13, Lucretia 2:14½ and Minnie B. 2:15½) by Electioneer 125; second dam Lucy 2:14, one of the greatest campaigners of her day. She is the dam of Chris Smith 2:14½ and Lucyneer 2:27. En Cimo is a trotter, and as she represents the Wilkes-Electioneer cross and both her dams have records and are also great broodmares, she should prove invaluable. En Cimo is thoroughly broken and has trotted quarters at a 2:20 gait.

Molly McNita is a brown mare, which Mr. Foster purchased from J. P. Dunn of Oakland. She is also by McKinney 2:11¼, out of Fontanita by Antevolo 2:19½, son of Electioneer and Columbine, dam of Anteeo 2:16½ (sire of the dam of Sonoma Girl 2:05¼, etc.), and three others in 2:30, by A. W. Richmond. Molly McNita's second dam was Fontana (dam of Flora Belle 2:25, San Diego, a sire, and Silas Skinner 2:17, a sire) by Almont 33; third dam Fanny Williams (dam of Bay Chieftain 2:28¼ and Beaumont, a sire) by Abdallah 15; fourth dam by Gaines' Denmark, etc. Molly McNita being by the great McKinney, out of such a royally bred mare as Fontanita, having had two colts since Mr. Foster purchased her, and they are perfect specimens—should be worth considerable to any breeder.

Still another standard mare is here, and these will be sold at a very reasonable figure. This one is a large, well formed brown mare, foaled in 1898. She is called Ada Stanley and is a half-sister to On Stanley 2:17¼, a sire, Rect 2:16½ and Rokeby 2:13¾. Her sire was McKinney 2:11¼, out of Lilly Stanley 2:17½, one of the greatest trotting mares as well as one of the grandest individuals that ever started in a race in California. She trotted the middle half in a race at Petaluma in 1:05, hitched to a high-wheel sulky. When placed in the breeding ranks she has proven her worth as a producer of early and extreme speed. Her sire was Whippleton 1883, son of Hambletonian Jr. and Lady Livingstone (dam of Lady Blanchard 2:26½, Western, a sire, and the dams of Charley C. 2:18½, Lily C. 2:20½ and Baden 2:24¼) by General Taylor, holder of the thirty-mile record, 1:47:59, etc. Hambletonian Jr. was by Hambletonian 725, out of Ashcat (dam of Ajax 2:29) by Hambletonian 10.

This is a rare opportunity for horsemen to buy McKinney mares. The few mares by this sire that have been placed in the broodmare ranks have produced Sally Pointer 2:06½, Bystander 2:07½, Irish 2:08½, Tidal Wave 2:09, Silver Coin 2:10, Jennie A. 2:13, Lou Derby 2:17¼, Cricket 2:18, Almaden 2:22½ and Ireny 2:27¼. As McKinney on the female side also comes from speed-producing matrons, these mares should be invaluable on any stock farm after their days on the track end.

There are several other good ones which will be placed at a very low figure for reasons stated above. One is Marinita, a chestnut mare, foaled 1903, by Monterey 2:09¼, dam Blanche T. by Hambletonian Wilkes; second dam Minnie B. 2:29½ by Billy Thornhill; third dam Laura R. 2:17½ by Electioneer. She has trotted quarters as a two-year-old in 40 seconds, and is a fine single driver.

Gammon Maid, foaled 1902, sired by Stamboulet 2:10, dam Magna Maid by Pilot Medium; second dam Thursday by Magna Charta; third dam Molly Miller by Black Prince. She should make a great broodmare.

Moonlight is a handsome bay mare, foaled June 15, 1904, sired by Searchlight 2:03¼, sire of Ray o'Light 2:13½, Aerolite 2:11½ (trial 2:05½), dam by Dynamo (son of Falrose 2:19 and a mare by Prompter); second dam Miss Mooney Filly (dam of Penrose 2:17¼) by Brigadier 2:21½ son of Happy Medium 400; third dam Miss Mooney by Elmo 2:27; fourth dam Grecian Bend by Signal; fifth dam by Lew Gastin (thoroughbred). Moonlight has never been driven.

Del Monte, chestnut gelding, foaled 1903, sired by Monterey 2:09¼, dam Lady Grosvenor by Grosvenor; second dam Lady Nutwood by Nutwood 2:18½, is broken single and very promising.

Pearlwood is a very useful driving horse. He was sired by Ross S. 2:21½ (son of Nutwood 2:18½), dam Pearl 2:32¼ by Blue Bull; second dam Lightfoot 2:32 by Flaxtail; third dam Fanny Fern by Irwin's Tuckahoe.

Millville, a beautiful bay filly by Mendocino 2:19½, out of Ada Stanley by McKinney 2:11¼; second dam Lily Stanley 2:17½ by Whippleton 1883, etc.

The Baron, a thoroughly broken bay gelding by Barondale 2:11¼, foaled in 1904, out of Magna Maid by Pilot Medium; second dam Thursday by Magna Charta, etc. The Baron is a fine driver.

Nora Quade by Educator (son of Director 2:17), dam Elsie by Silver Bow 2:16; second dam Addie S. (grandam of Meridian 2:12½), by Steinway 2:25½, etc.

Besides these there are colts and fillies by Searchlight 2:03¼, Kinney Lou 2:07¼, Mendocino 2:19½, Fairhills, out of mares by Educator, Pilot Medium, Direction (brother to Live Oak Hero 2:22½), Seymour Wilkes 2:08½, Rafael, etc. Nearly all of the three-year-olds are broken single, and seekers after first-class, standard bred trotters will find what they want at this place.

SIDNEY DILLON GUY WILKES DIRECTOR HAROLD MAMBRINO CHIEF BELLFOUNDER

DILLCARA

Sired by SIDNEY DILLON, No. 23157

1st dam—GUYCARA 2:18 3-4 (dam of Walter Dillon).....	by	GUY WILKES 2:15 1-
2nd dam—BISCARA (dam of S. 4 below 2:20).....	by	DIRECTOR 2:1
3rd dam—BICARA (dam of 6, including Pancoast).....	by	HAROLD (sire of Maud S.), No. 413
4th dam—BELLE (dam of Belmont, McCurdy's Hambletonian, etc.) by		MAMBRINO CHIEF, No. 11
5th dam—BELLE LUPE	by	BELLFOUNDER (Brown's)

The sire of Dilcara and the sires of his first four dams each produced world record holders. His own sire produced the present holder of the world's record for all ages. These sires (except Mambrino Chief) all trace in the male line to Hambletonian 10 through ancestors that have each produced extreme speed; each son in these male lines producing faster performers than his own sire produced. These male lines are, for sire, Sidney Dillon, Sidney, Santa Claus, Strathmore, Hambletonian 10

1st dam—Guy Wilkes, George Wilkes, Hambletonian 10
2nd dam—Director, Dictator, Hambletonian 10
3rd dam—Harold, Hambletonian 10
4th dam—Mambrino Chief.

Of these fourteen sires all but three (George Wilkes, Strathmore and Santa Claus) produced world-record holders, and these three also produced great performers.

DILLCARA'S breeding is unexcelled. For begetting world-record holders he should excel his sire or the sire of his 1st, 2nd, 3rd or 4th dams, each of whom enjoys fame in this respect. Individually he is as good as his pedigree. Stout and very handsome, he possesses a very high degree of natural speed at the trot, although he has never been in the hands of a trainer, his owner being averse to training or racing either stallions or broodmares to be used for breeding purposes. He can also pace very fast. Possessing unusual intelligence, he will go bare galloped, without break or shift, and without weights or hopples, at either the trot or the pace, whichever he understands is wanted. Mated with trotting mares he should produce even faster trotters than Lou Dillon 1:58½, his half sister on the sire's side, or mated with pacing mares he should produce pacers the superior of Custer 2:05¼, his half brother on the sire's side. Being naturally very showy and handsome, capable of being taught any gait, he should also make one of the very best sires for founding a breed of superior saddle horses.

Fee: \$35 for the Season.

Flosnut

Sired by NUTWOOD WILKES 2:16 1-2, son of GUY WILKES 2:15 1-4 and LIDA W. 2:18 1-4 by NUTWOOD 2:18 3-4.

1st dam—FLOSSIE by CORNELIUS 11335, son of Nutwood 2:18¾ and Jennie G. 2:26¼ by Echo 2:37¼.
2nd dam—Sister to RUTH RYAN (thoroughbred) by LODI, son of Imp. Yorkshire and Topaz by Imp. Glencoe.
3rd dam—EVA BULWER by BULWER, son of Grey Eagle and Julia Ann by Medoc.
4th dam—EMMA TAYLOR by Imp. GLENCOE.
5th dam—LANCESS, 4th dam of Aleyone (sire of McKinney), Palo Alto 2:08¼, etc., by LANCE, son of American Eclipse.

The blood lines of Flosnut represent two choice top trotting crosses (a Guy Wilkes-Nutwood and a Nutwood-Echo) laid upon a thoroughbred female line whose thoroughbred sires have produced the dams and grandams of trotters. This thoroughbred female line becomes that of Aleyone (sire of McKinney), Alcantara, Palo Alto, Allandorf, Alfonso and other great sires.

FLOSNUIT has a very high degree of natural trotting speed, nicely gaited. He has never been in the hands of a trainer. Doubtless he could be given a low record. He is very large, stout and handsome, of the Nutwood type of conformation. His breeding, size, conformation, natural speed and great strength, should make him one of the most successful sires for producing either extreme speed for the track or road or for producing large, stout, handsome horses suitable for family carriage or general purposes.

Fee: \$25 for the Season.

Address: SACRAMENTO VALLEY STOCK FARM,

SAVE-THE-HORSE

Registered Trade Mark
SPAVIN CURE

THESE TELL THE STORY OF ITS POWER.

WM. H. COOPER, D. D. S.,
11 Sand Beach Avenue.

Bad Axe, Mich., January 15, 1908.

Gentlemen: If you ever want a recommendation for your "SAVE-THE-HORSE," use me. I sent for a bottle sometime ago for a valuable mare which had a very bad bog spavin. She was so lame on the right hind leg that she could hardly walk, and then only with urging. After I had applied "SAVE-THE-HORSE" as directed twice, I hitched her to my runabout, and have been driving her every day and no one could ever tell she had any such trouble. Everyone here said I would never be able to use her again, as she was so bad, but now is as frisky as a colt. My neighbor is using "SAVE-THE-HORSE" on my recommendation, and it is doing the business. Yours respectfully,
W. H. COOPER, D. D. S.

Winnipauk, Conn., Jan. 2, 1908.

Gentlemen: I enclose order for dollars, for which send me half-dozen boxes of Condition Powder, 50-cent size. "SAVE-THE-HORSE" cured a ringbone on a horse owned by a local blacksmith, to whom I sold a bottle some time ago. As both the horse and his owner are well known, it has proven a great advertisement. Yours respectfully,

W. J. ANDERSON,

Care of Anderson Stock Farm.

"SAVE-THE-HORSE" permanently cures Bone and Bog Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness, without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

The French Coach Stallion

DUCASSE 3969.

The introduction of French Coach stallions in America has revolutionized the carriage horse industry and has done more to improve this type than any other. Wherever they have been mated with well proportioned, good boned, trotting mares, the produce always found a ready market. Even thoroughbred mares bred to these stallions have produced magnificent looking, stylish horses, and it is a strange fact that one of the principal factors in the improvement of the French Coach horse was the

streets and on the boulevards he is almost the only horse used for such purposes in that country. The French trotter is only another name for the French Coach horse. There is no country in the world where trotting races are more popular than in France. Since their introduction in America in 1870 this breed of horses has achieved great popularity from the Middle West to the Atlantic Coast. This breed is noted for its superior stamina and quality, and is eminently fitted for heavy harness work under varying conditions. As a typical French Coach horse this registered stallion Ducasse pos-

sesses their beauty as individuals and qualifications as worthy representatives of their breed have won for them the highest encomiums of praise from the most competent judges. Ducasse is a beautiful mahogany bay in color, stands 16 hands, 2 inches high, and weighs 1,300 pounds. He is not only high acting, but is a strong going, perfectly balanced trotter, having uniform knee and hock action. His gait is clean and open and just what one would look for in such a perfectly proportioned horse. He has a clean-cut, intelligent head, beautiful eyes, active ears surmounted on a crested neck, which is set

DUCASSE 3969—A High Class French Coach Stallion.

thoroughbreds which were crossed with the lighter class of French mares. The descendants of this infusion of blood have long been known in France by the following names: Demi-Sang, Anglo-Normand, Carrosier or Trotteur. This breed of horses known by these several names in France is described in America as the French Coach horse, and the French Government gives this breed more attention than all of the other breeds of horses combined. More French Coach stallions are bought by the Government each year for use in the National studs than the sum of all the other breeds—Percherons, Bonlanaise, Nivernaise, etc.

A study of the blood lines of the French Coach horse will show, especially in the earlier days of the last century, the influence of many foreign horses. However, in recent years foreign blood has been kept out and the breed has been systematically improved by the careful selection of breeding animals. Nearly 300 French Coach stallions are purchased by the French Government every year.

In France the French Coacher is used for three purposes: As an army horse in the cavalry, he meets with prime favor; as a heavy harness horse, driven on the beautiful roads in France, on the

sesses style and beauty as well as magnificent high action, in fact, he is about the most perfect and most ideal horse ever brought to California. His equal cannot be found in any other breed. In color French Coach horses are usually bay or brown, frequently black or chestnut; carriage pairs are quite readily mated. For road work, city work or farm work their docility and intelligence makes them much sought after.

This royally bred horse Ducasse 3969 was foaled April 25, 1903, and is registered in the French Coach Horse Stud Book of America, October 12, 1906, Conde sur Seulle Department of Calvado, France. Imported to America August 27, 1906. Ducasse was sired by the great Pollion by Colporteur, out of Belle-Idee by Cafe. Colporteur was by Normand, out of Zaine by Conquerant. Normand was by Divus, out of a daughter of Kapirat. Divus by Quebec, out of a daughter of Voltaire. Ganymede by Xerxes, out of La Louve by Chasseur. Xerxes by Young Rattler, out of a daughter of Young High-flyer. Young Rattler by Rattler, out of the Snap mare by Snap, and running back for twenty generations further.

Ducasse's sire and grandsires have won innumerable prizes at the horse shows of Europe, and

on to muscular, deep sloping shoulders. He has a good chest, is deep in girth and remarkably full and strong over the loins. He is close ribbed, full in the flank and perfectly muscled. His legs and feet are strong and perfect. His disposition cannot be excelled.

The above illustration was taken from his photograph, but it does not do him justice. One will have to see this horse to appreciate his many qualities and excellent points.

He will make the season of 1908 for the low fee of \$50, with usual return privilege. Only a limited number of approved mares will be taken. The best care taken of mares, but no responsibility assumed for accidents or escapes. Pasturage, \$5 per month.

For further particulars address

A. M. EASTON,

Burlingame, San Mateo County,

California.

RED McK. 43766, A ROYAL CROSS.

There were very few daughters of Red Wilkes bred to the great McKinney 2:11½ while this horse was in California, because there were very few, if any, on this Coast, but Red McK's dam, Bonnie Red, was here and she was one of the handsomest as well as purest gaited ever driven. She is a producer, moving to her credit Bonnie Derby, the dam of Bonaka (3) 2:23¼. Red Wilkes, her sire, was one of the greatest sons of Geo. Wilkes 2:22, having to his credit 177 in the 2:30 list, including Ralph Wilkes 2:06¾, Ithuril 2:09¾ and Blanche Louise 2:10. As a broodmare sire he stands pre-eminent among all other representatives of the Wilkes family. His daughters have produced Walnut Hall 2:08¾, Kingmond 2:09, Coleridge 2:05¼, Casonda 2:05¾, Sally Toler 2:06¾, Tommy H. 2:07½, Dr. Madara 2:08 and Bert Oliver 2:08¾ besides 200 others. Red McK's second dam, Bonnie Bell, is one of Almont's best speed-producing daughters, having Rebel Medium 2:15¼, Happy Promise 2:16¾, Poco Tiempo 2:23½ and Bonnie Dean 2:24¼ to her credit. Almont's greatness as a broodmare sire is acknowledged by all horsemen. The third dam, Alice Drake, was the dam of Norman Medium 2:30, Australia 2:28½ and Alice Addison 2:28½, and she was by Norman 25, sire of Lulu 2:15, May Queen 2:20, etc. The fourth dam was Viley by Pilot Jr., sire of eight in 2:30 and the dams of Maud S. 2:08¾, Jay Eye See 2:10, Pilot Medium, etc. With such a mare as Bonnie Red as the dam of McKinney 2:11½, the greatest sire of

early and extreme speed for his age that ever appeared in the trotting horse world, as his sire, can any one doubt that Red McK. will not make one of the best trotters as well as the greatest of sires? He has a double cross of Wilkes blood through the greatest progenitors of speed accredited to Geo. Wilkes 2:22, and, aside from their rich breeding, Red McK. is one of the finest looking, best-limbed, purest-gaited and most intelligent stallions in California. He is an even gaited trotter and would have been given a low record had a

race meeting been held in Los Angeles last Fall. He has trotted miles in 2:23, an eighth in 16½ seconds,—a 2:12 gait.

Red McK. is a rich mahogany bay, stands 15¾ hands, weighs 1160 pounds, is a grand individual, having size, substance, style and speed. He will stand for the season of 1908 for \$30 at my stables, 752 Sante Street, Los Angeles, where a number of his foals can be seen. All of them, without exception, resemble him, and prove, without a shadow of a doubt, that he is destined to be one of the

best producing sons of his sire. He has but five yearlings to his credit, only one having been handled, and that is owned by J. J. Rupp, of Los Angeles; his dam being Birdie Clay, by Bay Bird; second dam Rosie Clay, by Harry Clay. When driven but thirty-one times (at only eighteen months old) he trotted an eighth in 21½ seconds, and has since trotted in 20 seconds. With such a showing can there be a doubt in the minds of owners of broodmares that they will get colts equally as good as these five trotting youngsters; colts that know no other gait and will always prove salable, for they will have as much style as carriage horses and as much speed as any of the descendants of either the great McKinney or Red Wilkes? The demand for good, well-bred horses is increasing and the recent Old Glory sale in New York City demonstrated more than all the horse talk that can be started that buyers are ready to pay better prices than ever for first-class trotters. Better roads, more speedways and driveways and more race meetings with better purses and more futurity stakes than ever; all these have their effect upon the market. Owners of broodmares who are desirous of breeding to get the very highest and best type of the stylish trotting horse that has speed should not fail to see Red McK. If they do, it is a foregone conclusion they will send their mares to him at once. For further particulars address,

W. R. MURPHY,

752 Santee St., Los Angeles, Cal.

RAY O' LIGHT 46270, Record, 2, 2:13½

Winner Two-Year-Old Pacing Division Pacific Breeders Futurity Stakes of 1907.

Searchlight 2:03¼ was one of the greatest campaigners ever bred and the record of his winning campaigns is almost marvelous. From his breeding (strong in trotting lines) horsemen could see he inherited the greatest of staying powers, even though but two of his ancestors, Alcyone 2:27 and his sire, Geo. Wilkes 2:22, had records; nevertheless everyone appears as a sire of speed and all his dams on the paternal and maternal sides were great broodmares up to the fourth generation; and what broodmares they were! Nora Mapes, Alma Mater, Noonday, Midnight, Fuga, Betsy Trotwood, Hattie Mapes, Fanny Mapes and Blandina. Searchlight 2:03¼ was returned to California, the place where he made his first appearance as a fast pacer, and made two seasons at Pleasanton. From the list of mares sent to his court it seems that he so strongly transmitted all his good qualities that owners of his progeny are loath to place a price on any of them. Carrie B 2:18 was one of these mares, and when she dropped the foal known to all the world as Ray o' Light 2:13½, the fastest pacing colt of 1907, her owner felt that he had a champion. Carrie B. is a beautiful mare whose record 2:18 was no mark of her speed. She was sired by Alex. Button 2:26½ (sire of Yolo Maid 2:12, Tom Ryder 2:13¾, Margaret Worth 2:15, Mattie B. 2:15½, etc., and the dam of Tags 2:11¼), he by Alexander 490 (sire of six, three sires and two speed-producing daughters), out of Lady Button by Napa Rattler, etc. The

second dam of Ray o' Light 2:13½ was Carrie Malone, sister to Klatawah (3) 2:05½—holder of world's record—Charles Derby 2:20, etc. She was the dam of Carrie B. 2:18, Cassiar 2:22, and Moorland Lass (dam

2:08½, Ben F. 2:07¾, etc.), out of Katy G. (dam of Klatawah (3) 2:05½, Welladay 2:14, Katrinka G. 2:14¾, Chas. Derby 2:20, sire of 35 in 2:30, Covey 2:25, Sunlight 2:25, Steineer 2:29¼, Saraway (sire of Winfield

RAY O' LIGHT 46270 (2) 2:13½.

of Pinkey H. 2:17½). Her sire was Steinway 2:25¾ (sire of Thornway 2:05¾, Klatawah 2:05½, Bonnie Steinway 2:06¾, W. Wood 2:07, etc., and the dams of Stanley Dillon 2:07¾, Tuna, 4,

Stratton 2:05¼, etc., and Carrie Malone, grandam of Ray o' Light, 2, 2:13½ and Pinkey H. 2:17½) by Electioneer 125. The fourth dam of Ray o' Light 2:13½ was Fanny Malone (grandam of Maud C. 2:15) by

Niagara, and the fifth dam was Fanny Wickham, a thoroughbred who was a noted twenty-mile trotter by Herald; the sixth dam was by imported Trustee; the seventh dam by imported Sir Charles; eighth dam (the dam of the unbeaten race horse Boston) by Ball's Florizel; ninth dam by imported Alderman, and so on to the seventeenth dam by Brimmer. To the student of bloodlines as well as all interested horsemen, Ray o' Light's pedigree, like his individuality, needs no "boosting." It represents the leading fashionable families in America and Europe, and it is a combination of speed-producing strains that will breed on. In color, Ray o' Light (2) is a beautiful brown with only a few white hairs on inside of near hind coronet. He stands 15.3 hands, and when he has his age will weigh 1,150 pounds at least. He has a very nice disposition in or out of harness. On the roads he is afraid of nothing, and is as game as a bulldog and proved by his races in California last year that he will get a mark lower than his illustrious sire. He traces on his dam's side, just as he does on the side of his sire, to sires and producers of champions, and, as a result, he is a champion. I will stand him at the Salinas race track, Salinas, Cal., where Mr. C. Whitehead will prepare him for his three-year-old engagements. I will personally attend to and care for all the mares that may be bred to him. I will limit his breeding to ten approved mares at \$40 for the season, with usual return privilege. I will have pasturage at reasonable rates, but will assume no responsibilities for accidents or escapes. For further particulars address

E. S. TRAIN, Owner,
Salinas, Cal.

General J. B. Frisbie 41637 and Constructor 39569.

Many years ago, when I first came to Vallejo, I heard a great deal about a fast trotting mare called Jenny Lind, the dam of Prince Allen 2:27. She belonged to P. W. Dillon and died in his possession, leaving a filly (sister to Prince Allen 2:27) which Mr. Dillon sold to Chas. Ingleman of Benicia, from whom I bought her. I named her Fanny Rose. She could trot miles better than 2:25, but never got a mark better than 2:50 which she got in a buggy horse race. Fanny Rose never had a foal by any horse which, when it got old enough, could not trot in 2:30 or better. No one in Solano county ever had a gamer or more consistent trotter than Fanny Rose and it was always a matter of pride with me to take any of my friends out behind her. I owned McDonald Chief 3583 and bred him to Fanny Rose, and the result was Columbus S. 2:17, brother to Daisy S., dam of Tom Smith 2:13½, etc.). This horse McDonald Chief was by Clark Chief (sire of Kentucky Prince, etc.), out of a mare by the thoroughbred Berthune, second dam by McDonald's Copperbottom. I then bred her to Mambrino Chief Jr. 11622 (a son of McDonald Chief 3583), out of Venus by Mambrino Patchen 58, second dam by Silver Heels. His pedigree runs back for six generations to the strongest running families. The union of Mambrino Chief Jr. and Fanny Rose produced Geo. Washington 2:16½, sire of Stella 2:15½, Campaigner 2:26¼ and Princess W. 2:29¼. Daisy S. (according to my belief, as well as that of all horsemen who had seen her,) was a model of symmetry, and, with her stout breeding and impressive personality, could not fail to be a great broodmare. I bred her to three stallions and got Little Mac 2:27½, Sweet Rosie 2:28¼ and Gen. Vallejo 2:20¼, but when I saw McKinney 2:11¼ and his progeny I determined to breed her to him. The produce by this horse and Daisy S. were of a

different type and much faster: viz., Tom Smith 2:13½ (sire of Katalina (2) 2:22½), and Vallejo Girl 2:16½. After McKinney left she was bred to Nutwood Wilkes 2:16½ and produced Professor Heald 2:23. So this mare has to her credit six in the 2:30 list, and at my place in Vallejo I have two

owned by one man than these, and both are jet black. The first named is as perfectly proportioned, as any trotting bred stallion on this Coast. He stands 15.2 hands and weighs 1,100 pounds. He has a smooth, frictionless way of going, and, with very little handling, has shown that he is

him coming two years old the best I ever raised.

Constructor 39569 is a full brother to Gen. J. B. Frisbie 41637, Tom Smith 2:13½ and Vallejo Girl 2:16½. He is a horse of remarkably good disposition. He stands 15.2 hands over the withers and 15.3½ hands behind. His weight is 1,200 pounds. Like his illustrious brothers and sister, he has perfect trotting action, moves along smoothly and with apparently little effort. In every respect he is a high-class individual, one that will sire horses which will always find a ready sale. The McKinneys as a family will always be fashionable because every representative by this sire from a good mare seems to be perfectly adapted for any and all purposes for which light harness horses are wanted. McKinney's fee has been \$500, and it is not an idle boast to claim that he never was bred to a better individual or one better bred to cross with him than Daisy S., the dam of these splendid stallions. I have placed the service fee for this season for Gen. J. B. Frisbie and Constructor at \$25 each, a figure well within the reach of every owner of a good mare; and another thing, as an outcross for mares by sons of Electioneer, Steinway, The Moor, Director and Nutwood These will be a perfect outcross and the union of any good mares with either Gen. J. B. Frisbie or Constructor will produce colts or fillies having speed, gameness, soundness, size, intelligence and good solid colors. It will pay horsemen to visit Vallejo and look these stallions over before booking their mares. McKinney, their sire, is the highest priced and highest class stallion in America to-day. Owners of broodmares should not overlook this fact nor the other great consideration that these stallions are out of one of the greatest producers of speed bred to him while he was in California. I will be pleased to communicate with owners of good mares and furnish any particulars that may be desired.

GENERAL J. B. FRISBIE 41637

others from her by McKinney 2:11¼ that are full brothers to her best and fastest campaigners. One is called Gen. J. B. Frisbie 41637 and the other Constructor 39569. A man might travel from one side of this State to the other and not see two finer individuals

endowed with extreme speed. Gen. J. B. Frisbie is destined to be one of the best speed producing sons of McKinney 2:11¼, for he is out of the greatest speed producing mare bred to this great sire of early and extreme speed in California. I have a colt by

For further particulars address, THOS. SMITH, 1021 Georgia Street, Vallejo, Cal.

The Sire of Sonoma Girl 2:05¼, LARGEST MONEY WINNER OF 1907.

To sire one great trotter like Sonoma Girl 2:05¼, that sold for \$26,000, started eleven times on the Grand Circuit, was six times first, second once, third twice and outside of the money only twice and won \$23,650, the largest amount won by a trotter last year on the trotting turf, and being also the champion green trotter (her average for the nineteen heats is faster than that of any mare that ever trotted the first year out); this should be glory enough for a sire, but Lynwood W. 2:20½ sired others. Charley Belden 2:08½ was the champion green trotting gelding for 1906, winning \$11,140. He was Lynwood W.'s first foal. R. W. P. 2:13¼ was the winner of the fastest heat by a green trotter on the Pacific Coast that year. He also sired Sonoma Star 2:29½. Lynwood W. was the largest money winning sire on the Great Western Circuit in 1906, and besides this, Lynwood W. was a great trotter, in fact, Millard Sanders, who gave him his mark of 2:20½, always claimed he was the greatest two-year-old he had ever driven, "a perfect trotting machine." His gait was perfect, needing no toe weights, and but six-ounce shoes all around. Like many great prospects, something had to occur to keep him from being a champion (for he was of championship class), he strained the pastern of his front foot and a little blister was applied to both pasterns, but the colt got loose in the box stall through being improperly tied by his caretaker, and with his teeth tore the skin off, the place being treated, and despite the best skill of the veterinarians, it was found impossible to cure him well enough to get him to the races. He was heavily engaged in the big stakes in the Eastern Circuit, and the loss of this colt's earnings was deeply deplored by William Corbitt, his owner, who, to his dying day, declared that Lynwood W. was the best colt he ever bred. Chas. Durfee, knowing

what a wonderful trotter he was, purchased him at the closing out sale of the San Mateo Stock Farm, and even though he owned McKinney 2:11¼, he believed Lynwood W. would, on the representations of how this horse became crippled, be well patronized, but even good horsemen and despite persuasive eloquence,

hitched to a vehicle. For there are many among them that show as much pure trotting action as Sonoma Girl 2:05¼ did at same age. Lynwood W. 2:20½, besides being the sire of this great mare and Charley Belden 2:08½, has to his credit R. W. P. 2:13¼, Dumont S. 2:20, Clipper W. 2:24½, Sonoma Queen 2:25, Dennis

870; second dam said to be by Williamson's Belmont. Lynwood W.'s grandam was Flora Pierson, a mare that trotted in 2:33 in double harness and had a trial of 2:26. She was by Gen. McClellan 144 (sire of Dan Voorhees 2:23¼, St. Helena 2:27½ and the dams of nine, including Beaury Mc 2:14½, Dollican 2:15¼, Bonner N. B. 2:17, Annie Rooney 2:17, Paloma Prince 2:07 and Butcher Boy 2:17¼ and the dam of Mack Mack 2:08) the great grandam was by Langford, a son of Williamson's Belmont. Langford sired the dam of Lillian Wilkes 2:17¼, the dam of Guy Axworthy 2:08¼, the champion four-year-old trotting stallion of 1906. She was by Guy Wilkes 2:15¼ and she was also the dam of Lilly Stranger 2:15¼ and Guy Thistle 2:18¼, sire of Lotta 2:08¼, winner of five out of nine races last year, and was sold for \$7,500. With a double cross of Williamson's Belmont as a foundation in his pedigree, upon which is based the blood of Geo. Wilkes 2:22, Mambrino Patchen, American Star, two crosses of The Moor 870 and Gen. McClellan, one of the handsomest of the Morgan family, Lynwood W. is sure to sire horses that will find a ready sale. He will make the season of 1908 at the "Round Stable," formerly the property of the late I. de Turk, on Donohue street, fronting the minery, Santa Rosa, at a fee of \$50. This stable is noted for its peculiarly appropriate design, and is one of the best appointed for the keeping of horses in California. It is near the entrance of a three-acre field. In this field are several well fenced paddocks. There are also foaling stalls and every convenience for the comfort of mares. The best of care taken of all matrons sent to this splendid stallion, and I feel confident that on one is better prepared to care for mares with foals at foot than I am. For further particulars address H. A. CARLTON, Box 213, Santa Rosa, Cal.

LYNWOOD W. 2:20½.

broodmare owners declined to send their mares to the horse, so he sold him. Mr. Durfee says that notwithstanding the old scars, Lynwood W. trotted quarters for him in 30 seconds. The horse was sold and taken to Santa Rosa. Even at this "home of the trotter" horsemen felt diffident about breeding. A few had more faith in what they had heard and today they are looking with pride upon the finest lot of trotters that were ever turned loose in a paddock or

2:27½ and Sonoma Maid 2:29¼. Lynwood W. 2:20½ was sired by Guy Wilkes 2:15¼ (sire of Fred Kohl 2:07¾, Hulda 2:08½, Lesa Wilkes 2:09, Seymour Wilkes 2:08½ and eighty-five others in 2:30; 40 sires of 2:20, 39 dams of 55 in 2:30 list). His dam was Lindale, (also the dam of Rutger Wilkes 2:27½, full brother to Margaret 2:28, dam of Regal Wilkes 2:11¼,) by Sultan Jr. 12771 (son of Sultan 24 and May Sproule, dam of Deborah 2:21¼, a sire, by The Moor

Bonnie Searchlight and Bonny McKinney.

BONNIE SEARCHLIGHT 43899.

When the late Thos. Keating piloted the well-formed, smooth-gaited pacing stallion Searchlight 2:03½ through the California Circuit, the gameness of this son of Darknight was a favorite topic among horsemen. After being taken East on the Grand Circuit he fulfilled the prophecies and verified the predictions of everyone that he would make all the horses he met do their level best to beat him to the wire. He met the fastest pacers in the United States at that time and defeated all of them. He was then turned out and nothing was done with him for years. Finally he was returned to California to make a few seasons and was bred to about sixty mares, and, since his progeny has been handled every owner of a Searchlight is envied by his neighbors. If the great champion Searchlight never sired any others than the two-year-old Ray O' Light 2:13½, champion of 1907, and the smooth going three-year-old Aerolite (trial 2:05½), his reputation was made; but he has left others that have a license to be as great as these "marvels of speed." One of these is the beautiful brown colt Bonnie Searchlight 43899. His dam is Rita B., by Boodle Jr., he by Boodle 2:12½, one of the best bred trotting stallions and sires ever brought to California, tracing as he did to Goldsmith 2:14, and Jay Gould 2:20½, both champions in their day, while Boodle Jr.'s dam was by the great Electioneer out of Gabilan Maid (sister to Lady Ellen, dam of six trotters, three sires of thirteen and two dams of five

in 2:30), by Carr's Mambrino (sire of the dam of Sweet Marie 2:02, etc.); second dam Ida May Jr., by Owen Dale, third dam Ida May (grandam of Maggie E. 2:19¼) by Williamson's Belmont, etc. Bonnie Searchlight's second dam was Gabilan Girl by Gabilan (he by Ansel 2:20, son of Electioneer, out of Gabilan Maid by Carr's Mambrino); his third dam was Clara by Elmo 891 (sire of the dams of Free Coinage 2:11¼, Maud 2:14¼, etc.); the fourth dam was Lady Comstock, thoroughbred, by Norfolk, out of May Butte by Williamson's Belmont. Bonnie Searchlight's blood-lines are of the richest—Alcyone 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). So well was Bonnie Searchlight's dam considered by Mr. A. Robertson that he purchased her for a long price to take to Australia last month. Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year a fter the stallion season ends.

BONNY MCKINNEY 41383.

BONNY MCKINNEY 41,383.

The fame of McKinney 2:11¼ as a racehorse and a sire is not bounded by the seacoast line of the United States, but it extends to the farthestmost points of the world. His career in California is known to all who have taken an interest in the light harness horse industry, and, although he has for several years occupied a leading place on one of the best stock farms in the East, his sons which he left in California are adding lustre to his name and laurels of victory to his crown of glory. I have at the Alameda race track one of McKinney's handsomest and best bred trotters called Bonny McKinney. In color he is black as ebony, stands 15.3 hands, and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. In fact, as the saying is, he "fills the eye," a model of perfection. With a disposition of the kindest, his trotting action is perfect, and it is my intention to have him trained and raced this year. As a three-year-old he was bred to seven mares and the seven coal black trotters that resulted are McKinney's in action and Bonny McKinney's in color, style and conformation.

McKinney 2:11¼, his sire, leads all sires of his age and so do his sons. Bonny McKinney should prove no exception to this rule for he comes from Martha Frasier, one of the handsomest mares bred in California, and she is also the dam of the beautiful trotter Melody (trial 2:15). Martha Frasier

was by Rustic 2:30 (sire of Amelia 2:22½, Night-time 2:29¼, etc.), he by Hambletonian 725 (sire of the dams of Azote 2:04¼, Georgena 2:07½, etc.) out of Lady Suffolk (dam of Norman 2:28¾ and Rustic 2:30), by Henry Belmont, a thoroughbred son of Williamson's Belmont. Bonny McKinney's second dam was a fast trotter called Emma; she was by Whippleton (sire of seven in 2:30 and the dams of Rokeby 2:13¾, Clay S. 2:13¾, Lottie 2:15, etc., and the grandams of Athasham 2:09¼ and Nogi 2:17½, he by Hambletonian Jr., out of Lady Livingstone (a great broodmare) by the twenty-mile champion trotter Gen. Taylor. The third dam of Bonny McKinney was Gladys by Gladiator (sire of the dams of Almont Patchen 2:15, Lenmar 2:16¼, etc.), son of Geo. M. Patchen Jr. 2:27; and the fourth dam was by John Nelson (sire of the dams of Albert W. 2:20, Sister V. 2:18½, Valensin 2:23, Maud Y. 2:20½, etc.) Tracing on the maternal side, as Bonny McKinney does, can anyone doubt that his progeny will inherit stout, do-or-die game qualities? There is not a "soft" or "weak" spot in his pedigree.

They will make the season at the Alameda Race Track. Fee will be returned if mare does not prove in foal. For further particulars address

H. BUSING,
Race Track, Alameda, Cal.

Nearest 35562 and Nearest McKinney 40698.

The fame of Nutwood Wilkes 2:16½ as a sire is so firmly established that his name will live as long as trotting horses are known. Bred to mares of almost every breeding, he has sired horses of phenomenal speed and gameness. Nearest 2:22½ and his brother John A. McKerron 2:04½, the second fastest trotting stallion in the world, were from one of the best and stoutest bred mares ever mated with him. Nearest 2:22½, I consider, is destined to be one of the greatest of sires. He was, as stated above,

NEAREST 2:22½.

Direct 2:05½), and the third dam was the Tiffany Mare (dam of Gibraltar 2:22¼, a sire, and Coligny, a sire), by Owendale, by Williamson's Belmont. This is what can be truthfully called stout breeding and the kind that breeds on. Nearest 2:22½ is the sire of Alone (4) 2:09¼ (trial 2:06¼, holds ½ mile record :59½), High Fly (2) 2:24¼ (trial 2:17¼), Just It (3) 2:19½, True Heart (trial 2:20¼) and Our Lady (trial 2:20¼). He is very symmetrically built, bay in color, stands 15¼ hands and weighs 1,200 pounds. He is a horse of grand finish, strong shoulders, stout back, well muscled loins and stifles and the best of feet and legs. His disposition is perfect. I will stand him during the season of 1908 at my stable, 1042 Alameda avenue, near Race street, San Jose, Cal. The terms are \$40 for the season, with usual return privileges. Owners of good mares should not overlook Nearest 2:22½ if they are seeking to breed horses that will have breeding, good looks, substance, quality and speed. His progeny is recognized for these qualities, combined with the best of dispositions.

The other stallion at my place is called Nearest McKinney 40698 and his sire is McKinney 2:11¼ (sire of Sweet Marie 2:02, Coney 2:02, China Maid 2:05½, Zolock 2:05¼ and 13 others in the 2:10 list, 44 in 2:15 and 62 in 2:20), son of Alcyone 2:27 and Rosa Sprague (dam also of the dam of Ferenzo 2:05½ etc.). The dam of Nearest McKinney is a young mare called Maud Jay C., and she was by Nearest 2:22½ out of Fanny Menlo (dam of Claudius 2:13½, one of the gamest and best four-year-olds that ever faced a starter in California), by Menlo 2:21½ (son of Nutwood 2:18¾, sire of 180 in the 2:30 list, and Mamie Hall by imported Hercules; second dam by Williamson's Belmont. Nearest McKinney's second dam was Nelly Anteeo by Anteeo 2:16½, out of Fanny Patchen (dam of California Nutwood (sire of Maud C. 2:15, etc.) by George M. Patchen Jr. 2:27. Nutwood Wilkes 2:16½, the sire of Nearest 2:22½, is also the sire of John A. McKerron 2:04½, Copa de Oro 2:07¼, Tidal Wave 2:09 and Miss Idaho 2:09¼ and he was by Guy Wilkes 2:15¼ out of Lida W. 2:18¼ by Nutwood 2:18¾. It can be seen that Nearest McKinney traces twice to Nutwood 2:18¾, greatest brood mare sire in the world, George Wilkes 2:22 (twice), Electioneer, Director 2:17, Echo, Mambrino Patchen (twice), Anteeo 2:16½, Gov. Sprague 2:20½, Geo. M. Patchen Jr. and three times to Wil-

lamson's Belmont. That this beautiful dark brown son of McKinney 2:11¼ will be a sire of fast horses is beyond question. He stands 16 hands and weighs about 1,200 pounds. Looking at him, one cannot help being favorably impressed, for he has every qualification. His action is perfect and disposition is of the best. His breeding is of the very strongest

NEAREST MCKINNEY 40698.

McKerron 2:04½ (sire of Jack McKerron 2:23¼, Harry McKerron 2:24¼, Irene Mac 2:29¼, and Carrie Mac 2:29½), John A. McKerron 2:04½ has been mated with the choicest bred mares in America, among them being Lou Dillon 1:58½. It proves how much this strain is sought after by the most progressive breeders. Ingar was the greatest speed-producing daughter of the mighty Director 2:17; the second dam, Annie Titus (dam of Annie C. 2:23¼), was by Echo (sire of the dam of

and, as an individual, he is just what we should expect from such a rich blood inheritance. As early as last June he trotted a full mile in 2:15 to a cart over a ½ mile track, trotting the last ½ in 1:04, and could step eighths in 15 seconds, and was said by a number of horsemen to be another "Sweet Marie" and that he would become, in their opinion, as valuable as his great sire. You can't beat the best. I will stand him at my place for \$50 for the season of 1908 and will be pleased to show anyone interested in fine horses this magnificent son of McKinney 2:11¼. For further particulars apply to or address

T. H. BARSTOW,
Phone, Black 2841. San Jose, Cal.

Athadon 2:27, Athablo 2:24 1-2 and Stanford McKinney 45173.

One of the most progressive and best posted horsemen in California is G. L. Warlow of Fresno. Ever since he brought Athalie to the "Raisin Belt" and showed by the performances of her Matadon yearling champion stallion, Athadon 2:27, he has been foremost in aiding and elevating the trotting horse industry. Athalie also produced Athanio 2:10 (champion of Austria), Ira 2:10½, Athnio 2:14¾, Athavis 2:18, Athnix 2:20, Athablo 2:24½, Athadon 2:27. No stallion that ever stood for public service in Central California stands higher in the estimation of farmers and horse breeders than Athadon. He gets the finest roadsters, the most cheerful drivers, the strongest limbed and best mannered horses that one could wish to own, and all, without exception, are speedy and have a smooth, frictionless way of going. As a sire of speed he has to his credit The Donna 2:07¾, Athasham 2:09¼, Sue 2:12, Listerine 2:13½, Daken D. 2:16, Casey 2:17½, Athby 2:21½, Athamax 2:22½, Donna R. 2:24, Donnatrine 2:26 and Belladonna 2:28½. Athadon 2:27 was sired by Matadon 9392 (son of Onward 2:25½ and Fanny Alley by Wm. Rysdyk 527, out of Lucille by Hurst's Bayard, son of Bayard 53 and Vic, dam of Mattie Graham 2:21), out of Athalie (dam of 7) by Harkaway 2:28½ (son of Strathmore and Wait-a-Bit 2:31, dam of 3 in 2:30, by Basil Duke), second dam Mag by Alcalde 103; third dam by Cy Kinney's Vandal (son of Vandal thoroughbred); fourth dam by Bald Hornet.

Athablo 2:24½ was by that wonderful sire of early and extreme speed, Diablo 2:09¼ (sire of Sir Albert S. 2:03¾, Sir John S. 2:04¾, Clipper 2:06½, Diablito 2:08½, Tom Carneal 2:08½, Daedalion 2:08½, John R.

Conway 2:09, etc.) son of Chas. Derby 2:20 (sire of Don Derby 2:04½, Capt. Derby 2:06½, Much Better 2:07¼, Derbertha 2:07¾, Derby Princess 2:08½, Diablo 2:09¼, Rajah 2:10½, etc.) and Bertha (dam of four in 2:10, four in 2:18 and a yearling in 2:26½),

of training. He carries the blood of the following speed producing broodmares in his veins: Athalie, Bertha, Katy G., Green Mountain Maid, Abess, Alma Mater, Barcena, Blandina, Burch Mare and Wait-a-Bit, and the blending of the blood of such sires

color, stands 15¾ hands and weighs 1,100 pounds and both trots and paces. His service fee, as well as Athadon's, will be \$25 for the season.

Stanford McKinney 45173 is as handsome a five-year-old as there is in California, and I believe will be a credit to his superb breeding, sired by McKinney 2:11¼ (the highest classed, the highest priced and the greatest speed producing sire living), out of Palavena (formerly Avena) that got a two-year-old race record of 2:19½ and produced Mendovena 2:19¾. Palavena was by the trotting champion Palo Alto 2:08¾ (sire of Iran Alto 2:12¾, Pasonte 2:13, Palita 2:16, Rio Alto 2:16½, etc.), second dam Astoria (dam of Palavena (2) 2:19½, granddam of Mendovena 2:19¾) by Gen. Benton 1755 (sire of the dams of Lena N. 2:05¼, Sunol 2:08¾, Serpol 2:10, etc.); the third dam of Stanford McKinney was Asthore by Kentucky Prince (sire of the dams of Swift 2:07, Mainland 2:09¼, Georgiana 2:09½, Tom Keene (p.) 2:04¼, Claymos (p.) 2:07¾, Kavalli 2:07¾, etc.); fourth dam Sheba by Hambletonian 10; fifth dam Queen (trial 2:26 by Hambletonian 2. His pedigree bristles with the names of the greatest and gamest trotter, the most productive of broodmares and the most fashionable sires. He is bred to sire horses that will have every qualification: size, color, style, finish, conformation, substance, gameness, the best of feet and legs, and speed. He has a yearling trotter now that trotted quarters in 38 seconds and a yearling that paced a quarter in 36 seconds. Stanford McKinney represents the great Wilkes-Electioneer cross sustained on the female line by the greatest of broodmares and on the male line by the most fashionable and successful sires. He and Athadon 2:27 and Athablo 2:24½ will make the season of 1908 at Geo. L. Warlow's place, one mile north of Fresno, between Blackstone and Fresno avenues. Terms \$50 for the season, with usual return privileges.

ATHADON 2:27.

second dam Barcena (dam of Bayard Wilkes 2:11½ and three sires and two dams of 2:30 performers) by Bayard, etc. Athablo's dam was Athalie (dam of Athadon (1) 2:27 and six others in 2:30), etc. Athablo 2:24½ was a remarkably fast three-year-old, he was known to pace a mile in 2:14½ and then repeat it in 2:14. He could pace quarters at a two-minute gait, but met with an accident before he obtained a fast record and had to be taken out

as Geo. Wilkes, Electioneer, Steinway, Strathmore, Pilot Jr., Alcalde and Bayard. Surely this is enough to guarantee that he will produce speed. Only two of his colts have been trained. One, Dan S., got a mark of 2:11½; the other, Nogi (3) 2:17½, trial 2:11½, was the champion winner of all the California stakes for three-year-olds in 1907. His colts are grand looking and remarkably level headed and fast. He is a splendid bay in

HIGHLAND C. 43835. RACE RECORD 2:19¾. FOUR-YEAR-OLD TRIAL 2:12.

When Monroe Salisbury leased the great three-year-old mare Expressive to trot her on the Grand Circuit, I remember with what enthusiasm the horsemen I met spoke of her remarkable winning campaign against aged competitors, and how a delegation, headed by the late Frank W. Covey, journeyed to Pleasanton to welcome her home, for she had earned a record of 2:12¾. I never thought at the time that I would have a horse sired by her half-brother, but in Highland C. 2:19¾ I believe I have one that will sire many of the Expressive type. He was sired by Expresso 29199 (sire of Highland C. 2:19¾ and Dr. Driver 2:27½), a son of Advertiser 2:15¼, out of the thoroughbred mare Esther (dam of Expressive, 3, 2:12½, Express 2:21, Exquisite 2:21½ and Kelly 2:27, a sire), by Express. Esther was one of the mares which the late Governor Stanford considered had as much trotting action as Dame Winnie (dam of Palo Alto 2:08¾, etc.). Advertiser 2:15¼ (sire of Miss Adbell 2:09¼, Rowellan 2:09¾ and 16 others, besides the yearling champion, Adbell 2:23), was by Electioneer, out of Lulu Wilkes (dam of 4), by Geo. Wilkes 2:22; second dam Lula 2:15 by Norman 25, etc. Highland C.'s dam was Alpha 2:23½, a great money winner, and since being placed in the breeding ranks has produced, besides this grand looking stallion, the sire of Aegon 2:18¼, sire of Josie Aegon 2:10¼, Lillian B. 2:15¼, Aegon Star 2:11½, sire of Snoopy 2:15¼, Aenas 2:20¼. Two of Alpha's daughters are producers. She was by Alcantara 2:23 (sire of 168 in 2:30, including Sir Alcantara 2:05¼, Sufreet 2:06¼, Moth Miller 2:07, Cinch 2:08¼, Oscar L. 2:08¼ and Raven 2:10. His daughters produced Don Derby 2:04½, Diablo 2:09¼, Heir-at-Law 2:05¼, Charley Hayt 2:06¼, Beausant 2:06¼ and 5 others in 2:10 list). Alcantara 2:23

was by Geo. Wilkes 2:22, out of Alma Mater (dam of 8 in 2:30, including Alcyone 2:27, sire of the dam of McKinney 2:11¼, 7 producing sons and 2 producing daughters), by Mambrino Patchen 58, out of Estella by imported Australian. Highland C.'s second dam, Jessie Pepper, was one of the greatest matrons ever foaled, as a perpetuator

thoroughbred son of Hamblintonian by imported Diomed. Jessie Pepper is the dam of Iona 2:17¼, Wenonah, Iola, Alpha 2:23½, Metella, Gossip, Starling Wilkes and Annabel, all noted as great broodmares, and her sons Le Grande, Almont Archy and Omega are sires. These are all the foals she had. To them can be traced

HIGHLAND C. 43835.

of speed she surpassed all other daughters of Mambrino Chief 11. She was out of Lena Pepper by Sidi Hamet, he by Virginian, a son of Sir Archy (thoroughbred), out of the beautiful Barb mare presented to Hon. Thomas Jefferson by the Dey of Algiers. The fourth dam of Highland C. was the Wickliffe mare by Barnaby's Diomed, a son of Hancock's Hambletonian, a

Lady of the Manor 2:04¼, The Friend 2:05¼, Heir-at-Law 2:05½, Dan S. 2:05½, Passing Belle 2:08¼, Argetta 2:08½, Byron Kay 2:08¼, John R. Conway 2:09, Orrin B. 2:09¼, Baron Robert 2:09¾, Ethelyn C. 2:10, Kelly 2:10, Metellas 2:11, Lady Geraldine 2:11¼, Wilask 2:11½ and hundreds of other trotters and pacers.

With such an inheritance of beauty,

speed, color, size and finish, is it surprising that Highland C. is such a grand individual? He represents the famous Electioneer-Wilkes cross, the stake winning blend that is rapidly floating on the top wave of success. It is what all progressive owners of good mares are seeking. Highland C. has every requisite one should be inclined to look for in a stallion. He possesses great natural speed, his race record of 2:19¾ was earned as a four-year-old, but he has been timed miles in 2:12 repeatedly. In color he is as black as a raven's wing. He has one hind ankle white, and stands 16.1 hands high and weighs 1,200 pounds or over. Is remarkably intelligent, possesses a perfect disposition, is full of spirit and just the kind of a horse that appeals to everyone who sees him.

He has been bred to a number of choicely bred mares, and all his foals, without exception, are perfect in every way; his oldest are two years old and show great natural speed. Last fall while in yearling form, one of them trotted a quarter in 39¼ seconds, and out of a bunch of five of them all can trot quarters between 39¼ and 43 seconds.

Owners of mares who are striving to breed horses that will always find a ready sale, either for the track or road with a strong possibility of getting a 2:05 trotter, should not overlook Highland C., and it will afford me great pleasure to show him to anybody interested. I will send my stallion cards to any applicant. I intend to stand him at Salinas and Watsonville during the season of 1908 at the low price of \$25, with the usual return privilege, and I wish to emphasize this: "Before sending your mares to any stallion, come and see this magnificent individual."

HENRY STRUVE,
Watsonville, Cal.

ATHASHAM 2:09 1-4. A GAME RACE HORSE IN THE STUD.

It is the aim of many broodmare owners to send their mares to horses that have earned race records. They are believers in the developed sire theory, and, to those in California who are adopting this plan, Athasham 2:09 1-4 offers many qualifications not often met with in a sire. From early colthood he was a natural trotter, never seeming to know any other gait. Even when his breeder, George L. Warlow of Fresno, was having him broken, the trainer claimed it was almost an impossibility to make him break into a run; in fact, he seemed to want to run away on a trot. As a two-year-old Athasham took a record of 2:20, defeating Bellemont, R. Ambush and Rey McGregor. As a three-year-old he worked a mile in 2:12 1/2, and the following year won seven out of eight races, getting a mark of 2:12 and defeating Carlockin, Burnut, Wild Bell, Marvin Wilkes, Little Louise, Lady Jones, Princess, Queer Knight and Gebbie. He trotted over all kinds of tracks and never faltered. He won more money that year than any horse on the Coast that was not entered in the big stakes. In his five-year-old form he was taken East, and on the Grand Circuit was pitted against such horses as Highball 2:06 1/4, Sonoma Girl 2:05 1/4 and Wilkes Heart 2:06 1/4, taking his record at Readville, Mass. Athasham was very seldom outside of the money and was returned to California perfectly sound.

Athasham is a strikingly handsome mahogany bay horse. He has a fine mane, and a tail that touches the ground, stands 15.3 hands and weighs about 1,160 pounds. He has a clean head, intelligent eye, good ear, splendid forehead and wide jowls. His neck is arched and well set on good, well inclined shoulders. His back is short and over the coupling he is remarkably full and strong. Has well sprung ribs and heavy quarters and the best of feet and legs, making him a model horse in every respect. His disposition is perfect.

Athasham 2:09 1-4 was sired by Athadon 2:27, the first stallion that ever trotted as fast as that as a yearling

His dam was Cora Wickersham (dam of Nogi (3) 2:17 1/2, trial 2:11 1/2, winner of the three-year-old trotting division of the Pacific Breeders Futurity Stakes of 1907), by Junio 2:22 (sire of Athanio 2:10, Athnio 2:14 1/4, Bruno 2:16 1/4, Anita 2:17 and seven others in 2:30, and the dams of that wonderful trotter George G. 2:05 1/2, Athasham 2:09 1/4, Diablita 2:15 1/4, Potrero

by Gladiator (sire of the dams of Almont Patchen 2:15, Lenmar 2:16 1/4). Gladiator was by George M. Patchen Jr. 2:27, out of Buttermilk Sal, a famous trotting mare whose pedigree is unknown. Athadon 2:27, the sire of Athasham, was by Matadon (sire of Billy V. 2:13 1/4 and Athadon (1) 2:27) by the great George Wilkes stallion Onward 2:25 1/2 (sire of 198 in 2:30

ATHASHAM 2:09 1-4.

2:21 and Merle M. 2:25) by Electioneer, out of Nelly by Granger; second dam Maud Whippleton (dam of Bolinas 2:24 1/2, Rapides, trial 2:13 1/4) by Whippleton (sire of Homestake 2:16 1/2, Frank O'Neil 2:19 1/4 and four others in 2:30, and the dams of Lily Stanley 2:17 1/2, Clay S. 2:13 1/4, Rokeby 2:13 1/4, Lottie 2:15, Rect 2:16 1/2, On Stanley 2:17 1/2, etc.) by Hambletonian Jr. 1882, out of Lady Livingstone (dam of Lady Blanchard 2:26 1/4). The third dam of Athasham 2:09 1-4 was Gladys

list); his dam was Fanny Alley by William Rysdyk 527 (sire of Robert Rysdyk 2:13 1/2 and seven others in 2:30); second dam Lucille by Hurst's Bayard; third dam by Donerail (thoroughbred). William Rysdyk was by Hambletonian 10, out of Belle of Chester by Black Hawk 24. Hurst's Bayard was by Bayard 53, out of Vic (dam of Dainty 2:26 1/4, Mattie Graham 2:21 1/2, Tattler Chief, a sire, and the dams of Dawn R. 2:20, Sally Graham 2:29 1/4, dam of four, Trouseau 2:28 1/2,

dam of four, Maywood 2:29 1/4 and Etelka 2:26 1/4) by Mambrino Chief 11, etc. The dam of Athadon was Athalie (dam of Athanio 2:10, champion of Austria and the sire of The Aristocrat 2:12, etc., Ira 2:10 1/2, Athnio 2:14 1/4, Athavis 2:18, Athnix 2:20, Athadon (1) 2:27 and Athablo 2:24 1/2, sire of Nogi 3) 2:27 1/2) by Harkaway 2:28 1/4, second dam Mag by Alcalde 103 (sire of four in 2:30), he by Mambrino Chief, out of a mare by Pilot Jr. 12; third dam by Kinney's Vandal, son of the great thoroughbred Vandal; fourth dam by Bald Hornet. Harkaway 2:28 1/2 was by Strathmore 408 (sire of Steinway 2:25 1/4, etc.), out of Wait-a-Bit 2:31 (dam of Guy Princeton 2:28 1/4 and Lady Princeton 2:15 1/2 and the dam of Ringing 2:19 1/4) by Basil Duke, he by Iron Duke (son of C. M. Clay 18), out of a daughter of Pilot Jr. 12. Harkaway's second dam was Katie by imported Glencoe. The beautiful blending of the strains of George Wilkes 2:22, Strathmore, Electioneer, C. M. Clay, Gen. Taylor, George M. Patchen, Hambletonian 725 and thoroughbred blood which flows in Athasham's veins will undoubtedly insure for him a place among the greatest of sires of pure gaited trotters. He is an impressive looking stallion and will transmit his excellent qualities to his progeny in a manner that will attract the attention and elicit words of praise from all who see them. It is a foregone conclusion that he will, if bred to mares with any known breeding, sire horses that will be endowed with natural and extreme speed. I have decided to stand him at the Orchard Farm, Fresno, in care of Charles Middleton, at the low fee of \$50 for the season, with the usual return privilege. Money due at close of season or when mare is sold or moved out of the county. No reduction. Best of care taken of mares and special attention given to mares with colts at foot. Pasturage \$2.50 per month. For further particulars apply to Mr. Middleton or to

D. L. BACHANT,
R. R. No. 1, Fresno, Cal.

McMYRTLE. A Good McKinney-Electioneer Cross.

This good looking stallion has not been heard of for the reason I have not advertised him much, but now that his progeny is beginning to show so much class as well as extreme speed, I think his merits should be made known to owners of good mares who are desirous of raising colts and fillies that will always find a ready sale. He was foaled May 21, 1902, sired by McKinney 2:11 1/4, sire of 11 2:10 trotters, 17 in 2:10, 44 in 2:15, 62 in 2:20 and 92 in 2:30. His sons have sired seven and his daughters have produced five in the 2:10 list and have in all fifty-six in the 2:30 list. The dam of McMyrtle was Myrtledale by Iran Alto 2:12 1/2 (sire of Dr. Frasse 2:11 1/2, Thomas R. 2:15, Vendome 2:18 1/4, Altodown 2:24 1/4, Dr. Frasse's Sister 2:25 1/2, Admiral Togo 2:29 1/2), by Palo Alto 2:08 1/4, out of Elaine 2:20 by Messenger Duroc, sire of twenty-three in 2:30; second dam Green Mountain Maid (dam of Electioneer and eight others in 2:30). Iran Alto 2:12 1/4 was one of the gamest and purest gaited trotters even seen on the California Circuit. He earned his record in a hard fought race. This is not to be wondered at, for his sire, Palo Alto 2:08 1/4, earned the reputation of "King of Trotters." He never knew what it was to give up, and even when crippled so badly that Chas. Marvin, his driver, said he had three bad legs and one good reliable one when he earned his record. Iran Alto's dam, Elaine, was the first four-year-old to tot in 2:20, and a purer gaited mare never faced a starter. She was the fastest daughter of Green Mountain Maid and when put in the breeding ranks produced beside Iran Alto 2:12 1/4, Altoine 2:29 1/2, Anselma 2:29 1/2 and Palatine 2:18. Her daughters produced Palita 2:16, Rio Alto 2:16 1/2, Anselor 2:21 1/2, Mary Osborne 2:28 1/4, Novelist 2:27, Anselita 2:29 1/4 and Salvini 2:30.

McMyrtle's second dam was Nettie

Nutwood (dam of Hillsdale 2:17 1/4 and the dam of Sterling McKinney 2:09 1/4), by Nutwood 2:18 1/4 (sire of Manager 2:06 1/4, Lockheart 2:08 1/2 and 172 others in 2:30, the dams of 938, including 17 in the 2:10 list); the third dam was by Vick's Ethan Allen Jr. (sire of Prince Allen 2:27 and the dams of George Washington 2:16 1/4, Columbus S. 2:17, etc.), son of Ethan Allen 2:28, one time holder of the

buried, his good qualities will assert themselves. He is a beautiful bay in color and stand 15.3 hands. His trotting action is smooth and friction-

then. McMyrtle will make the season of 1908 at the race track, Santa Rosa, Cal., at a fee of \$30 for the season. (His sire's fee is \$300 this year).

world's trotting record; and the fourth dam was by Williamson's Belmont. In McMyrtle we have a splendid representative of the Wilkes-Electioneer-Nutwood cross, and like many other stallions that have been practically

less, and as it is my intention to have him trained, I believe he will get as low a record as any McKinney. Thos. Holmes worked him last year three months and drove him miles in 2:18 1/2, McMyrtle being only three years old

Mares kept on pasture at \$3 per month. For further particulars address

JOHN GRIMES, Owner,
Petaluma, Cal.

SADI MOOR 39989.

When the attention of horsemen is called to a beautiful, well formed, stylish horse of any breed, the question naturally arises: "How is he bred?" It is then that the owner takes pride in giving the visitor a card containing a tabulated pedigree, and especially if it is of a standard and registered trotter, like my four-year-old black stallion Sadi Moor 39989. A glance at the tabulation by anyone interested in pedigrees generally creates a desire to make a more careful inspection of the individuals and modesty compels me to say I must refrain from publishing all the complimentary remarks I hear every time this colt is shown. So I will content myself by repeating that the most comprehensive one I heard was: "No one can find a fault with him as an individual; he is even better than his rich breeding indicates."

Sadi Moor was foaled February 20, 1904. He was sired by Guy McKinney 37625 (trial 2:20), son of McKinney 2:11½. Guy McKinney's dam, Flossie D. was by Guy Wilkes 2:15½ (the fastest entire son of the great Geo. Wilkes 2:22, and one of his best bred speed progenitors), his second dam was Blanchard (dam of the great campaigner China Maid 2:05½), by Onward 2:25½ (sire of 198 in 2:30), one of the greatest sons of Geo. Wilkes 2:22; the third dam of Guy McKinney was Blanche Patchen (dam of Blanche L., dam of Wayburn 2:24½ and Blanche N. 2:25½), by Mambrino Patchen 58; the fourth dam Lady Blanche (dam of Geo. Hooff 2:21½, Alcyon 2:15, sire of Alton 2:09½, Amos R. 2:09½ and 26 others; she is also the dam of Jaywood, sire of dam of Ed Patch 2:08½ and 10 others), by Privateer 258 (son of Grey Messenger 155 and Lady Moscow 2:30); fifth dam Jennie Lind, by Abdallah 15; sixth dam Lady Weiner by Saltram (sire of Highland Maid 2:27, holder of the world's record in 1853), he by Kentucky Whip, out of Sea Gull by Duroc.

The dam of Sadi Moor was the wonderful trotting mare Sadie Moor, that had a record as a yearling of 3:03, lowered it to 2:39½ as a two-year-old, and the following year reduced it to 2:29½. Then, for fourteen years, she was used as a family driving mare and, after being placed in training for two months, lowered her record to 2:22½. No better evidence is needed than this, that she was constitutionally all right and that she "had her speed" with her. Sadie Moor was by

Humboldt Maid 2:13½, Lady Waldstein 2:15 and 8 others in 2:30. The second dam of Sadi Moor was Carmine (dam of Brice McNeil 2:19½, Sadie Moor 2:22½ and Robert Mac 2:30). She was the greatest speed producing daughter of Poscora Hayward 2:23½, that was brought to Humboldt county years ago and whose progeny were noted for their gameness, good limbs, strong constitutions and perfect trotting action. He was by Billy Hayward 2:31½, a son of

SADI MOOR 39989.

the very best bred son of The Moor 370, Grand Moor 2374, a horse that has rightfully earned the title of being a great broodmare sire. His sire, The Moor, being classed as such through the number of performers that descended from his daughters: Beautiful Bells (dam of 11), Mabel (dam of 3), Sable (dam of 4), and Atalanta (dam of 2). The Grand Moor's dam was the dam of Don Tomas 2:20 and 1 sire of 3, and 1 dam of 2, by Mambrino Patchen 58 (the greatest broodmare sire); the second dam was Kate Tabor by Mambrino Messenger (sire of the granddam of McKinney 2:11½). Grand Moor sired the dams of Joe Wheeler 2:07½, Arthur W. 2:11, Morosco 2:12, John A. 2:12½,

Geo. M. Patchen Jr. 2:27 and Grey Liz, by the Morse Horse 8 (sire of Lulu 2:15, May Queen 2:20, etc., and the dams of Norval 2:13½, Norman Medium 2:30, etc.). Poscora Hayward 2:23½ was another great broodmare sire, his daughters having produced Rupee 2:11 (a sire), Siva 2:13½, Iora 2:11½, Tobasco 2:12½, Amelia 2:13½, Forest W. 2:14½, Dudley Olcott 2:18½, Swift Bird 2:18½ (dam of Swift B. 2:12½), and seven others in 2:30. Poscora Hayward held the world's record at one time for the fastest fifth heat on record, 2:25. He was out of Poscora Maid by Leonard's Poscora, second dam Scotty by Black Hawk (Horne's). Sadi Moor's third dam was Jenny, by Algerine by Ham-

bletonian 725 (sire of Graves 2:19 and 14 others in 2:30 and the dams of Azote 2:04½, Georgena 2:07½, etc.), out of a mare by Black Warrior, son of Tippoo. The fourth dam was Old Bay by Albrack (thoroughbred); the fifth dam was The Finch Mare by Velox (thoroughbred). When one comes to analyze the above mentioned blood lines, it will be seen that this promising trotter traces to speed-producing families on both sides, and "as like begets like or the likeness of some ancestor," is there any room for doubt as to what his career as a trotter and as a sire will be? The blending of the very best strains of Geo. Wilkes and Mambrino Patchen blood with that of The Moor, Geo. M. Patchen, Hambletonian 725, and stoutest of thoroughbred strains is remarkable. The number of famous speed producing broodmares which appear in his pedigree, is remarkable, and as the most successful horse breeders in the United States consider that without strong maternal lines they cannot hope to get fast colts or fillies uniformly, Sadi Moor should prove a sire that will transmit his qualities to his progeny in a manner that will make all owners who send their mares to his court feel that they are on a fair road to success. Another strong argument in favor of this sire is that his celebrated dam produced Sable Moor, winner of the gold medal at the Charter Jubilee at Long Beach, and the silver cup on the Long Beach strand in 1907 in a large field of competitors.

I will breed Sadi Moor 39989 to some good approved mares during the season of 1908 at \$40, with the usual return privileges. I believe that anything further regarding this stallion will be told by those who come to the place where he will stand this year, which is at the Brace half-mile race track, Santa Clara, Santa Clara county.

W. R. JOHNSON,

Box 161, Santa Clara, Cal.

Young Hal 2:10 1-4 and Hal McKinney.

There are few handsomer horses in the United States than Young Hal 0410, record 2:10½. He stands 16 hands and weighs 1175. In color he is a rich dark bay. He has size, style, substance and speed. His disposition is perfect. He earned his record in a hard fought race. He goes without hobbles and his gait is the "poetry of motion." His breeding is of the stout-

YOUNG HAL 2:10 1-4.

est and best. His sire was Hal Dillard 2:04½ (sire of Fannie Dillard 2:03½, Hal B. 2:04½, Hal Clipper 2:08½, Cambria Maid 2:04½, Hallock M. 2:09½, Hal C. 2:05½, Dillard On-line 2:07½ and forty-four others in 2:30), and his dam was Ozora (dam of Young Hal 2:10½, Strathdale 2:30 and granddam of Strathline 2:07½, Citation 2:09½, Baraza 2:14½, Realty 2:17½, Black Line 2:22), by Smugler 2:15½, champion of his year, and sire of dams of Nut Boy 2:07½ (the greatest money winner of 1906), Be Sure 2:06½, R. Ontime 2:07½, Miss Whitney 2:07½, etc. Young Hal's second dam was Odd Stocking (dam of Happy Russell 2:21½, a sire, Spring

Lock 2:24½ and Boniface 2:29½), by Happy Medium (sire of Nancy Hanks 2:04, etc.); the third dam was called The County House mare (dam of Nettie 2:18 and granddam of Ellen Lowe 2:12 and five others in 2:30), by American Star 14. Hal Dillard 2:04½ (the sire of Young Hal 2:10½), was by Brown Hal 2:12½ (sire of Star Pointer 1:59½, Star Hal 2:04½, Hal Chaffin 2:05½, Elastic Pointer 2:06½, Hal Braden 2:07½, New Richmond 2:07½, Storm 2:08½, Brown Heels 2:09½, Laurel 2:09½, Silver Hal 2:10 and 20 others in the 2:15 list), dam Annie Pointer (dam of Hal Dillard 2:04½ and Lucy W. 2:16½), by John Dillard Jr. (sire of the dams of 3 in 2:12); second dam Clara by Mamy Chief. What an outcross Young Hal is for the vast number of well bred mares in California! The greatness of the Hals is recognized by all horsemen, but this one has for his dam a producing daughter of the great Smugler 2:15½, and then the Hambletonian-American Star cross back of this; such breeding removes all the taint of "softness" or chicken-heartedness long attributed to pacing families. Smugler 2:15½ was a lion-hearted horse, and the Brown Hal family is noted for courage and gameness. Owners of mares should not hesitate to breed them to Young Hal, if they are seeking to get fast horses possessing all the

qualities sought after by the best class of patrons in the light harness horse world. Young Hal is a sure foal getter. He was bred to a number of fine mares in Los Angeles last season and all that I have heard from are in foal.

I have as a companion to Young Hal 2:10½ another young stallion that has attracted a great deal of attention ever since he arrived here. I refer to Hal McKinney. He is only a two-year-old, but looks older, so perfect is he in conformation. In color he is a solid red bay, and is large and perfectly developed. He has been handled a little as a yearling, pacing eighths in 16 seconds and quarters in

34½ seconds. I will breed him to a few choice mares for a fee of \$25 for the season. His breeding is as follows: Sired by the sensational winner on the Grand Circuit of 1899, Hal B. 2:04½, full brother to Fanny Dillard 2:04½. Hal B. 2:04½ sired Hal R. 2:07½, Hallock M. 2:09½, Hal Raven 2:14½ and four others in 2:30. Hal B. 2:04½ was sired by Hal Dil-

2:13½ was a game race mare and is noted also as the dam of Irish 2:08½. Her dam was by the great four-mile running horse Hock Hocking, he by Ringmaster, out of Fashion (sire of great granddam of Anteeo 2:16½, etc.) by imported Hurrah, second dam Fashion by imported Trustee. With such a strong foundation Hal McKinney should be a sire of

HAL McKINNEY.

lard 2:04½, out of Ellen M. (dam of Fanny Dillard 2:03½ and Hal B. 2:04½) by Blue Boy, son of Blue Bull 75, the great sire whose daughters have produced Princess Moquette p. 2:08½, Alhambra 2:08½, Kassell 2:09½, Veta 2:09½, Vitella 2:09½, Atlantic King 2:09½, Dick Wright 2:09½ and scores of others. The dam of Hal McKinney is Juliet D. 2:13½ by McKinney 2:11½, sire of Coney 2:02, Sweet Marie 2:02, China Maid 2:05½, Zolock 2:05½, eleven trotters in 2:10, 17 in 2:10, 44 in 2:15, 62 in 2:20 and 92 in 2:30, establishing a record for his age unexcelled by any stallion that ever lived. Juliet D.

the very best limbed, gamest and highest finished horses. For every purpose they should prove of great value, and as it is my intention to race Hal McKinney, I believe he will be as fast as any of the Hals, and I know that none has a more frictionless way of going and like to "go the route" with a keener relish.

I will stand both these horses at Agricultural Park, Los Angeles, Cal., and will be prepared to handle and care for trotters and pacers. For further particulars apply to

A. E. HELLER,

929½ W. 37th St., Los Angeles, Cal.

Baron Bowles, 3, 2:25 and Alconda Jay 46831.

The popularity of Baron Wilkes 2:18 as a sire is firmly established, not only through his representatives in the 2:30 list, but by the remarkable showing made by his sons, as sires, and his daughters as dams of early and extreme speed. In this respect Baron Wilkes leads all other representatives of the famous George Wilkes-Mambrino Patchen cross. Mated with representatives of any and all trotting horse families, this cross has been productive of marvelous results. Very few representatives of Baron Wilkes have been brought to California, and no trotter of the family as well bred or as promising as Baron Bowles 2:25. His record as a three-year-old is no measure of his speed. That he will get a very low mark this year is a foregone conclusion.

BARON BOWLES (3) 2:25.

As an individual he must be seen to be appreciated. His breeding is as follows: Sired by Baron Wilkes Jr. 2:18½, one of the best bred sons of Baron Wilkes 2:18 sire of Dulce Cor 2:08½, Baron Bell 2:09, Oakland Baron 2:09½, Baron Rogers 2:09½, Bumps, p. 2:03½, Rubenstein 2:05, Rachel 2:08½, etc., and 130 others in 2:30 list), out of Susie May 2:18½ (dam of Baron Bowles, 3, 2:25), by Dignus 22350 (sire of Johnny Agan 2:05½, Sunday Belle 2:10½, Susie May 2:18½, etc.); second dam Hattie D. (dam of Oakley D. 2:09½, Susie May 2:18½) by Col. Hambrick 5805 (sire of Daphne 2:16½ and six others in 2:30); third dam Suse (dam of Ella Earl 2:25 and Dirkee, sire of one in 2:30) by J. C. Breckenridge (sire of

two dams of four in 2:30). Baron Wilkes Jr. 2:18½, sire of Baron Bowles 2:25, is also the sire of Patsey Hendricks 2:29½. He was out of Marinette (dam of Royal Nelson 2:18, Baron Wilkes Jr. 2:18½, Lady Rossie 2:25½ and Queen Regent 2:29½) by Director 2:17 (sire of Directum 2:05½, Direct 2:05½, etc.); second dam Pantalette (dam of Escobar 2:13½, a sire, Burglar 2:19½, a sire, and Epaulet 2:19, sire of Georgena 2:07½, and thirty-five others in 2:30) by Princeps 536 (sire of fifty-two and the dams of Exalted 2:07½, Marion Wilkes 2:08½, Bi-Flora 2:09½ and Pat Ford 2:10); third dam Florence (dam of Furor 2:24½) by Volunteer 55. From this it will be seen that Baron Bowles represents a line that will be valuable for our California bred mares, and as his gait is perfect and he comes from the stoutest of trotting lines, owners of broodmares here (as they do in the East) should avail themselves of the opportunity of breeding their mares to representatives of this line of breeding, which is only to be found in California in this young stallion. Terms for the season are \$30, with return privilege.

There is another young stallion which I brought from the East, to which the attention of horsemen is also called. He is registered Alconda Jay 46831, which, like his stable companion, is a worthy member of "The Futurity Winning Families." He was foaled in 1905. When matured, he will stand 15.3 hands and will weigh 1,200 pounds. Is a natural, smooth gaited trotter and has shown 2:20 speed in his two-year-old form. He was stunted to five of the best mares in California last spring as a two-year-old and all five are safe in foal. Alconda Jay is bred as follows, and it will repay broodmare owners to carefully study his rich inheritance: Sired by Jay Bird 2:31½ (sire of Hawthorne 2:06½, Allerton 2:09½, Gitche Manito 2:09½, Early Bird 2:10, Invader 2:10 and 103 others in the 2:30 list). His dam is Alma Wilkes (dam of Oakland Belle 2:23½) by Baron Wilkes 2:18 (sire of 140, fifty sires of 341 and fifty-two dams of seventy-eight in the list); second dam Almata 2:31 by Almont 33; third dam Alma Mater (dam of Alcantara 2:23, Alcyone 2:27 sire of McKinney 2:11½, Allandorf 2:19½ and five others, seven sires of 283 and two dams of three in 2:30) by Mambrino Patchen 58; fourth dam Estella by imported Australian. The value of Jay Bird as a sire is increasing every year, for his descendants are proving their superiority in every race they start in. They are well formed, have the best of feet and legs and are so uniformly made that the Jay Bird form is as easily detected as the old-fashioned Morgans are. His son, Allerton 2:09½, is one of the leading stallions in America. Jay Hawker, sire of Susie J. 2:06½, is another,

Trampfast (2) 2:12½ was by The Tramp, another son, and Eagle Bird, sire of Eagle Flanagan 2:07½, etc., was another. Jay Bird was by Geo. Wilkes 2:22, out of Lady Frank, also dam of Early Dawn 2:21½, and Monte Carlos (sire of three) by Mambrino Star 585; second dam Lady Franklin 2:29½ (dam of Cottage Girl 2:29½) by Esty's Black Hawk. Alconda Jay traces twice to George Wilkes 2:22 (through Baron Wilkes 2:18 and Jay Bird 2:31½), twice to Mambrino Patchen, and every mare in his pedigree to the fourth generation is in the great broodmare table, except Dolly Spanker, the dam of George Wilkes 2:22. When the list of championship

ALCONDA JAY 46831.

records for 1907 is compiled it will be replete with the names of those that trace to these two young stallions, and I do not deem it boasting to say that as these are bred to be ast, fas well as to be producers of speed, neither will be found lacking. Alconda Jay will make the season of 1908 at Pleasanton and Santa Rita Stock Farm for \$40 the season, with usual return privileges. It will afford me great pleasure to show these young stallions to any one interested. For any further particulars, stallion cards, etc., address

H. H. HELMAN,
Pleasanton, Cal.

Neernut 2:12 1-2 and His Son Goldennut 2:11 1-2.

The Electioneer-Nutwood cross has been productive of marvelous results. Arion 2:07½, whose record of 2:10½ at two years' old, made to high-wheel sulky in 1891, is still unequalled, and the greatest money-winner of 1907, Sonoma Girl 2:05½, is the latest representative of this cross, while Neernut 2:12½, who is a grandson of Electioneer out of a mare by Nutwood has seven in the 2:30 list and over forty-nine of his get have taken records in races, matinees and public trials from 2:04½ to 2:30. Neernut 2:12½ was foaled in 1891. He stands 15½ hands, is a blood bay with black points and weighs 1,100 pounds. He trots without boots, weights or hobbles, is a great show horse and sire and be-

NEERNUT 2:12½.

gets speed, size, style, soundness and endurance. There are no cripples among the Neernuts, and all of them have quality, speed and strength. Neernut is the sire of that great trotting mare Neeretta 2:16½ at 3, 2:11½ at 4 and 2:09½ at 5. The fastest record for mares for those three years. Last season Goldennut got a mark of 2:11½ and Burnut 2:13½; in 1906 Neergard got a record of 2:16½ and Jenny A. 2:13. Were it not for the fact that every owner of a Neernut believes he has the finest roadster ever foaled (equal to many that are entered in the races on the circuit) there is no doubt his list of 2:20 and 2:30 performers would exceed that of any other grandson of Electioneer. His tabulated pedigree shows the source from whence his excellence comes. His sire, Albert W. 2:20, was one of the

gamest campaigners ever raced in California. He sired Little Albert 2:10, a gelding that the late Monroe Salisbury claimed was the toughest, gamest and most consistent little campaigning trotter he ever crossed the Rockies with. Albert W.'s next fastest son was Neernut 2:12½ (trial, 2:09), Miss Albert 2:15½, William Albert 2:16½, Dudley Olcott and sixteen others in 2:30. His daughters have produced Icon 2:10, Bob Ingersoll 2:14½, Pop 2:17 and eight others in 2:30, while four of his sons sired fourteen and Neernut 2:12½ is the greatest of these four. Albert W. 2:20 was by Electioneer 125, out of Sister (also dam of Bonanza 2:29½ and granddam of two under 2:20 and Waldstein 2:22½, sire of nine in 2:30) by John Nelson 187 (sire of four in 2:30 and the dams of nine in 2:30). He was by a son of imported Trustee, the latter the sire of Trustee, the first horse to trot twenty miles in an hour. Neernut's third dam was The Lamont Mare (dam of Aurora 2:27, etc.) by Abdallah 1. The dam of Neernut 2:12½ was a very fast and game trotting mare called Clytie II. She trotted a mile to cart in 2:20. She was by Nutwood 2:18½ (sire of 174 in 2:30, 146 sires of 925 and 155 dams of 290), the greatest of broodmare sires; his second dam was Clytie by Hambletonian 725 (sire of Graves 2:19 and fourteen others; his daughters have produced Azote 2:04½, Georgena 2:10, etc.); the third dam of Neernut was The Belmont Mare by Williamson's Belmont, the "Mambrino Patchen of the Pacific Coast." Neernut 2:12½ will make the season of 1908 at the home of his owner, George W. Ford, on North Ross street, Santa Ana, for \$10 for single service and \$20 for the season and \$30 to insure a living foal.

Goldennut 2:11½ is a son of Neernut 2:12½, out of Florence Covey 2:22 (with one month's work). This is the dam of Neernut Maid (trial 2:12½), Peter Neernut 2:19½, Tooneer (trial 2:21), Florence Covey was sired by Alban 2:24, son of General Benton and Lady Morgan (also dam of Marion 2:26½, Merriment 2:26½ and the dams of Pawling 2:24½, Whips, Jr. 2:27½, Nenox 2:27½, and Golden Slippers 2:30) by Hambletonian 10. Goldennut's second dam was Laura C. 2:19½ (dam of Laurel 2:13½, Lauretta 2:14½ and Langton 2:21) by Electioneer 125; the third dam Fanny Lewis (granddam of the great race horse Bannockburn who holds the world's record for 1½ miles) was by imported Buckden, etc. Goldennut 2:11½ was foaled in 1890. He is a beautiful golden chestnut. His hair is as fine as silk and looks like pure gold. He stands 15½ hands and is the prettiest horse on earth. Goldennut is a show

horse and a blue ribbon winner in any company. He is the best mannered stallion in the country and is a fine buggy animal; a lady can drive or ride him. He does not know what fear is. At Phoenix, Arizona, Goldennut was timed separately in 2:10½, last quarter in 30 seconds. He was beaten a neck at Fresno last three quarters in 1:35, last quarter in 31 seconds. This was the fourth time he ever started in a race. He trotted to his record of 2:11½ last fall

GOLDENNUT 2:11½.

with apparently little effort. He needs neither boots nor weights and his trotting action is the poetry of motion. There are several of his progeny in the vicinity of Santa Ana. He will make the season at Agricultural Park, Los Angeles, in charge of C. T. Hewitt & Son, to a few approved mares at the very low price of \$30 for the season cash.

Owners of good mares who desire to breed horses that will fill every requirement: beauty, size, style, soundness, gait, substance, conformation, clean trotting action and speed should not fail to come to inspect Neernut 2:12½ and Goldennut 2:11½. Address or apply to C. T. HEWITT & SON, Agricultural Park, University Station, Los Angeles, Cal.

WOODLOCK.

The greatness of Zolock 2:05½ as a sire will be perpetuated through his sons, especially if they are of the type of Woodlock. He stands 16.1 hands high and weighs 1,260 pounds. In color he is a rich mahogany bay. His oldest colts are yearlings, and they will compare favorably with the progeny of any other stallion in this country. They are as perfect as pictures. Woodlock, as stated above, is by Zolock 2:05½, the fastest entire son of the mighty McKinney 2:11¼, and one of his best speed-producing sires. Woodlock's dam was Miss Goldnote by Goldnut (son of the great Nutwood 2:08¾); second dam Miss Franklin by Echo; third dam Mamie D. by Hambletonian 725; fourth dam by Kentucky Whip. In Woodlock's veins flows the blood that has given us some of the greatest horses in the trotting world. He traces to George Wilkes 2:22 twice (through Simmons 2:28 and Alcyone 2:27) to Nutwood 2:18¾, the phenomenal sire of broodmares, Echo, twice (sire of the dam of Direct 2:05½) and Hambletonian 725 (sire of the dam of Azote 2:04¼), etc. Woodlock is destined to make a great sire of early and extreme speed. He is a beautifully gaited natural trotter, but his speed has never been developed. He will make the season of 1908 at Kings County privilege.

I. M. LIPSON, Owner.

A Handsome Son of McKinney

ALBERT MAC.

The largest money winner in regular events on the Pacific Coast in 1907 was Berta Mac 2:13¾, full sister to the grandly made stallion Albert Mac. She won \$4,200 and demonstrated she was of champion class. Albert Mac was sired by McKinney 2:11¼, that sold for \$50,000 at seventeen years of age, sire of eleven 2:10 trotters, seventeen in the 2:10 list, forty-four in 2:15, sixty-two in 2:20 and ninety-two in 2:30, and of sires of seven and of dams of five in 2:10 list and fifty-six in all in the 2:30 list. Albert Mac's dam was Alberta 2:25 by Altoona 8850 (sire of May B. 2:13¾, world's record on ice track, Antovita 2:16¾ and Almo Jay 2:19, and five others in 2:30, and the dams of Berta Mac 2:13¾, Louisa A. 2:13¾, San Luisto 2:14½ and Elaine 2:22½), he by the great Almont 33 (sire of thirty-seven in the list, ninety-eight sires of 601, and eighty-four dams of 136), out of Theresa B. by Prophet Jr.; second dam Molly Floyd by Mohawk 604 by Black Hawk 24. The second dam of Albert Mac was Gipsy (dam of Alberta 2:25, Dido, trial 2:28, and the granddam of Berta Mac 2:13¾) by Erwin Davis (sire of Ed 2:26, Carrie P. 2:27¾, Florence R. 2:26¾), son of Sken-

andoah 926 (sire of the dams of eight in 2:30) and Lost Diamond by Hambletonian 10. Maggie, the third dam of Albert Mac, was by Goldnote, by Skenandoah 926, out of a daughter of Goldfinder, son of imported Glencoe. The Skenandoahs were noted for their gameness, speed, splendid limbs and feet and intelligence, and this horse traces twice to this fountain head. Being by McKinney 2:11¼, out of a mare with a record of 2:25, that was capable of lowering it ten seconds, Albert Mac has a license to be fast. He has only been handled three months, yet he has shown a 2:20 gait, in fact, he is faster for the work he has had than his famous sister. Altoona, the sire of Alberta, was one of the strongest bred sons Almont ever brought to California. All of his progeny were pure trotters.

Albert Mac is a handsome and perfectly proportioned dark bay horse, 15.3 hands high. He has style, size, color, substance, gait, constitution, the best of feet and legs, a splendid disposition and should prove a sire of high class individuals that will be line trotters. He will make the season of 1908 at my stable, 320 Capital street, Salinas. Terms for the season, \$25, with usual return privilege. Best of care taken of mares, but no responsibility assumed for accidents or escapes. For further particulars apply to

W. PARSONS,
Salinas, Cal.

A Royally Bred Young Stallion.

HIS SIRE AND THE SIRE OF HIS DAM HAVE RECORDS BETTER THAN 2:10.

TEDDY REY.

When Monterey 2:09¼ was going "down the line," winning race after race, everyone who saw him was loud in his praises, and it was predicted by every competent judge that he would get a much lower record. Since being retired to the stud he sired Irish 2:08¾, the champion four-year-old of 1904. Monterey was sired by Sidney 2:19¾ (sire of 107 in 2:30, including Lena N. 2:05¾, Dr. Leek 2:09½, etc.); his dam was Hattie (dam also of Montana 2:16), by Commodore Belmont; second dam Barona by Woodford Mambrio, etc. Teddy Rey's dam was called Aunty and she was by Diablo 2:09¼ (sire of Sir Albert S. 2:03¾, Sir John S. 2:04½, Clipper 2:06, Diablito 2:08½, etc., and grandsire of Inferlotta 2:04¾ and Nogi, 3, 2:17½). He was by Chas. Derby 2:20, out of Bertha, the greatest speed producing mare in the world, having nine in the 2:30 list, of which four have records better than 2:10 and four better than 2:18; by Alcantara 2:23; second dam Barcena (dam of one in 2:12, two sires and two dams of 2:30 performers) by Bayard, etc. Chas. Derby 2:20 was by Steinway 2:25¾, out of Katy G., Electioneer's greatest speed producing daughter. The grandam of Teddy Rey was by Anteros 6020, sire of Ed. S. 2:08¾, full brother to Anteeo 2:16½, Antevolo 2:19¾, J. C. Simpson 2:18¼, Coral 2:18½, etc., by Electioneer 125, out of Columbine by A. W. Richmond, etc.

I bred Teddy Rey. He is a beautiful chestnut horse with star, snip and two hind ankles white. He was foaled May 5, 1903, and stands 15.3 hands, is well developed, high headed, with the best of feet and legs. His breeding is of the best, as his sire has a mark of 2:09¼, and the sire of his dam also has a record of 2:09¼, all his bloodlines are blended with those of the fastest of trotters and pacers. Teddy Rey is a pacer and one that will get a very low mark. As a sire he will beget horses that will have speed, good looks, size and iron constitutions. Owners of mares should not overlook this opportunity to get horses that will be of the highest type. I have placed his service fee at the low figure of \$25 for the season. For further particulars address

P. J. HOWARD,
2065 San Antonio Ave., Alameda, Cal.

An Inbred Nutwood

THAT HAS SIZE, STYLE, BEAUTY
AND SPEED.

CHESTNUT TOM 2:17¼.

The demand for trotting stallions having size and style, speed and action, with dispositions of the kind, will be filled only occasionally. In my stallion, Chestnut Tom 2:17¼, I think I have one that fills every requirement, and judging by the few colts and fillies he has sired out of ordinary mares, I know that I am not boasting when I assert that he is a stallion that owners of mares will make no mistake when they send them to him. His breeding is of the best. He traces on the male and female side to Nutwood 2:18¾, one of the greatest sires of fast horses that ever lived. He has two crosses to Geo. M. Patchen Jr. 2:27 and two to Williamson's Belmont. Chestnut Tom 2:17¼ was sired by Nutwood Wilkes 2:16½ (sire of John A. McKerron 2:04½, Copa de Oro 2:07¼, Tidal Wave 2:09, Miss Idaho 2:09¾, Who Is It 2:10¼, Cresco Wilkes 2:10¾, etc.), out of Zeta Carter by Director 2:17 (sire of Nathan Straus 2:03¾, Directum 2:05¼, Direct 2:05½, etc.); second dam Lida W. 2:18¾ (dam of Nutwood Wilkes 2:16½, etc.), by Nutwood 2:18¾; third dam Belle by Geo. M. Patchen Jr. 2:27; fourth dam Rebel Daughter by Williamson's Belmont. Nutwood Wilkes 2:16½, the sire of Chestnut Tom 2:17¼ (trial 2:14), was by Guy Wilkes 2:15¼ (sire of Fred Kohl 2:07¾, Hulda 2:08½, Seymour Wilkes 2:08½, etc.), out of Lida W. 2:18¾ (also dam of Direct Line 2:29, a sire, Lita Carter 2:20 and Zeta Carter, dam of Chestnut Tom 2:17¼); second dam Belle by Geo. M. Patchen Jr. 2:27; third dam Rebel Daughter by Williamson's Belmont. This breeding does not show that he has a "cold" cross or a defect in his bloodlines. He is a horse of wonderful strength and finish. In color a beautiful chestnut. He has a short back, good bone and extreme endurance. Is a sure foal getter. I will stand him at Stockton for the season of 1908 at \$30, with usual return privilege. If broodmare owners want to breed and raise horses that will bring good prices, I know of no stallion that will surpass Chestnut Tom. As an outcross for mares that trace to Electioneer, Steinway, Sidney or any of the leading sires, this horse will prove invaluable. For further particulars address

GEORGE T. ALGEO,
120 South Center St., Stockton, Cal.

A FILLY.

First she's foaled,
Then she's sold
And wins a race some day.
Next she foals,
Soon she's old
And's put away for aye.

AN EPISCOPALIAN HORSE.

A Baptist parson, famous in Virginia, once visited a plantation where the ducky who met him at the gate asked him which barn he would have his horse put in.

"Have you two barns?" asked the parson.

"Yes, sah," replied the ducky; "dar's de ole barn, and Mas'r Wales has jes' build a new one."

"Where do you usually put the horses of clergy-men who come to see your master?"

"Well, sah, if dey's Methodis's or Baptists's, we gen'ally put 'em in de ole barn, but if dey's 'Piscopals we puts 'em in de new one."

"Well, Bob, you can put my horse in the new barn; I'm a Baptist, but my horse is an Episcopalian."

The Grandest Representative OF Palo Alto's Choicest Breeding in California.

Palo Alto Stock Farm, as a place where trotting horses were once bred and developed, is no more. In a few years its broad acres may be divided by fences and costly residences will be dotting the paddocks and fields wherein the kings and queens of the trotting world gamboled a few years ago. But, as the home of Electioneer and his family and the nursery and training ground where the late Senator Leland Stanford passed the closing years of his eventful life, it will occupy a place in the history of California for all time. How much the world is indebted to this progressive man of wealth who did so much for the trotting horse industry on this farm will never be known. In almost every part of America, Europe and Australasia can some of the

Bell Bird 2:26¼. Her sons, Chimes, St. Bel, Electric Bell and Day Bell, were sires of 2:30 performers and five of her daughters were noted producers of speed. Beautiful Bells was by The Moor, out of Minnehaha (dam of Alcazar 2:20½ and seven others in 2:30 and six producing sons and the dams of eighteen in 2:30) by Stevens' Bald Chief. The fourth dam of Moormont was Nettie Clay by C. M. Clay Jr. 22; fifth dam The Col. Morgan mare; sixth dam by Engineer 113. Azmoor's dam was Mamie C., a thoroughbred mare that had splendid trotting action. She was also the dam of Electric King 2:24 and Don Monteith 2:29¼, and one of her daughters produced Aldeana 2:25; her sons have sired Betonica 2:09¼ and Major Centilevre 2:10¼. She was

cyonium 2:24¼ and John F. Phelps, Jr. The sons and daughters of Piedmont 2:17¼ that were bred at Palo Alto (where he was, in a great measure, overshadowed by the presence of Electioneer and General Benton) have proven to be very successful on the race track. Twenty-five have records and all of them were noted for their gameness, and Esparto Rex 2:15¼, Limonero 2:15¼ and Wanda 2:18¼ were all famous campaigners, and his daughters when placed in the breeding ranks have given us some very fast and consistent performers: Alla Vela 2:11¼, Ariel 2:21, Electant 2:19¼, Orphina 2:17¼, Montrose 2:18 (half sister to Moormont), etc., Evonia 2:29¼ (dam of Effie Worthy (3) 2:20, Vonja Worthy (3) 2:22¼, Fanny Worthy (3) 2:23¼, and Jerome

MOORMONT 44995.

descendants of the Palo Alto horses and broodmares be found, and it is with pleasure the owners point to them and declare that Senator Stanford bred the sire, the grandsire, the dam or the granddam of these promising speed producers. How different would the records of the trotting turf have been if Palo Alto had never existed, but, like the enterprises of J. Malcolm Forbes, A. J. Alexander, Robert Bonner and C. J. Hamlin, it has passed out of existence. The hours devoted to the all-absorbing topic of breeding and the thought expended in striving to get the best results in the light harness horse industry and the best and most humane methods of training and developing trotters have not been lost to mankind. Strange to say, there are few descendants of Electioneer out of Palo Alto bred mares standing for public service in California, for the auction ring in New York City has been the distributing point from whence these horses have been scattered to every part of the globe, except California, and owners of broodmares are to be congratulated that Moormont, one of the best bred ones foaled at Palo Alto, was never sent East, but was kept on the Pacific Slope, and is now at Chico. He was sired by Azmoor 2:20½ (sire of Betonica 2:09¼, Azmoon 2:13½, Bob 2:15, Bonnibel 2:17¼, Rowena 2:19½, Aggregate 2:19¼, Azmont 2:22¼, A. A. A. 2:25½, Mary Osborn 2:28¼, Amalgam 2:29¼ and the dams of Rowellan 2:09¼, Arzilla 2:12¼ and Little Louise 2:17, Azmoon 2:20¼, Joe Axworthy 2:24¼ and Noraine 2:27), out of Rosemont (dam of Montrose, 3, 2:18, Sweet Rose, 1, 2:25¼, Mazatlan 2:26, one sire of four and two speed producing dams), by Piedmont 2:17¼, sire of twenty-five in 2:30 list, and the dams of Fanny Wilcox 2:10¼ and Alta Vela 2:11¼); second dam Beautiful Bells 2:29½, the queen of broodmares, dam of eleven in the list, including Adbell 2:23, the champion yearling, Belleflower 2:12¼, Belsire 2:18, Bell Boy 2:19¼, Bow Bells 2:19¼, Hinda Rose 2:19½, Palo Alto Bell 2:22¼, Monbells 2:23¼, St. Bel 2:24¼ and

by imported Hercules (by Kingston, from a mare by Toscar), out of a mare by Langford, sire of the dam of Joe Arthurton 2:20½ and Lillian Wilkes 2:17¼ (dam of Guy Axworthy 2:08¼, the champion four-year-old trotting stallion of 1906, Lilly Stranger 2:15¼ and Guy Thistle 2:18¼, sire of Lotta 2:08¼). Langford was by Williamson's Belmont, out of Liz Givens by imported Glencoe. Moormont's granddam, Beautiful Bells, stands alone as the dam of the handsomest type of trotters in America as well as the fastest. Her son Chimes has 100 in the 2:30 list, including The Abbot 2:03¼, The Monk 2:05¼, Fantasy (4) 2:06, Chimes Bell 2:09¼, Shadow Chimes 2:05, Council Chimes 2:07½, Dandy Chimes 2:07½, Merry Chimes 2:08½, Ed. Easton 2:09¼; his daughters produced Lady of the Manor 2:04¼, The Friend 2:05¼, etc. Bow Bells 2:19¼ sired forty-seven, including Beausant 2:06½, Billy Andrews 2:06½, Matin Bells 2:06½ and Bellwood 2:076. Adbell (1) 2:23, sired twenty-four, including Miss Adbell 2:09¼ and Rowellan 2:09¼; Electric Bell sired twenty-five, including Captor 2:09¼. For smooth, frictionless action, solid color, splendid limbs and perfect dispositions, Electioneer-Beautiful Bells family is unexcelled by any other in the United States.

Moormont's dam, Rosemont, was conceded by all horsemen to be the handsomest daughter of Beautiful Bells 2:29½. She would have won a blue ribbon in any horse show in America. Senator Stanford paid a large sum for her sire, Piedmont 2:17¼, after he had demonstrated his wonderful racing abilities. He was a horse of size, substance, style, excellent bone and as pure gaited a trotter as ever was led by a halter. He was out of a great speed-producing mare, Mag Ferguson. She being also the dam of Almont Eagle 2:27 (sire of Parnell 2:29¼, etc.) and Mammoth, sire of five, and the dams of Marjorie 2:13¼, Pussy Wilkes 2:15¼ and Fannie McGuire 2:17¼. Mag Ferguson also produced the dams of Friendship 2:17¼, Edith Wilkes 2:19¼, Al-

Worthy (3) 2:29½) was out of Evemont by Piedmont 2:17¼ and this daughter of Piedmont also produced Fanny Wilcox 2:10¼, Lizziemont 2:16¼, Boozer 2:22¼ and Quoddy 2:28¼.

Moormont's pedigree represents the acme of breeding; all successful breeders of trotting horses today, those who send to the races horses that are capable of winning in the best of company, are advocates of breeding from sires bred as he is. The blood of Electioneer, Almont, The Moor, Cassius M. Clay and representatives of the best thoroughbred families that were noted for their intelligence, trotting action, weight carrying powers and speed, such as Williamson's Belmont, imported Hercules, Bassinger and imported Glencoe, when blended have given us the greatest speed producing broodmares, such as Beautiful Bells 2:29½, Minnehaha, Green Mountain Maid, Mag Ferguson and Rosemont. It is the union that has given strength, beauty, size, manners, soundness and speed to the greatest of trotters. Moormont is no exception. He is a handsome bay horse with black points, foaled in 1901, stands 16 hands high and weighs 1,200 pounds. He represents the best type of Palo Alto breeding. He has every qualification one should expect from studying his rich pedigree. He has style, action, intelligence, a splendid disposition and is in every respect a high class stallion. His colts are all of good size, good color, strongly made and evenly proportioned. As an outcross for mares carrying the blood of Geo. Wilkes 2:22, Director 2:17, Steinway 2:25¼, Belmont 64, Mambrino Patchen or any of the other great sires, Moormont should prove invaluable. I will stand him for the season of 1908 at the Fashion Stables, Chico, at \$25 for the season. The best of care taken of mares, but no responsibility assumed for accidents or escapes. For further particulars address

L. B. DANIELS,
Barnard Livery Co., Chico, Cal.

Robert Direct 0883 and Best Policy 42378

Two Grand Representatives of the Leading Trotting and Pacing Families.

When it comes to trotting or pacing, the families that are always "forging to the front" never become unfashionable, so the Directs are the leaders of fashion. I watched the wonderful career of Direct 2:05½ as a trotter and as a pacer, and, after his departure East to James Butler's farm in New York, he fulfilled every promise as a sire. His death a short time ago left a void in the ranks of great progenitors of speed, and I take pleasure in knowing that I used good judgment in breeding my favorite mare, Daisy Basler (sister to Ethel Basler, dam of My Way 2:15¼ and Stonelita 2:15¼) by Robert Basler 2:20 to him, and have the beautiful black stallion, Robert Direct 0883 as the result of this mating, at my place, The Palms, one-

(brother to Bay Rose 2:20½) by Sultan 2:24, and her dam was Miss Rowland by A. W. Richmond, who sired the dams of Italia 2:04¼, New Richmond 2:07¼ and Waldo J. 2:09. Robert Direct is in every respect worthy of this rich breeding. He is one of the largest and handsomest of the Direct family, standing 16 hands and weighing 1,200 pounds. He has size, style, substance, quality and intelligence. His disposition is perfect. He has had very little work, yet he has shown eighths in 15 seconds and a half in 1:04 on a half-mile track. His progeny cannot be excelled and I believe they will do as much to perpetuate the name of the Direct family as any sire in America. There are many young Robert Directs to be seen throughout the central part of California and, without exception, they resemble him to a remarkable degree. The class of mares mated with him

as fashionable as some of the great mares of to-day, was enough to give her all the qualities one looks for in an ideal mare. The 'Electioneer-A. W. Richmond (twice) cross has produced some remarkably fast and game horses—Anteo 2:16¼ (brother to Antevolo 2:1½, sire of Robert Basler), sired the dam of Sonoma Girl 2:05¼, the sensational trotter of 1907! I will breed him to a few mares this year on the following terms: \$30 for the season, or \$50 to insure.

Last year I purchased a stallion that I think represents a line of breeding which will appeal to all lovers of well-bred trotting mares. This horse is called Best Policy 42378, and a glance at his pedigree will convince anyone why I bought him. Individually, he is worthy of such an inheritance. At all points of view he is simply perfect. I will only breed him to a few

Expedition 2:15¼, Axtell 2:12, Electioneer, William L. Harold (twice), George Wilkes (twice), Mambrino Patchen (twice). Every mare in the second and third generations is in the great broodmare table, while his dam has a mark of 2:18¼. C. W. Williams, owner of his sire, Allerton 2:09¼, claims that Best Policy is one of the best trotters he ever raised. The Allerton family is highly esteemed in the Eastern States and in Europe. When racing he was one of the gamest and best seen on the Grand Circuit, and since being retired to the stud he has proved his worth as a progenitor of speed. No other son of Jay Bird approaches him in the number of 2:10, 2:20 and 2:30 performers to his credit. Jay Bird's other sons, Jay Hawker, Eagle Bird and The Tramp are also proving that the blood of George Wilkes and Gusie Wilkes is productive of marvelous

ROBERT DIRECT 0883.

BEST POLICY 42378.

half mile east of Visalia. Direct 2:05½ was a remarkable sire; he was the only horse that sired two winners of the M. and M., and two winners of the C. of C. Stakes. He sired twelve in the 2:10 list, including Directly 2:03¼, Direct Hal 2:04¼, Bonnie Direct 2:05½, King Direct 2:04¼. He sired twenty-eight in 2:15, fifty-three in 2:20 and seventy-nine in 2:30. His sire, Director 2:17, was one of the greatest trotters and best sires that ever lived, for in him was blended the blood of Dictator (brother to Dexter 2:17¼) Hambletonian 10, American Star 14, Mambrino Chief and those great broodmares, Clara, Dolly and Fanny. Direct's dam, Echora 2:23½, was the dam of two and one sire. She was by Echo, another son of Hambletonian 10, and her dam was by Jack Hawkins, son of Boston, the unbeaten race horse of his day. Daisy Basler's sire, Robert Basler 2:20, was by Antevolo 2:19¼, son of Electioneer, out of Elizabeth Basler, a splendid mare I brought from the East. She was by Bill Arp, out of Mary by Warfield, another son of Boston. Daisy Basler's dam was Richmoor by Pasha

was not of the very highest. Standard and registered trotting and pacing mares in this section are few and far between, and Robert Direct's opportunities as a sire were therefore restricted. Had he been making the season in a section where there were scores of royally bred mares there is no doubt that the majority of these would be sent to him just as soon as their owners inspected this horse. He is one that has attracted attention and compelled praise wherever exhibited. Aside from his bloodlines he is all that the most exacting horseman could wish for. I know the family from whence his sire, Direct, comes, and as for Daisy Basler and her ancestors, I have known them for years, and I believe that with a proper environment this mare would have been one of the greatest producers of early and extreme speed in America. Her sister, as noted above, was the dam of two that got marks of 2:15¼, and her sire, Robert Basler 2:20, was out of one of the gamest, most courageous, best limbed, intelligent mares that ever lived. Her breeding while not

choice mares, as I intend to train and race him, for a horse of his disposition, soundness, pure gait and determination to do his best (never making any mistakes), should have an opportunity to show what he can do; besides, his breeding justifies it. Sired by Allerton 2:09¼ (sire of Locanda 2:02, Allerton 2:05½, Charley Hayt 2:06¼, Redlac 2:07½, etc.), son of Jay Bird, that wonderful sire of speed and gameness, and Gussie Wilkes (dam of two) by Mambrino Boy 844. The dam of Best Policy was the good race mare Exine 2:18¼ (sister to Exuente 2:11¼ and Libby Queen 2:15¼) by Expedition 2:15¼ (sire of Bon Voyage 2:12¼, Exalted 2:07 and sixty-one others in 2:30), son of Electioneer and Lady Russell by Harold; the second dam was Euxine (dam of four) by Axtell 2:12 (sire of seven in 2:10 and the dams of six in 2:10), out of Russia 2:28, full sister to Maud S. 2:08¼ by Harwood, out of Miss Russell, dam of Nutwood 2:18¼, by Pilot, Jr. The next dam was Sally Russell by Boston, etc. In Best Policy is combined the blood of the very greatest sires and dams: Allerton 2:09¼, Jay Bird,

results. As Best Policy's dam is without doubt out of the best bred mare by Expedition 2:15¼ and by Allerton 2:09¼, the best of the Jay Bird family, he should prove a great sire, and to go still further, his granddam is the best speed producing daughter of the champion Axtell 2:12, one of the greatest sires of early and extreme speed in America. The great granddam had a record and she was a full sister to the trotting queen, Maud S. 2:08¼. So one could go on, but enough has been shown to demonstrate that if there is anything in breeding Best Policy should be one of the best ever foaled and one whose blood will enrich every other strain it is blended with. We have only a few Allertons on this Coast and it may be years before we will have another that will approach in the slightest degree his rich breeding. I have placed his fee at \$50 for this season and cordially invite all who are interested to come and see these stallions. I believe they will be satisfied that they are all, if not more, than I claim for them. For further particulars address R. O. NEWMAN, Visalia.

Star Pointer 1:59 1-4 -- The World's Champion Race Horse.

"The world's champion race horse!" That's a title thousands, aye, tens of thousands of horses have been striving for, but this fine looking stallion accomplished it. He was in many a turf battle, but came out victorious. Over all kinds of tracks and in all kinds of weather he was always striving to do his best, never faltering, always responding to the encouraging words of his driver. He was carrying on this struggle for five years. He met and defeated all comers, pacing sixty heats at an average of 2:04 1-3, seventeen heats averaging 2:00 16-17, and eight heats averaging 1:59 77-80. His record of 1:59 1-4 stood unbroken for six years, while he still holds the world's race record of 2:00 1-2; this also being the fastest third heat ever paced in a race. His three winning heats in a race 2:02 1-2, 2:03 1-2, 2:03 3-4 are also a world's record. Brown Hal 2:12 1-2, the sire of Star Pointer 1:59 1-4, is the greatest of all pacing sires, having to his credit eighty-five in 2:25 or better, including Star Pointer 1:59 1-4, Hal Dillard 2:04 3-4, Hal Chaffin 2:05 1-4, Elastic Pointer 2:06 1-2, Hal Braden 2:07 1-4, New Richmond 2:07 1-4, Storm 2:08 1-2, Brown Heels 2:09 1-4, Laurel 2:09 1-4, Silver Hal 2:10. Star Pointer's dam was Sweepstakes by Snow Heels, and she is one of the greatest of speed producers, having given to the pacing world besides this champion, Hal Pointer 2:04, Elastic Pointer 2:06 1-2, Cloud Pointer 2:24 1-4, Tennessee Pointer 2:24 1-4, two producing sons and six producing daughters. Brown Hal is a son of Tom Hal, Jr. 16934 (sire of Hal Pointer 2:04 1-2 and the dams of Direct Hal 2:04 1-2, Twinkle 2:05 1-4, Roy R. 2:09 1-4, Blue Ribbon 2:09 1-4, etc.) and Lizzie (dam of Little Brown Jug 2:11 1-4, Brown Hal 2:12 1-2, Directors Jug 2:29 1-2 and Lizzie Moore, dam of Moorella 2:10 1-4 and Moorena 2:24 and the dam of Isabel 2:13 1-2) by John Netherland.

As a sire Star Pointer has proven conclusively that he transmits to his get the extreme speed and race horse qualities which earned for him the

championship title. He is already credited with such famous horses as Morning Star 2:03, (the handsomest horse living, and C. K. G. Billings, who owned him, claimed that of all the horses he ever owned, there never was one that had more intelligence or was a nicer driving horse than this

heats ever paced by a green pacing mare. So one might go on enumerating the performances of his progeny. The greatness of the Hals is not measured by the numbers in the 2:30 list but by the hundreds of the representatives of this family which are to be found in Tennessee and Kentucky.

STAR POINTER 1:59 1-4.

remarkably fast pacer), Joe Pointer 2:05 1-4, Sidney Pointer 2:07 1-4 (sire of Angus Pointer 2:01 1-4, one of the greatest campaigners in the annals of racing), Schley Pointer 2:08, etc. Star Pointer's daughter Alice Pointer 2:05 1-4 made her debut in 1907 and has to her credit the fastest three

For years they have been in demand and the enthusiasm kindled in the minds of all the farmers and horse breeders as well as the citizens in the cities and towns whenever one of the Hals start in a race is almost incomprehensible to people who have never given the subject of horse

breeding and development a thought. The Hals, when bred to mares which trace to Hambletonian 10, have produced speed with remarkable uniformity and Star Pointer 1:59 1-4, the "greatest Hal of all," the "pride of Tennessee," is continuing in the good work. Wherever a pacing mare of the most fashionable trotting horse breeding (and there are hundreds of these appearing every year) has been bred to him, the produce has all the finish, quality, stamina, rich color, size and gameness that he has combined, with a smooth, frictionless pacing gait that seems as untiring as it is remarkably fast. Some of his fastest representatives and many of the most promising of his get that are just being handled are bred this way and when we consider the number of fast pacing mares here by Diablo 2:09 1-4, Steinway 2:25 1-4, Sidney 2:19 1-4, representatives of the fleet Flaxtail and Prompter families, Direct 2:05 1-2, Charles Derby 2:20, A. W. Richmond, McKinney 2:11 1-4, etc., in California, the opportunity to bred them to Star Pointer should not be overlooked. Some people prefer to own pacers, claiming that it is not so difficult to train them as it is to train and gait trotters, and another argument they use is that they can always get good prices for them, and the stakes and purses offered by the associations are almost as large as for trotting horses. There will be many of Star Pointer's progeny seen in 1909 and thereafter on the California Circuit and if all the stories are true of the marvelous speed shown by the youngsters, we have reason to believe that there will be several two-minute pacers that will have for their sire Star Pointer 1:59 1-4.

His service fee for 1908 will be \$100 with usual return privilege. The best of care taken of mares and good pasturage will be found for all consigned to this stallion. For further particulars address CHAS. DE RYDER, manager, Pleasanton, Cal.

ZOMBRO, 3, 2:13 -- The Greatest Blue Ribbon Winner at the Leading Horse Shows on the Pacific Coast!

SIRED BY ZOMBRO.

AS A RACEHORSE— Zombro won more money than any other son of McKinney 2:11 1-4 up to the time he was retired to the stud.

AS A SIRE— Zombro leads all sons of McKinney and every year his reputation increases. He led all other stallions on the Pacific Coast in 1907, having to his credit no less than nine with new standard records, eight of these race records and seven better than 2:20. No other stallion in America has put seven in the 2:20 list this year, and even the great McKinney has not so many new standard performers. Zombro has two new 2:10 performers and three new 2:15 performers.

Zombro is also acknowledged to be one of the greatest speed producers in America. His progeny have great uniformity, nearly every one a bay or brown, with a few blacks, and they are splendidly muscled, the best of limbs and feet, perfect disposi-

tions and have style and action, gameness and great natural speed.

Zombro will make the season of 1908 at the home of his breeder and owner, George T. Beckers, at 3949 South Figueroa street, Los Angeles.

His service fee will be \$50, a price within the reach of all owners of good mares, and the owners

of any of the get of Zombro can always find buyers and a good profit can be depended upon over and above the price of breeding and rearing. Everybody wants a Zombro and the demand far exceeds the supply. Every year the sons and daughters of this splendid son of McKinney 2:11 1-2 and Whisper by Almont Lightning are commanding higher prices.

Sire of Lady McKinney 2:19 $\frac{1}{2}$, McKinney Belle 2:30.

Will make the Season of 1908 at SANTA ROSA, CAL.

FEE: \$35 for the Season.

Apply to or address

RICHARD ABLES, Santa Rosa, Cal.

DEL CORONADO 2:09 $\frac{3}{4}$

Del Coronado 2:09 $\frac{3}{4}$

Reg. No. 45122. By McKinney 2:11 $\frac{1}{2}$, dam Johanna Treat by Thos. Rysdyk 2:28. Winner of the fastest 3 heats ever trotted by a stallion in California. Winner first premium at the California State Fair 1907. Winner Blue Ribbons, Horse Shows at Los Angeles Fiesta, Horse Show 1904 and first prize at both the Pasadena and Los Angeles Horse Shows 1906. 15.3 hands, weighs 1150 lbs.

Unbeaten on the Track and in the Show Ring.

Carlokin 2:13 $\frac{1}{2}$

Reg. No. 36438. By McKinney 2:11 $\frac{1}{2}$, dam the great brood mare, Carlotta Wilkes (dam of 4 standard performers); second dam, the great mare, Aspasia (dam of 3 standard performers); third dam Miss Buchanan (dam of 1). There are no better blood lines than those contained in Carlokin's pedigree. He is related to all the royal families of the Wilkes tribe, the greatest of all race-winning families.

Copa de Ora 2:07 $\frac{1}{2}$

By Nutwood Wilkes 2:16 $\frac{1}{2}$, dam Atherine 2:16 $\frac{3}{4}$ by Patron 2:16 $\frac{1}{2}$ (son of Pancoast 2:23 $\frac{1}{2}$ and Beatrice, dam of Prodigal 2:16 $\frac{1}{2}$); second dam Athene, etc. He is a beautiful light bay stallion, stands 15.3 $\frac{1}{2}$ hands, weighs 1100 pounds. He is one of the finest individuals ever seen on the California Circuit. He was one of the gamest and best horses out 1907. He is a typical show horse and paces without toe weights or hoppers. His breeding is ultra-fashionable. The combination of Wilkes-Nutwood-Patron-Pancoast-Harold and Pilot Jr. blood is unequalled by any other sire in the United States, and it is a foregone conclusion that next year this great horse will get a mark of 2:02 or better. He will be allowed to serve but 15 mares during this season.

Murray M. (3) 2:14

By Hambletonian Wilkes 1679, dam Anna Belle 2:27 $\frac{1}{2}$ by Dawn 2:18 $\frac{1}{2}$. Winner Pacific Breeders Futurity, 1904, \$6000.

The above horses will make Season of 1908

—AT—

Agricultural Park, Los Angeles, Cal.

Del Coronado, \$60; Carlokin, \$50

Vassar

Race Rec. 2:07. A great individual. Full brother to Reg. No. 12042. and Proven Sire. Belle Vara 2:08 $\frac{1}{2}$. Sired by Vatican 2:29 $\frac{1}{2}$. He by Belmont 64. First dam Nell, dam of 12 in the list, 4 with race records better than 2:10, etc., etc.

Will stand at TOURNAMENT PARK, PASADENA

Fee, \$50. For particulars address

C. C. STANFORD, Manager, Pasadena, Cal.

Welcome Wilkes

By Welcome 24908, pacing race record 2:10 $\frac{1}{2}$, trotting race record 2:27 $\frac{1}{4}$, sire of Cavalier 2:11 $\frac{1}{2}$ and six other standard performers; dam Hera 2:20 $\frac{1}{2}$, by Mambrino Wilkes 6083 (sire Doc Wilkes 2:12 $\frac{1}{2}$ and fifteen others in 2:30 list); next dam Kitty, by Conductor 18779, etc.

Welcome Wilkes is a handsome black stallion, stands 17 hands high and weighs 1,280 pounds. He is an inbred Wilkes and is one of the best representatives of the Wilkes family in this section of the country. He is a large horse of symmetrical conformation, stylish and sound in every particular. With very little training he showed quarters in 35 seconds and demonstrated that he possessed racing speed. He is a horse of excellent disposition, intelligent and in every respect a high-class sire both for roadsters and track horses. He is six years old and his first crop of colts are now two-year-olds. They are all good individuals and have size, style and speed.

WILL MAKE THE SEASON OF 1908, CLAYTON, CONTRA COSTA CO., CAL.

Terms \$20 for the season—with usual return privilege.

For further particulars address,

BARTLETT WRANK, Clayton, Contra Costa County, California.

The Trotting Stallion

Edward McGary

By Zombro 2:11, Greatest producing son of McKinney 2:11 $\frac{1}{2}$.

Dam Diavolo by Diablo 2:09 $\frac{1}{2}$ (sire of Sir Albert 8, 2:03 $\frac{1}{2}$, Sir John 8, 2:04 $\frac{1}{2}$ and 5 others in 2:10 list, 35 in 2:30 list), next dam Lilly Langtry (dam of 2 in 2:15 list) by Nephew, etc.

Season of 1908

AT

Laurel Creek Stock Farm, San Mateo

A highly bred and grand individual.

Fee: \$50 the Season

For further particulars address

K. O'GRADY, San Mateo, Cal.

Milton Gear 2:16 $\frac{1}{2}$

Sired by Harry Gear 2:38 $\frac{1}{2}$ (sire of Harry Logan 2:12 $\frac{1}{2}$, etc.) by Echo 162 (sire 16 in 2:30 list, 11 producing sons, 22 producing daughters, first dam Lulu N. by Don, etc., etc.)

Will make the SEASON OF 1908 at the

Fee: \$25 the Season.

Usual return privilege.

Fresno Fair Grounds.

For further particulars apply to or address

J. DEPOISTER,

Fresno, Cal.

UNIMAK 40936. A McKinney-Director-Nutwood Cross.

The trotting horse, McKinney 2:11½, when retired from the track proved to be a phenomenal sire of trotters and pacers that had phenomenal speed. He was a horse of impressive individuality and whenever he was bred to an intensely trotting bred mare, the produce showed how strongly his characteristics of color, form, gait and disposition were transmitted. McKinney was masculinity in looks: there was nothing effeminate about him. He was a horse all over from the tip of his ears to fetlocks. The late Theo. Winters used to say there never was a stallion that proved his worth as a sire that had the appearance of a mare, and there never was a mare that produced speed that had a neck and head like a stallion. Unimak 40936 is a typical stallion, a typical "McKinney." He stands 16 hands high and weighs about 1,200 pounds. In color he is a beautiful seal brown with near hind foot and coronet white. He has never been worked with a view of giving him a fast race record. He is as pure gaited as any horse that was ever driven, and is naturally fast. He trotted miles in 2:26 with six weeks' work two years ago, and on account of his rapid growth it was not deemed advisable to give him much work. His full brother, Sterling McKinney 2:09¾ (timed in a race in 2:06¼, last eighth in 1¼ seconds), did not display any unusual speed until he was eight years old, and was condemned by all the horsemen in California and in the East. He is now hailed as the logical candidate for the stallion crown. Horsemen who have seen him on the grand circuit declare him to be the best gaited McKinney ever foaled. There is no reason why Unimak and he should not be, for they represent the trinity of the greatest race crosses—McKinney 2:11½, Director 2:17, and Nutwood 2:18¾. The first named the leading sire of 2:10 per-

formers, the second is the founder of one of our greatest race winning families and the third is the greatest sire of standard performers and broodmares that ever lived. Unimak's sire, as stated above, is the mighty McKinney 2:11½; his dam was Twenty-

vania ever raced. Leonardo 2:08¾, dam of the \$30,000 Todd 2:14¾, the Futurity sire. Unimak's second dam was Nettie Nutwood (dam of Hillsdale 2:15, one of the gamest horses ever seen on the California circuit) by Nutwood 2:18¾, sire of Lockheart

fourth dam by Williamson's Belmont (sire of Venture 2:27). With such a speed inheritance is there any room for doubt as to his future as a sire of speed? He has been bred to four mares, and has four living foals that are yearlings. Two of them can be seen at the Pleasanton race track. One is called Nalta W. She has shown eighths at a 2:20 clip, is hardly harness wise, and is the subject of much praise among all horsemen at the track. The other is just as frictionlessly gaited. She is called Royal Orphan, as her mother died shortly after she was foaled. They are perfect likenesses of their sire in form and gait and, like him, they have the sweetest of dispositions. It is a matter of regret that Unimak was not bred to any mares last season when one considers how wonderfully fast his progeny of the preceding year has shown. McKinney's sons have sired Italia 2:04¼, Sherlock Holmes 2:06½, Zephyr 2:07¼, Bystander 2:07½, Delilah 2:08½, Hymettus (3) 2:08½ and and thirty-seven others in the 2:30 list. Director's daughters have produced John A. McKerron 2:04¼, Ozanam 2:07, Little Thorne 2:07, Leonardo 2:08¼, Sterling McKinney 2:09¾, Dollade Wilkes 2:10¼, Oro Wilkes 2:11 and sixty others in 2:30 Nutwood's daughters have produced Custer 2:05¼, Eyelet 2:06¼, Nutwood Grattan 2:07¼, Allanwood 2:07¼, Arion 2:07¾, Consuella S. 2:07¾, Fred Kohl 2:07¾ and 289 others in 2:30. With these three for top crosses on the very stoutest of thoroughbred blood, Unimak should prove a very valuable sire to cross on mares of any known breeding that are of the lighter effeminate type. He will make the season of 1908 in care of J. S. Phippen at the Pleasanton race track. Terms \$30, with usual return privilege. All bills payable before mares are taken away. Address all communications to

J. S. PHIPPEN,
Pleasanton, Cal.

UNIMAK 40936.

third (dam also of Sterling McKinney 2:09¾) by Director 2:17 (sire of Directum 2:05¼, the champion Direct 2:05½, Direction 2:08½, etc., and the dams of John A. McKerron 2:04½, the wagon champion, Ozanam 2:07, the winner of the greatest Transly-

2:08½, former holder of a world's record and the dams of nearly 300 in the 2:30 list; the third dam was by Vick's Ethan Allen, Jr. 2903, sire of Prince Allen 2:27 and the great broodmare, Fannie Rose (dam of two, and the dams of seven in 2:30), and the

HERMOSO.

In Kentucky thousands of dollars are expended yearly in the breeding and developing of saddle horses. The demand always exceeds the supply, hence good prices is the rule. Very little attention has been paid to the saddle horse industry in California because there has been a scarcity of good stallions, and now that this grand looking black

HERMOSO.

stallion Hermoso has arrived at Los Angeles, owners of stylish mares will have the opportunity they have long desired for getting representatives of a high type of horses. Hermoso is registered in the American Saddle Horse Register. His sire is Rex Montgomery 2011, brother to Rex McDonald, ex-champion, and the best known saddle horse in the world. Hermoso's dam was by Gloster Denmark, a noble representative of the Denmark family, the one from whence the majority of the well mannered, stylish, high school saddlers come. Notwithstanding the claims made by enthusiastic thoroughbred horse fanciers regarding the breeding of saddle horses, that a thoroughbred stallion is best, experience has taught horse breeders that this is not true, for when a man wants a saddle horse he wants one that is gentle, kind, never excitable and nervous, always level headed and intelligent and has the faculty of

understanding what is expected of him. That is why the highest type of saddle stallions that are registered in the stallion register are patronized so extensively by owners of good mares, feeling confident they are on the road to financial success, as well as on the way to getting the highest types of saddlers with a greater certainty than they would if they followed the advice of thoroughbred theorists, who never had any experience as breeders. The colt or filly that is easily trained the various gaits because it is almost second nature is always sired by a saddle stallion, not a trotter nor a thoroughbred race horse. Hermoso is a three-year-old, stands 15½ hands and is a stallion of magnificent proportions, high headed, has deep sloping shoulders, a splendid barrel, heavy quarters, supported on the best of feet and legs. His progeny will be stylish weight packers. It is our intention to breed him to a few approved mares this season, and have placed his service fee at \$50, with usual return privilege. He will be at Agricultural Park, University Station, Los Angeles, and we shall be pleased to show him to all who are interested.

C. T. HEWITT & SON.

LORD DILLON 39587.

It is a usual saying among mankind to emphasize the genealogical connections of some titled person to say: "He is related to royalty." The same applies to the equine race, and Lord Dillon comes nearer the throne than any other stallion in America. He has a trial of 2:28 as a two-year-old. His sire was Sidney Dillon, sire of Lou Dillon 1:58¾, the queen of the trotting world, Ruth Dillon (3) 2:15, the queen of the three-year-old trotters on a half-mile track, Dolly Dillon 2:06¼, Stanley Dillon 2:07¼, Custer 2:05¼, etc. Sidney Dillon was sired by Sidney 2:19¾ (sire of Lena N. 2:05¼, Monterey 2:09¼, Dr. Leek 2:09¼ and 107 others in 2:30 and the dams of Al Bock 2:08, Simassie 2:08½, Birdina 2:08¾, Dan M. 2:09¼, Helen D. 2:09¼, etc.), by Santa Claus 2:17¾, sire of Wm. Penn 2:07¼, etc., out of Sweetness 2:21½ by Volunteer 55. The dam of Lord Dillon was Roblet 2:12 (dam of Bonalet, 3, 2:09¼, ex-queen of the three-year-old pacers; Kate Dillon 2:24¼, Robin Stanley 2:29½, Lord Dillon, trial 2:28, and Kate Dillon, trial 2:08), by Robin 2:22¾ (sire of Robizola 2:12, Roblet 2:12, Fred W. 2:14¼, Black Bart 2:17½, etc.), he by Live Oak

Hero (sire of J. J. 2:12¼, Robin 2:22¾, etc., son of Director 2:17 and Nelly Grant, by Santa Claus 2:17½), out of Bessie, by Nephew 1220; second dam Nelly Nelson by John Nelson; third dam Lizzie by Morgan Rattler. Lord Dillon's granddam was Eveline (dam of Ole 2:10¼, Roblet 2:12, Tietam 2:19, McPherson 2:22 and Maud Fowler 2:21¼, dam of Sonoma Girl 2:05¼, the world's champion green trotter), by Nutwood 2:18¾ (the greatest sire of speed producing daughters of his age), out of a mare by Niagara, sire of the granddam of Klatawah 2:05¼, the king of three-year-olds. With such an

LORD DILLON 39587.

inheritance I have no hesitancy in saying he is the highest bred trotting stallion the world has seen. He is four years old, stands 15½ hands and weighs 1,150 pounds. He is an exceptionally good individual, a line trotter, and must be a producer. No other stallion living or dead has as much championship blood. As shown above, his sire has produced two champions and his dam another, and she is a half sister to the dam of Sonoma Girl 2:05¼, the fastest green trotter and the largest money winner of 1907. I will give \$500 (in five sums of \$100 each) to the breeders of the first five colts by Lord Dillon that take standard records. I will stand him at my place at Santa Rosa for the season of 1908 at a fee of \$25, with return privilege, so if owners of mares want to get a world's champion, they can make no error in breeding to Lord Dillon. Address

DR. J. J. SUMMERFIELD, V. S.,

Santa Rosa, Cal.

GRECO B. 43129, Trial 2:12 1-2.

A Good Son of McKinney, that will Make the Season at the State Fair Grounds, Sacramento.

Throughout the United States there seems to be a great demand for the "McKinneys." On every farm where a colt or filly by McKinney is, the owner takes pride in acknowledging the fact. Sons and daughters of other sires may be romping in the fields beside it, but the orders to the men "rounding them up" for inspection are: "Just bring out that McKinney!" The reason for this is plain. As Hambletonian 10, George Wilkes 2:22, Electioneer 125, Mambrino Patchen, Mambrino King and Strathmore have had their day, passed on to make room for others, McKinney now occupies the center of the stage, and as the "spot light" is turned on, horsemen everywhere sit and praise him and his descendants. The era of wonderful mares has not passed away; in fact, it is always with us, and has been since the day the gray mare Lady Sugolk entered the 2:30 list on the old Beacon Course at Hoboken, New Jersey, on October 13, 1845, when, driven by Dave Bryan, she became the trotting queen by entering the charmed 2:30 circle and made a record of 2:29½. We have had eighteen trotters to hold championship honors, but the mares lead, and of the nine that held it we find the 2:20 list was first entered by Flora Temple 2:19¾, the 2:15 list by Goldsmith Maid 2:14, the 2:10 list by Maud S. 2:08¾, the 2:05 list by Nancy Hanks 2:04, and the two-minute list by Lou Dillon 1:58½. When a stallion by McKinney 2:11¼, out of a half-sister to her, the greatest trotter in the world, is advertised to make the season of 1908, it is a foregone conclusion that that horse must be a good one, and he is; good in every way, color, size, conformation, gait, soundness and speed. His name is Greco B (trial 2:12½). McKinney 2:11¼, his sire, has to his credit Sweet Marie 2:02, Coney 2:02, China Maid 2:05¼, Zolock 2:05¼ (a sire), You Bet 2:07, Kinney Lou 2:07¾, Charley Mac 2:07¾, Mack Mack 2:08, Miss Georgie

2:08½, Jennie Mac 2:09, Hazel Kinney 2:09¼, Lady Mowry 2:09¼, El Milagro 2:09¼, The Roman 2:09½, Coronado 2:09¾, Dr. Book 2:10, 44 in the 2:15 list, 62 in 2:20 and 92 in 2:30. His sons have sired seven, and his daughters have produced five in 2:10, and have to their credit some fifty-six in 2:30. Is it any wonder that McKinney, for his age, is considered the leading sire? The dam of Greco B. was Alein

GRECO B. 43129.

2:26½, and she is also the dam of Sister 2:20 (dam of Sally Pointer 2:06¼) and Mowitza 2:20½, and she was by Anteeo 2:16½ (sire of 54 in 2:30, 16 sires of 84 and 21 dams of 24, including the dams of Sonoma Girl 2:05¼, W. Wood 2:07, Directum Kelly 2:08¼ and Grey Gem 2:09¾). Anteeo 2:16½ was by Electioneer out of Columbine (dam of 4, 5 sires of 126 and the dams of 3 in 2:30) by A. W. Richmond.

Greco B.'s second dam was Lou Milton (dam of Lou Dillon 1:58½, the trotting queen), Redwood 2:21 (a sire of 10 trotters), Alein 2:26 (dam of 2), and Ethel Mack 2:25, by Milton Medium 4782, he by Happy Medium (sire of Nancy Hanks 2:04 and 94 others in 2:30, 69 sires of 438, and 78 dams of 137 in the 2:30 list) out of a mare by Sackett's Hambletonian. Combined with these rare bloodlines from which the fastest and greatest money winners have emanated, Greco B. as an individual is pronounced by all judges to be one of the handsomest sons of his grandly-made sire; in fact, he is in every way a worthy representative of the family. In color he is a solid black, stands fully sixteen hands high, and so well proportioned that he does not look to be that high. In gait, he is a square-gaited line trotter, having splendid knee and hock action, and, had he not been taken sick while on his way East would have obtained a mark of 2:10 or better. Before leaving Pleasanton he had been driven by Charles De Ryder miles in 2:12½.

Greco B. was bred to a number of choicely bred mares, and his progeny, the oldest being three years, show that he transmits his qualities very uniformly. Two have shown quarters at a 2:20 gait trotting and all of them that have been handled are considered worthy of being trained for low records. To sire such youngsters is a credit, and owners of mares who wish to get the blood that flows in the veins of the very fastest in the world, such as Lou Dillon 1:58½, Major Delmar 1:59¾, Sweet Marie 2:02, Nancy Hanks 2:04, Sonoma Girl 2:05¼ (who was also out of an Anteeo mare), should not hesitate one second in sending their mares to Greco B. He will make the season of 1908 at the State Fair Grounds, Sacramento, for the low fee of \$40, and I shall be pleased to give any further information desired regarding him. The best of care taken of mares and special attention paid to mares with foals at foot.

For further particulars address

JOHN QUINN,

3710 Cypress Avenue, Sacramento, Cal.

ZOLOCK 2:05¼ AND R. AMBUSH 2:11¼.

In all that one can fancy as the ideal horse there are few stallions in the United States to compare with Zolock 2:05¼, the stylish looking, well bred son of the "king of trotting sires, McKinney 2:11¼." He is a perfect type of the highest class of the trotting horse, is beautifully proportioned, standing sixteen hands and

ZOLOCK 2:05¼.

weighing nearly 1,200 pounds. In color a rich, seal brown. He has size, speed, substance, gameness and a splendid disposition and is the fastest entire son of McKinney. His dam, Gazelle 2:11½, besides being a great race mare and the fastest daughter of her sire, Gossiper 2:14¾, is also the dam of Zephyr 2:07¼ and Abe Miller 2:21¼ (trial 2:15). Gossiper 2:14¾ was by Simmons 2:28 (sire of 136, including Dr. Madara 2:08, McKaig Simmons 2:08¼, Tregantle 2:09¼, Hesperus 2:09½ and the dams of Fereno 2:05½, Bonnie Direct 2:05¼,

Hal C. 2:05½, Bonnie Steinway 2:06¼, Brenda York (3) 2:08¾, etc.), out of Lady Bryan by Smuggler 2:15 (sire of the dams of Be Sure 2:06¾, Nut Boy 2:07¼, R. Ontime 2:07½, Miss Whitney 2:07½), second dam by a son of Mambrino Patchen 58.

Zolock's dam, Gazelle 2:11½, was out of Gypsy (dam also of Delilah 2:14½, Ed Winship 2:15, Willets 2:17, and Dixie S. 2:27), by General Booth 2:30½ (son of George M. Patch-

en 2:23). Her second dam was Echo Belle by Echo 462, (sire of the dam of Direct 2:05½, etc.); third dam by Lummo, thoroughbred. All of Zolock's get resemble him—having the same finish, style and size—and every one, without exception, that has been trained has shown a lot of speed and gameness and none has gone lame. There is no question but Zolock 2:05¼ for his age is the leading sire of speed on the Pacific Coast. He is the sire of Sherlock Holmes 2:06¼, By-stander 2:07¼, Delilah 2:08, R. Ambush 2:11¼ trotting, Josephine (3) 2:20¼, Zolahka 2:23¼ trotting, Inaugurita 2:25½ trotting, and Dixie W. 2:27 trotting. Besides these the following have shown trial miles the past year: Bouton de Oro 2:11, Glory 2:11¼ trotting, Cleopatra 2:09, Kinney Wood 2:12, Zollie 2:13, Lillian Zolock 2:14, Conchita 2:17 trotting, Red Lock 2:16 trotting, Angeline 2:18, Adalante 2:17, Zolocka (3) 2:15 trotting, McO. D. 2:11¼, Hylock 2:25, Majella 2:25, McNeer 2:25, Denitha 2:25, Meinciner 2:20 trotting, Bolock 2:26 trot-

ting, Bonnie June 2:27 trotting, Izalco 2:30 trotting, and many others that have shown miles in 2:30. Zolock, after a heavy season in the stud, was taken up and handled five weeks and at Arizona equalled his record of 2:05¼. More of his progeny are known to be ready to drop in the 2:10 list than those of any other horse in California. The get of McKinney 2:11¼ and his best sons are bringing the highest prices at private sales and in the auction ring. That is why owners of good mares cannot make a mistake in breeding to Zolock. He will make the season of 1908 at Wal-

la Walla, Washington, at a fee of \$75 with usual return privilege.

R. Ambush 2:11¼ is Zolock's best bred and greatest stake winning trotting son and in every respect reflects credit on his sire. His dam, May McKinney, was by the beautiful black stallion Silkwood 2:07, that won a number of races in Los Angeles when competing with the very best horses in California, and Silkwood 2:07 is the

R. Ambush traces twice to Echo through the male and female line. He won a \$5,000 stake last year at the State Fair, Salem, Oregon, and got his mark of 2:11¼ which is no limit of his speed. He will get a much lower mark this year. There are few better formed young stallions than R. Ambush. In color he is a mahogany bay, stands 15.2 and weighs 1,175 pounds. He is as pure a gaited trotter as ever

R. AMBUSH 2:11¼.

sire of eleven, including High Ball 2:08½ and Beechwood 2:08½. The second dam of R. Ambush 2:11¼ was Satanelia by McKinney 2:11¼. (Here we get a double cross of the greatest living sire.) The third dam is Laurell Inca (dam of Sir Gird 2:16¼) by Inca 557 (son of Woodford Mambrino and Gretchen, dam of Romero 2:19½, etc., by Mambrino Pilot 29, etc.); fourth dam Fairy Queen (dam of Pink 2:23½) by Echo (sire of the dams of Direct 2:05½, Captain Derby 2:06½, Rex Alto 2:07¾, Loupe 2:09¾, etc.).

lived and as he represents the very highest class of breeding and the most prominent trotting families that are noted for early maturity and early and extreme speed, he is destined to be a famous sire.

R. Ambush will be at Salem, Oregon, April 1, where he will be allowed to serve a very limited number of mares before filling his engagements on the racing circuit. RUTHERFORD & YOUNG, 228 East street, between Second and Third, San Bernardino, Cal.

& CO.**

Western Horse Market

297 Valencia Street, S. F.

We will sell at auction, at our sales stables, on Tuesday, February 25, 1908, 150 head of Eastern Oregon Percheron mares and geldings, from the Kirk Williams ranch. These horses are all young, sound and range in weight from 1,250 to 2,000 pounds. They are sired by imported Percheron stallions, out of the best draft mares to be had.

Sale will commence promptly at 1 P. M. and again in the evening at 8 P. M. All stock guaranteed as represented, and 24 hours will be given to inspect and try horses before full settlement is required.

Our sales for 1906 and 1907 foot up \$938,000. Compare this with the combined sales of all the other dealers.

We buy all grades of workers, from heavy draft to light handy horses. Also trotting bred horses and speed prospects, as well as range stock. We handle the entire output of the Button Ranch, the famous double-square brand, counted the most serviceable horse for his inches produced on the Coast.

WE SELL CONSIGNMENTS ON COMMISSION.

HOW TO BUY AT OUR SALES:

Come early, look the stock over and get a line on what you want before the sale. As we sell a horse every 30 seconds, there is no time for close inspection while before the block. BUT, take note of what is announced concerning each animal.

15,000 Targets Without a Miss

J. W. Akard's claim to the title, "The King of Rifle Shots," is well earned. His performance of breaking 15,000 regulation clay targets without a miss is the greatest exhibition of skill on record. He used one shot only for each target. He threw his targets with his right hand, holding his gun with his left. He used

U. M. C. .22 SHORT CARTRIDGES

whose perfect quality supported his perfect aim. A great per cent of the targets were broken edgewise, so that the diameter of the disc does not truly represent the size of the moving target in the air. Mr. Akard's earlier run of 1,659 small marbles without a miss is nearly twice as long as any previous record on similar objects. In this case, also, he did his own tossing. Remember that Mr. Akard's run of 15,000 targets was unfinished. Mr. Akard is now giving demonstrations on the Coast.

A RECORD THAT IS A RECORD

Adolph Topperwein makes Straight runs of 14,540, 13,599, 13,292 and 13,219 on 2 1/4-inch wooden blocks at 20 foot rise, and misses only 4 out of 50,000 and 9 out of 72,500, shooting

WINCHESTER

SMOKELESS POWDER CARTRIDGES AND .22 CALIBER RIFLES

Just to show that all things ARE POSSIBLE with Winchester .22 Caliber Cartridges and Rifles, and also to prove "Who's Who" in making rifle records IN PUBLIC, Mr. Topperwein recently shot for ten consecutive days at San Antonio, Texas, and made the above world's records for wing shooting with a rifle. He used only two rifles and loaded them himself. These record-breaking, history-making scores were made, without the aid of a notary public, before large crowds of people in a public park—not in a far-away back lot or down on the farm behind the barn.

STRICTLY IN ADVANCE

Money should be sent by Postal Order, draft or letter addressed to F. W. Kelley, P. O. Drawer 447, San Francisco, California.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

THIS IS THE ANNIVERSARY of the birth of Geo. Washington, the greatest American, and one of the greatest men in all history. He used to race horses and bet on them occasionally, but there is no record of his studying a dope sheet or trying to make a business out of something that should be ideal sport. If the Father of his country could revisit it now, and watch the crowd that play the races twelve months in the year, it is very likely he would want to start another revolutionary war.

THE CONGRESS of the National Trotting Association met in New York on the 12th instant. A number of changes were made in the rules, a complete report of which we will not receive until next week, but the telegraph has reported the most important changes. The amateur associations have gained a big victory after several years of effort and can now hold races and charge admission fees without incurring bars or records for their horses. The new rule reads:

"Records cannot be made or bars incurred in contests on the grounds of members for premiums other than money when no entrance fee is collected from entered or competing horses, even if admission is charged at the gate and the grandstand and privileges sold, but all other rules governing public races shall be enforced, and members as well as competitors shall be answerable for violation of same."

Another new rule that will please horse owners and trainers is one which prescribes that all money subscribed, for stakes shall be distributed among the winners, and will prevent associations that secure thirty or forty paid up entries from keeping all but the advertised stake and putting it in their pockets or distributing it for other races.

A new rule was adopted compelling race track associations to send to horsemen making entries to all stakes and purses a correct list of horses actually entered in the forth coming races at least fifteen days previous to the date of the races. The intention and purpose of this rule is to give the entrants a correct idea as to what horses are to compete in the race and not allow race associations to send out a padded entry list as is the custom now.

Besides the changes mentioned several others were made in the rules. A change to Rule 2 adds a fine to the possible penalties of expulsion and suspension that may be imposed for false entries and permits entries to be made by mail, the latter to bear a postmark no later than 11 A. M. of the day following the closing of the entries, and in case a race is not filled and the association member fails to notify the nominators to the race within a time limit of seventy-two hours he is liable to a fine, suspension or expulsion.

Secretary Horace Wilson of Lexington is responsible for the introduction of a new rule which was adopted and provides that horses reputed to have been trained and raced by wearing hobbles should not be allowed to start in a race without them, unless by the special consent of the judges.

When the election of new officers of the association was held Major P. P. Johnston of Lexington, Ky., who has held the office of president for nineteen years, was re-elected. Morgan G. Bulkeley of Hartford, Conn., was elected first vice-president, and the Pacific Coast was honored by the selection of Prof.

E. P. Heald as second vice-president to fill the vacancy caused by the death last year of Capt. N. T. Smith of this city. The election of Prof. Heald to the second vice-presidency caused a vacancy in the Board of Appeals for the Pacific District, and Hon. Ben F. Rush of Suisun was elected to that position. Mr. Rush is the president of the California State Board of Agriculture, a large breeder and is a gentleman well qualified in every way to make an excellent member of this board. As second vice-president, Prof. Heald will be ex-officio a member of the board also. The Board of Appeals now consists of Messrs. A. B. Spreckels, J. C. Kirkpatrick and Ben F. Rush, and will have the entire confidence of all the horsemen on this Coast.

PRESIDENT BEN F. RUSH of the State Agricultural Society is opposed to a seven days' program of races for the State Fair, and thinks five or six days, all in one week, is sufficient. The plan of opening the racing program on Saturday is not a good one, and while the speed committee desire to give seven days of racing, with two harness events each day, the public would be much better pleased were the races all crowded into one week. The plan of having the Occident Stake on Monday and the Stanford Stake the following Saturday gives the three-year-olds that start in both plenty of rest between the two races and has been agreeable to all concerned. Exhibitors of live stock are also greatly in favor of a one week fair. In the East, where the largest of State Fairs and stock shows are held, six days are considered ample to devote to one fair, and the Oregon State Fair, which draws five times the attendance the California Fair has had in recent years, finds six days enough. The directors will please a vast majority of those who exhibit at, and those who attend the California State Fair if they will open the fair on August 31st and close it September 5th. This will give Woodland or some other association the week previous in which to hold its fair and race meeting.

HOPPLES BARRED.

The following resolution was adopted at the annual meeting of the American Trotting Register Association, February 5, 1908:

Whereas, At the annual meeting of the American Trotting Register Association, held on February 6, 1907, a motion was offered and carried as follows:

"Moved by F. E. Marsh, seconded by C. W. Williams, that after the year 1907 records made by trotters or pacers performing in hobbles will not be recognized for the Year Book or for registration purposes by this association. Carried unanimously."

And whereas, It is the belief of the stockholders and directors here present at this the annual meeting of the American Trotting Register Association, that the use of hobbles on horses in trotting and pacing races is a disgrace, and an injury to the whole trotting and pacing horse interest, and that such use should be discouraged in every possible way, therefore it is hereby resolved by this American Trotting Register Association in annual meeting assembled that, in its desire to discountenance such use of hobbles on horses in races, this association shall hereafter, so far as in its power lies, reject all records made by horses using hobbles in races or otherwise, for the purposes of registration.

As it is realized that without the help of the American Trotting Association, the National Trotting Association and the individual members thereof, and of horsemen in general, very little can be done in the way of abolishing the use of hobbles; the co-operation of the two trotting associations and the members thereof and of all horsemen is earnestly asked.

It is also further resolved that a copy of this resolution be sent to the turf papers and to each and every member of the two trotting associations and to each stockholder of this association. Seconded and carried.

The following resolution was also adopted at the meeting:

Whereas, The committee appointed by the president in accordance with a resolution passed at the last annual meeting to look into the question of amendments to improve the standard, have recommended that no change be made at the present time.

And whereas, It is believed by the members of this association that the breed of trotting and pacing horses has been sufficiently established so that it is not now necessary or advisable to go outside of standard rank to produce trotting or pacing horses, and further that to do so will be harmful to said breed, therefore, it is

Resolved, That pursuant to the by-laws in reference to amendments to the rules, notice is hereby given that at some time in the near future, certainly as early if not earlier than the year 1913, all rules governing admission to the standard, except rule 1, shall be eliminated. Seconded and carried.

W. H. KNIGHT, Secretary.

THE PLEASANTON SALE.

One of the biggest auction propositions inaugurated in this State for some time is the horse sale advertised to take place at Pleasanton on the 16th, 17th and 18th of April, under the auspices of the Pleasanton Chamber of Commerce. On the opening day draft horses are to be sold and already about a hundred head have been consigned, among them a lot of pure bred mares of the different draft breeds that should be eagerly snapped up by the farmers of California.

On the second and third days of the sale the trotters and pacers will be sold. There will be nearly two hundred head of these horses, among them many speedy ones whose speed will be shown on the track before the sale.

Among others, Mr. C. L. Griffith will consign ten head sired by Bonnie Direct 2:05½. These are four, five and six-year-olds, and will all show fast at sale time.

Mr. H. W. Meek of San Lorenzo has catalogued two five-year-old mares by Welcome 2:10½, one out of Carmelita, sister to Cricket 2:10, and dam of Cavalier 2:11½, and Babbie 2:13. The other is out of Cricket 2:10, dam of six in the list.

Thos. Ronan will consign four standard bred speed prospects that will show speed under the watch. Mr. Ronan has some of the best bred trotting stock ever brought to the Pacific Coast.

There are many other owners who will consign horses to this big sale, and next week a list of these will be printed which will be added to every week until the day of closing entries, consequently those who intend consigning horses should send their lists in immediately to get the full benefit of advertising.

Fred H. Chase & Co. will be the auctioneers.

DEATH OF BROWN HAL.

Star Pointer's sire, Brown Hal 2:12½, sire of the first horse to beat two minutes, died at Ewell Farm, in Maury county, Tennessee, last Wednesday. As he was foaled in 1879, he lived to the good old horse age of 29 years. Brown Hal was 10 years old when he made his record at Cleveland, Ohio, in a six-heat race, which he won, getting his mark in the third heat. His first standard performer appeared two years later, when five of his get took pacing records from 2:15¼ to 2:23. At the close of 1907 he had 85 standard performers, of which six made their records last year, and four more reduced theirs. Brown Hal was one of the great 2:10 sires, having eleven in that exclusive list, viz.: Star Pointer 1:59¼, Hal Dillard 2:04¾, Star Hal 2:04¾, Hal Chaffin 2:05¼, Elastic Pointer 2:06½, Hal Braden 2:07¼, New Richmond 2:07¼, Storm 2:08¾, Brown Heels 2:09¼, Laurel 2:09¼ and Silver Hal 2:10. Brown Hal is also sire of the dams of Rudy Kip 2:04¼, Hallena Duplex 2:08¾, Carnot 2:08¾ and Cadet 2:09¾. He has 26 sons and 18 daughters that have produced standard speed. Of his 85 standard performers there is not one trotter, and of the 142 performers produced by his sons and daughters only five are trotters. He was a pacing bred Tennessee pacer, and founded the greatest pacing family in the history of the harness horse. He was bred by R. H. Moore of Culleoka, Tenn., was sired by Tom Hal Jr., out of Lizzie, also the dam of Little Brown Jug 2:11½ and the trotter Director's Jug 2:29½. The last named horse was bred by Monroe Salisbury, who purchased Lizzie and brought her to California, where she was bred to Director in 1884.

It will take the pen of "Trotwood" to do justice to an obituary notice of Brown Hal, and all readers of the journals devoted to the trotting and pacing horse will eagerly await "Trotwood's" story of the life and death of this great pacing sire.

ANSWERS TO CORRESPONDENTS.

N. M. Strong, San Bernardino—Ruby H. was bred by S. H. Hoy of Winters. She is by Bayswater Wilkes, and her dam is Smut, the dam of Rita H. 2:11¼ and Brilliantine 2:17¼; second dam by Tecumseh. Mr. Hoy can give you the age of the mare and her full breeding.

F. P. Ogden, Highgrove—The sire of James Madison was Anteeo 2:16½, son of Electioneer. The dam of James Madison was Lucy Patchen by Geo. M. Patchen Jr. 31. The thoroughbred mare Infalible was by Lightning (son of Lexington and Blue Bonnet by imported Hedgeford), out of Laura Bruce by Star Davis. Infalible produced a filly registered as Belle D. by Belmont, son of Lexington, but we cannot find any of her foals registered as Belle B. The trotting stallion St. Bel was by Electioneer, out of Beautiful Bells.

J. S. F., Red Bluff—The Cupid mare, out of Sen Sen 2:28 can be registered when her dam is registered. The other mare is not eligible at present, but if her dam, Emma S., produces another standard trotter she will be eligible upon the registration of Emma S.

Fred Fanning, San Diego—There was a mare called Irene that raced in California in 1892. She is described as a black mare by Dexter Prince, dam Black Dolly by Morris Longfellow. She took a record of 2:25 in San Francisco, but we find no record of her having ever raced at Coronado or San Diego.

NOTES AND NEWS

Neer Girl 2:25 and Lady Sifton 2:25, both by Neernut 2:12½, got matinee records at the last Los Angeles meeting.

The present address of Mr. V. J. Cameron is wanted by Mr. K. O'Grady of San Mateo, who wants to have Viola J., a mare bred by Mr. Cameron, registered.

J. L. Tarlton of Indiana has sold to George H. Estabrook, Denver, Colo., the bay filly Fanny Lawson, by Tregantle, dam Miss Fanny Summers 2:26¼, by Bow Bells. She is engaged in the Western Horseman Stake.

Robt. A. Smith of Los Angeles was more severely injured than first reported when he stopped a runaway horse on the streets of Los Angeles recently. The bones of his leg were broken and he will be laid up for some time.

Mr. William Bradley of New York, who recently purchased Sweet Marie 2:02, is also the owner of Major Delmar 1:59¼ and George G. 2:05¼, and will probably give exhibitions with these three great trotters this season. Sweet Marie has already been sent to W. J. Andrews, who formerly drove her, to be made ready for the campaign of 1908.

Don't forget Fred Chase's combination sale next Monday evening. There are thirty head of good horses, including three or four stallions and some good speed prospects.

George Richardson, a trainer and driver of trotting horses, died recently at Phoenix, Ariz., where he went for his health several years ago. He formerly resided in Ohio, but during all his illness in Arizona steadily refused to say where his relatives could be found, or whether he had any living. He left some property.

Interest is increasing in the trotting and pacing horse all over the country. A revival in this line is now in progress at Oroville, where there is a track and grandstand that have not been in use for years. Several Oroville horse owners have been talking over the matter of organizing a racing association, leasing the old track and putting it in order for training and racing.

The California State Fair will open this year on Saturday, August 29th, and close Saturday, September 5th. There will be seven days of racing, with two harness races each day. The speed committee of the board is now working on a program which will probably be ready next week.

Dr. W. H. Button of Turlock, Cal., sends the stallion Docus D 42259 to the Chase sale, Monday night. Docus D. is by St. Whips, a grandson of Electioneer, dam a producing mare by Daly 2:15, second dam a producing mare by Steinway, third dam by Woodford Mambrino, fourth dam by Abdallah 15. Here is a good stock horse for some one.

The Hudnut Driving Club of Bakersfield will give a matinee tomorrow, February 23d, with three or four races on the card.

The death occurred several weeks ago of Mr. T. H. Fogarty of Bakersfield, one of the enterprising citizens of that town and an enthusiastic horseman. He owned the blue roan stallion Richmond Chief 2:11¼, by Monroe Chief and raced him through the circuit on this coast in 1902. Mr. Fogarty had hosts of friends wherever he was known.

Jos. Sanchez of Hollister has purchased from Robt. I. Orr the finely bred stallion Oro Guy and will place him in the stud for public service.

Albany, Oregon, is planning for a three days' fair and race meeting this summer at the track owned by Mr. S. S. Bailey, owner of Tidal Wave 2:09, who is one of the enterprising citizens of Albany.

A good son of Lynwood W. 2:20, sire of Sonoma Girl 2:05¼, will be sold at Chase's Monday evening. This stallion is seven years old, 16 hands high and is out of a mare by Whalebone, and can be driven by anyone.

C. A. Walker has the Abbotsford Jr. pacer Pilot at Pleasanton and is just starting in to work him. Pilot has been running out and looks strong and rugged. The should be a good money winner in the slow classes, as it is not probable that he will have to meet such fast ones as Inferlotta 2:04¼ and Copa de Oro 2:07¼, both of which were in his class last year.

Charley De Ryder's Prodigal colt, that has been trying to trot fast miles for some time without seeming to get the hang of it, has been put to pacing, and a mile in 2:11 last week is pretty good proof that he is what De Ryder has always claimed him to be—a more than ordinary horse.

Look over the three-year-old filly Alameda by Stam B. 2:11¼, out of Henrietta, by Boodle 2:12½, that is at Fred H. Chase's pavilion and will be sold next Monday night. This filly is entered and paid up on in the Breeders' Futurity and Stanford Stakes.

Charley De Ryder worked the roan trotter Birdson a mile in 2:13, with the last half in 1:05 at Pleasanton last week, and the owner, Thos. Ronan, was naturally greatly pleased. Birdson did the trick so nicely and is coming so fast that 2:10 will not stop him this year.

Some of the best horses driven in this city were purchased at auction. There is a mare now at Pleasanton showing 2:10 speed that sold at one of Fred Chase's auctions a few months ago for a little over \$200. Chase will have another sale next Monday evening, and several good prospects are catalogued.

Better register all your horses that can be registered without further delay. Within a few years, not later than 1913, there will be only one rule under which a horse can be registered as standard, and that is Rule 1—the progeny of a registered horse and a registered dam.

Kentucky won't be fit for a Colonel to live in if the legislation which the reformers are working for is placed on the statutes. There is one bill for prohibition of liquor selling and another for the suppression of all betting on horse races, now before the Kentucky Legislature. Without good "red licker" and "hoss races" Kentucky would be like a lawn in a church yard.

John Madden, one of the leading horse breeders of America, is not so pessimistic as many who think that the prohibition of betting will stop horse racing, and says: "People will go to see the races when the bookmakers are all dead."

G. B. Simpson, owner of that grandly bred and promising young sire Arner 2:17¼, left Pleasanton this week for Chico, where this full brother to Diablo 2:09¼, etc., has been kept in the stud for the past two years, and is very popular. He takes with him a four-year-old filly by Arner that will set fire to the new Chico track unless they keep it watered, as she is fast as a bullet now and improving all the time. Arner is one of the hand-somest sons of Bertha, a broodmare that enjoys the distinction of being the only mare that ever produced four 2:10 performers.

Among those who will consign horses to the big auction at Pleasanton in April under the auspices of the Pleasanton Chamber of Commerce are Chas. De Ryder, H. W. Meek, C. L. Griffith, Thos. Ronan, Jos. Cuicello and others. It is expected that at least 150 trotters and pacers will be sent to the sale. One hundred draft horses have already been consigned.

There is a slight error in the last few lines of the article on Neernut 2:12 ½ and Goldenut 2:11¼, which appeared in the stallion number last week. The former as stated (in a preceding paragraph in the adjoining column) will stand at the barn on Geo. W. Ford's (his owner) place, North Ross street, Santa Ana, and the latter at C. T. Hewitt's barn, Agricultural Park, University Station, Los Angeles, Cal. Goldenut is undoubtedly the finest type of a saddle horse sire ever bred in California, and his book will be filled as soon as owners of good stylish mares see him.

A Denver paper of recent date says: "Although willing to pay \$10,000 if necessary, George H. Estabrook, the Denver horseman, failed to get George Gano, one of the best sons of Gambetta Wilkes, sold at Lexington yesterday. Walter R. Cox purchased the horse for an Easterner for \$7,500 and Mr. Estabrook, who was unusually anxious to acquire the animal, is immensely disappointed and cannot account for the prize escaping his agent, R. S. Stater. The Denverite led off with a bid of \$7,300 and was perfectly willing to go higher."

Charley Morgan is driving his horses on the Park Speedway these days hitched to a neat speed cart that he bought at Kenney's, 531 Valencia street.

The Livermore Horse Parade and Stallion Show which is set for March 7th, will be worth going a long way to see. From present indications there will be at least 200 horses in the parade. Some of the best horses at Pleasanton track will be shown and it is possible that the famous stallion Star Pointer, the first horse to beat two minutes, will lead the light harness horse division. The display of draft stock should be very fine, as the horse breeders of the Livermore Valley, by purchasing many fine stallions in recent years, have put that valley again in line as one of the leading draft horse-breeding centers of the coast. Secretary Gomer of Livermore has sent out entry blanks, and will gladly mail them to any one who will drop him a postal card with the address on. "Bill" McDonald is to do the announcing during the parade, and no man in the country is more competent to handle that end of the show. The Livermore Concert Band will furnish music for the occasion.

Some horseman living at Los Olivos, Santa Barbara county, has sent to this office for a stallion service book, but neglected to sign his name to the letter. If this item is read by him he will understand why he does not receive the book.

E. D. Dudley of Dixon has named four of his broodmares in the American Horse Breeders' \$10,000 Futurity, among them his great broodmare Bee Sterling, dam of McFadyen (2) 2:15½, and Friskerina (3) 2:13¼. Mr. F. E. Alley of Roseburg, Oregon, has named ten good mares in the same stake.

A good 2:20 class trotter, one that shows form enough to race against horses in the 2:12 class, can earn over \$5,000 net on the Pacific Coast Circuit this year, provided he does as the pacer, Sir John S., did last season, who was entered all through the circuit and won all his starts. The Breeders meeting has offered \$2,000 for a 2:20 class trot, the Oregon fair \$5,000 for a 2:14 trot, the Portland fair \$2,500 for a 2:13 trot, the Washington fair \$2,500 for a 2:12 trot, and the Spokane fair \$1,000 for a 2:14 trot. These five races total \$13,000, or \$6,500 in first money to the winner of them all. Deducting \$1,300 entrance money, the net winnings would be \$5,200, enough to buy a good forty-acre farm and build a house on it.

There will be a pretty good circuit on the Pacific Coast even though there are no more meetings than those already announced. At the P. C. T. H. B. A.'s meetings, the California, Oregon and Washington State Fairs, and the Spokane Interstate Fair, a total of about \$80,000 will be given in purses and stakes for trotters and pacers.

Mastic, a fine Belgian stallion owned by the Woodland Belgian Horse Association, died February 5th from impaction of the bowels. Mastic was purchased four years ago by an association of farmers, who have secured many fine colts by him from their best draft mares. Mastic won second prize at the International Stock Show in 1903, and later took second at the California State Fair.

Mr. F. E. Alley of Roseburg, Oregon, who recently purchased Dumont S. 2:20, the handsome full brother to Sonoma Girl 2:05¼, from Thos. Charlton & Son of Ukiah, sent William Duncan of Colusa to attend to shipping the horse to his new home, and Mr. Duncan left Ukiah with him on Friday of last week, stopping at Santa Rosa to put in the car a filly that Mr. Alley had purchased from Frank Turner of the Santa Rosa Stock Farm. Many breeders here hated to see Dumont S. go out of the State, and they would certainly have bred many mares to him had he stood in a more central location than Ukiah while here.

The Lake Erie Circuit, where the purses are uniformly \$400, has fixed the following dates: Oil City, July 14-17; Titusville, July 21-24; Corry, July 28-31; Erie, August 3-7; Jamestown, August 11-14; Bradford, August 18-21; Hornell, August 25-28, and Conneaut Lake, September 1-4.

Cleveland has withdrawn from the Grand Circuit and Kalamazoo has been assigned the dates from August 3d to 7th. President Deveraux of the Cleveland Club says that ever since the passage of the State law several years ago prohibiting the sale of pools they have lost money on the races, and as a result it was decided to withdraw from the Grand Circuit.

Col. St. Clair, a yearling colt by Searchlight, sold for \$500 at the Lexington sale last week.

Geo. H. Fox, proprietor of the Mokelumne Stock Farm, at Clements, Cal., and who has bred as large a proportion of handsome fast horses for the number raised on his farm as any man in California, proposes to hold a clearing out sale of his stock some time in April. He will sell all the horses he owns, except three, consigning about fifteen head to the sale. He has on his farm the blood of Pancoast, now one of the most popular strains, Cresceus 2:02¼, Silver Bow 2:16, that of the great broodmare Grace, by Buccaneer, and other speedy and handsome strains. The only horses he will keep are a couple to do his farm work with, and his three-year-old colt by Cresceus out of Silpan by Silver Bow, second dam Kitty Fox by Pancoast. This colt is entered in the Occident Stake, and is such a promising youngster that Mr. Fox cannot make up his mind to part with him at an auction sale.

Persimmon, the horse that won King Edward's first Derby in 1896, is dead. He broke his hip about three weeks ago. The horse was slung and it was hoped he would be saved, two veterinary surgeons being placed in charge of him. Before the accident Persimmon was valued at \$200,000. It is estimated that but for the accident his earnings as a sire during the year would have amounted to \$35,000. During seven years he was represented on the turf his get won 140 races of the total value of \$624,075.

The new track and fairgrounds at Chico are to be known as the Chico Driving Park. Work on the track is being pushed along and horses will soon be speeding over it.

Drink Jackson's Napa Soda.

The Pelasanton Horse Sale, under the auspices of the Chamber of Commerce of that live town, promises to be a big success. It is likely that 300 horses will be catalogued and buyers be present from all parts of the coast and several from the East. Fred H. Chase & Co. are to act as auctioneers and Jack Fronefield has been engaged especially to attend to securing entries to the sale.

This office received a pleasant call last week from Mr. W. P. Murray of Cleveland, who has been spending the greater part of the winter in and around Los Angeles. Mr. Murray is one of those enthusiastic horsemen with whom it is a pleasure to converse. He has a large business in Cleveland, and takes his recreation and exercise on Sundays on a farm of about four hundred acres a few miles out where he has the good stallion Reuben S. 2:13½, by Guy Wilkes, a trotter that raced well last season and brought home some of the money, reducing his previous record five full seconds. Reuben S. is by Guy Wilkes out of Bifty Duck by Bezant. Mr. Murray owns a number of fine brood mares, among them Italia 2:14½, trotting, and 2:04½ pacing, by Zambro 2:11. He is breeding her to Moko, and she will foal soon. Mr. Murray left for Los Angeles this week to be in time for the matinee racing there today by the Los Angeles Driving Club. He is a prominent member of the famous Cleveland Driving Club, and often drives his own horses although a trifle over weight.

Mr. M. McIntire of Kelseyville, Cal., is the owner of the stallion Thurston by Tago 32975, from Belle Emmet by Mambrino Wilkes, second dam Lady Belle by Hambletonian 725, third dam by Geo. M. Patchen Jr., fourth dam Lady Vernon. Thurston is a seal-brown horse, stands 15.3 and has a great deal of natural trotting speed, although he has not been trained.

Several persons have recently asked for the breeding of Exel, the handsome son of Axtell 2:12, years ago, and is now owned by Mr. E. J. Molero of this city. Ex el was sired by Axtell 2:12, champion three-year-old of his day. Exel's dam is by Simmons 2:23, second dam by Artillery 2:21, third dam by Peavine 513, fourth dam by Brinker's Drennon, fifth dam Copperbottom, sixth dam by a son of Blackburn's Whip, seventh dam by Post Boy, son of Henry, eighth dam by Bishop's Hambletonian.

THE SEASON OF 1908.

A mighty good start has been made for the harness racing season of 1908 by the North Pacific Circuit, and the programs for four of the principal meetings were printed in our issue of last week. These programs, with that already announced by the Breeders' Association, and advertised in these columns, make a total of over \$80,000 in stakes and purses which those who race at these meetings will have to race for, and when the California State Fair, and the several California associations which will give meetings this year, announce their programs, the money in sight will doubtless bring out a larger field of horses than raced last year on this coast.

We offer the suggestion again that there be no further delay on the part of California associations in announcing programs. Owners are entitled to know now when and where meetings will be held, how much money and what classes are to be given, and there should be no further delay in the public announcement of meetings. When owners and trainers know what there is to race for, they know what horses to spend their money and time on, and as it is an established fact that late announcements make small entry lists, associations whose directors are wise will get their programs before the public as early as possible. The North Pacific Circuit is bound to be a big success this year, and if harness racing is tame in California it will be because our associations here are asleep.

A DASTARDLY DEED.

'San Rafael, February 18.—A. W. Foster, former president of the California Northwestern Railway and Regent of the State University, is lamenting the loss of three valuable horses, which were found dead in their paddock this morning, each with a bullet hole in the head and a deep knife wound across the throat. A mask, made from a pocket handkerchief and bearing the initial "M" in one corner, was found near one of the slaughtered animals.

Aside from this, the authorities have no clew toward solving the mystery. Foster is also at a loss to explain the crime, as he is aware of no personal enemies in San Rafael who would resort to such an act for the sake of vengeance. The three horses killed were among the finest of Foster's extensive stable, especially Don, who was Miss Lulu Foster's favorite saddle horse, and has been a conspicuous figure in many society paper chases of this county. Foster has engaged a special detective upon the case, who, in conjunction with Constable Harry Lucas, is making every effort to detect the guilty person.

Only One "BROMO QUININE."

That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the world over to Cure a Cold in One Day. 25 cents.

SECRETARY IS DEAD.

The death is announced of Secretary 28378, a son of Director 2:17, that would have ranked as one of the best sires ever bred in California had he been favored with the opportunities which come to some stallions. Secretary was foaled in 1886 and bred by D. S. Frasier of Petaluma. He was out of the Martin mare, a daughter of Volunteer 55. He was trained as a yearling and won second money in a mile dash for yearlings at Petaluma in 1887, coming second to George V. by Sidney in 2:57½ on the 1st day of September. As a two-year-old he showed great speed but wrenched an ankle, and this kept him from the track ever after. He was owned by Mr. Frasier, who made several seasons in the stud with him, but acquired the reputation of being an uncertain foal-getter and the patronage extended him was not large. Seven or eight years ago he became the property of Mr. P. W. Bellingall of Oakland, who owns several very fine mares by him, and an effort was made to train Secretary with the idea of giving him a record. The ankle showed weakness, however, and Mr. Bellingall made the late Jos. Cairn Simpson a present of the stallion. Mr. Simpson sent Secretary to the Haggin ranch at Sacramento, where he was bred to a number of mares. After the death of Mr. Simpson the horse was sent back to Oakland, when the Haggin farm was dispersed, and Secretary was kept in Oakland until his death.

Secretary was famous among California breeders for siring horses of elegant form and great style. It takes a good price to induce any one to part with a daughter of Secretary, and they will undoubtedly attain high reputations as brood mares.

With limited opportunities Secretary is the sire of eleven standard performers, of which eight are trotters and three pacers. The fastest of his get is the pacer Frank 2:10¼, a gelding formerly owned by Mr. Bellingall that could pace a quarter in 30 seconds, and without any change of harness or weight of any kind trot a quarter at the same speed. The trotters to Secretary's credit are Hazel Y. 2:17, Auditor 2:19½, Dan Frasier 2:20¼, Lilith 2:22¼, Legation 2:23½, Tom Thumb 2:26¼, Secret 2:26½, and Josephine 2:27½, besides the pacers Frank 2:10¼, Sweitzer 2:13½, and Butcher Boy 2:17¼. Secretary was also sire of the dam of Diodine 2:10¼.

PROFESSIONAL DRIVERS' ASSOCIATION MEETS.

The fifth annual meeting of the Professional Drivers' Benevolent and Protective Association was held at the Ashland House, New York, during the Mid-winter sale. At the ensuing election of officers, Edward Benyon of Lexington, Ky., was chosen president, in place of Harry J. Davis of Camden, N. J., who has filled that office since the inception of the organization. Mr. Davis was elected first vice-president, Walter Palmer of Ottawa, Ill., second vice-president, and it is understood that Miss J. B. Miller of Camden will continue to hold the position of secretary and treasurer. The directors elected were: Thomas W. Murphy, Syosset, L. I.; Charles Dean, Palatine, Ill.; Frank Covington, Norfolk, Va.; Ed. M. Gillies, Massachusetts; F. E. Davis, Hoboken, N. J.; James Carpenter, Readville, Mass.; Amos Rathbun, Syracuse, N. Y.; W. L. Snow, Hornell, N. Y.; Charles Atkinson, Baltimore; Eben Clark, Allentown, Pa.; F. C. Colby, Detroit; W. K. Smith, Tiffin, O.; Henry Hawkins, Decatur, Ill.; Andy McDowell, New York, and C. N. Payne, Philadelphia.

The treasurer's report showed the association to be in a healthy condition financially, there being a balance of \$1,071.62 in the treasury, notwithstanding the fact that the sum of \$730 was disbursed for benevolent purposes the last year.

OLD DIRECTORS BACK.

The terms of Geo. W. Kingsbury, L. J. Rose Jr. and Ben Rush, directors of the California State Board of Agriculture, having expired on the first of the present month, Governor Gillett has filled their places by the following appointments: In place of Mr. Kingsbury he has appointed Chas. W. Paine of Sacramento; in place of L. J. Rose Jr. Frank H. Burke of San Francisco has been appointed, and Mr. Rush, president of the board, has been named to succeed himself. The new appointees, Messrs. Burke and Paine, were former members of the board, are thoroughly familiar with all business matters of the organization and will make valuable members. The outlook for the best fair this year in the history of the State is excellent. Secretary Filcher will make an extra effort to have the exhibits larger and better than ever in all departments.

PLEASANTON MATINEE.

Entries for the matinee racing to be given at Pleasanton today, under the auspices of the local matinee club, are as follows:

Class A, pacing—Senator Clark, Bonner Belle, Polly Gar, Don Diablo, Freely Red and King Cadenza.

Class A, trotting—Kelley, Lady Inez, Princess W. and Audmark.

Class A, trot—Zella Mack, Alto McKinney, Lady Diablo, Antoinette, Peter Pan.

Class C, trot—Direct D, The Angelus, McKinney Belle.

A KINNEY LOU FOR ARIZONA.

Budd Doble, the owner of the great trotting stallion Kinney Lou 2:07¾, has sold to Charles A. Smith of Phoenix, Ariz., a royally bred son of his noted horse. This colt is a three-year-old. His first dam is by Nearest 2:22½, a full brother to the great John A. McKerron 2:04½, the fastest trotting stallion of the famous Wilkes family, and the second fastest trotting stallion in the world. His second dam is by Anteo 2:16½, one of the best sons of the world's champion sire of champions, the immortal Electioneer. Anteo, besides being a great sire of trotters himself, is a great broodmare sire as well, his daughters having produced such great race horses as Sonoma Girl 2:05¼, the largest money-winning trotter of 1907, who sold for \$26,000 last summer, and is considered by all to be the fastest trotter ever foaled, not barring the wonderful Lou Dillon 1:58½.

His third dam is by the only strictly thoroughbred stallion with a trotting record, Venture 2:27, sire of the dam of Directum 2:05¼, ex-champion trotting stallion.

But two of the get of Kinney Lou have ever received a season's training. They are the four-year-old Diamond Mc, who trotted a mile in 2:16, and the two-year-old filly, Debutant, who stepped a mile in 2:26 in a race.

Mr. Smith also owns that great son of Dexter Prince, Senator L., who holds the world's four-mile trotting record of 10:12, made a dozen years ago over our old race track at Agricultural Park, driven by the Oregon driver, Sam Casto.

This young son of Kinney Lou should be a happy cross for the many daughters of the game Senator L., as well as many other mares in Arizona of Electioneer blood, there being many sons and grandsons of that great horse in that section.

By the way, it is worth mentioning that there is no place in the wide world better suited for raising and developing the trotting race horse than the vicinity of the beautiful little city of Phoenix, and in no distant day we shall expect to read of many winners that were bred in that corner of the world.

Mr. Smith is to be congratulated upon his selection, and the breeders of Phoenix and vicinity are to be congratulated upon the opportunity they will now have to breed to such a royally bred young stallion. While there are a number of well bred horses in the beautiful Salt River Valley, there are none of the same blood lines as this fellow, and there is no doubt that his advent into their midst will be fully appreciated.—San Jose Times.

MORE THAN SATISFIED.

John Splan, who had more to do with selling the three-year-old colt The Harvester at auction for \$9,000 than any one else, has received a letter from the buyer, Mr. August Uihlein of Milwaukee, from which the following is an extract:

"In reply to your favor of the 4th inst. I wish to say that I feel that I struck it rich for once in securing The Harvester. We paid the Adams Express Company \$82.50 and before thirty hours he was in Milwaukee, unloaded in good shape, and I at once had him examined by an expert veterinary, who pronounced him absolutely sound and in good health. The more I see of him the better I like him, and to say that I am in love with him is putting it mild. The gents down in Kentucky speak of the height of a horse, and we Dutchmen up this way generally ask what does he weigh. Well, I scaled him about half an hour before your letter arrived. I was astonished at the result. I had the scales balanced again and had him weighed the second time, and in both instances he scaled 1,075 pounds. Say, but what a fine horse he is—as to color, breeding, mane and tail, size, etc., and last, but not least, didn't he show us the speed in the sale ring and give me the nerve to go \$9,000 on him?"

GOOD IF TRUE.

A Belgian veterinary surgeon reports that he has cured confirmed glanders by giving at first five and then three granules of the sulphate of arseniate of strychnine every two hours for ten days, the dose then being reduced to two granules. A solution of sulphate of zinc was injected into the nostrils, and the farcy balls stutzerized. There had been no return of the disease for a year at the time the report was made. Distinguished veterinarians, however, seem to think the disease liable to reappear at any time, and that the only safe course is to kill an animal known to be suffering from this malady. It is to be hoped, however, that experiments with the treatment of the Belgian will be continued until the truth is demonstrated beyond doubt. If the results are confirmatory, the life of many a valuable horse may be saved.

The autopsy on Coney 2:02 proved that his heart was ruptured. Mr. W. J. Furbush, who owned this fast McKinney gelding, says that he developed into one of the most perfect road drivers he ever owned, and took his road work on the trot, at which gait he once defeated a fast pacer on the New York speedway.

E. E. Smathers has made a present of Lord Derby 2:05¼ to Mr. Caruthers of Memphis, with the understanding that Lord Derby will be well taken care of the remainder of his days. Lord Derby will be driven over the Memphis speedways by his new owner.

HARNESS MEETING AT OAKLAND.

There is prospect of a big harness meeting in Oakland during the month of August. Ben Benjamin, sporting editor of the San Francisco Chronicle, is working it up and trying to enlist the aid of the Oakland Board of Trade to give a fair and stock show in connection with the harness races. If the meeting materializes, early closing \$2,400 stakes will be given for 2:20 class trotters and pacers, with consolation purses in both instances, and three or four other early closing stakes with a value of from \$600 to \$1,000 each. An excellent program of class races, providing for the 2:05 pacers and the 2:08 trotters, will be announced to close two or three weeks before the meeting. Mr. Benjamin is sanguine of the success of such a meeting and states that the track will be made safe if not fast for the harness horses.

We hope the project will meet with every encouragement, as it has been several years since a good harness meeting has been given in this locality, and there is no doubt but the attendance will be large if the leading horses of the circuit are raced. A definite announcement is expected to be made very soon in regard to this meeting.

AUTOS' EFFECT ON HORSES.

Washington, February 8.—Automobiles in the United States, including those used for business purposes, have displaced the service of only 60,000 horses, according to investigations made by George K. Holmes, Chief of the Division of Foreign Markets of the Department of Agriculture. He has prepared figures as follows:

Number of automobiles in use.....	100,000
Number made in this country.....	135,000
Number exported	10,000
Number imported	4,436

About 60,000 horses in stock on farms could have replenished from year to year the 60,000 horses displaced by the automobiles had the horses remained in use.

Electricity has displaced 500,000 horses in use in urban street car service.

Under 850,000 horses in stock on farms could have replenished from year to year the losses from the 500,000 by reason of death, decrepitude, etc. This is based upon the assumption, more or less improbable, that street car mileage and traffic would have grown to their present proportions had horses continued in use.

Farm horses numbered 19,992,000 on January 1, 1908, the highest figure ever reached.

Never have horses been in such demand as during the last two or three years.

Energia, a registered Orloff trotting mare, has reached New York to be bred to McKinney 2:11½ and returned to her owner, Nicholas Konoplin of Moscow, who sent at the same time another Orloff mare to be bred to Axworthy 2:15½. Such enterprise as this should be rewarded and it is hoped that two record breakers will be the result of these meetings.

Secretary W. H. Knight of the American Trotting Association made a good speech to the convention of representatives from the half-mile tracks which assembled at Indianapolis, February 7th. Among other things, he told them to insist on clean racing and to permit no games of chance to be run at the meetings, and that the sooner all such things are absolutely abolished the better it will be for the sport.

There is talk of Seattle hanging up a \$10,000 purse for 2:05 class pacers in the hopes of getting the entries of Sir John S. 2:04½, Inferlotta 2:04½, Sherlock Holmes 2:06½ and three or four Eastern horses of the same class. Such a race would draw a crowd that would test the capacity of any fairgrounds on this Coast.

Sadie Fogg, the black mare by The Director General that showed so well in the race at Libertyville when Sonoma Girl beat Highball, died at Selma, Alabama, February 19th. Lou McDonald paid \$12,000 for this mare for a client and expected her to win some of the big stakes this year.

J. S. Kellogg of Fresno, who owns one of the most promising two-year-old Diablos on the Coast, was in San Francisco this week for the first time since the fire, and marveled at the tremendous amount of building that has been done. Mr. Kellogg took home with him a couple of cushion-tire wire wheels for his bike from W. J. Kenney's manufacturing shop, 531 Valencia street.

DO YOU WANT A HORSE?

Thirty head of horses, four of them stallions, the others well bred mares and geldings, among which are many nice roadsters and a few extra good speed prospects, will be sold at auction next Monday evening at Fred H. Chase & Co.'s big pavilion, 478 Valencia street, San Francisco.

KENTUCKY HUNTER AND GEO. M. PATCHEN JR.

[Written for the Breeder and Sportsman by Geo. H. Tinkham.]

It may interest the many patrons of the Breeder and Sportsman to read of some of the performances of two of the stallions of long ago, Kentucky Hunter and Geo. M. Patchen Jr. Both were Eastern bred and both were brought to California in the fall of 1861, the former across the plains by J. H. Dewey, and the latter by steamer by Wm. Hendrickson, who is still living and raising McKena colts.

In writing of Kentucky Hunter I have a boyhood pride, for I had the proud distinction in the summer of 1864 of riding him in his walking exercise while he was in the stud at Stockton.

Skenandoah, for by that name he is registered and best known, was sired by Brokenlegged Kentucky Hunter in 1854 in New York, and first owned by a Mr. Sykes, later passed into the hands of J. H. Dewey. He was handled in California by him and passed on to horse heaven in 1871. Hunter had the name of being a fast one, and at the State Fair of 1862 made good by defeating Honest Ance and Fillmore, an emigrant of that year, in 2:44, 2:43, 2:44, Honest Ance taking the second heat in 2:42.

On the following day, October 2d, Hunter again started in mile heats, his opponents being Fillmore, and John Crooks' Shot, all three going to wagon. Shot took the first heat in 2:41½, and Hunter the race and coin in 2:44, 2:43, 2:45.

Hunter was a hard one to beat, for he was one of the best trained trick trotters ever on the California turf; so trained that he would break and run like a quarter horse, so far as the rules would permit, and would then settle back to his former stride, and, by trotting and running, he could beat a horse two or three seconds faster than he. It was by these tricks that he defeated Patchen mile heats 3 in 5 at Stockton in 1863 for the State purse of \$500.

Geo. M. Patchen Jr. was foaled in New Jersey in 1856 and sired by Geo. M. Patchen. He was raised by Joseph Regan, Wm. Hendrickson purchasing and bringing him to the State. He had a reputation for endurance and speed, and although Kentucky Hunter won the Stockton race, Patchen had the sympathy of the crowd.

Jim Eoff was then driving Patchen, he having handled Hunter in his previous races, and Dewey was behind the little chestnut. As the two stallions were driven upon the track, Hunter looking like a colt beside the big brown, they were the observed of all horsemen, for never before had trotters so famous been seen upon the course.

Eoff was leading when the word "Go" was given, and knowing that Hunter could not pass him if Patchen kept his feet, he drove to the turn with full speed. Patchen broke on the turn because of a defect in the track, but Eoff quickly brought him to his stride, and, passing the quarter in :36 and the half in 1:15½, a flight of speed not equalled up to that time, Patchen broke on the upper turn. He was there collared by Hunter, and neck and neck they came down the stretch, a breathless stillness over all the crowd, for never had they seen such a race. Hunter, who was very speedy coming home, gradually moved ahead of the big fellow and passed under the wire in 2:38, two lengths ahead.

Of all raw work that shown in the second heat was the worst. The starting judge had no experience and for over half an hour they scored. Patchen came up trotting square and steady every time, but Hunter would either break or be too far ahead or too far behind. The starter should have done as the late L. U. Shippee, who on one occasion a few years later, when seven horses were on the track, said: "Gentlemen, if you don't score next time by the pole horse I'll fine you each \$50." The crowd cheered and a few minutes later shouted, "They are off!"

Returning to the trot: The starter at last gave the word, and with a sigh of relief the crowd sprang to its feet to see that splendid, honest trotter Patchen speed around the turn. Like a walking-beam he moved, passing the quarter in :37½ and the half in 1:16½. Dewey, losing ground from the start, now began jockeying. He would run Hunter past Patchen, then pull up to a trot, but the brown was going so fast Hunter could not get his stride and again losing ground would break and run. The crowd yelled, "See him run! Look at the quarter horse!" All the way around Dewey kept up these tactics until reaching the home stretch, then lapping Patchen he forged ahead and beat him out some ten lengths in 2:38. The judges gave the heat to Hunter, and Hendrickson, declaring "that he was not trotting against a running horse," withdrew Patchen.

Hunter then trotted the third heat in 3:05 and took the purse. Thomas B. Merry, who is still writing turf records, said of this race that it was the best race to wagon ever trotted in California, for the dirt on the inside of the track was so deep that both horses got as far out on the hard ground as they could, and they must have trotted thirty yards more than a mile, as neither horse was nearer than twenty feet of the pole.

Hunter as a getter of fast trotters was not a success, one only have I mind, Gold Note.

In 1874 he trotted in three races 3 in 5 in three consecutive days, fourteen heats. In the last day's race he won the last two heats in 2:39 and 2:39½, and the following day took the race and money in 2:32, a pretty fast and severe performance.

Wallace, in his "American Trotting Horse," says that California Patchen made his record, 2:27, against time over the Sacramento Union track, April 1st, 1865, and was the result of his defeat by Wm. Armstrong's Calhoun the previous month.

It was a match race, 3 in 5, for \$500 a side, the race taking place March 8th over the Louisiana course. The judges were D. E. Callahan, John Gilbert and E. M. Skaggs. Jim Eoff was to drive Patchen, but he failed to show up, and Hendrickson got up behind his own horse, Butler driving Calhoun.

At the tap of the drum Butler drove to the front and, leading all the way, Patchen at his wheel came in in 2:37½. The next heat was the same thing 2:41. Hendrickson now came to the conclusion that he couldn't drive his horse, and as drivers were scarce he told the young man who had been handling the stallion "to get up behind old George and push him through."

He proved to be a wonder, for he drove the stallion out in 2:37, winning the heat, and to wagon, making the best stallion record of the Coast. He took the fourth heat in 2:37½. The fifth heat was victory or defeat, and Butler began jockeying—he being an experienced driver. Time and time again they scored, and finally Patchen became restive and sullen and his driver could not quiet him. At last they were sent off, and Calhoun won the heat easily in 2:41.

This race led to the following wager: Armstrong bet Hendrickson \$1,000 that Patchen could not in three successive heats beat 2:37. Hendrickson immediately took the bet and Eoff began training Patchen for that which proved the effort of his life. At the time appointed the horse was in the pink of condition, and his friends were freely betting that he would beat 2:33½.

The judges were Frank Malone, the well-known horseman and stableman, E. M. Skaggs, the owner of several fast ones, and John Gilbert. As Patchen steadily and rapidly moved down the track Eoff nodded for the word, which was given, and, making two breaks, he crossed the line in 2:31½.

While the horse was cooling out his backers, now more confident than before, began betting on 2:30. Again the stallion came thundering down the track with a tremendous stride and speed, "and no horse ever before in the State moved more beautifully than Patchen." Over the turf he sped without a single break, and when the judges called out 2:27 pen cannot describe the scene. The crowd shouted and yelled and threw high their hats in air, so rejoiced were they. The horse repeated in 2:29½, and as he wanted to go, Eoff drove out the second mile, much to the surprise of the spectators, who looked for his return. No time was taken of the fourth mile.

On the following Saturday, April 8th, over the Bay View track, Patchen trotted against Fillmore, 3 in 5, for \$2,000 a side, Barney Rice driving Fillmore. Patchen took three straight heats in 2:39½, 2:37 and 2:37½. Fillmore was a bad actor, and Charley Shear, getting up behind him in the third heat, he went all to pieces.

Patchen was the most remarkable horse of his time. He was a greater breeder than his sire, and Wallace says he put ten colts in the 2:30 list, among them Vanderlyn 2:21, Sam Purdy 2:20½, and Wells-Fargo 2:18½.

In 1866 he was taken East, but returned to California in 1869, the property of W. J. Mathews of San Jose. Later he was sold to Pat A. Finnegan of San Francisco, who sold him to J. B. Haggin, on whose ranch he died in 1887.

HALSTEAD'S AMENDMENT FAILED TO PASS.

Delegate W. M. Halstead of Brooklyn, New York, introduced an amendment to the rules of the National Trotting Association at the recent Congress in New York, which failed to pass. Mr. Halstead's proposed amendment was to only mark time bars against race winners, and in defense of his measure he said:

"What my amendment would do would be to give any horse that won a heat in a race a new record provided the time made by it was faster than its previous record, but this would not force it to start in a faster class on account of having won one or two heats, but not the race, in faster time than its class record.

"As the rules stand today all horses are classed by their records. To demonstrate the injustice of this I will give four illustrations only, although there are hundreds every year. At Lexington, Ky., 1906 meeting in the 2:06 pace, \$3,000 purse, Argot Boy finished 5-2-2, giving him second money less entrance, or \$450, and was not taken out of his class. In the 2:16 trot Guy Axworthy finished 8-1-7-7 and received \$150 net second money by winning the second heat in 2:08¾. Although receiving \$300 less than Argot Boy, Guy Axworthy dropped from the 2:24 class to the 2:09 class. In the 2:12 trot, \$5,000 Emboy was 2-3-9, which summary gave him second money, or \$750 net. In the 2:18 trot, \$1,000, Robin C. was 1-1-2-2-8, winning the first two heats in 2:11¼ or 2:10¼ and being beaten in the third heat in 2:10¾ and the other two heats in slower time and being forced into the 2:11 class and receiving second money or \$150, or \$600 less than Emboy, which did not win a heat and was only second once.

"It was the unfairness of such a rule that suggested my amendment, for there is no justice in placing a heavy penalty on winners of money other than first money simply because they may be unfortunate enough to win a heat or two."

TURNED OUT TO DIE.

Turned out to die! The faithful horse
You mounted twenty years ago,
A laughing boy and galloped fast
Amid the whirling flakes of snow,
A better friend man never had
Than Dobbin with the gentle eye.
But now a stranger's in his stall,
For you have turned him out to die!

How oft he drew the heavy wain
To market o'er the winding road,
And homeward, cheerily again,
Pulled back of winter stores a load.
And oft, bedecked with ribbons gay,
To fairs, beneath the autumn sky,
He drew a crowd of girls and boys—
To be at last turned out to die!

Have you forgot the stormy night
When little Ned was taken ill?
The way to help was long and dark,
Skirting the spectre-haunted hill.
Old Dobbin failed you not that time,
Though lightning cut the inky sky;
He bore you to the Doctor's door—
And now he's been turned out to die!

And when your father, breathing low,
Committed all things to your care
He said, "Be kind to Dobbin gray,
The good old horse has done his share."
He never shirked before the plough,
But drew it steadily, and why?
He loved you all, and never thought
That he would be turned out to die!

Oh, shame! Call back the trusted friend,
And shelter from the bitter blast
The good old horse that's served you well,
In happy times forever past.
What if, when age has bleached your hair,
Your children, without tear or sigh,
Shall say, "You've served us long enough;
Father, we turn you out to die!"

One touch of nature, it is said,
Doth make the whole world kin, and now
Call homeward from the meadow bare
The old companion of the plough;
Give Dobbin true the warmest stall—
The one he graced in years gone by—
He's been a noble friend to you;
Beneath the old roof let him die!
—Youth's Companion.

Gen. J. B. Frisbie 41637
Constructor 39569

And his full
brother

Handsoms Sons of McKinney 2:11 $\frac{1}{4}$, greatest sire of the age; dam the great broodmare, Daisy S. (dam of Tom Smith 2:13 $\frac{1}{4}$, sire of Katalina 2:22 $\frac{1}{2}$, General Vallejo 2:22 $\frac{1}{2}$, Little Mac (3) 2:27, Sweet Rosie 2:28 $\frac{1}{2}$, Vallejo Girl 2:16 $\frac{1}{4}$ and Prof. Heald 2:23) by McDonald Chief 3583, son of Clark Chief 89; second dam Fanny Rose, great broodmare (dam of Geo. Washington 2:16 $\frac{1}{4}$, Columbus S. 2:17), by Ethan Allen Jr. 2993. General J. B. Frisbie is handsome, good gaited, black, seven years old. He is a full brother to Tom Smith 2:13 $\frac{1}{4}$; shows McKinney speed and will be trained for the races this season.

Constructor is a beautiful black stallion, stands 15.2 $\frac{1}{2}$ hands, weighs 1,200 pounds; perfect in every way.

Will make the Season of 1908 at my Stables in Vallejo.

Good Pasturage, \$3 per Month.

TERMS—\$25 for the Season. Usual return privilege.

CONDUCTED BY J. K. DeWITT

NEW YORK SHOW NOTES.

The opening took place at 9 A. M. last Tuesday, with about none other than the judges in attendance, but in the afternoon the attendance grew, and through the remainder of the day it increased steadily until in the evenings hours the aisles between the rows of exhibits were fairly well crowded, and sleepy and yelping exhibits had their first hard day of the four days' show.

The general plan of the arrangement was to put the big dogs in the fore part of the show, and this worked out fairly well so far as the early arriving exhibits were concerned, but many a big dog which deserved a forward kennel had to put up with conditions, and Bulldogs and Collies yelped as forcefully in the rear as in the front of the building when the coming of the crowd provoked the first outcry.

Aside from the insistent claims of the dogs, several rings, which were occupied by the judges throughout the day, diversified attention, and kept the fanciers in a long-continued ferment. The general public, which made up the great portion of the afternoon and evening patronage, did not question decisions, but the "dog experts" did, and argument that will last through the week began with the judgment of the first ring of the day.

In the arrangements for the first day's judging sporting dogs had a big share of the program, and in the consideration of the sporting dogs the Cocker Spaniels drew the best measure of attention and patronage. The Cocker classes throughout filled remarkably well.

Cocker honors went principally to Mepals Kennels' Norman and Mepals Iris. Brookside Kennels' Rosa Lee and Brynwood Kennels' Blue Gown were next up.

Another of the breeds in which there was free and sharp competition was confined to Bulldogs, with twenty-three classes on the program. Thomas Grisdale showed dogs that earned a shade of advantage in the decisions, the Grisdale entry, Gotham Odin, winning in two of the big classes of the day for dogs weighing forty-five pounds or over, and in winners class the same breeder's Gotham Belle Victoria winning in her class.

There was considerable dissatisfaction over the awards of the judge, John F. Collins, but that always happens in this breed, and the defeat of the Croker string, Broadway, Bull's Eye, Buccaneer and Bandmaster, was a surprise to those at the ringside.

The Pomeranians were a fine lot, two entered by Mrs. R. F. Mayhew carried nearly everything before them. Shelton Brown Elf was unbeaten in the regular classes, and besides this carried off six specials, the best showing made by a Pomeranian yet at any show in this country.

On Wednesday holiday crowds furnished the afternoon and evening attendance, the congestion on the main floor, galleries and in the toy dog annex, however, pleasing to President Williams, Superintendent Mortimer and Treasurer Knapp, being often a discomfort to the visitors who wished to make a hasty inspection of the canine bluebloods. Whenever two friends met for a handshake and a chat there was a blockade, and hundreds stood idly in the aisles with no recourse except to groan in spirit. Etiquette prevented an outcry of indignation or a call for the subway police, who would have been welcome as crowd breakers.

It was a gathering of dog fanciers above all, whether of society or from the marts of trade, men and women being equally eager in their admiration of the best sorts; but as fillers in there were persons of all kinds and conditions of life and from far and near.

Fritz Kirschbaum of Berlin had a throng about the ring while he judged the elongated and crooked legged Dachshunds. The classes were strong in quality. The champions of Dr. C. Motschenbacher, who did so much to advance the breed in this country and who died since the last New York show, have been purchased by Harry T. Peters of the Windholme Kennels and were shown by Karl Bjurman in very good condition. The judge for the winners classes went to the importations of George Semler of Manhattan, the black and tan Ramsch von Seelberg and Dina von Lichtenstein.

There was a surprise in Boston Terriers when Judge Benson took up the bitch classes. He found his ideal in the puppy class when the eighteen-pound brindle and white Yankee Doodle Darling, as blocky in body as a hackney and saucy in head as could be fancied, came in on the leash of M. J. Mulcahy of Peabody, Mass. The judge carried Yankee Doodle Darling through in all her classes and also awarded winners to her, with George S. Thomas' Willbrook Glory reserve.

Jess of Kent, winner in Pointer bitches, is owned by G. R. Wakefield, who trains the police dogs in The Bronx. The victory was well earned. In English Setters the Brooklyn dog Deodora Bobs won winners from his sire, Ben Lewis' Champion Deodora Prince, who held the tri-color for two years. His Deodora Vic, formerly Mallwyd Vic, won through until beaten in winners by Champion Mallwyd Countess, also of the Lewis kennel. Many persons

thought Judge Tallman had displaced the best English Setter at the show in putting back Deodora Vic.

In excellent coat and keen in ring action, Vic is beautifully coupled and has a fine head and conformation, while both the Prince and Countess seem throaty and aged in comparison. The trio imported by B. Lewis and entered by George Bleistein of Buffalo did not impress the critics as better than those he has shown before. Vic beat both the bitches on points, and of the two Mallwyd Catharine seemed to have more quality than Mallwyd Sarah, although the latter has the greater reputation in England.

There was not a single Mastiff benched for the English breed has been put out of fashion by the St. Bernards and Great Danes. Joseph B. Thomas Jr. had the Russian Wolfhounds under judgment. He took a champion of his own breeding, Rasboy of Valley Farm, as the type in dogs and Dr. Demund's Zoraida, by Thomas' imported Nenagladni of Perchina, as the best of the bitches. The beaten included Geo. J. Gould's Furlough Irma, who upset all the Valley Farm entries at Washington two years ago. Thomas' judging was indorsed and the appearance of some of his noted Russian importations for specials added to the interest of the classes.

The resuscitated Irish Wolfhounds, once the most famous of British breeds, were a novelty, the winner in the class being Frederic Pruyn's Brady. Brig-Gen. Williams of Kentucky had success in placing the Deerhounds and Greyhounds, as well as with the Irish Wolfhounds.

Judge Walter S. Glynn kept a pipe in his mouth throughout most of the day, and this was his only mannerism to suggest a Londoner. Mr. Glynn is deliberative in forming an opinion and decidedly painstaking, so that when preconceived ideals of the rail critics were shattered they always credited Judge Glynn with earnestness.

In closing with the smooth Fox Terriers there could be no exception to the placing of Winthrop Rutherford's Ch. Warren Remedy and Warren Rarity first and reserve for winners. They are as good a pair as his kennel has sent out in a decade. In the winners classes for the wire haired variety, Mrs. A. Henry Higginson of Boston scored a double event with two importations, Ch. Endcliffe Prevent and Grand Mira, the latter just over. Brought in as fit as a fiddle, Endcliffe Prevent was fortunate to be placed over Cairnsmuir Othesis, one of the string with which G. M. Carnochan returned to the ring competing in this breed. Grand Mira was decidedly out in coat, yet quality carried her through the slimly filled bitch classes, but lack of condition enabled Endcliffe Prevent to beat her in the special for the best wire.

Irish Terriers were next before Judge Glynn, and the entries contained some hard nuts to crack. A capital one in conformation, head, texture of coat and character, the Boston owned Thorncroft Sportsman, made its winning appearance in the limit for dogs, and soon after won in the hot open class, with the Brooklyn dog Ch. Crow Gill Phil second. This one had received a thorough grooming over night for old friend's sake from George Raper, who knew Phil in England, and the dog never appeared to such advantage.

Also among the beaten were the famous Champion Duncraggan Straight Tip, no longer in full bloom, and W. C. Finley's Drumclaph Fair Chance. In the opposite sex John G. Bates had amends for the defeat of Straight Tip by taking bitch winners with his typical Blarney Bessie, brought from Ireland last year, and George S. Thomas won reserve with Endcliffe Flyette.

Valverde Faultless, the Collie bitch whom W. E. Mason of England arrived with on Saturday for William Ellery of San Francisco, won through in her classes and winners. She is a sable and white, especially good in head and undercoat. Mason sold the bitch on a guarantee that she would win over everything at the show, but the dog he sold Ellery on the same terms, Southport Student, was third to Mason's own Southport Supremacy in the class won by the Canadian dog, Wishaw Chance.

If the French Bulldogs needed an indorsement from society the reception they had in the judging ring Thursday would have revealed that Mrs. Grundy has taken them to her heart. The judging ended today with drafts of Foxhounds and Beagles from hunt packs to be judged for \$300 specials. The Meadow Brook, Westchester, Brandywine and Suffolk hunt clubs were represented by their dogs with their masters in pink; also the Windholme and Somerset Beagles with their masters in the green of harriers. This is one of the most picturesque features of the Westminster shows and only the fanfare of horns was needed to heighten the hunting scene.

To return to the tulip-eared Parisians in the judging ring, society women and men crowded about and pushed the dingy-looking professional fanciers off the rails throughout the time William Lennox had the French Bulldog classes before him. The charm of the breed to them is that it does not require much trimming, in which it differs from the Boston Terriers that have to be touched up artificially from ears to stern pieces. In homebred

dogs Mr. and Mrs. William A. Quirk, Manhattan, had the best in Gurgesse Jr., while L. W. Tompkins of Fishkill-on-Hudson won in puppies with Hunk's Etoile. But the race for winners in dogs was between the entries of Mrs. Roy A. Rainey, the wife of the turfman, and those of the Fairholme Kennels. The latter is owned by sisters, Miss Sharswood and Mrs. Newland Hooper, the kennel name being that of their mansion and estate at Stonington, Conn. Both had seasoned dogs to show, Mrs. Rainey the dark-coated champion Nellcote Fanfan and Fairholme the white champion Paulus II. The latter won out, with Fanfan in reserve.

In the bitch classes of French Bulldogs winners in different classes were the Brackenside Kennels of Boston, with the puppy Miss Loupie; Charles K. Fownes, the professional whip, with Guess in novice class, and Thomas W. Lawson, with Mirette de la Mere in the limit. In the open for lightweights the winner was Ninon re la Mere, owned by Dr. and Mrs. J. Lee Morrill, Manhattan, and the same class for those over 22 pounds went to Champion Malgache, owned by the Fairholme Kennels. The open class for homebreds was won by Odette, another white one, owned by Mrs. H. T. Foote of New Rochelle, and this was also successful in winners over Champion Malgache, a dark brindle now 8 years old and not in fine bloom. Aquehung Farm only showed its Champion Riche-lieu and Champion Sarah for specials. The pair won the brace prize handsily enough.

Judge Glynn wound up his classes Thursday. In Scottish terriers a puppy brought from England by George Raper named Rosslyn Crack won nicely, but went no higher. The winners for dogs went to the clean cut Champion Echless Piper and in bitches to Newcastle Natty, a very good sort. There were twenty-five Welsh terriers in the six classes, not a gain in number, although the quality has advanced from the tin colliery type, while but three white Scottish came to time. As to Manchester terriers, Skyes, Bedingtons, Dandie Dinmonts and Schipperkes, Judge Lyndon had well matched candidates to decide between and his awards were indorsed. He had only four Newfoundlands to judge and placed the veteran Major, son of old Captain, over a neat puppy just from England. This is called Bear and is a grandson of Champion Shelton Viking, deemed the king of the breed in England. When better furnished Bear will be hard to beat. Hellmuth, the Sheephead Bay owner who has for so long had a monopoly in the breed, said Bear would beat Major in six months.

Mastiffs and Newfoundlands are now more reminiscent than active breeds, while St. Bernards are not much stronger in favor. The class of the dogs was good enough, but that of the exhibitors no longer heightened the interest as in the days when celebrities led the shaggy types of the monks' breed to the ring. Abbot Bruno, owned by Elly Papadopolu, Manhattan, won in winners for dogs, and that for bitches went westward, to Aunt Patience, owned by W. J. Rue of Oshkosh, Wis.

Fritz Kirschbaum, the judge from Berlin, ended with the select company of Great Danes, and won applause. He misses nothing in the ring, goes over every detail and gets as far from the hound type as he can. Rugged strength is his ideal seemingly over mere beauty. The fawn puppy Vohl's Vulcan won through to winners in dogs, and is very typical. He is owned in Manhattan. The harlequin Champion Roy B., placed reserve, is also owned in Manhattan and was cleaner in head and shorter in body than Vohl's Vulcan. A fawn also won the winners for bitches, Champion Lore Vom Inn, owned by the Dalmore Kennels of Port Allegany, Pa., very rugged and muscular in type. Reserve went to Champion Mira, owned in Manhattan, and one of the most elegant and finely set up harlequins ever benched. But Kirschbaum favored the utility over the boudoir type, as in the dog classes.

Dr. Henry Jarrett of Philadelphia caused a smashing of old images in the placing of the Chow Chows. The heroes of the two classes for winners were newcomers, Ackum and Chinese Yehonola, owned by Mrs. Franklyn L. Hutton of Manhattan, and the good ones from the kennels of the Ladewes, Mrs. Proctor, Mrs. Van Heusen, Mrs. Decker, the Tinkers and the Countess de Montgion had to stand aside. The Countess had as a compensation things all her own way in Samoyedes. American Foxhounds brought forward as a winner a dog from Newport, N. Y., a staunch one called Col. Rogers of the type that runs a fox to the gun, and he put the noses of the dogs from the packs quite out of joint.

With all the rings thrown into one and the judges acting in concert there was some hot competitions for specials Thursday afternoon. There were 200 or more dogs in for the judging of H. P. Whitney's cup for the largest and best exhibit of any one breed. Joe Thomas had in Russian Wolfhounds, Bleistein his English setters, and Lewis a string of Pointers. American Foxhounds had representation from the Grafton Kennels, North Adams, Mass., and A. Henry Higginson of Boston brought in the Middlesex pack of English Foxhounds. Undermyer's collies, Tyler Morse's Old English Sheepdogs, Rutherford's Fox Terriers and Mrs. Smyth's Philadelphia string of Pomeranians swelled the entry. But most remarkable of all was the pack of thirty-five Beagles led by W. G. Rockefeller and the muster of forty Cocker Spaniels by H. K. Bloodgood. The two latter were the greatest collections of single breeds ever brought in by one exhibitor.

The Middlesex hounds won to the glory of the Bostonians. In competitions as large and as hotly

contested W. Rutherford's Fox Terrier Warren Remedy won \$50 in gold as the best of any breed at the show. Tyler Morse won the president's cup for the best team with his Sheepdogs, beating out Knox's Bloodhounds, but for the vice-president's cup for the best brace the Rutherford smooth Fox Terriers Remedy and Blue Blood beat out Tyler Morse's Handsome Bob and Dame Dons. In the Ladies' Kennel Association unclassified specials Miss Alger and Miss Grace's Poodle Red Brook Rufus won the Ballyhoo Bey challenge cup for the best American bred, and Mrs. R. F. Mayhew's Pomeranian Shelton Brown Elf the champion cup for the best dog or bitch owned by a member.

Judge Oldham closed the toy class with but one kick. Mrs. C. D. Atwood's miniature Chihuahua Chula, never before beaten, she says, had to play second fiddle to Mrs. M. B. Townsend's Marguerite. The latter, according to Mrs. Atwood, is not of the same quality as Chula and should have been passed over. Oldham, on the other hand, pronounced Chula as a midget and not in the regular class at all.

A patrol box had a place in the big ring at night and Lieut. Wakefield gave an exhibition of the good work of the police dogs from Belgium. The dogs traced and guarded the men who posed for them as surely as the Bloodhounds in "Uncle Tom" hit the trail, and the novel exhibition pleased the crowded house.

PASADENA SHOW AWARDS.

St. Bernards (Rough coats). Limit, open and winners dogs—1 Mrs. F. Monaghan's Montana, 2 Mrs. E. Deniels' Prince Yan.

Great Danes. Open and winners dogs—1 F. R. Valk's Major XL, 2 La Sonrisa Kennels' Salvage.

Russian Wolfhounds. Puppy dogs—C. C. Curtis' Ivan of Mirasol, 2 C. C. Curtis' Tikhon of Mirasol. Open dogs—1 C. C. Curtis' Kubelik IL, 2 Ivan of Mirasol, 3 Tikhon of Mirasol. Winners dogs—1 Kubelik IL, res Ivan of Mirasol. Puppy and open bitches—1 C. C. Curtis' Princess Stephanie of Mirasol, 2 Princess Vera of Mirasol, 3 Princess Tula of Mirasol. Winners bitches—1 Princess Stephanie of Mirasol, res Princess Vera of Mirasol.

Foxhounds (American). Puppy dogs—1 Carroll Cook's Prince Louis. Open dogs—1 Carroll Cook's Judge. Winners dogs—1 Judge, res Prince Louis. Open and winners bitches—1 Carroll Cook's Queenie.

Foxhounds (English). Open and winners dogs and bitches—1 Major W. A. Phipps' Langley Drag, 2 Major W. A. Phipps' Langley Chum.

Pointers. Puppy dogs—1 F. Maier's Sport. Novice dogs—1 J. L. Anderson's Spot All, 2 A. Whitehead's Dictator. Limit dogs—1 Spot All, 2 Dictator, 3 W. R. Sibley's Aiken's Sensation. Open dogs (under 55 pounds)—1 E. Maier's Ch. Dictator, 2 Spot All, 3 Dictator. Open dogs (55 pounds and over)—1 Aiken's Sensation. Winners dogs—1 Ch. Dictator, res Spot All.

English Setters. Puppy dogs—1 V. A. Kuehn's Mallwyd Beau. Novice dogs—1 H. R. Elliott's Bro. Ben Gladstone. Limit dogs—1 H. Waterman's Max, 2 J. Blake's Don. Open dogs—1 Mallwyd Beau, 2 Don. Winners dogs—1 Mallwyd Beau, res Bro. Ben Gladstone. Novice bitches—1 H. R. Elliott's Rose E. Limit bitches—1 H. R. Elliott's Miss Alice. Winners bitches—1 Rose E., res Miss Alice.

Gordon Setters. Open and winners dogs—1 A. L. Stuart's Ch. Doc Watson.

Irish Setters. Puppy dogs—1 J. Eddy's Duke of Tipperary, 2 E. Kroll's Lew Dockstadter. Novice dogs—1 Duke of Tipperary. Limit, open and winners dogs—1 T. Savage's Don, 2 Duke of Tipperary. Puppy bitches—1 E. Tollen's Audra Belle, 2 L. H. M. de Biron's Tyrone Queen. Novice bitches—1 Tyrone Queen. Limit bitches—1 R. H. Groves' St. Lambert Phyllis, 2 T. Lowe's Molly, 3 Tyrone Queen. Open bitches—1 C. C. Bancroft's Lady Don, 2 Molly, 3 Tyrone Queen. Winners bitches—1 Lady Don, res St. Lambert Phyllis.

Clumber Spaniels. Open and winners dogs—1 Tod Ford's Ch. Norwood Rake.

Field Spaniels. Limit, open and winners dogs and bitches—1 T. B. Bassett's Jack.

Cocker Spaniels (Black). Open and winners dogs—1 Miss A. Wolfen's Searchlight. Limit bitches—1 E. B. Gesner's Lila. Open and winners bitches—1 Geo. A. Nieborger's Uvas Cricket, 2 Lila.

Cocker Spaniels (Parti-color). Open and winners dogs—1 A. Wolfen's Gypsy Chief. Novice, limit and open bitches—Kingsley N. Stevens' Romany Lady.

Cocker Spaniels (Any solid color other than black). Limit and open bitches—Kingsley N. Stevens' Brownland Babbie, absent C. Mailes' Queen.

Winners bitches (Other than black)—1 Brownland Babbie, res Romany Lady.

Dachshundes. Puppy dogs—1 L. Schneider's Dachs. Novice dogs—1 Miss R. Blossom's Pretzel, 2 Dachs. Limit dogs—1 Pretzel. Open dogs—1 Pretzel, 2 J. Peters' Pete Kenna. Winners dogs—1 Pretzel, res Pete Kenna. Novice, limit and winners bitches—1 L. H. M. de Biron's Poire.

Collies (Sable and white). Puppy dogs—1 C. B. Burger's Laddie, 2 T. S. Griffiths' Glen Tana Buster, absent Mrs. Wm. Johnson's Jack. Novice dogs—1 Glen Tana Buster, 2 E. B. Varian's Barney, absent Jack. Limit dogs—1 E. Kennedy's Prince of Hazeldean, 2 T. S. Griffiths' Glen Tana Squire, 3 Varian's Barney, v h c E. B. Varian's Rowland, absent Jack. Open dogs—1 Prince of Hazeldean, 2 Glen Tana Squire, 3 Varian's Barney, absent Jack. Puppy and open bitches—1 H. J. Evans' Nellie MacPherson, 2 E. Kennedy's Birkdale. Limit bitches—1 Birkdale. **Collies** (Other than sable and white). Limit and

open dogs—1 R. Wallace's Dictator.

Winners dogs—1 Prince of Hazeldean, res Glen Tana Squire.

Winners bitches—1 Nellie MacPherson, res Birkdale.

Collies (California bred). Open dogs—1 Prince of Hazeldean. Open bitches—1 Birkdale.

Poodles (Corded). Open dogs and bitches—1 R. B. Jump's Nigger.

Dalmatians. Puppy and limit dogs—1 Freeman Ford's Arroyo Conspirator. Open dogs—1 F. N. Robinson's Ch. Glenwood Adonis, 2 H. Lancaster's Wano. Winners dogs—1 Arroyo Conspirator, res Ch. Glenwood Adonis. Limit bitches—1 Freeman Ford's Arroyo Coquette. Open and winners bitches—1 Arroyo Coquette, 2 H. A. Bailey's Queen Ramona.

Bulldogs. Limit dogs (under 45 pounds)—1 H. C. Seamon's Calizona Michael. Limit dogs (over 45 pounds)—1 Mrs. C. B. Bergin's Metropolitan Chappie, 2 Dr. J. Auburn Wilborn's Walsingham Roy. Open dogs (over 45 pounds)—1 Freeman Ford's Endcliffe Baron, 2 Metropolitan Chappie, 3 Walsingham Roy. Winners dogs—1 Endcliffe Baron, res Metropolitan Chappie. Limit, open and winners bitches (over 40 pounds)—1 P. B. Roy's Geisha.

Airedale Terriers. Novice dogs—1 A. G. Gemunder's Bowser. Limit dogs—1 E. Kohler's Pete, 2 F. C. Reid's Robin Hood. Open dogs—1 J. Bradsham's Endcliffe Royalist, 2 Robin Hood. Winners dogs—1 Endcliffe Royalist, res Pete. Open and winners bitches—1 F. C. Reid's Barton Bangle.

Bull Terriers. Novice dogs—1 C. B. Gill's Edgecote Wonder, 2 J. M. Cole's Czar. Limit dogs (over 30 pounds)—1 H. R. Elliott's Joe Wonder, 2 Czar. C. B. Gill's Ch. Tedcote Wonder in for exhibition only. Winners dogs—1 Edgecote Wonder, res Joe Wonder. Novice bitches—1 H. T. McCullough's Peerless Spectator. Open bitches (over 30 pounds)—1 C. B. Gill's Silkwood Brassie, 2 H. R. Elliott's Ch. Hope of Wonder. Winners bitches—1 Silkwood Brassie, res Peerless Spectator.

French Bulldogs. Novice dogs—1 Muriel Webber's Abington Ripp. Limit dogs—1 Mrs. M. H. Bam-burger's Mystic Boulot, 2 Abington Ripp. Open dogs—1 Abington Ripp. Winners dogs—1 Mystic Boulot, res Abington Ripp. Open and winners bitches—1 Mrs. E. G. Edelhoff's Madame Boulette.

Boston Terriers. Puppy dogs—1 Freeman Ford's Arroyo Auditor, 2 Mrs. W. A. Porter's Ascot Sir Edwin. Novice dogs—1 F. Ford's Arroyo Acrobat, 2 Ascot Sir Edwin. Limit dogs (12 and under 17 pounds)—1 J. W. Brooks' Ascot Roseben, 2 Arroyo Acrobat. Limit dogs (17 and under 22 pounds)—1 H. I. Drummond's Playboy IL. Limit dogs (22 and under 28 pounds)—1 J. W. Brooks' Ascot Jim, 2 F. Ford's Arroyo Autocrat, 3 J. B. Callery's Breaker. Open dogs (12 and under 17 pounds)—1 Ascot Roseben. Open dogs (17 and under 22 pounds)—1 F. Ford's Ch. Boylston Prince IL, 2 E. T. Chase's Ch. Sportsman, 3 Playboy IL. Open dogs (22 and under 28 pounds)—1 Ascot Jim, 2 Arroyo Autocrat, 3 Mrs. H. T. McCullough's Endcliffe Dictator, res Breaker. Open dogs (under 12 pounds and over 1 year old)—1 J. W. Brooks' Ascot Major. Winners dogs—1 Ch. Boylston Prince IL, res Ascot Roseben. Puppy bitches—1 Freeman Ford's Arroyo Affinity. Novice bitches—1 F. Ford's McCusker's Butternut. Limit bitches (12 and under 17 pounds)—1 F. Ford's Arroyo Affiliate. Limit bitches (17 and under 22 pounds)—1 McCusker's Butternut. Limit bitches (22 and under 28 pounds)—1 J. W. Brooks' Ascot Ramona, 2 F. Ford's Arroyo Aster. Open bitches (12 and under 17 pounds)—1 Arroyo Affiliate. Open bitches (17 and under 22 pounds)—1 F. Ford's Agawam of By-The-Way, 2 E. S. Chase's Willow Brook Dainty. Open bitches (22 and under 28 pounds)—1 Ascot Ramona, 2 Arroyo Aster. Open bitches (under 12 pounds and over 1 year old)—1 J. B. Callery's Wave, 2 J. W. Brooks' Ascot Sporting Duchess. Winners bitches—1 Agawam of By-The-Way, res McCusker's Butternut.

Fox Terriers (Smooth coated). Puppy dogs—1 La Sonrisa Kennels' Tuyo, 2 La Sonrisa Kennels' Risueno. Open dogs—1 J. Bradsham's Sabine Ringer. Winners dogs—1 Sabine Ringer, res La Sonrisa Tuyo. Puppy bitches—1 G. F. Herr's Mischief, 2 La Sonrisa Kennels' Mia. Novice bitches—1 Mischief. Winners bitches—1 Mischief, res La Sonrisa Mia.

Fox Terriers (Wire-haired). Novice dogs—1 Irving C. Ackerman's Humberstone Vanguard. Open dogs—1 La Sonrisa Kennels' Valiente, 2 I. C. Ackerman's Humberstone Penance, 3 J. Peters' Cairnsmuir Pitter Patter. Winners dogs—1 La Sonrisa Valiente, res Humberstone Penance. Open bitches—1 La Sonrisa Kennels' Nuestra. Open bitches (California bred)—1 La Sonrisa Nuestra. Winners bitches—1 La Sonrisa Nuestra.

Irish Terriers. Puppy dogs—1 Belfast Kennels' Belfast Muddler, 2 R. N. Malden's Danny. Limit dogs—1 T. Walsh's Winsome Tip. Open dogs—1 G. F. Herr's Endcliffe Incognito, 2 Winsome Tip. Open dogs (American bred)—1 J. Bradsham's Brigadier. Winners dogs—Endcliffe Incognito, res Brigadier. Puppy bitches—1 G. F. Herr's Noreen. Limit bitches—1 F. Ford's Arroyo Erin, 2 J. McAney's Peggy. Open bitches—1 J. Bradsham's Bracelet. Open bitches (American bred)—1 Arroyo Erin. Winners bitches—1 Bracelet, res Arroyo Erin.

Pomeranians (Under 8 pounds). Open and winners dogs and bitches—1 Eleanor Nixon's Bimba, 2 A. E. Fitzgerald's Vera.

English Toy Spaniels. Puppy dogs and bitches—1 R. C. Macklin's Ashton Goldfinder Jr., 2 Mrs. A. E. Halsey's Chin Chin. Novice dogs and bitches—1 Ashton Goldfinder Jr. Limit dogs and bitches—1 J. Bradsham's Pall Mall. Open dogs and bitches—1

Mrs. R. T. Cochran's Ch. Dreamwold Don Quixote. Open dogs and bitches—1 Mrs. R. T. Cochran's Lady Betty. Winners dogs and bitches—1 Ch. Dreamwold Don Quixote, res Pall Mall.

Japanese Spaniels. Puppy dogs and bitches—1 W. E. Davis' Auroki. Limit dogs and bitches—1 S. K. Shoemaker's Nippon, 2 Mrs. R. C. Macklin's Admiral Togo, 3 W. W. Anderson's Admiral Togo. Open dogs and bitches—1 Nippon, 2 Mrs. R. C. Macklin's Admiral Togo. Winners dogs and bitches—1 Nippon, res Mrs. R. C. Macklin's Admiral Togo.

Toy Poodles. Limit and winners dogs and bitches—1 Mrs. E. E. Edelhoff's Fortuna Jean.

Yorkshire Terriers. Open dogs and bitches—1 T. Maddock's Mollie Tatters.

Welsh Terriers. Open dogs and winners dogs—1 J. Bradsham's Endcliffe Nepkin.

Beagles. Puppy, novice and open dogs—1 L. Schneider's Leader II. Puppy bitches—1 L. Schneider's Traylor.

Variety Class. Open bitches—1 L. Schneider's Traylor (Beagle).

Team Class—1 Hon. Carroll Cook's American Foxhounds, Ch. Ned, Judge, Prince Louis and Queenie.

Brace Class—1 Freeman Ford's Boston Terriers Ch. Boyleston Prince II. and Agawam of By-The-Way.

Champion Class—1 Tod Ford's Ch. Norwood Rake (Clumber Spaniel).

Veteran Class. Open dogs and bitches—1 Miss B. Brown's Sabine Beldia (Fox Terrier).

Special Awards.

Mr. Joseph B. Vandergrift's president's trophy for best in the show—Sabine Ringer (Fox Terrier).

Arroyo Kennels' challenge cup for best whelped in California—J. W. Brooks' Ascot Roseben (Boston Terrier).

Freeman Ford cup for best shown by non-resident exhibitor—C. C. Bancroft's Lady Don (Irish Setter).

Montgomery Bros. cup for best exhibit—C. C. Curtis' (Mirasol Kennels' Russian Wolfhounds).

Best St. Bernard—Mrs. E. Deniel's Prince Yan.

Best Great Dane—F. R. Valk's Major XL.

Best American Foxhound—Hon. Carroll Cook's Ch. Ned.

Best English Foxhound—Major W. A. Phipps' Langley Drag.

Best Pointer—Ed Maier's Ch. Dictator.

Best Clumber or Field Spaiel—Tod Ford's Ch. Norwood Rake.

Best black Cocker Spaniel—Miss A. Wolfen's Ch. Searchlight.

Best red Cocker Spaniel—Kingsley N. Stevens' Brownland Babbie.

California Cocker Club medal for best dog—Ch. Searchlight.

Best Collie dog—E. Kennedy's Prince of Hazeldean.

Best Collie bitch—H. J. Evans' Nellie MacPherson.

Best Gordon Setter—A. L. Stuart's Ch. Doc Watson.

Best Bulldog—Freeman Ford's Endcliffe Baron.

Best Bull Terrier dog—C. B. Gill's Edgecote Wonder.

Best Bull Terrier bitch—C. B. Gill's Silkwood Brassie.

Best Boston Terrier dog—F. Ford's Ch. Boylston's Prince II.

Best Boston Terrier bitch—F. Ford's Agawam of By-The-Way.

Best smooth Fox Terrier dog—Sabine Ringer.

Best smooth Fox Terrier bitch—G. F. Herr's Mischief.

Best wire Fox Terrier dog—La Sonrisa Valiente.

Best wire Fox Terrier bitch—La Sonrisa Nuestra.

Best Irish Terrier dog—C. F. Herr's Endcliffe Incognito.

Best Irish Terrier bitch—Bracelet.

Best English Toy Spaniel—Mrs. R. T. Cochran's Ch. Dreamwold Don Quixote.

DOINGS IN DOGDOM.

The Fresno Kennel Club bench show committee is busy on the preliminary work for a bench show in the near future.

Homer C. Katze, president of the Fresno Kennel Club, recently purchased from Stockdale Kennels the fine young Pointer, Banjo, by Cuba Jr., out of Bow's Daughter.

Fred Coutts has his training kennels now located in San Diego county, at Merle. His postoffice address is Encinitas, where there is an express and a telegraph office. Letters addressed to Merle will reach him, there being a postoffice at that point.

Fred has quite a string of dogs on hand at present. He had a very successful season last year.

The decision of the Referendum Committee of the American Kennel Club on the question of incorporating the club, is expected shortly. A sub-committee of twelve is now considering a proposition to be submitted to the Referendum Committee as a whole. This committee, of which William G. Rockefeller is Chairman, met February 14th at the American Kennel Club rooms, 55 Liberty street, and held a brief session behind closed doors. It was admitted after the meeting that the question of reincorporation had been discussed, but no decision was reached. The sub-committee will meet again in about a week, by which time it is expected the proposition will be ready.

Glen Tana's Parbold Premier sired a good Collie in Ravenwood's Reward, which was first in puppy class, first novice, first limit, first open, and first winners' class; also winning four specials, one of which was for best Collie in the show, at Ft. Wayne, Ind., last month. At East St. Louis he was first puppy, first novice, first limit, first open, nad first winners, and annexed four specials. This great youngster, as formerly mentioned, is out of Parbold Pink, litter sister to the world-famous Collie Ch. Parbold Padoda. The sire of Ravenwood's Reward is Parbold Premier, owned by Thomas S. Griffith, Spokane, Wash.

The dogs and entries, by breeds, at the Pasadena show last week were as follows: St. Bernards, 2 dogs benched, 4 entries. Great Danes, 2-2; Russian Wolfhounds, 3-6; American Foxhounds, 4-4; English Foxhounds, 2-2; Pointers, 5-10; English Setters, 6-8; Gordon Setters, 1-1; Irish Setters, 8-16; Clumber Spaniels, 1-1; Field Spaniels, 2-2; Cocker Spaniels, 7-12 (1-1 absent); Dachshundes, 4-8; Collies, 10-24 (1-4 absent); Dalmatians, 5-7; Bulldogs, 6-9 (1-1 absent); Alredales, 5-6; Bull Terriers, 7-9; French Bulldogs, 2-4; Boston Terriers 23-32; Smooth Fox Terriers, 5-6; Wire Fox Terriers, 5-6; Irish Terriers, 9-13; Poms, 2-2; English Toy Spaniels, 5-6; Japs, 4-6; Toy Poodles, 1-1; Yorkshire Terriers, 1-1; Welsh Terriers, 1-1; Beagles, 2-6. Total dogs, 140; total entries, 217.

Bostons were the banner entry at Pasadena.

Tom Blight offers several extra good English Setter puppies in our advertising columns this week. Mallwyd Bob Jr. and Lady Kate, the sire and dam, are both not only well bred, but bench winners. These pups, to be had at a bargain, can be regarded as a snap by any sportsman desiring a high class young English Setter for next season's work to the gun.

The Hawaiian Kennel Club held a meeting recently in Honolulu, H. T., and elected the following officers: Thos. Sharp, president; C. T. Littlejohn, secretary-treasurer; Thomas Sharp, Wm. H. Charlock, A. R. T. Jackson, Dr. Rowat and Dr. Fitzgerald, directors.

The club has been re-organized and a plan of campaign laid out for the coming show—when the fleet arrives.

The Utah Kennel Club will hold a three-day show in Salt Lake City, April 2-4. T. B. Jones is now a member of the board of directors, vice A. T. Clark, resigned. Dr. J. W. Gray was elected superintendent of the coming show in place of H. R. Elliott, who will be absent from the city during the show dates.

Dr. Bruette, kennel editor of The American Field, will be invited to judge all classes.

Wandee Resist, the corking good and winning Fox Terrier by Ch. Dark Blue ex Ch. Lovaine, was recently purchased from Hampshire Kennels by Mr. W. W. Stettheimer and will now be domiciled in the Tallac Kennels.

The Westminster Kennel Club bench show opened in New York on the 11th inst. with the record list of entries as here given:

Bloodhounds	19	Boston Terriers	293
St. Bernards	50	Fox Terriers	175
Great Danes	99	Irish Terriers	79
Newfoundlands	4	Scottish Terriers	84
Russian Wolfhounds	103	Rosneath Terriers	4
Irish Wolfhounds	5	Welsh Terriers	31
Deerhounds	20	Black and tan (Manchester) Terriers	19
Greyhounds	22	Skye Terriers	7
Esquimaux dogs	16	Bedlington Terriers	3
Foxhounds	34	Dandie Dinmont Terriers	6
Pointers	107	Schipperkes	32
English Setters	102	Pomeranians	156
Irish Setters	35	English Toy Spaniels	79
Gordon Setters	8	Japanese Spaniels	28
Retrievers	6	Pekinese Spaniels	15
Chesapeake Bay dogs	3	Pugs	22
Basset Hounds	2	Yorkshire Terriers	14
Sporting Spaniels	165	Maltese Terriers	8
Beagles	106	Toy black and Tan Terriers	7
Dachshundes	100	Griffons Bruxellois	14
Whippets	11	Chihuahuas	6
Collies	197	Papillons	6
Old Eng. Sheepdogs	34	Italian Greyhounds	6
Poodles	26	Toy Poodles	6
Chow Chows	73	Airedale Terriers	5
Dalmatians	45	Bull Terriers	125
Samoyedes	3	French Bulldogs	129
Bull Terriers	175		
Airedale Terriers	97	Total	3026

Nuthurst Surprise is also making an enviable record as a Nairood Kennels' sire. Among other good ones his owner has a one month old bitch puppy from him out of the successful producer Nairood's Miss Hurdle, that will be shown and should Buffalo has a six months old dog puppy by him that times as it has begun; and Mr. George O. Moule of take high honors during the coming year, if it can be expressed himself as willing to match against any youngster of his age in America.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

SUNNY SOUTH HANDICAP.

The "Sunny South Handicap," the annual trap shooting feature of the southwest, took place at Brenham, Tex., January 27th to February 1st, and was, according to the following report in Sporting Life, a great success.

The attendance was much smaller than usual, which was probably due to the financial stringency, though many shooters who promised to attend never showed up. However, the Brenham people vied with each other in seeing that the time the boys were not shooting was enjoyed, and they all seemed to have a pleasant visit.

The Sunny South Handicap at 25 live birds was won by Mr. Fred King of Denver, Col., on a score of 25 straight. W. H. McCreery of Loveland, Col., was second with 24; George Tucker and Alf Gardiner third with 23; Hood Waters and L. I. Wade fourth with 22. The scores and handicaps of the Sunny South Handicap at 100 targets were: McCreery, 20 yds., 88; Barkley, 22 yds., 89; Maxwell, 22 yds., 89; King, 20 yds., 88; Poston, 21 yds., 90; McCreery, 18 yds., 86; Sens, 19 yds., 90; Jones, 19 yds., 80; White, 17 yds., 90; Atchison, 19 yds., 80; Lednum, 16 yds., 70; Faurote, 21 yds., 89; Tucker, 19 yds., 87; Forsgard, 21 yds., 88; Wade, 22 yds., 85; Waters, 17 yds., 90; Gardiner, 18 yds., 87; Jackson, 20 yds., 84; Sherman, 19 yds., 86. In the shoot-off for the trophy between Sens, White and Poston, Sens won. Mr. Hood Waters scored 90, but was shooting for targets only.

Third and Fourth Days—Sunnyside South Handicap at live birds, 25 live birds:

Faurote, 27 yds.	19	Waters, 30 yds.	22
Sens, 30 yds.	20	Barkley, 32 yds.	21
Tucker, 28 yds.	23	King, 30 yds.	25
Wade, 32 yds.	22	Jackson, 30 yds.	21
McCreery, 30 yds.	24	Gardiner, 30 yds.	23
Poston, 30 yds.	18	Forsgard, 32 yds.	21
Mankin, 27 yds.	16	Gramm, 28 yds.	18

Summary.

Shot at—	Summary.	Jan.	Jan.	Jan.	Feb.	Total
		29.	30.	31.	1.	
		205	190	205	200	800

Gardiner		145	152	178	149	624

Mr. Geo. Maxwell high professional, Mr. L. R. Barkley, second.

Mr. Ed Forsgard high amateur, Mr. E. L. Jones, second.

The Houston Chronicle Event at 100 targets, which trophy was held by Mr. Otto Sens of Houston, was won by Mr. Ed Forsgard of Waco on a score of 92, Mr. B. L. Jones of Brady, Tex., being second on a score of 91; Mr. Otto Sens of Houston, being third on a score of 90. Mr. Geo. Maxwell of the U. M. C. Co. was high in this event, with a score of 97, but was not eligible. Dickey Bird and McCreery traps were used and the trapping of targets was the best ever seen at Brenham, the traps being in charge of Messrs. H. E. Sherman of Kansas City, and A. M. McCreery of Lamar, Mo. Mr. W. E. Scott of Houston, now representing the Winchester Repeating Arms Co., was at the shoot and the boys were all glad to see him back in the game again. Mr. Ed Forsgard of Waco, Tex., had with him a little book supposed to contain pointers on how to shoot difficult targets and the boys' attention was called on many occasions to page 16. Mr. Forsgard had studied this little book carefully and was shooting in fine form and won.

High Amateur Average of the shoot. Mr. B. L. Jones of Brady, Tex., won second high. Mr. E. D. Lednum of the Du Pont Co., was called away from the shoot on business, much to the regret of every one present. Mr. Lee R. Barkley, though shooting good, was not shooting up to his usual form. Mr. Otto Sens had with him a large supply of cigars and his many friends enjoyed a good smoke. Mr. B. E. Saunders delivered an appropriate speech after his friend, Otto Sens, had won the Sunny South Handicap at targets. Pop Heikes and W. R. Crosby were missed by their many friends. There were a number of extra events at live birds shot after the program each day in which King, McCreery and Gardiner were winners, with McCreery and Gardiner winning a greater number of events. H. E. Poston and Geo. Tucker were also shooting live birds in good form in the extra events. With the exception of Thursday, which was a cloudy day with a light rain, it was an ideal week for trap shooting. An effort will be made to pull the Sunny South Handicap off at some other point in Texas next year. Scores:

Second Day, January 28—8 Live birds, \$5 entrance—Faurote, 5; Sens, 6; Tucker, 4; Wade, 8; McCreery, 8; Poston, 8; Waters, 8; Barkley, 6; King, 8; Jackson, 8; Sherman, 6; Gardiner, 8; Forsgard, 8.

AT THE TRAPS.

The local trap shooting season will be started today under most pleasant auspices. The Trap Shooters' League will offer a two-days' schedule for what promises to be a well attended and a successful shoot.

The card today embraces four 15 target events (entrance \$1.25 each), followed by the Roos, Hunter Arms and Peters trophy shoots at 20 targets each (entrance \$2), three 15 bird races (entrance \$1.25), will conclude the day's meeting.

Tomorrow the schedule begins with four 15 target races (entrance \$1.25 each), followed by the Reed and the Du Pont trophy matches, 25 targets, entrance \$2.25 each, a 20 target race (entrance \$2), the Sorenson and Ballistite trophy shoots at 25 targets, entrance \$2.25 each and concluding with a 20 bird race (entrance \$2).

Purse divisions under the Rose system—15 target events, 10-7-3; 20 and 25 target events, 12-8-5-3. There will be optional side pools, \$1 entrance, high guns, four moneys. Trophy winners will receive 50 cents on each entry. Ties in trophy races will be carried from event to event. The fun will begin promptly at 10 a. m. each day.

The Golden Gate and Union Gun Clubs will announce the season's program in the near future.

Advices from many interior and Coast points also are that trap shooting will have quite a boom this year. One pleasing feature in connection with the sport is that a large number of new clubs have been organized, or will be shortly.

A gun club is being organized in Port Townsend, to be known as the Key City Gun Club. Captain C. H. Morrison is the leading spirit in its organization and has already the signatures of about twenty members, some of whom are officers of the Coast Artillery. The club will be select and the membership will be restricted to about thirty. The club will have regular practice twice a month shooting at blue rocks. Smokers will be held at stated intervals and when the members become proficient matches will be arranged with the clubs of other cities. The club promises to be one of social enjoyment as well as one of improvement in the art of shooting.

The lists of registered tournaments, under the auspices of the Interstate Association, as published in the Eastern sportsmen's press, shows a systematic and pleasing increase from week to week.

An interesting program for the trap shooting contests which is billed for the Olympic Games this year is the following:

The competitors must all be amateurs, and this is the rule governing the definition of a professional: "Any person who shoots or has shot in public as a means of livelihood or who engages or has engaged in the teaching of shooting as a means of livelihood, or who has shot in any competition open only to professional shooters, shall be deemed a professional shooter." In the first stage, of individual competition each competitor shoots at 30 targets, in two sections of 15. In the team competition (first stage), teams shoot at 30 targets per man, in three sections of 10. In the second stage, 50 per cent. of the original competitors retire, and in the individual competition each competitor shoots at 20 targets, in two sections of 10. In the team competition (second stage), each team shoots at 20 targets per man, in two sections of 10. Thereafter, five targets per man are fired at from unknown traps. For the third and final stage, half the competitors in the second stage qualify, and in the individual competition each competitor shoots at 20 targets, in two sections of 10 birds. Thereafter, 10 targets per man are fired at from unknown traps; whilst in the third and final stage of the team competition each team shoots at 40 targets per man, in two sections of 20 targets. Thereafter 10 targets per man are fired at from unknown traps. No gun of larger calibre than a 12-gauge may be used, with any length of shell and charge of powder, but the charge of shot must not exceed 1½ ounces, nor be of a size larger than No. 6. The arrangement of the traps will be as follows: Three traps shall be arranged behind each bulkhead and there shall be five bulkheads in all. The three traps behind each bulkhead shall throw in different directions, and the shooters shall be kept in ignorance of the particular bird they are to have from any one bulkhead.

Harvey McMurchy is due in San Francisco about the end of next month.

Tony Prior and Clarence Nauman are, among others, exerting themselves to make the Ingleside tourney today and tomorrow an enthusiastic opening for the trap season of 1908.

The weekly shoot of the Pasadena Gun Club at Bixby on Wednesday was attended by good luck. Fred Croxen, Mr. Paisley and John A. Traylor were high guns with twenty birds; J. J. Blick and Dr. Taylor broke fifteen and Judd Blick twelve in a 25-bird race.

"SAVE-THE-HORSE"
Registered Trade Mark
SPAVIN CURE

THESE TELL THE STORY OF ITS POWER.

WM. H. COOPER, D. D. S.,
11 Sand Beach Avenue.
Bad Axe, Mich., January 15, 1908.
Gentlemen: If you ever want a recommend for your "SAVE-THE-HORSE," use me. I sent for a bottle sometime ago for a valuable mare which had a very bad bog spavin. She was so lame on the right hind leg that she could hardly walk, and then only with urging. After I had applied "SAVE-THE-HORSE" as directed twice, I hitched her to my runabout, and have been driving her every day and no one could ever tell she had any such trouble. Everyone here said I would never be able to use her again, as she was so bad, but now is as frisky as a colt. My neighbor is using "SAVE-THE-HORSE" on my recommend, and it is doing the business. Yours respectfully,
W. H. COOPER, D. D. S.

Winnipauk, Conn., Jan. 2, 1908.
Gentlemen: I enclose order for dollars, for which send me half-dozen boxes of Condition Powder, 50-cent size. "SAVE-THE-HORSE" cured a ringbone on a horse owned by a local blacksmith, to whom I sold a bottle some time ago. As both the horse and his owner are well known, it has proven a great advertisement. Yours respectfully,
W. J. ANDERSON,
Care of Anderson Stock Farm.

"SAVE-THE-HORSE" permanently cures Bone and Bog Spavin, Ringbone (except long Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness, without scar or loss of hair. Horse may work as usual.
\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express Paid.

TWO PACING STALLION COLTS WANTED.

A yearling or two-year-old by Star Pointer and one by Zombro. Must be good color, natural pacers, standard bred and registered, or eligible to registration. Bay or brown, little or no white, of good size, neat heads, not too high on leg, standing and traveling square on their feet. Must have plenty of knee and hook action. Must be absolutely sound and out of good mares. Address giving price, pedigree and full particulars as to speed, if worked, etc., **P. W. KELLEY, Breeder and Sportsman,** 366 Pacific Building, San Francisco.

MARE FOR SALE.

Brown mare, five years old, absolutely sound, afraid of nothing, and can be driven by a child. This mare is but 14 hands high, but is elegantly formed and handsome in harness. She is a pacer, and can show better than a 2:20 gait at any time. Will be sold very reasonable. Apply to **BEEDEE and SPORTSMAN,** Room 366, Pacific Building, corner Fourth and Market Streets.

FRED H. CHASE & CO.,
Auctioneers,

478 Valencia Street, San Francisco

DEL CORONADO 2:09 $\frac{3}{4}$

Del Coronado 2:09 $\frac{3}{4}$

Reg. No. 45122. By McKinney 2:11 $\frac{1}{4}$, dam Johanna Treat by Thos. Rysdyk 2:28. Winner of the fastest 3 heats ever trotted by a stallion in California. Winner first premium at the California State Fair 1907. Winner Blue Ribbons, Horse Shows at Los Angeles, Fiesta, Horse Show 1904 and first prize at both the Pasadena and Los Angeles Horse Shows 1906. 15.3 hands, weighs 1150 lbs.

Unbeaten on the Track and in the Show Ring.

Carlokin 2:13 $\frac{1}{2}$

Reg. No. 26458. By McKinney 2:11 $\frac{1}{4}$, dam, the great brood mare, Carlotta Wilkes (dam of 4 standard performers); second dam, the great mare, Aspasia (dam of 3 standard performers); third dam Miss Buchanan (dam of 1). There are no better blood lines than those contained in Carlokin's pedigree. He is related to all the royal families of the Wilkes tribe, the greatest of all race-winning families.

Copa de Ora 2:07 $\frac{1}{2}$

By Nutwood Wilkes 2:16 $\frac{1}{2}$, dam Atherine 2:16 $\frac{3}{4}$, by Patron 2:16 $\frac{1}{4}$, (son of Pancoast 2:21 $\frac{3}{4}$ and Beatrice, dam of Prodigal 2:16 $\frac{1}{4}$); second dam, Athene, etc. He is a beautiful light bay stallion, stands 15.3 $\frac{1}{2}$ hands, weighs 1100 pounds. He is one of the finest individuals ever seen on the California Circuit. He was one of the gamest and best horses out 1907. He is a typical show horse and paces without toe weights or hoppers. His breeding is ultra-fashionable. The combination of Wilkes-Nutwood-Patron-Pancoast-Harold and Pilot Jr. blood is unequalled by any other sire in the United States, and it is a foregone conclusion that next year this great horse will get a mark of 2:02 or better. He will be allowed to serve but 15 mares during this season.

Murray M. (3) 2:14

By Hambletonian Wilkes 1679, dam Anna Belle 2:27 $\frac{1}{2}$ by Dawn 2:18 $\frac{3}{4}$. Winner Pacific Breeders Futurity, 1904, \$3000.

The above horses will make Season of 1908

—AT—

Agricultural Park, Los Angeles, Cal.

**Del Coronado, \$60; Carlokin, \$50
Copa de Ora, \$50; Murray M., \$30**

COPA DE ORA 2:07 $\frac{1}{2}$

Vassar

Race Rec. 2:07. A great Individual Full brother to Reg. No. 12042. and Proven Sire. Belle Vara 2:08 $\frac{3}{4}$

Sired by Vatica 2:20 $\frac{3}{4}$. He by Belmont 64. First dam Nell, dam of 12 in the list. 4 with race records better than 2:10, etc., etc.

Will stand at **TOURNAMENT PARK, PASADENA**

Fee, \$50.

For particulars address

G. C. STANFORD, Manager, Pasadena, Cal.

Welcome Wilkes

By Welcome 24908, pacing race record 2:10 $\frac{1}{2}$, trotting race record 2:27 $\frac{3}{4}$, sire of

Cavalier 2:11 $\frac{1}{2}$ and six other

standard performers; dam Hera 2:20 $\frac{1}{2}$, by Mambrino Wilkes 6083 (sire Doc Wilkes 2:12 $\frac{1}{2}$ and fifteen others in 2:30 list); next dam Kitty, by Conductor 18779, etc.

Welcome Wilkes is a handsome black stallion, stands 17 hands high and weighs 1,280 pounds. He is an inbred Wilkes and is one of the best representatives of the Wilkes family in this section of the country. He is a large horse of symmetrical conformation, stylish and sound in every particular. With very little training he showed quarters in 35 seconds and demonstrated that he possessed racing speed. He is a horse of excellent disposition, intelligent and in every respect a high-class sire both for roadsters and track horses. He is six years old and his first crop of colts are now two-year-olds. They are all good individuals and have size, style and speed.

WILL MAKE THE SEASON OF 1908, CLAYTON, CONTRA COSTA CO., CAL.

Terms \$20 for the season—with usual return privilege.

For further particulars address,

HENRY STRUVE, Watsonville, Cal.

Athasham

Race Rec. 2:09 $\frac{1}{4}$
Reg. No. 45026.

A Game Race
Horse in the Stud

Bay stallion, stands 15.3, weighs 1,150. Sired by Athadon (1) 2:27 (sire of The Donna 2:07 $\frac{3}{4}$, Athasham 2:09 $\frac{1}{4}$, Sue 2:12, Listerine 2:13 $\frac{1}{2}$ and 8 others in 2:30), he by Matadon by Onward 2:25 $\frac{1}{4}$, out of Athalie (dam of Athano 2:10, Ira 2:10 $\frac{1}{2}$ and 5 others in 2:30), by Harkaway 11808, etc. Athasham's dam was the great broodmare Cora Wickersham (also dam of Nogi (3) 2:17 $\frac{1}{4}$, winner of three-year-old trotting division Breeders' Futurity 1907 and Occident and Stanford Stakes of same year), by Junio 2:22 $\frac{1}{2}$ (sire of dams of Geo. G. 2:05 $\frac{1}{2}$, etc.); second dam Maud Whippleton (dam of one) by Whippleton (sire of 7); third dam Gladys by Gladiator 8336, son of Geo. M. Patchen Jr. 2:27. Athasham has a great future before him as a sire. He is bred right and made right, and has every qualification one can expect in a sire. He has been timed in 2:06 $\frac{1}{4}$ in a race, and his courage is unquestioned.

He will make the Season of 1908 at Orchard Farm, Fresno, Cal., for a Fee of \$50, with usual return privilege. For further particulars address this place, care of

CHAS. MIDDLETON, Manager,

Or **D. L. BACHANT, Owner,**

R. R. 1, FRESNO, Cal.

King of Race Horses.

Sire of Ray o'Light 2:13 $\frac{1}{2}$ (2-year-old champion of 1907), Aerolite (3-year-old record 2:11 $\frac{1}{4}$, trial 2:05 $\frac{1}{2}$). Dam Rita B. by Boodle Jr.; 2nd dam Gabilan Girl by Gabilan; 3rd dam Clara by Elmo 891, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alycane 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioher (twice), Curt's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at **Alameda Race Track, Alameda, Cal.**

Fee: \$40 for the Season.

January 1st to July 1st.

Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

Four more in 2:15 have already been credited this season to

"McKINNEY" 2:11 $\frac{1}{4}$

Making his wonderful list still more remarkable.

When writing kindly mention this journal. **The Empire City Farms, Cuba, N. Y.**

Ellis' Improved Hutton Patent Checking Device....

Absolutely the Greatest Controller on Earth for Road or Track Use

GUARANTEED to stop your horse from **Pulling, Tossing the Head, Tongue Lolling, Side Pulling, Bit Fighting** or any other bad habits caused by **Bits or Checking Devices** that inflict punishment or keep a horse under too much restraint.

Just the thing for your road horse, as this device has a neater appearance than an ordinary bit. With it you have perfect control over your horse with little or no effort; it will make him forget his bad habits, bringing out all the style there is in him and make your driving more pleasant. Used and endorsed by E. F. Geers, W. L. Snow, D. J. McClary, Alta McDonald, J. B. Chandler, Crit Davis, Harry Stinson and nearly all the prominent Track and Road Drivers and on fully 80 per cent. of the horses campaigned over the Grand Circuit tracks. We are sole owners of patent and sole manufacturers of this device. Beware of worthless imitations and devices.

claimed to be as good as "Ellis' Improved Hutton Patent Checking Device." The genuine have name, number and date of patent stamped on bit, also on leather parts and can only be bought direct from us, as we have no agents or branch houses and do not sell to harness dealers. Our entire product hereafter will be sold to horsemen only, at the same wholesale prices we formerly charged harness dealers.

Price reduced under our new plan, direct from us to the consumer, to \$5 for complete device, including Back Part of Overlay. Delivered free to any part of the United States when cash accompanies order.

TURF GOODS MANUFACTURERS. - - - 430 MAIN ST., CINCINNATI, O.

N. B.—Our illustrated catalogue No. 12, containing cuts and descriptions and prices that are beyond competition on everything used on the horse (many new goods), will be mailed free to any address upon application. Every horse owner should have one as it will save him many a dollar during the season. Write for one at once, addressing Dept. "S."

Iran Alto

Reg. No. 24576 Trotting Race Record 2:12 1/4

IRAN ALTO is the only stallion with so fast a record and whose sire and dam both held world's records. He is sired by Palo Alto 2:08 3/4 (to high-wheeled sulky) by Electioneer. His dam is Elaine 2:20 (to high wheels), which was the 2-year-old record of her day. She is the dam of four and grandam of 12 in the list. Next dam Green Mountain Maid, dam of Electioneer and of nine in the list. Iran Alto is the sire of Dr. Frase 2:11 1/4, winner of the 2:12 trot at Lexington, 1906. His get are all large, handsome, high-class roadsters and race horses.

Will make the Season of 1908 in charge of
TERMS: \$30 for the Season. Usual return privilege. H. S. HOGBOOM, Woodland, Cal.

Three-Legged Horses

are not curiosities by any means. The country is full of them. The fourth leg is there all right but it is not worth anything because of a curb, splint, spavin or other like bunch. You can cure the horse of any of these ailments and put another sound leg under him by the use of

Quinn's Ointment.

It is time tried and reliable. When a horse is cured with Quinn's Ointment he stays cured. Mr. E. F. Burke of Springfield, Mo., writes as follows: "I have been using Quinn's Ointment for several years and have effected many marvelous cures; it will go deeper and cause less pain than any blister I ever used. Thought it my duty for the benefit of horses to recommend your Ointment. I am never without it." This is the general verdict by all who give Quinn's Ointment a trial. For curbs, splints, spavins, winduffs, and all bunches it is unequalled. Price \$1 per bottle at all druggists or sent by mail. Send for circulars, testimonials, &c.
W. B. Eddy & Co., Whitehall, N. Y.

ABSOLUTELY CURES QUINN'S OINTMENT REMOVES SPRAINS, WINDUFFS, CURBS, SPLINTS, SPAVINS, AND ALL BUNCHES.

NEW WORLD'S RECORD 15,000 Targets Without a Miss

J. W. Akard's claim to the title, "The King of Rifle Shots," is well earned. His performance of breaking 15,000 regulation clay targets without a miss is the greatest exhibition of skill on record. He used one shot only for each target. He threw his targets with his right hand, holding his gun with his left. He used

U. M. C. .22 SHORT CARTRIDGES

whose perfect quality supported his perfect aim. A great per cent of the targets were broken edgewise, so that the diameter of the disc does not truly represent the size of the moving target in the air. Mr. Akard's earlier run of 1,659 small marbles without a miss is nearly twice as long as any previous record on similar objects. In this case, also, he did his own tossing. Remember that Mr. Akard's run of 15,000 targets was unfinished. Mr. Akard is now giving demonstrations on the Coast.

U. M. C. CARTRIDGES EXCEL IN CLEANLINESS AND ACCURACY

A RECORD THAT IS A RECORD

Adolph Topperwein makes Straight runs of 14,540, 13,599, 13,292 and 13,219 on 2 1/4-inch wooden blocks at 20 foot rise, and misses only 4 out of 50,000 and 9 out of 72,500, shooting

WINCHESTER SMOKELESS POWDER CARTRIDGES AND .22 CALIBER RIFLES

Just to show that all things ARE POSSIBLE with Winchester .22 Caliber Cartridges and Rifles, and also to prove "Who's Who" in making rifle records IN PUBLIC, Mr. Topperwein recently shot for ten consecutive days at San Antonio, Texas, and made the above world's records for wing shooting with a rifle. He used only two rifles and loaded them himself. These record-breaking, history-making scores were made, without the aid of a notary public, before large crowds of people in a public park—not in a far-away back lot or down on the farm behind the barn.

Communications must be accompanied by the writer's name and address, not necessarily for publication, but as a private guarantee of good faith.

THERE IS no enterprise that will prove more profitable to farmers than the breeding of horses, and there is nothing raised on the farm that will pay as well, provided, judgment is used in the selection of stallion and mare and care is given the development of the produce. Since the early part of the nineteenth century there have been many inventions and labor-saving devices which pessimists claimed would do away with horses. Some of these individuals claiming that ere many decades would pass the only horses to be found would be gracing some sideshow or be placed on exhibition in zoological gardens. The introduction of the steam engine on land and on the great inland waterways did not cause the equine race to be annihilated, in fact, it was demonstrated that horses had to be used to draw the products of the farm, the mill, and the factory to the place where the iron horse was waiting with its train of empty cars, or to the vessels at the wharves where the big engines were waiting for the signal to move the loads of freight. Then followed the introduction of electricity and another generation of "doubting Thomas" was awakened whose predictions as to the fate of horses of all kinds were fraught with even more misgivings. But the horse interests did not die. The electric cars displaced a type of horses that had neither size, breeding nor speed; in fact, were found to be useless for all other purposes. Then came the automobiles. Is it not strange that since their introduction the demand for good horses is better than ever, while automobile manufacturers are wondering how long the craze will last, and if, like the bicycle fever, it will not almost reach Death's door?

During the recent slump in financial affairs in the large Eastern cities the first things which the rich people (who found themselves in need of ready cash) sent to be sold were their automobiles, and today the garages in New York, Philadelphia and Washington are filled with bargains in automobiles. But the horse, where is he? Why, he is in demand everywhere, the supply having been cut off through a slump in prices about ten years ago, when farmers and horse breeders shipped their best young mares to the auction rings and never replaced them. The farmers who sold at that time have been "kicking themselves" ever since. It taught them a lesson, and in their endeavor to build up this profitable branch of industry on their farms have endeavored to purchase colts and fillies that were well formed as well as standard bred and are breeding to the best representatives of the most fashionable families. A change in conditions has caused all this. Since those dark days in the horse industry every large city of note in the United States has its driveways over which devotees of light harness horse racing have taken pleasure in speeding their favorites and holding matinee races. Commissioners from Great Britain, Canada, Europe and Australasia have attended the large Eastern sales and paid excellent prices for record-holders, while nearly all the turf journals have instituted futurity stages for colt trotters and pacers. These futurities are more directly responsible for the increased interest among all classes of breeders of light harness horses than any other. Breeders feel that for them it is the quickest and best way to secure easy financial returns in their business. Even if they sell their colts that are entered in these stakes at less price, there is so much less expense made that they really gain by the transaction. Neither are they compelled to take the risk of holding their horses until maturity. The prices realized for colts and fillies as well as older horses in New York, Lexington,

Chicago and San Francisco during the time when money, to use a slang phrase, was "scarce as hen's teeth," are the best guides for our farmers and breeders to follow. The opportunities offered to owners of good, well-formed, well-bred mares to breed to sound young stallions—representatives of the best race-winning families—were never so plentiful as they are today, and such owners stand in their own light if they do not embrace the golden opportunities which owners of stallions are so generously offering them on the Pacific Coast.

AS THERE IS a good demand for light harness horses in California, there is no reason why the sale advertised to take place at Pleasanton, April 16th, should not draw buyers from all sections. There are apparently just as many people looking for good horses which look like campaigning material now as there ever was. There have been numerous sales to horsemen in Australia, Oregon, Nevada and Arizona which have caused a scarcity; then the increase in membership in the various amateur driving clubs and in the number of matinees held by the members of these clubs have furnished many places for the best. The recent sales in New York and Lexington prove conclusively that notwithstanding the stringency of the money market there were plenty of buyers ready to satisfy their wants in the way of good horses, consequently they found that to get them they had to bid for them. There was greater enthusiasm and much livelier bidding at these sales than has been noticed in years. California bred trotters were not very plentiful, nevertheless all that were offered brought excellent prices. We have the material here, and at the sale which takes place in April many bargains will be secured. At the auction sales heretofore held there no opportunities for showing the gait of the horses offered, but at this sale at Pleasanton a day will be set apart and duly advertised when all that are "threatened with speed" will be shown in harness on the racetrack. Prospective buyers will thus be enabled to see and judge for themselves. Many have been sold under the hammer in California that have turned out to be great money winners: Inferlotta 2:04½, Custer 2:05¼, and Carlokini 2:13½ were sold at auction for low prices, and this list could be extended would space permit. Suffice it to say, however, that a splendid lot of the choicest bred trotters and pacers will be disposed of at this big sale to the highest bidders, and owners should send their entries in at once.

ENTRIES TO THE American Horse Breeders' Futurity close on Monday, March 2. The purse is \$10,000. This stake is open to mares bred in 1907 for foals of 1908, and the entrance is only \$1. Every owner of a well bred mare bred to any of our good trotting stallions should send their entry on immediately. The very fact that a mare is engaged in this futurity increases her own and her prospective foal's market value. The small breeder stands an equal chance with the big one. Over 60 per cent of the money winners of the American Horse Breeder Futurities were bred by small breeders, owners of from one to three mares. This is the last notification and we advise all interested to take advantage of this golden opportunity.

READ THE SPLENDID OFFER made by the Horse Review in another column of this journal. Nothing so liberal has ever been offered by this sterling publication before. Every owner of a stallion should send circulars to owners of mares telling them of this offer, and every broodmare owner should forward \$2.50 subscription and the name of every mare he has now in foal, and the prospective youngster or youngsters will be eligible to start in the "Horse Review \$12,500 Futurity No. 15." Entries and subscriptions must be mailed on or before Tuesday March 10th. After that date the opportunity will have passed.

NOTHING SEEMS to meet the hearty approval of horsemen more than the announcement that there is a probability that there will be five or six days only of high-class light harness horse racing at the State Fair this year. The directors who have this in charge are working hard on a programme, and when it is published it will contain so many good features that every owner and trainer will feel encouraged to have their horses ready when the bell rings. The track will be in a better condition than it was last year, as considerable work is being done to have it in perfect order.

THE HORSEMAN and Spirit of the Times \$15,000 Futurity for foals of 1908 offers another opportunity for owners of broodmares to enhance the value of their prospective foals. The conditions of this ideal futurity as shown in another column will appeal to every horseman. Only \$1 to enter. It is unlike all other futurities for it is a true stake event, in which all the money received goes into the purse. There is absolutely nothing to be taken out of the amount contributed by the breeders or others who take part in the stake. Those horses which face the starter will race for all the money put into the stake. A colt or filly with a fair prospect of developing into a fast two-year-old or three-year-old will have an added value because of his engagement in this stake. Really, any man who expects a well bred foal in 1908 cannot well afford to keep that foal out of this ideal futurity. The promoters of this futurity are making a sacrifice in the interest of the breeders, and the breeders in order to help themselves to better futurities should make this most liberal of all futurities the best futurity of the year.

We know how some men are given to putting off the matter of making entries until the last moment, and then we know how often something happens in that very last moment to cause them to forget, or to take up their time and force them to neglect doing the thing they should have done. Just by way of reminding those who are in the habit of putting things off, we repeat that entries close next Monday, March 2, and to avoid an accident it were better to nominate at once.

FRESNO is again to the front with its programme of races. The meeting is to take place September 28th to October 3d. The sum of \$7,000 is guaranteed in stakes and added money. The programme appears in the advertising columns of this journal and entries will close April 1st, 1908, when horses must be named. Besides the published programme this agricultural association intends to advertise other races so as to give each afternoon its full quota of racing. Undoubtedly these races will be for the slow classes and District horses, except as to races not filling and where the management believe the local horses would not give contests, then other races will be provided for. Taking it all in all, the meeting to be held on this beautiful track will equal if not surpass any heretofore held there. Those having it in charge, President Geo. L. Warlow and the Board of Directors, are deeply interested in the light harness horse industry and are very sanguine as to the outcome of this meeting. Fresno is on the road to Hanford, Tulare, Bakersfield and Los Angeles, and horsemen can arrange their itinerary so that they can race at each of these fairs in succession.

The horsemen of Australasia have been trying for forty years to get a 2:30 trotter by breeding their mares to thoroughbreds, but the one they have sought for has never materialized. Those who have spent their money in this vain endeavor are now sending men to America to buy trotting stallions and mares, and have sold all their half thoroughbreds for whatever they would bring.

We regret to hear of the death of D. W. Donnelly, superintendent of Chas. W. Clark's Stock Farm at San Mateo. The deceased was beloved by all who knew him and his death leaves a void difficult to fill. His early life was spent on a farm adjoining Wm. Corbett's Stock Farm, where he was an authority on all matters pertaining to the trotters on the latter place.

Sonoma Girl 2:05¼ trotted 18 heats in 2:10 or better, in 1907. George G. 2:05¼ trotted in 13 heats, and among the fastest pacers Sir John S. 2:04½ paced in 18 heats; Inferlotta 2:04½ in 11, Thornway 2:05¼ in 9, Sherlock Holmes 2:06 in 8, Copa de Oro 2:07¼ in 7, Mona Wilkes 2:06½ in 4, Queen Pomona 2:07¼ in 4, and Jonesa Basler 2:05¼ in 3.

ABSORBINE FOR SHOE BOILS.

S. Farnsworth, Lunenburg, Mass., writes April 4, 1907: "Last fall I sent to you for a can of Absorbine. My horse had a large shoe boil, I should say as large as a quart measure, and Absorbine took it all down, and I have used only half of the can. I should not be afraid to recommend it to anyone." Absorbine is a mild and pleasant remedy to use. It is prompt and positive in its action and will remove blemishes, cure lameness and pain without blistering or removing the hair. Horse can be used. Send to address below for free book, "How To Remove Blemishes." Absorbine is \$2 per bottle at dealers, or express prepaid upon receipt of price. W. F. Young, P. D. F., 54 Mount St., Springfield, Mass.

NOTES AND NEWS

Do not forget to make entries in the Futurity Stakes advertised in this issue.

There are only three mares living at the Palo Alto Farm the last representatives of the great matrons that made this farm famous. First—Sallie Benton 2:17½, twenty-nine years. She was the first to trot better than 2:18, and is the dam of Surpoi 2:19. Second—Manette, thirty years old, whose foals sold for \$175,000, including Arion (4) 2:07½. Third—Manzanita 2:16. She is twenty-seven years old and was a world's record breaker at that time, is a full sister to Wildflower (2) 2:21. Manzanita's last foal is a bay horse four years old by Monbells, which is on the farm now.

Joe Cuicello drove a pacing mare through the stretch at Pleasanton last Saturday morning in 30½ seconds. She belongs to a Mr. McGowan of San Francisco, and was purchased at one of Fred Chase's sales not long ago for a small figure. The mare is by Chas. Derby and out of Addie Ash. She was bred at Oakwood Park Stock Farm. She looks like a great prospect.

Grace Zolock, the three-year-old filly by Zolock 2:05¼ out of Grace Kaiser, dam of Coney 2:02, is moving nicely for Joe Cuicello and has a great deal of speed. Her owner, Mr. W. T. Sesnon of San Francisco, enjoyed a ride behind her last Saturday. Grace Zolock has grown very much in height, and when she fills out will be a handsome mare. It is pretty safe to predict that she will be a member of her sire's 2:10 list by the time she is five years old.

One of the handsomest two-year-olds in California is Mr. P. M. Bellingall's filly by Coronado 2:09¾ out of a Secretary mare. She is the exact color of her sire and resembles him very much in conformation as well as trotting action. The Pleasanton trainers all predict great things for this filly.

Frank Jermy has purchased from Mr. Cunningham of Haywards the old mare Mabel by Naubuc, dam of Directly 2:03¼, and will breed her to Star Pointer this year. He also purchased from I. D. Cunningham a full sister to Directly and a filly by Bonnie Direct 2:05¼ out of Mabel, and will probably breed both to Star Pointer.

Geo. Beckers worked his Zombro mare Helen Dare 2:14 a half in 1:04¼ at Los Angeles last week, then pulled her up and finished the mile in 2:15. She will go in about 2:10 this fall.

The Searchlight mare Truth, a four-year-old, owned by E. D. Dudley of Dixon, is moving like one of the coming fast pacers of the season. Last Saturday at Pleasanton Fred Chadbourne drove her a workout in 2:18, Mr. Sutherland driving the five-year-old McFadyen (2) 2:15½, also owned by Mr. Dudley, and Dick Ables driving Mr. Kilpatrick's Don Diablo. The three pacers finished the mile in 2:18¼ and repeated in 2:19½, all well in hand. The way the mare Truth pinned her ears back and rushed to the wire at the finish of both these heats caused many to remark that she finished her miles much after the manner of her famous sire. McFadyen looks very rugged and should be a money-earner this year.

Thos. Ronan's roan trotter Birdson, by Antrim out of Birdie, by Jay Bird, improves every time De Ryder gives him a workout. He turned the Pleasanton track in 2:12 last week and the last half was in 1:03½. Birdson looks to be one of the best green trotters in sight at the horse center.

Frank S. Turner of Santa Rosa recently sold to F. E. Alley one of the handsomest and best fillies bred on the Santa Rosa Stock Farm. She was sired by Guy Dillon 2:23½ out of Carimo C. by McKinney 2:11¼; second dam Adioo (dam of Humboldt Dillon 2:13 and two others in 2:30) by Guy Wilkes 2:15¼; third dam By By (sister to Lockheart 2:08½) by Nutwood 2:18½; fourth dam Rapidan (great broodmare) by Dictator 1:13, etc. This filly's blood lines are of the very best, and, as an individual, she is in every way worthy of her royal lineage.

On March 12th the well known auctioneer, Ed. Smith, will sell at Agricultural Park, Los Angeles, about thirty head of grandly bred trotters and pacers—all speed prospects—and with them are several choicely bred mares in foal to Bon Voyage 2:12½ and Highland 2:19½. Mr. W. A. Clark Jr. consigns a number of royally bred ones, and so does Chas. Saddler and Mr. Christopher.

Judging from the meetings already declared for the Oregon and California Circuits this season, a trotter will have the earning capacity of \$5,000 net should he be able to place first money to his credit. There is a colt at Agricultural Park, Los Angeles, that possesses sufficient speed to do the trick, and he is for sale at half his value. Go take a look at him. W. R. Wynn has charge of him. This colt is Neernut 2:12½, dam Concha by A. W. Richmond, dam of Italia 2:04¼, is five years old past, sound and a race horse.

Jack Curry, the famous driver, is still receiving medical attention at Kansas City, Mo. His condition is critical, we regret to say.

Whoever needs a first-class Nutwood Wilkes stallion with which a good income can be made this year in any farming community should write at once to I. L. Borden of 417 Montgomery street for full particulars, price, etc., of his handsome Cresco Wilkes 2:10¾. The Nutwood Wilkes family is fashionable and he is one of the best bred and finest looking of its representatives.

According to the most careful estimate there are 85,000 work horses in New York city. This includes animals driven to trucks, express wagons, cabs and public carriages.—Exchange. How many autos are owned in Gotham we don't know. But it will take all of them, and then some, before they will cause the above equine army to "pass."

The real value of a trotting bred stallion or mare, as a trotting bred animal, is based on his or her breeding on qualities much more than on his or her individual qualities as a race horse. For instance, Smuggler, Goldsmith Maid, Allx, Sunol et al. were great on the track, but made no great contributions to nor lasting impressions on the trotting breed. Onward, Red Wilkes, Mambrino Patchen, Electioneer, Mambrino King, Moko, Alma Mater, Lady Pepper, Green Mountain Maid, Miss Russell, Minnehaha, Lady Geiser, Lark and many others of our most renowned speed-siring and speed-producing—and breeding on—stallions and mares never figured as turf performers. The ideal trotting-bred animal is the one which is great both on the turf and in the breeding stud, but as so many possess only one of these great virtues in a marked degree it must be concluded that a fast record is not, by any sort of means, proof positive that a certain animal will prove a great sire or a great producer. Indeed, it is a notorious fact that many noted failures as track performers later ranked at the top as sires or producers, while celebrated performers have proven complete failures as sires and producers.

James Smith's Nutwood Wilkes four-year-old mare worked a mile in 2:17½ at Pleasanton last Saturday, and is gaining speed right along.

Dick Ables has Mr. Kilpatrick's horses in perfect condition at Pleasanton. They are each and every one in good flesh, ready to go miles at any time and are all sound and healthy.

A resident of Kansas inquires if there are any statistics bearing on the number of services on an average it takes for a stallion to get a mare with foal within a single breeding season, says the Breeders Gazette. There are not, but some light was thrown on this subject by Gen. B. F. Tracy, who bred a great many good trotters. He stated his discoveries in rather different terms to those in which this query is propounded, but as the same thing is referred to in both his figures will do as a reply. He found that during a long series of years his stallions made about three covers for every foal begotten, taking the mares as they ran and without selection, young and old, good, bad and indifferent. Put into larger terms, this indicated that a horse begetting 50 foals would make about 150 covers during the season. Some horses will, of course, do better and some worse, but that was the average as presented for what it was worth.

The imported French Percheron stallion of the Tehama Stock Association died very suddenly at the Cone Ranch, Red Bluff, Wednesday night. The horse gave no indication of being sick and had eaten his usual amount of feed. The animal was a beauty and weighed, when only three years old, 2,000 pounds. The association paid \$2,300 for him about three years ago and the loss is keenly felt by those interested, although it is claimed that the shareholders had received \$90 on each share last season.

Enter your mares in the Futurity Stakes advertised in this journal. They close on Monday, March 1st.

H. A. Carlton, owner of Lynwood W., recently refused two offers of \$5,000 each for him. A few years ago this horse sold at auction for \$100. He bids fair to have more record-breakers to his credit than any horse bred at the San Mateo Stock Farm.

Hymettus 2:08½, the champion pacing three-year-old gelding by Zombro 2:11, is the property of Mr. L. H. Todhunter of Sacramento, Cal., and has not been sold to Geo. H. Estabrook of Denver, as stated by several turf papers. When Mr. Estabrook purchased through J. W. Zibbell, the four-year-old mare by Seymour Wilkes 2:08½, dam by Silver Bow 2:16, sire of the dam of Hymettus 2:08½, one of the Denver daily papers got the item so badly mixed that it gave out the news that Hymettus was the horse purchased by Mr. Estabrook.

"Men are deserters in adversity," wrote George D. Prentice many years ago, and breeders are deserters when they withdraw their patronage from profitable stallions simply because times are not as good as last season. The good horse is always a good seller, and now is no time to stop breeding.

Wm. E. Detels, the well-known harness-maker in Pleasanton, is about the happiest man in that horse haven, for he owns an eleven-months-old trotting colt by Bon Voyage 2:12½ out of La Moscovita (dam of Yolande 2:14¼) by Guy Wilkes 2:15¼; second dam Moscovita (dam of Mamie R. 2:15½, and Oro Belmont 2:15½) by Belmont 64; third dam Mosa (dam of Morale 2:15½, Murdock 2:22½, a sire, In-laid 2:26½, Moquette 2:27¼, Mosaic—dam of one and grandam of four—and Marmosa, dam of five in 2:30) by Woodford Mambrino 2:21¼; fourth dam Hermosa (dam of three sires and the dams of twelve in 2:30) by Edwin Forrest 49; fifth dam Black Rose (dam of the great broodmares Primrose and Mal-maison) by Tom Teemer.

Star Medium should be a bargain at \$500. He is royally bred, being by Dictatus Medium out of Diva (dam of Helen Keyes 2:05) by Piedmont, etc. See adv.

As will be seen by an advertisement in another column of this paper, the Horse Review of Chicago is offering a \$12,500 subscription purse for foals of 1908, to close on March 10th. This is the fifteenth annual stake of this description offered by the Horse Review, and the payment of \$2.50 covers a year's subscription to that paper and a nomination in this stake. Entries must be made and mares named by March 10th. There is no substitution clause in the conditions, consequently there is no way of getting into the stake after that date. There is no further liability incurred by the nominator. The next payment is on the colt but costs but \$5, and is not due until November 1st next; an additional payment of \$5 is due May 1st, 1909; after that nothing further is to be paid except starting fees. The Horse Review Futurity Stake is one of the most popular of the colt events, that enterprising paper having distributed \$130,575 among breeders by means of its Futurities. An engagement in the Horse Review Stake adds greatly to the value of a colt if it proves to be a good one. The subscription to the paper is more than worth the money to any one who is interested in horse matters.

A. B. Coxé of Paoli, Pa., is visiting California. While in Los Angeles he purchased the mares Ruth Mary by Directum 2:05¼ out of Tuna 2:12¼ by Ethan Allen Jr. 473, etc., and She 2:12½ by Abbottsford 2:19½. Both these mares have been bred to Bon Voyage 2:12½. Mr. Coxé has a splendid stock farm and is the owner of Sunol 2:08¼, American Belle 2:12¼, Leading Lady 2:16¼, etc., and twenty-three other mares.

W. A. Shippee is the owner of a very promising pacer that is being worked at Marysville. She is by his horse Temescal (a son of Palo Alto 2:08¾ out of the dam of Truman 2:12), and her dam was an old mare by Nutwood 2:18½ and her grandam a very old mare by a son of Imported Trustee. When first handled she was a pure-gaited trotter, but lately has shifted to the pace, and at this way of going has gone quarters in 31 seconds. She is strong and rugged, and if nothing happens will be one that will have to be considered when the races commence.

The list of new performers in 1907 on the Pacific Coast is most encouraging, but in the summaries sent by the various secretaries to this journal very little attention was paid to the pedigrees of the starters in the various events, hence if any of our readers will send us the breeding of any of the following sires we would be deeply indebted: Wappolo, Altitude Jr., Thos. Rysdyk, Platte, Alcone, Woodmon, Charleston, Howard St. Clair, Athby, Martin's Florida, Mohegan or Count.

There were but twelve entries received for the three-year-old stakes in the Sonoma County Driving Club, and the club decided to offer \$25 to each starter and add to the entrance money, and will do so if it is agreeable to the twelve nominators, all of whom have been written to and responses are expected within a few days.

Homer Rutherford of San Bernardino has two yearling colts by his grandly bred trotting stallion R. Ambush 2:11¼ that trotted eighths in 25 seconds the first time they were driven on the track. There is no doubt that this well-formed stallion will be a great sire.

The thirteen-year-old thoroughbred stallion Cyllene by Bona Vista has been sold to go to the Argentine Republic. His new owner paid \$125,000 for him, but he will not use him to improve the trotting horse interests of that country.

Frank Work's veteran trotter Edward 2:19, died at Carl S. Burr's Indian Head Stock Farm at Camac, L. I. Edward was a chestnut gelding by Masterlode, son of Hambletonian 10, dam Dolly, whose pedigree was untraced. He was foaled in 1872 and was therefore thirty-six years old at the time of his death. Mr. Work purchased him thirty-two years ago for \$2,500, and for years drove him to the pole with Dick Swiveller 2:18, the pair showing a mile in 2:16 and a fraction, a wonderful performance at that time. Edward took his record at Providence, R. I., in 1878. He was long ago pensioned for life by Mr. Work, who still survives at the age of eighty-nine.

Rocovaya is the name of the Russian Orloff mare that recently arrived in New York from Moscow, Russia. She is to be bred to Bingen 2:06½ this spring.

The pedigree of Cora Wickersham (dam of Athasham 2:09¾ and Nogi 2:17½, winner of the three-year-old trotting division of the Pacific Breeders' Futurity Stakes of 1907), is as follows: By Junio 2:22, dam Maud Whippleton (dam of Bolinas 2:24½) by Whippleton 1883; second dam Gladys by Gladiator 8336; third dam Crazy Kate by John Nelson 187; fourth dam by Shakespeare. Cora Wickersham has a yearling that is a pocket edition of Athasham 2:09¾, but will grow into a large and handsome stallion.

The San Benito Advance announces that the matter of the Hollister race track property is to be threshed out in the Superior Court. More than one-third of the stockholders refuse to ratify the sale made by the directors to Thomas McCloskey and by him to Messrs. Holbrook and Mehlwood. The stock originally cost the stockholders \$100 per share, and after paying all the debts there would be left upon division, if the sale is declared to be valid by the Court, the amount of \$33.50 per share.

The Winters Horse Breeders' Association has organized with the election of the following board of directors: W. I. Baker, A. B. Ish, L. E. Overhouse, H. R. Bowman, W. H. Robinson, and by electing the following officers: W. H. Robinson, president; H. R. Bowman, vice-president; W. I. Baker, secretary; A. B. Ish, Treasurer. The association reports that it had a prosperous year and that the prospects for 1908 are exceedingly bright.

Woodland Park track at Olympia, Wash., has recently been purchased by Mr. Geo. Huggins, an owner and breeder of fine horses, including both draft and trotting bred stock. He has made many improvements on the property and has everything fixed up in fine shape. He has a good hotel at the track and is putting in a complete new water system. About one hundred horses are in training at Woodland Park.

The trotting register has barred hoppers, and records made hereafter with the straps will no longer qualify for standard rank nor be accepted as records. This is the most important move towards the eradication of hoppers ever made.

Energia, the Orloff mare, that recently arrived in New York City from Russia, has been sent to Wm. Simpson's Empire City Farm to be bred to McKinney 2:11¼.

H. W. Brown of Spanish Fork, Utah, writes that there is a splendid half-mile track there, upon which he is going to train eleven colts and fillies by Al-toka 2:10½ this year.

J. M. Johnson paid \$575 for Fanella 2:13 with Todd 2:14¼ at foot and Sadie Mac in utero. This was an excellent investment, for he received close to \$65,000 for the mare and her descendants, viz.: Todd 2:14¼ sold for \$30,000 after earning \$20,000 in stud fees; Sadie Mac sold for \$4,000 and the mare herself for \$3,725. Who says it does not pay to buy a good mare?

The Los Angeles Driving Club postponed its matinee race meeting from last Saturday until to-day, so that plenty of time will be given for preparing the track. The directors are seriously considering the advisability of holding two matinees a month. Secretary A. D. Steuart recently stated that the members were quite enthusiastic over the idea and if so, the season of 1908 will be a most successful one for all who are interested in light harness horses.

The great event of the year in Livermore, known as the Horse Show, which is to take place next Saturday, March 7th, promises to eclipse all that have heretofore been held. Many prominent horsemen with their famous trotting stallions are coming from Pleasanton and Haywards, and if the weather is clear it is expected that the attendance will be a record breaker.

Jas. Sutherland wore a happy smile as he mopped his forehead after dismounting from his sulky last Thursday at Pleasanton, for he had just driven Bernice, a green trotter, a mile in 2:23, last quarter in 33 seconds and the last eighth in exactly 15 seconds! She goes with open bridle and wears no check. Bernice is a full sister to Owyho 2:07¼, being by Owyhee 2:11 out of Bertha (dam of nine in 2:30, four in the 2:10 list, four in 2:18 and one a yearling in 2:26¼) by Alcantara 2:23.

Contracts for clearing the entire 90-acre tract of the Portland Country Club and Livestock Association's grounds in East Portland have been let, and the building of the track and permanent improvements is being pushed. The mile track is about half completed. The fencing contracts have been let, and the next contracts will be for the plowing, surfacing and seeding of the grounds. Plans for a grand stand to seat 4,000 people are being drawn. Within the next few weeks contracts for the barns and show pavilions will be let. The livestock show and the harness racing will be the two great events of the association's annual meetings.

Anyone wishing to purchase a good producing, graded Norman stallion should visit the Livermore Horse Show next Saturday and see the black stallion Emperor, for sale on account of death of manager.

The attendance at the workouts on the Stadium in Golden Gate Park is increasing and a greater interest is being taken in the sport than has been noticed since the time the old Bay District track was in its glory. With the return of warm and pleasant weather we shall hear of some fast trials being made over this beautiful half-mile course.

In a group of horsemen who were discussing the causes and cures for thumps the other day C. E. La Fetra of Van Tassell & Kearney's horse department, pulled out of his pocketbook a slip of paper, yellow with age, on which was written: Nitrate of potash, 1 oz.; pulverized digitalis, 2 dr. Divide into five powders and give one every night. "John Doty wrote that prescription for me at Buffalo," he said, "on the day that Sensation beat Gloster and Grace, thirty-six years ago. Sensation had the thumps after winning two heats that day, and the betting was \$100 to \$10 against him. Doty, his driver, gave him this and he won. I have carried the prescription and used it ever since, and never saw a case of thumps it would not cure."

C. J. Grubb, owner of Redlac 2:07½, writes that he has decided to remain in Galesburg, Ill., this summer and will stand his fine stallion there. In the fall he intends to return and make California his home.

C. X. Larrabee has consigned 108 head of trotting stock to the big April sale in Portland. These animals were all bred on his farm in Ruby Hill, Montana.

The owner of a stallion in public service owes it to his patrons to advertise his stallion and keep him before the horsemen of the country, so that when the patrons sell the colts they will command a good price. There is no question but that of two colts of equal individual merit the one by a well-known sire will command a larger price than the one by a sire not kept before the public.

Arthur Neville of Dolgeville, Cal., writes us that his stallion Bo D'Arc, by Conifer (sire of Bonnie Russell 2:10¼, etc.), son of Lord Russell, out of Pastora (dam of Johnny Trouble 2:22¼, etc.), by Judge Salisbury, son of Nutwood 2:13¾; grandam Desdemona, by A. W. Richmond, has been taken to Caldwell, Idaho, to make the stud season of 1908. Bo D'Arc is a 16-hand chestnut and worked a two-mile heat in 5:17, last half in 1:10, last quarter in 34½ seconds, but never raced owing to an accident and subsequent veterinary malpractice, for which latter a judgment was obtained in the courts.

It is reported that the aged widow of Frank S. Malone, the former well-known horseman, is in very destitute circumstances. The calamity of 1906 swept away all her possessions and she was compelled, like many others, to move into one of the refugee camps, where her devoted husband passed away. Since then her condition has become pitiable, and as this is the first public notification of these facts it is hoped that the benevolently inclined horsemen of California who remember Frank Malone and his kindly, gentlemanly ways, will quickly respond to her relief. Some plan should be formulated to see that her remaining days shall not be spent in the almshouse. She is living in a shack on Point Lobos avenue between 13th and 14th avenues.

It is reported that Alta McDonald, at the recent Fasig-Tipton sale in New York, announced a challenge to match George G. 2:05¼ against Sonoma Girl 2:05¼ for \$5,000 a side. Manager Frank Smith was present and asked McDonald how long the deal was open, and the answer was till the start of the Grand Circuit at Detroit, and the race to be mile heats, best two in three. Californians will be interested in this. From the showing made at Point Breeze track, Philadelphia, it is dollars to doughnuts George G. will beat her. She is more rugged than the mare and seems to have improved every time he was driven last year.

A Belgian veterinary surgeon reports that he has cured confirmed glanders by giving at first five and then three granules of the sulphate of arseniate of strychnine every two hours for ten days. A solution of sulphate of zinc was injected into the nostrils, and the farcy balls stutzerized. There had been no return of the disease for a year at the time the report was made. Distinguished veterinarians, however, seem to think the disease liable to reappear at any time, and that the only safe course is to kill an animal known to be suffering from this malady. It is to be hoped, however, that experiments with the treatment of the Belgian will be continued until the truth is demonstrated beyond doubt. If the results are confirmatory, the life of many a valuable horse may be saved.

Wm. Stevenson of Victoria, British Columbia, who owns Fanny Putnam 2:12¼ and her son, Capt. John 2:18, by Tennysonian, has moved to San Francisco and will open a cafe in the Pacific building.

Montana, which was a conspicuous place on the harness horse map in Marcus Daly's time, is again compelling recognition. At present there are a great number of trotters and pacers coming out in that State.

From information collected by the Bureau of Animal Industry at Washington it is shown that the whole number of registered horses of all the recognized breeds in the United States is about 308,000. Of this number no less than 195,000 are trotters, the light harness horses far outnumbering thoroughbreds, hackneys, French and German coaches, Percheron, Shire and Clydesdale drafters, Shetland ponies, saddle bred horses, etc., all combined. When it is remembered that probably not one standard bred trotter in five is ever registered, the full significance of the government statistics is apparent, and it seems a fair estimate to say that there are at least 1,000,000 trotting bred horses in the country.

One of the greatest and most promising young sires on the Pacific Coast is the Electricity stallion Tennysonian, that was bred by Chas. Welby of San Francisco. Topsy T. 2:11¾, by Tennysonian, was one of the fastest pacers in the Northwest last year and will get a mark of 2:05 this year, besides a number of others will get low records in the Northwest.

Mr. Andrew Robertson, with his consignment of American bred trotting horses, arrived in Sydney safely. A large number of trotting horse enthusiasts were at the wharf to see them taken from the steamship.

Worth Ober, one of our old-time horsemen, is lying dangerously ill at his home in this city. He has had two strokes of paralysis. Mr. Ober was the owner of the Nutwood stallion Ross S. 2:19¼, that died on the Chico racetrack some years ago, and on holding an autopsy it was ascertained that the game little trotter had been poisoned. The death of this horse created quite an excitement among horse owners and trainers at the time. The loss was a most serious and lasting blow to Mr. Ober, for he had wagered a large sum of money on his chances of winning the race.

The great speed and draft horse sale to be held at Pleasanton April 16 to 18, under the auspices of the Pleasanton Chamber of Commerce, promises to be the blue ribbon sale of the West. Many entries are coming in from horse owners in all parts of California.

Mr. Chas. De Ryder will receive entries for the Fasig-Tipton Blue Ribbon Sale which will take place at Cleveland, Ohio, May 18 to 22. All speed horses sold at this sale will be shown on the track, where they will be timed.

The Zombro mare Bellemont 2:09¾, holder of the Coast record for three-year-old fillies, is bred as follows: She is out of Daisy Q. Hill, by Altmont 2:26 (sire of Chehalis 2:04¼, Del Norte 2:08¼, Ella T. 2:08¼, etc.); second dam Belle Price (dam of Pricemont 2:12, Multnomah 2:26, Malheur 2:27½ and Oneco 2:23¾), by Doble, son of Ericson; third dam Patti Price (dam of Olympus, a sire), by George D. Prentice, a son of Mambrino Chief II.

Owners of stallions should advertise them so that broodmare owners may be able to choose the stallion they think will be most suitable to send their mares to. The earlier these advertisements appear the better.

Jack Phippen, the trainer and driver who was for many years on the Palo Alto Stock Farm, is now located at the Pleasanton racetrack, where he has a small but select string of green trotters and pacers. One in particular attracted the attention of visiting horsemen last Saturday. She is called Nalta W., and was sired by Unimak (full brother to Sterling McKinney 2:09¾). She is a trotter and although hardly bridewise trotted down the homestretch at a 2:40 clip. She knows nothing but trot, and when started attends as strictly to business as an old campaigner.

The price of hay in San Francisco is decreasing rapidly. Last spring a number of the members of the hay trust visited the farmers and paid them big prices for their crops, believing that the same difficulty would be had in shipping to the city as they experienced the preceding years, and that there would be just as good a demand for hay at \$22 to \$28 per ton, but the old Scotch adage says: "The best laid plans o' mice and men aft gang aglee," and these dealers have learned this to their sorrow. Freight cars are more plentiful than they have ever been, and where there were ten horses working in San Francisco there are not two today. The farmers have good prospects this year for heavy crops and are anxious to have the hay dealers remove their purchases so that they can have room for what they will harvest.

Unimak, the sturdy looking brother of Sterling McKinney 2:09¾, looks better this year than at any time since he was first harnessed. His coat is like satin and, to use a horseman's expression at Pleasanton last Saturday, "He looks fit to go in any kind of good company—a gentleman all."

SUCCESSFUL MATINEE AT PLEASANTON.

At least a thousand people were at the Pleasanton track last Saturday afternoon to see the first matinee of the year under the auspices of the Pleasanton Matinee Club, and they were rewarded with some of the closest contests and best finishes seen on the track in many a day. Had the horses been racing for purses or stakes of Grand Circuit size, they could not have put up any more thrilling head-and-head finishes than were witnessed by the large and enthusiastic holiday crowd. Cheers greeted the winners after every heat, and all voted the day's sport one of the most enjoyable they had ever spent.

The Matinee Club officials are to be commended for the excellent management of the affair. The races were called on time, there was little scoring and for the time of year fast time was made.

The greatest excitement prevailed during the Class B trot. In this event Thos. Ronan, who owns the Pleasanton track, won the first heat with his road mare Antoinette, and it was evident that the sympathies of the large crowd of spectators were with him. When scoring for the second heat, an outsider yelled "Go" as the horses approached the wire and heedless of the starter's recall, the drivers went the mile, Farmer Bunch and Mr. Ronan driving their mares every inch of the way and reaching the wire only heads apart in 2:18. The judges called it no heat, however, and the Farmer captured the next heat. Mr. Ronan's mare was not to be denied the next time out, however, and won amid cheering and waving of handkerchiefs by the ladies in the grandstand.

Helman's Freely Red and De Ryder's Senator Clark made a pretty race of the Class A pace, and heats in 2:17½ and 2:15½ were fast for horses that have had but little chance to work during the long rainy season this winter.

The cups were large and handsome and were donated by the Rose Hotel, Fred H. Chase, President Lee Wells and Thos. Ronan. Another handsome cup offered by the Pleasanton Hotel will be raced for at the next matinee, the scratching of horses in the Class A trot causing that event to be declared off. The summaries of the races follow:

Class A, pacing; Rose Hotel Cup—

H. H. Helman's b m Freely Red by Red Medium	1	1
Chas. De Ryder's b g Senator Clark by Prodigal	2	2
E. R. Dunn's b m Bonner Bell by Bonner N. B.	3	3

Time—2:17½, 2:15½.

Class B, trotting—Fred. H. Chase Cup—

Thos. Ronan's b m Antoinette by Antrim	1	2	1
C. F. Bunch's b m Zella Mack by McKinney	3	1	3
Wm. Montgomery's b s Alto McKinney by McKinney	2	3	2
A. L. Charvo's br g Peter Pan by L. W. Russell	4	dr	

Time—2:21, 2:23, 2:25.

Class C, trotting; Lee Wells Cup—

Chas. De Ryder's ch m by Sidney Dillon	1	2	1
Henry Dunlap's b g Direct D. by Bonnie Direct	2	1	2
Henry Helman's br m Carrie S. by Zombro	4	3	3
L. L. Griffith's s m Oredna	3	4	4

Time—2:29, 2:26½, 2:28¼.

Colt race, mile dash; Ronan Whip—

Dr. Colestock's Direct Only	1
R. C. Peach's Sugar Beet	2

Time—3:14.

Notes of the Meeting.

Messrs. John A. McKerron and Ira B. Dalziel of Francisco and John Thoms of Alameda were the judges and performed their duties most acceptably.

Jack Fronefield acted as starter and got them away well in line and with little scoring. He presented the trophies to the winners with a neat speech.

President Lee Wells made a hit with the crowd when he reprimanded the person who caused the drivers in Class B trot to drive a full mile by giving them the word to a false start. Nothing is more reprehensible than such actions on the part of spectators at a race, and while there was but a single incident of this kind, Mr. Wells spoke timely on the subject and was heartily applauded. There were no further transgressions.

Henry Helman's mare Freely Red paces like one that will be shading 2:10 before many weeks. She is beautifully gaited and finishes like a real race horse.

William Montgomery's big stallion Alto McKinney was much admired by every one, even though he didn't win. He is a beautifully gaited trotter, very attractive when in motion.

The Sidney Dillon mare that Chas. De Ryder won the Class C trot with is said to belong to a Southern Pacific attorney, although Col. J. C. Kilpatrick is giving directions about her work, etc.

A delegation from the Stockton Driving Club attended the matinee and were greatly pleased with the racing. There were seven in the party, which consisted of President A. B. Sherwood, Secretary Frank Liegenger and Messrs. J. Grigsby, A. H. Cowell, F. A. Murray, M. Henry and P. Marengo.

The sale of the Ormondale Stock Farm racehorses has been postponed until March 24th.

Drink Jackson's Napa Soda.

MATINGS FOR INBRED TYPES OF THE HORSE.

[By C. E. Farnum, M. D.]

It has occurred to the writer that certain facts well known concerning breeding might be profitably used as a basis for evolving a new and improved type of horse.

When a large mare is crossed with a jack the progeny is an animal stouter, stronger and harder than either parent. In such mating we have, as a rule, a female parent that weighs from three to four hundred pounds more than the male parent. When a jenny is crossed with a horse (a large male parent with a small female parent) the progeny is a comparatively delicate little animal that does not surpass or even equal in strength and hardness either the male of the female parent. There must be for these facts some reason, which should be more or less considered in mating stallions and broodmares, especially when endurance and maximum of strength in proportion to size is desirable. A rational theory for the explanation of this fact is as follows: A female parent, the mare weighing, say 1,300 pounds, bred to the male parent, the jack weighing 900 pounds, would give the female parent an excess of 400 pounds in weight, and if the progeny averaged in weight between the two parents, would give the progeny a weight of 1,100 pounds, the female parent then weighing about 200 pounds more than her progeny fully grown. A female parent during gestation (or the period of carrying her offspring) should much better sustain for good and superior development an offspring weighing at maturity 200 pounds less than herself, than one to weigh as much or more than herself. Over and above the requirements during gestation, and while furnishing nutriment after birth, there is in her an excess or reserve in units of volume of blood and in units of respiratory capacity, and in units of absorptive, assimilative and excretory functions, which never taxes her in these respects to the limit of her capacity in procreation and which at all times furnishes to the foetus as much pabulum as can be appropriated for its healthy growth and sturdy development. The result is offspring that, in proportion to size, is the superior of either parent in strength and endurance and hardness of constitution.

About fifty years ago a stout, handsome, stylish little stallion of solid color and superior conformation, 14 hands high, was standing for public service. On account of his small size most of the mares mated with him were larger than himself. The result was progeny very beautiful and stylish, very strong for their age and of great endurance. Sons and grandsons of his stallion were used for breeding purposes, the largest of them being, of course, selected for this purpose, and, after they were bred up to good size so that the mares with which they were mated were usually smaller than these stallions, the progeny of these stallions were hardly up to the standard of "strength for inches" of the immediate progeny of the original progenitor of this family, Justin Morgan. Thus did the Morgans lose their prestige. It was then easy for some other family or families possessing more speed, such as the Hambletonian or Mambrinos, to displace them in popularity.

About forty-five years ago Clydesdale stallions were numerously imported into the United States. The purpose of their importation was to cross them with native mares in order to raise horses of increased size for draft purposes. It is a well known fact that the progeny of the first matings of small American or Mustang mares with large Clydesdale stallions were most unsatisfactory. The offspring, although of increased size over the dam, was not strong in proportion to size, nor did it possess hardness and endurance. Clydesdales at once became more unpopular. However, at a later period, after large half-Clydesdale mares had been bred back to large American bred sires, and this progeny had demonstrated its superiority over that resulting from mating small mares with large Clydesdale stallions, the Clydesdales again gradually grew into favor.

At a later date the Norman stallions were imported into this country. They were more fortunate in their early matings than the Clydesdales, for the Clydesdales having preceded them, the Norman stallions found for their matings many large mares, part Clydesdale. The result was that the earliest progeny of Normans were much superior to the earliest progeny of the Clydesdales, and the Normans at once came into popular favor. Had the Normans preceded the Clydesdales the results would have been the reverse in regard to quality of progeny and popularity.

By mating for a few generations large female parents with smaller male parents doubtless a new and superior type of horse can be experimentally originated. In such matings a female parent of about 150 or 200 pounds in excess over the size and weight of the resultant progeny, would probably insure satisfactory results. For such matings each parent should have respiratory capacity and other development in proportion to weight. The predominant qualities to be developed, and to be improved in each subsequent generation, by such matings would be great strength in proportion to size and a hardness and capacity for endurance in excess of anything hitherto known in equine history. Development of a capacity for extreme speed should not be expected to result from such matings, especially when the female parent is in size so much in excess of the male parent, as a maximum of strength is incompatible with a maximum of speed. Excessive muscular development in the progeny of such matings

would improve such restrictions upon free range of motion as would necessarily place speed below the extreme limit.

The combinations for matings on this plan to develop the extreme of hardness and endurance and the maximum of strength in proportion to size might range from the Norman or the Clydesdale mare, weighing about 2,000 pounds, to the small stout, beautifully formed Hungarian pony, weighing from 350 to 400 pounds, each male parent in all these many matings between these extremes of weight averaging from 350 to 400 pounds less than the female parent, so that the progeny will average in size 150 or 200 pounds less than the female parent and about that much more than the male parent. After a few generations of progeny from such matings the difference in size between sire and dam might be reduced to 200 pounds, so that the offspring would average in size only about 100 pounds less than its dam. Once established by several generations of breeding a superior type of horse that inherits this excess of strength, hardness and endurance it is evident that not so great a disproportion in size between female and male parents will be required to maintain these qualities as was required to originate them through original and less remote ancestors used in the building-up process. However, no horse should be expected to become an ideal representative of this type of horse until he could trace back for several generations only through ancestors themselves the progeny of such matings. Then outcrosses would be positively retrogressive.

At the present day the trotter with a capacity for development of extreme speed and a capacity for producing the same is not unfrequently of such make up that he is useful mostly for speed purposes. The same can be said of the thoroughbred. By matings of trotters and of thoroughbreds somewhat on the plan outlined in the foregoing, doubtless new types of each could be developed, perhaps less valuable for racing purposes, but of much greater value for utility purposes, a large proportion of their speed being still retained.

AMATEUR DRIVERS.

The biennial congress of the National Trotting Association, held at the Murray Hill Hotel in New York, was characterized by a very large degree of harmony, and by very little opposition to the changes in the trotting rules recommended by the rules committee, except upon some minor points. The report of the rules committee was practically accepted as submitted and its recommendations concurred in. The congress will be chiefly distinguished for the very large concession which it granted to the amateur drivers, who, like Caesar, "came, saw and conquered." The result of the amendment to the rules governing amateur racing ought to give a great impetus to that diversion, for the concessions granted were far greater than were demanded or even hoped for. They had not asked for greater privileges than are involved in the rule adopted by the congress of the American Trotting Association one year ago governing this subject. That provision gives them the right to conduct racing for not more than ten days in any one year, at which an admission fee can be collected and no record penalty incurred if no entrance fee is charged, no privileges sold, and no purse, stake or wager raced for. The sweeping provisions of the rule adopted recently by the National Congress give them the right to charge an admission fee and sell any kind of a privilege they desire, including programmes and pool-selling, and in addition they will not be limited to ten days, but can race all summer if they so desire. Only they must not race for money or charge an entrance fee.

It is impossible to foretell what effect this radical departure from the old methods will have, except that it seems certain to give a wonderful impetus to the amateur feature of the sport, by reducing the expense so materially that many will be induced to participate who have not heretofore felt able to do so. The regulation defining the status of an amateur has been obliterated, and there is now nothing in the rules to prevent the professional people from conducting the sport on the same lines as the amateurs. The trophies could be diamonds or any other commodity easily negotiable for money, some way might be found to circumvent the condition as to entrance fees, and thus the game could go on forever without the risk of incurring records—a situation which would appeal mightily to the average trainer. We do not predict that this will be done, or even attempted, but merely suggest that it is possible.

Ethically considered, the advantage which has been conferred upon the amateur drivers is not strictly fair and just to the man who races his horses for a living and is compelled to accept a record when his horse wins, but it is probably practicable and expedient, in view of the importance to which the amateur game has attained during the past few years. It should materially increase the demand for fast trotters and pacers, and stimulate the sale of harness and vehicles and all other racing paraphernalia. Laws against racing, or rather racing speculation, are coming to occupy the attention of legislatures more and more every year, and but for the amateurs the speed of the light harness horse would have ceased long ago to be an available asset in many of the States, so that it is impossible to longer ignore the influence of the gentleman driver and the service he is doing the breeder and the dealer.—Trotter and Pacer.

THE COMBINATION SALE.

A large assemblage of horsemen and their friends attended the combination sale held by Fred Chase & Co. at the big sales pavilion on Valencia street last Monday evening. The prices obtained were very fair considering the frenzied state of the money market. Wm. Higginbottom was the auctioneer while W. Mendenhall described the merits of the families which each animal represented. Following is a list of buyers and the prices obtained: Bird, b m by Diablo 2:09½, dam by Alex. Button; J. Lindauer\$170
Thoroughbred mare by Vesuvian; J. Cates..... 100
Fall, b g by Falrose, dam by Nevada; J. M. Bonney 365
Chestnut mare by Knight, dam Hylene by Albert W. 165
Combination horse; F. Vascelle..... 130
Fred, b g by Pilot Prince; R. Frank..... 160
Bert G., b g by Antevolo 2:19½; R. Fahey..... 100
Prince 2:20; J. McTigue 165
Tommy, blk g; A. Jose..... 130
Lomo Wilkes, trial 2:25, by b s by Lynwood W. 2:20½, dam Flora B. by Whalebone; Pease & Son 305
Bay gelding by Patchen Wilkes; J. Holland..... 180
Ibis and Ides of March, bay geldings by Green's Rufus; S. B. Tobey..... 510
T cart and harness, cash..... 185
Lena, b m by Welcome 2:10½, dam Retta, by Electioneer; J. J. Butler..... 240
Rose L., trial 2:17, by Brown Jug, dam Miss Mathews; Wm. Ayres..... 280
Toby, r g; W. Watt, Napa..... 125
Combination mare; A. V. Fulton..... 90
Prince, b g by Diablo 2:09½..... 205
Ethel S., b m by Falrose 2:19, dam Rena B., by Alex. Button; Wm. Watts..... 250
Peach, b m by Gossiper Jr., dam Sigma by Waldstein; J. J. Butler..... 180
Togo, b g by Gossiper Jr., dam Rena B., by Alex. Button; Walter Ayers of Seattle..... 130
Busbybody, b m by Gossiper Jr., dam Rena B., by Alex. Button; J. W. Schuetten..... 175
Gossiper Jr., b s by Gossiper 2:14½, dam Virginia Vasto, by Vasto 2:16½, second dam Virginia by Junio 2:22; W. H. Kitchen, Paso Robles 220
Dolly Lynwood 2:40, by Linwood, dam Jennie by Stanford; A. Jose..... 50
Docus D. (trial 2:14½), b s by St. Whips, dam Dalia by Daly; H. Boyle, Mill Valley 150

DRAFT STALLIONS PURCHASED.

The big black French draft stallion, Orleans, Reg. No. 16142, which has been on exhibition by E. Lovell, has been purchased from Dunham & Fletcher by the Mendocino Draft Horse Company. The following gentlemen hold shares of stock in the company: Boyd & Daniels, H. S. Tregoning, W. B. Coombs, Jas. W. Todd, Joe Guenza, A. A. Heeser, S. W. Coombs, John Eglin, John Guenza, J. C. and Hans Ottoson, W. H. Oppenlander, Andrew Peterson.

Dunham & Fletcher of Wayne, Ill., imported the horse from France last year. He was foaled in 1903; sire, Sapeur 366; dam, Comtesse 390. The bill of sale of the horse is accompanied by a certificate of registration in French and one in English and shows the complete family lineage.

Ed. and Chas. Bambauer, John Menjoulet Sr. and John Menjoulet Jr., Sam Jamieson and Domingo Gastombide of Los Banos have formed a company and purchased an imported Percheron horse which they now have at Volta. The animal was purchased from J. Crouch & Son of Lafayette, Ind., through their agent, Thomas Vantine of Sacramento.

Thomas Ross of King City has just bought of Singmaster & Son of San Jose two fine imported stallions. One is a Percheron coal black and weighs about 1,800 pounds; the other is an English Shire of rich bay color and weighs 2,000.

One of the best Percheron stallions ever brought to California has just become the property of a joint stock company with local men as members, which has arranged for the purchase of the horse to be kept in Santa Ana. The horse is a two-year-old, jet black, and weighs 1,750 pounds, and is one of the smoothest made and best proportioned individuals possible to imagine. Members of the company owning this horse are L. F. Clapp, J. Buckingham, F. J. Graser, J. H. Halladay, Fred Culver and Ben Nimmo. The horse came from the Metz Stock Farm in Chicago and the sale was made by Charles Harris, former resident of Santa Ana, but now a practicing veterinary surgeon in Nevada City.

AN ENTERPRISING MONTANA JOURNAL.

The Northwestern Stockman and Farmer, published at Helena, Montana, is certainly an enterprising journal, as the following from its issue of February 15th shows:

For some time past the harness racing in Montana has been poor; in fact, each year it has been getting poorer. We do not know exactly why it has been going on this way, but we feel sure that it is the fault of both the fair associations and the owners of horses. The Stockman and Farmer is going to try to form a plan that will, or should, add new life to the business. It is our intention to raise \$3,000 to be given in \$500 purses, one each day, at the coming Montana State Fair. The races will be opened to Montana horsemen for horses

worked upon Montana tracks this season. Just as soon as we find that we can raise this amount of money, and also find how many horses there will be to compete in the various classes, we will make up the races, and where we find at least eight entries for any certain class we will offer a purse of \$500 for which the horses can compete without entrance money. But it will be reserved that there shall not be less than five starters for each race. This, together with the regular races that will be offered by the State Fair, should be the most inviting program ever made up in the West, or in fact at any place. In order to raise this \$3,000 it will be necessary for us to ask all of the breeders and persons interested in harness races to contribute as liberally towards the proposition as possible. Therefore, the Stockman and Farmer will start the ball rolling by giving \$100 towards the fund.

The same paper prints the following Montana horse news:

Every year about this time we have had reports from various sections about the number of harness horses that were being worked. Bozeman has always had a big list and continues this year to be away in the lead.

In Joe Huber's stable will be found Maggie Hart and Royal Hart, both by Great Hart, and Directum D., all owned by Frank Clark of Red Lodge; Georgiana S. and Mabel Ayers, both by George Ayres, owned by Dr. Kellogg of Helena; Belle Parkinson, by Bob Fitzsimmons, owned by C. J. McNamara of Helena; Montana Grattan, Cherry Diamond 2:22½, Copper Shell 2:15½, and Tortoise Shell, all owned by C. W. Hoffman of Bozeman; J. D. L., owned by Jno. D. Losekamp of Billings; a three-year-old filly by Gold, owned by Walter Story of Park City; a two-year-old gelding, owned by A. C. Roecher of Bozeman; Kitty Lomond, owned by A. M. Showan of Utica, and Dan Wilkes, owned by C. H. Buford of Virginia City.

In the stable of Chris Peterson are Patsy Rice and Prince Charles, owned by Al Smith of Bozeman, and Placer, owned by A. L. Love of Bozeman. Mr. Peterson has several others in his stable, but we were not able to get the report.

Two 2:34 trotters, one green pacer and one three-year-old pacer are said to be in a stable of Charles Butcher of Bozeman.

S. M. Willis of Wibaux reports that he has one green pacer and green trotter at Wibaux and that several horses are being worked in that town and Glendive for a small circuit that they are going to form in eastern Montana, finishing up at the State Fair.

Harry Cannon of Park City is working one green pacer and a green trotter that he expects to have at the fairs this fall.

Kalispell seems to have a large list of horses already in working, and they expect more within a very short time. A list of pacers are: Gold Dust 2:14, Frank Patch 2:29, Light of Day and Billings G., both green ones, Fern Dot and Bertha Gold Dust, three-year-olds. In the list of trotters are L. L. B. and Silver Coin, both in the 2:25 class; Edna S., 2:40 class, and three trotters for the green classes.

At Helena we are very sorry to announce a small string. Primus, a young pacer that raced at the Helena track in a matched race last year, will be worked, as will Mazie Mack, owned by Thomas Murray, and Lulu B., a Fitzsimmons, owned by William Holbrook. Jake Fischer has a four-year-old green trotter that will no doubt be seen at the races the coming year. Mr. Fischer recently sold Buddie Boy, with a 2:21 pacing record, who can trot equally fast, to N. J. Gould of Helena.

CLEVELAND OUT OF THE CIRCUIT.

Mr. H. K. Devereaux of Cleveland, Ohio, writes as follows: "A few pertinent facts relative to the abandonment of the Cleveland Grand Circuit meeting for 1908 may be of interest. We will probably have the track to train on and use for our matinees the better part of this summer at least, but the last meeting has been held over this historic bit of ground and its days are numbered.

"In 1903 the betting law was first enforced and the meeting that year lost about \$8,000. In 1904 no meeting was attempted. In 1905 one was arranged for and abandoned at the eleventh hour, with a loss of about \$4,000. The meeting was declared off, not with the idea of saving money, for had it been carried to a finish the loss would have been no greater, if as great. Also two of the directors offered to make any loss good. The declaring off of the meeting was for the purpose of rousing the public and obtaining their sympathy, and it was with the unanimous vote of the horsemen present. In 1906 an advertised betless meeting was tried, with a loss of over \$2,500. In 1907 the experiment was tried again, with a loss of about the same amount. In five years the Cleveland Driving Park Company has gone in the hole \$47,500, this including \$21,000 raised by subscription. In that time the plant has deteriorated from lack of funds and \$15,000 would not put it in more than passable condition. We have made a fair fight, but the odds are too great to warrant attempting a continuance of it. Over \$10,000 deficit a year is not a thing to appeal to anybody. This association, the oldest in the Grand Circuit, has stood for thirty-six years for all that is good, and as a pattern for others, but the enforcing of an obsolete and unpopular law (so far as trotting meetings are concerned) has killed it. This has been a case almost of persecution, and certainly unfair and unwarranted."

SONOMA COUNTY COLT STAKES FILL.

The following twenty-seven nominations have been received by the Sonoma County Driving Club for Stake No. 1 (foals of 1906), and same has been declared filled:

Bay colt Lynwood Patchen by Lynwood W., dam Maud P., entered by S. B. Wright; b c F. S. Whitney by F. S. Turner, dam By Guy; b c F. S. McKinney, entered by F. S. Turner, dam Center Guy; b c Guy Stamboul by Guy Dillon, dam Stamboulita; b f Carimo McKinney by Guy Dillon, dam Carimo C.; b f By By Dillon by Guy Dillon, dam By By, entered by F. S. Turner; b f Guy Katie by Guy Dillon, dam Katie, entered by Jno. S. Taylor; b c McKinney Button by Washington McKinney, dam Diana Button, entered by Ben Scoville; b c Guy Dillon Jr. by Guy Dillon, dam May Wilkes, entered by Mrs. Mamie Cook; ch f by Lynwood W., dam Jessie Mare, entered by W. Hockin & Sons; blk f by McMyrtle, dam by Gossiper; ch f by McMyrtle, dam by Sidmore; b f by McMyrtle, dam by Gossiper, entered by John Grimes; b c by Lynwood W., dam Rosewood, entered by R. W. Peterson; br f by F. S. Turner, dam Philosopher May, entered by W. Callahan; br c Ansel M. by Washington McKinney, dam Aggie G., entered by J. B. Durand; b f by Washington McKinney, dam by Lynwood W., entered by Mr. Murphy; b f Lady Mack by By Mack, entered by I. F. Rickert; b c by Lynwood W., entered by L. L. Cannon; b c Fitzgerald by McMyrtle, dam by Gossiper, entered by Dr. O'Brien; b f by Wayland W., entered by W. C. Helman; b c by Wayland W., dam Nettie J., entered by Fred Jasper; b c by McMyrtle, dam by Secretary, entered by Mr. Perry; b c Mack Gleno-way, entered by E. B. Voris; b c Claude Duval by Dumont S., dam Rose Thorn, entered by J. L. Charlton; b c Prince by Wayland W., entered by M. Concannon; b c by Washington McKinney, dam Eva Z., entered by Sam Norris.

FOALING TIME.

Soon mares bred last season will begin to foal, and it is very important that they should be looked after very carefully, and such attention given them as will insure their health and the strength of their foals, says the American Sportsman. Broodmares require the best of care and there are always many reasons why the breeder should see to it that they receive it. They should have plenty of exercise. They should not be deprived of this important routine of their daily life. It adds to their own strength and the strength of the prospective foal. They should have proper food. Their food should be succulent and nourishing. They should have it regularly and in sufficient quantities to meet every demand of the prospective mother. Pure water is another essential part of their keep. Never should they be given water that is in any way polluted. It should be given them regularly or arranged so that they can have access to it at any time. Another important feature connected with the care of brood mares is that they should have protection from storms and inclement weather. It is absolutely necessary that care in this particular should be given them. They need such protection, and if it is not given them, they suffer, which, injures the mare. One of the important things for the breeder to remember, is that the more care and attention he can give the mare before foaling, and the two, after foaling, the greater will be the returns to him in a financial way. Most breeders are compelled to pay attention to the financial part of the business. They are engaged in the business because of the money there is in it. Very often they lose, because they are careless and negligent in the care of the mare and colt. In fact, the prospective foal should be looked after through the care of the mare. After foaling time the colt and mare should each be properly cared for, with a view of giving the colt every opportunity to form and develop. Breeders who take proper care of the mare and foal are the ones that are the more successful in a financial way.

RACING AT RIVERSIDE.

The season at the Riverside Driving Park opened Saturday afternoon, February 23d, with a good matinee given by the Riverside Driving Club.

The first race, a 2:40 pace, was won by Mammy, owned by A. B. Miller and driven by Axtel Nelson. Coupon, owned by J. Garner, was second. Time 1:17½, 1:17 1-6, for half-mile heats. In the 2:30 trot the winner was Tom McKinney, owned and driven by Dr. F. Ramsey. S. R. McDougall's Pete was second. Time 1:18½, 1:15 and 1:15. The special trot was won by Laureta, owned by W. A. Hayt and driven by G. H. Judd. Time 1:12, 1:25 and 1:10. In the free-for-all pace, Harry H., owned by V. E. Reynolds and driven by F. A. Ramsey, was the winner. Maidie, owned and driven by G. H. Judd, was second. Time 1:14, 1:10½. The three-minute mixed race was won by Orin A., owned and driven by Harry Germain. Prince Valentine was second. Time 1:24, 1:22½ and 1:23. The 2:40 trot was won by Staton McGerg, owned by Ed Simmons and driven by G. H. Judd. Time 1:22 and 1:23.

In the quarter-mile dash, the winner was R. L. Bettner's Mignonette, ridden by J. P. Norton. Time 0:26. The Kid, owned by T. B. Jenkinson, came in second. The last event was the half-mile dash, which was won by R. L. Bettner's Mignonette. Time 0:52. Jenkinson's Annie Burke was second.

CARE OF THE RANCH HORSE.

[Special Correspondence to the Breeder and Sportsman.]

The special purpose horse, the driver, the saddle horse or the track horse has had much attention given it as to the general treatment it should receive as to feeding, etc., but the horse that pulls the plow and makes possible the cheap cultivation of our soil and motive power of every sort has but little thought and attention given it. It is common belief that any one can care for a work horse and consequently it is a fact that there are none worse abused and generally mishandled than the "plug" that does the work. You will only need to visit several ranches to discover that there is a great difference in the appearance of the work horses under various managements.

Correct feeding is not generally understood and a lack of understanding in this line causes much of the bad condition found in horses. It is common when there is quite a number of teams for a stableman to do all the feeding. As no two horses should be fed the same at all times, the manager would have to watch the feeding close or some would be getting too much or not enough of hay or grain. Where it is possible and the teamsters are intelligent, it is a good plan to let each man feed his own team. A stableman is liable to be partial to certain horses or indifferent, and feed all alike. A teamster who likes his team would be more apt to give them the proper amount of feed if he was instructed a little by the manager. The noon meal should be the lightest of the day, mainly because the horse, if working hard, is more or less heated and is liable to bolt his grain. At night is the time to give the heavy meal, when he has plenty of time to eat and rest. A horse should not be allowed to stuff on hay. In general about two pounds of hay to every one hundred pounds of live weight is enough for a day. The best kind of hay to feed is a matter upon which feeders disagree, but from analysis, alfalfa hay is more nearly a balanced ration compared with oat hay, and with barley as a grain it makes a strong ration. On many ranches alfalfa hay is the only feed given working mules and horses, and it is remarkable how well they work and keep up on it. A change of hay and grain occasionally does much toward keeping a horse in condition, even though scientifically it might not be proper. Once a week, regularly, it is well to give one good feed of bran, as a mash or dry. This loosens up the bowels and cleans them out. Colic is largely caused by too heavy feeding, too much water when warm, or bolting the grain. A good, well-tried remedy is the following:

Sweet Spirits of Nitre.....1 ounce
Laudanum1 ounce
Ginger1 teaspoonful
Baking Powder1 teaspoonful

With this give an injection per rectum of 3 to 6 quarts of warm, soapy water. With the proper care in feeding and watering, digestive troubles and an unthriftiness of appearance, would not occur so frequently.

The shoulders of the work horse are very commonly neglected, although it is very important that these parts should be well cared for. Sometimes the formation of the shoulder is such that it is almost impossible to get a collar that will fit smoothly the whole surface and the draft is brought too much on the points of the shoulder, causing gall sores continually. In such a case it is a good idea to put on collar pads and make them very thin over the sores or cut out holes the size of the sores. No grease of any kind should ever be used on a sore under a collar. Better to use some drying healing powder, and a good one is, equal parts of sulphur, oxide of zinc, and air-slaked lime. A good practice is to make the teamsters wash off the shoulders of his team every night with cold water, especially when plowing or doing heavy ranch work. He should also be requested to clean the horses' collars just as regularly as he harnesses his team. A horse with a good, smooth shoulder should never wear a sweat pad, as it only collects sweat and dirt and keeps the shoulder irritated.

There is just as much need for currying and keeping the work horse clean as there is the driver. Fancy polishing is not necessary, but a good, thorough brushing and currying of the coat at least once a day is essential. It keeps the perspiratory organs in active condition and this enables much of the waste of the body to be thrown off easily. Frequently you will find a work horse in good condition of flesh, showing he has plenty to eat and digests his food well, but his coat stands out and he acts sluggish in his movements. This is often due to the fact that he simply works and eats, but his driver does not work his skin and keep him clean. Who has not seen two men working side by side, both getting plenty of food and are apparently healthy but one looks as though he changed his clothes and took a bath regularly, while the other is unkempt and his clothes wear out without change. The movements and steps of these men are different and the better groomed man will do more work, all things being equal.

Much might be said about keeping the feet in good condition, but with this so much depends on the shoer that the owner has not much control. As a rule a good horse with poor feet is no better than a poor horse with good feet. However, there is much that may be done to keep the hoof and foot healthy. Horses standing in a stable much of the time are liable to get foul feet. Manure gets packed around

the frog and if not cleaned out occasionally, "foul" results. A good wash for this is "blue stone," dissolved in water or a strong solution of carbolic water. When the horses are in mud continually, it is best to keep the hair trimmed about the foot and fetlocks, and a good cleaning given them every night.

To keep a work horse in a good condition, so that he is always ready for any kind of work, requires constant attention on the part of the owner. His needs are not the same as the trotter's, but his work is just as important and he must be fit to do it.

SPEED NOTES FROM PLEASANTON.

The weather has been all that could be desired, the track is in perfect condition and several horses from almost every stable have been worked fast for this time of the year. The two-year-olds especially have been brushed some remarkably fast quarters and halves.

Messrs. Sutherland & Chadbourne have driven the three-year-old Moretrix a mile in 2:29, last quarter in 32½ seconds. Jim Logan (by Chas. Derby 2:20-Effie Logan), a two-year-old pacer, a mile in 2:40 and a quarter in 36 seconds. The Limit (by Searchlight 2:03¼, out of Bertha), a mile in 2:22, last quarter in 32 seconds. Tom Murphy, a green pacer, a mile in 2:21, last quarter in 32½ seconds. McFadyen and Truth (the latter a four-year-old pacer by Searchlight), worked a mile head and head all the way in 2:19, coming the last quarter in 32½ seconds. Mona Wilkes 2:06½, a mile in 2:22, last quarter in 32 seconds. Ben Russell, a green trotter, a mile in 2:23½, last quarter in 34 seconds. Commodore Dewey (his name will have to be changed), a green trotter, a mile in 2:25, last quarter in 34 seconds. A very handsome big stallion, just in from pasture, sired by Stam B. 2:11¼, out of an Electioneer mare, jogged a mile in 2:40 and acts like a trotter.

Dick Ables let a two-year-old trotter have his head, and the way he came down the stretch would have made Budd Doble smile. This one is by Kinney Lou 2:07¼, out of the dam of Lady Mowry 2:09¼. The boys caught the half in 1:14¼.

Ed Parker was not to be outdone by Dick. He has a pacing two-year-old filly that has only been handled two months, and the way she came from the head of the stretch at a :30 clip was "all powahful, sah, all powahful!"

E. R. Dunn then let his three-year-old pacer by Searchlight step a mile in 2:19. His three-year-old trotter made the mile in 2:31½, and then, by way of preparation for the matinee Saturday, he gave Bonner Belle a mile in 2:21, the last quarter in 30 seconds! She is a sweet one.

C. A. Walker has just commenced on "Pilot," a fast pacer by Abbottsford Jr. This fellow is only four years old, but he has shown enough speed to warrant his being entered through the Coast Circuit. Mr. Walker also has a nice trotter by the name of Hunky Dorey; he is by Athadon. He has a green pacer by Chas. Derby 2:20 also, and two nice-looking youngsters by Bonnie Direct and T. C., a son of Nutwood Wilkes.

W. P. Hodges has negotiated a mile in 2:24 with "The Angelus," a brown stallion by Zombro 2:11 out of Hazel Kinney 2:09¼—an inbred McKinney—that looks as though he will be as good a trotter as that other inbred Wilkes, Lady Gail Hamilton 2:06¼. Mr. Hodges drove Volante, a four-year-old filly by Neernut 2:12½, out of Malvina by McKinney 2:11¼, a mile in 2:35.

G. A. Farmer drove a green pacer by Searchlight 2:03¼, dam Addie C. by Guide, a mile in 2:14¼. He then took out another by the same sire which trotted a half mile in 1:12.

Joe Cuicello brushed a green pacer by Charles Derby 2:20 a quarter in 31½ seconds. Then he gave a four-year-old trotter by Nutwood Wilkes 2:16½ a mile and repeat in 2:20, the last quarter of the last mile in 32 seconds. These were not all the strings to Joe's bow, for he came out with a Sidney Dillon filly that trotted a mile in 2:23, last half in 1:08, and the last quarter in 32 seconds. Lou Dillon's laurel wreath stands in danger of being shifted to this one's brow.

That sterling Palo Alto favorite, Jack Phippen, wore a broad smile as he dismounted from his sulky after driving Grey Boy, a green pacer, a mile in 2:21¼, last half in 1:07½, last quarter in 32 seconds. He has several others that he is "sweet" on, especially a three-year-old trotting filly which he drove a half in 1:15½ and a quarter in 36½ seconds. He breezed a three-year-old trotter by Kinney Lou 2:07¼ a mile in 2:35, a half in 1:14, last quarter in 36 seconds.

H. Helman of Mack Mack 2:08 fame, gave Freely Red a mile in 2:20, last quarter in 32 seconds. His filly Bertie Mac jogged a mile in 2:25, last quarter in 33 seconds. The trotting filly Carrie S., in his string that is owned by A. R. Shreve of Cathlamet, Washington, was given two easy miles around 2:30, with last halves in 1:13 and 1:12. He drove a three-year-old owned by A. G. Dahl of Butte, Montana, a mile in 2:31½, and the two-year-old pacer Bonnie Antrim, a full mile in 2:35, last quarter in 36 seconds.

Chas. De Ryder has given his Eastern candidates a good tryout this week and several look as if they had "wintered good enough." Unless all signs fail his "Jay Bird trotter," as the Ronan roan horse is called, is of Grand Circuit calibre.

H. H. Dunlap brushed a full sister to Dr. Ham-

mond 2:11¼ a half in 1:14¼, last quarter in 37 seconds. He sent Direct D., a trotter by Bonnie Direct 2:05¼, a quarter in 35 seconds.

J. R. FRONEFIELD.

THE NEW RULES.

The legislation at the recent congress of the National Trotting Association does not effect very many material alterations in the trotting rules, but there are a few changes that have an important bearing upon the conduct of the sport and they should come to the attention of trotting managers and owners of horses to be raced, in order that they may be well considered and understood before the season opens. It will hereafter be necessary for track associations opening events on the plan of installment payments of the entrance fee, to publish and mail to each nominator a complete list of those making each payment within ten days after the same becomes due, together with the substitutions or transfers if these are provided for in the conditions. The failure to do this will relieve the nominator of liability for the entrance fee or penalties for failing to make the payments.

Rule 4 was amended by providing that in races for purses three entries are required, instead of five, as heretofore, and two to start instead of three. Associations may take exception from the above, if desired, in which case they must specify how many entries and starters are required.

The starting judge has his scope enlarged and his responsibilities increased by the addition of the following provision to Section 5 of Rule 24: "The starter is also required to see that the official record is kept in accordance with the by-laws and rules."

The hobbles question came in for consideration, and in addition to the requirement that no horse shall wear the straps in a race unless he starts in the same in the first heat, it is now provided that having started with them he must continue to wear them until the end of the race; also that horses habitually wearing the hobbles shall not be permitted to start in a race without them, except by permission of the judges.

Rule 37 was amended by providing that in races of half-mile heats the distance shall be one-half the distance of mile heats.

The full text of the new rule granting record immunity while permitting admission fees to be taken and privileges sold, is as follows:

"Records cannot be made or bars incurred in contests on grounds of members for premiums, other than money, when no entrance fee is collected from entered or competing horses, even if admission is charged at the gate or grand stand and privileges sold; but all other rules governing public races shall be enforced, and members, as well as competitors, shall be amenable for violation of same. This rule shall apply only to meetings given by members of The National Trotting Association."

ANSWERS TO CORRESPONDENTS.

Honolulu—What became of the stallion Durfee? Ans.—Durfee 11256 was sent to Bellefontaine, Ohio, and sold by the executors of the Hicks estate. There is no record of his having sired any fast performers since his departure.

H. R.—Is Sky Pointer registered? Is his son out of Juliet D. registered?

Ans.—Yes. His number is 34567. We cannot find the latter registered in the last volume of the Stud Book.

THE HORSE BREEDERS' FUTURITY.

It is of vital importance to all owners of broodmares who wish to realize high prices on their produce that the foals be entered in the Futurity Stakes which are advertised every winter. The Horse Breeders' Futurity for mares bred in 1907—foals of 1908—is one which should appeal to all. The inducements offered by this splendid newspaper in offering this stake are of such a nature that it seems as if all who are interested in the breeding, training, development and sale of young trotters and pacers cannot afford to overlook them. The following three reasons are self-explanatory and we earnestly urge our Pacific Coast horseowners to make entries in it:

1—It costs but \$1 to nominate a mare, and there is no substitution, so it's a case of now or never with the broodmare owners. 2—Two more payments of only \$5 each carries foal to year of race. 3—Winner of trotting division gets \$5,000, winner of pacing division \$2,000, thus making it worth while to train and race a foal, whether it is a trotter or a pacer. 4—Nominators of dams of winners are liberally rewarded. For example, it is possible for a nominator on a \$1 payment to get back \$300. 5—Big buyers, the men who pay high prices for likely prospects, are located in the East, and they demand that a foal have an Eastern futurity engagement. 6—Colts with stake engagements are more valuable than without, and for the likely colt an engagement enhances its value tenfold. The good, but unstaked, colt has little selling value.

Only One "BROMO QUININE."

That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the world over to Cure a Cold in One Day. 25 cents.

CONDUCTED BY J. X. DeWITT

A DAY'S FISHING AT TAMPICO.

Steps on the stairs and a knock at the door. It is my friend the Colonel come to call me (a colonel by courtesy); he has never been connected with the regular army, although rumor affirms that in former times he had quite intimate relations with various of the irregular organizations that flourished in the republic, now, happily, dormant or extinct, due to the vigorous persecution of Don Porfirio, writes M. L. in the Mexican Herald. There was not room for them both, and the weakest had to go to the wall. "Get up," he says; "the pleasant chill of the salt sea breeze coming through the window, the muffled roll of the gentle surf, the morning gray chasing the darkness from the glassy ocean, the twittering of the beach birds as they fluttered upon the sands, all call us from our beds. Let us get into the sea before the sun gets out of it, a plunge and then our coffee."

In light and airy costume we run across the sands and into the briny. A plunge through a roller, a race on the sand, another dip in the water and then back again to our coffee. The rosy blush of the storm-compelling clouds, whose purple masses edged with streaks of feathery silver and red gold are hanging in the east, promised to shade and defend us from the rays of a southern sun and the glare of a shimmering sea. "Give the impediments to the mozo," says the Colonel; "leave the sun umbrellas behind—we will not need them; those clouds will serve instead," and now along the beach past the "cantina," pavilion and bath-houses to the jetties.

"Do you notice the sand? How smooth it is! Millions of shells have been ground and polished by the breakers in its fabrication. Those bluish, iridescent little navigators that you see sailing on the waves are 'Portuguese men-of-war'—a pleasant combination of sailor and shellfish, who come out to sail on days like these. Don't handle them; they are very poisonous at times. Look at the gray alcatraz with long bills and short legs as they come sailing over the waves but a few inches above the water, rising and falling with the billows; they are professional anglers, not amateurs like ourselves; and here are the jetties, when the norther blows; they are a streak of white foam on a dark-green sea. Millions of tons of stone were used in their construction. This beach where we now stand was once well out to sea, but the shifting sands have been held here by the dyke."

We go out into the jetties a little way to find a fishing place—the Colonel, his boy, the "mozo," and myself. Here is where the river ends and the sea begins, where man's work struggles with nature's for supremacy. To the right the ocean, to the left the river. In the background, the white beach and the whiter surf, while the gray stone wall that divides the salt water from the fresh serves to emphasize the ceaseless, restless roar of those foaming waters which it separates from the gentle ripples of the river. To the right green water, to the left brown; those waves come curling around from the capes of Florida and reefs of Yucatan; these brown waters fall in crystal raindrops on yonder mountains that form our western horizon, rolling through deep and gloomy canyons, over precipices, under mighty trees, past plantations of cane and orchards of oranges, forests of palm, by Indian villages, until at last this rocky dyke alone separates them from their final home—the sea.

There is a current from the north, and when it strikes the jetties it curves out to sea. A few yards beyond the surf, where the waves roll, but do not break, is the place to try our luck. Two lines in the sea and one in the river. To suit all piscatorial tastes we bait one hook with a piece of fish and the other two with fresh shrimp, and with a swing of the sinker throw the line about thirty yards into the eddy. It is well to have some slack in case of hooking something large. This surf fishing is worse than buying lottery tickets; it may be a little fish with a big mouth or a big fish with a little mouth. There are all kinds and sizes here. I get a bite at last, and a big one, too; how the rigid line cuts the water like a wire. I pull him in and let him go, play with him and give him slack. That was a pretty leap, but it was his last. He is tired now; I bring him in—a twenty-pound robalo. And now the Colonel is struggling with a monster, but he is out of luck; his line is snarled and caught around a rock and will be broken with the next rush. "Now he is gone, Colonel, with hooks, sinkers and all. Don't mourn his loss; be a philosophic, if not a scientific, angler." But it is an aggravation when the victim marked for sacrifice bids us adieu, after showing his fan-like tail and burly shoulders above the water, that we may know we have lost. After about ninety minutes of fishing, in which we caught above one hundred pounds of fish of all kinds and sizes, we left the jetties and walked along the river bank to the pilot wharf to take our canoes. As we were standing on the little dock awaiting our boats—for we were to use two—an Indian with a basket walked out to us, sat down and took out

his fishing lines. As he looked a bit different from the other people hanging around, I began a conversation by asking if he were a Tampico man. "No, amo" (boss), he said, "I am a Mexican" (meaning a City of Mexico man). "I heard that this was a good place and so ran away from the hunger there and came here."

"How much is the fare?" I asked. "I don't know, as I walked it." (It is about 500 miles the way that he must have come).

"What are you working at?" "Nothing; no one but 'tarugos' (chumps) work here."

"Well, how do you make a living?" said I, getting interested. He stood up and pointed to the woods back of us: "Those woods are full of fruit, and this river of fish; any tree will do to sleep under; the sun keeps me warm; I pay no rent and feel no hunger." He then sat down and went to fishing. "A queer country this," thought I, "where a man will walk 500 miles to get a good place to loaf."

The boats provided by the Colonel were one a skiff and the other a dugout canoe made from the trunk of the "ceiba" tree. My crew was an Indian paddler who officiated also as captain. The canoe was about 20 feet long and 20 inches wide, painted blue outside and green within. The paddler sat in the stern and I took my seat amidships. My line was braided linen about 600 feet long, of which 450 feet I coiled inside of the canoe as slack in case something big was hooked, for tarpon, jew-fish, shark and cruel (a large species of the jack family weighing up to sixty pounds) are plentiful in the river.

We went up the river with the tide on the south bank, but at first the fish did not seem inclined to bite, and my sailor man told, to pass the time, a number of stories. He said to me: "You catch fish, boss, or try to catch them, with a hook and line, but there was once an 'Americano' here who used only 'hot bricks.'"

"How is that?" said I; "fish will not bite on bricks."

"Yes, they will, if you fix them right. When the jetties were being built and the piling run out into the sea to support the track the sharks were very plentiful in the river, and if any one fell into the water he was almost sure to be eaten. They became so tame that whatever edible was thrown or fell from the tugboats or piledrivers was at once picked up and eaten. The captain in charge of the work heated a brick one day until it was almost red hot and wrapped it up in cloth full of grease. He then threw the bundle to a 14-foot shark that was swimming by. The palatable morsel was swallowed at once by the shark. When the brick had burned through its covering and began burning through the intestines of the shark he jumped and plunged in all kinds of ways (brinco y salto de muchas maneras). The boss called it his aquatic circus, but it was the last performance of the shark."

On the south bank of the river are extensive pastures where hundreds of cattle were feeding, awaiting shipment to Cuba and Yucatan. These cattle are from the para grass pastures of the foothill country. One large steamer already loaded and ready for sea was waiting for a pilot. I noticed that she was rocking back and forth, though the river was perfectly smooth. My Indian told me that cattle ships frequently do so. If anything started them rolling the movement of the cattle on board would keep them going indefinitely.

Talking with my Indian I had almost forgotten that I was fishing, when suddenly my line was jerked from my hand, and about one hundred and fifty feet astern I saw a silvery fish jump into the air. He looked six feet long and seemed to jump twice his length out of the water. A tarpon, the king of brackish waters. Up into the air he goes again, his silvery scales shining in the sun. He means to keep it up until he is dead or free. "Liberty or death" is his motto. I keep a steady strain on the line, giving him slack or pulling him in with the hope of tiring. Now he sulks at the bottom of the river. I pull him gently toward me, when he makes another rush; but it is his last; he is tired now. I pulled him to the boat's side for the Indian to gaff. Though it seems but a short time in telling, forty minutes were spent in his execution. My Indian says he is not a large one and will weigh about three arrobas and a half (about ninety pounds). He does not look as large alongside the boat as she did when first jumping and plunging. My Indian tells me that these fish have been caught 7 feet 5 inches in length and weighing 215 pounds. If the large ones are as active in proportion to their size as this one it must be a hard half-day's work to capture one. He is too big to take into the canoe, so we will tow him alongside. Now we are in front of the astillero (ship repair yard), and the Colonel, who has come up astern, suggests that we anchor just below the shipyard, out from the rocky point the river bends around. We anchored a short distance astern of a small river steamer that was slowly rotting at its moorings. The water was

about fifteen feet deep inshore from us, but outside there was a deep pool, and there we threw our lines; the current ran about two miles an hour and only light sinkers were necessary. For the first ten or fifteen minutes we caught nothing, but at last the Colonel's boy threw into the boat two pargitos about a pound and a half each. For the next quarter of an hour we were all landing fish as fast as we could, until thirty or forty had been caught; then they stopped biting. The pargito is a fish weighing from one to five pounds of dark color above and white below. In shape they are very similar to black bass and make a good fight when hooked. After waiting a few minutes we concluded to go to Pueblo Viejo (the old town). The tide was with us and we drifted and paddled up the river and turned into the estero, about one hundred yards wide at its mouth. This must have been a great place for oysters once; the banks were a mass of shells.

Those poles driven V-shaped are fish traps and supply Tampico market with shrimp and river fish as they come from the lake with the tide. This is one of the minor highways of commerce. Do you notice the canoes laden with corn, fruit, beans and fish that are constantly passing us? That canoe seems to have a family party aboard. The lady in the stern with the sun umbrella over her head and sandals on feet on the gunwale evidently considers her complexion of the first importance, even if it is chocolate-colored. I am a little hungry and thirsty. Shall we go up to that palm-leaf house and ask for their hospitality? It has an inviting look. At least, the doors are wide open, and after this sun on the water the shade of its roof will be comfortable.

We left our canoe on the bank and went up to the house to ask for a drink and a light lunch. The ladies of the family came to the fence to welcome us, while two of the young gentlemen stood by the gate to usher us in. The patriarch and founder of the settlement stood by himself in placed dignity watching the arrival of the strangers. Our hosts were pleasant people, with black eyes, shining teeth, cheery smile and ample person whose round arms and well developed busts suggested the good things of this life taken "Otium cum dignitate." We passed a pleasant hour in their company listening to the tales of sharks, smugglers, floods and forests sandwiched in between the courses of shrimp salad, fried bananas and quesadillas. The old gentleman told us what he had done and the young men what they hoped to do.

Pueblo Viejo, situated at the junction of lake and river, facing the west, is a characteristic little place. Its long street parallel with the shore of the lake, the bamboo and palm houses on either side surrounded by gardens and orchards of oranges, mangoes and plantains, its pair of country stores, where everything from dried shrimp to green bananas can be purchased, the canoes drawn under the sheds at the beach, the languid, lazy, loafing Indians, the small boys, whose black skin and white teeth show to advantage under their undress uniform of broad straw hat and escapulario.

Down the estero with the wind and current to the mouth of the Tamesi and into the river, to paddle and sail and fish for a few hours among the many tree-covered islands that divide the river into a labyrinth of waterways, will be our afternoon's diversion, and then a moonlight ride back again with the tide. So let's be going and get the carpon line ready. It will take us but a few minutes to run through the estero, with the wind and the current in our favor.

With this wind with us we'll put up a sail and you'll see what fine sea craft these canoes are. That schooner-rigged affair that is overhauling us so fast is loaded with a family, their goods and chattels, homeward bound. You notice they have hoisted a red blanket as a foresail. The sheets (from the same bed, no doubt) make a very fair mainsail.

"Hoist the mainsail, you copper-colored son of Neptune, and get her under way. This lovely afternoon must not be wasted." This isn't bad, sitting in the shade of the sail and sniffing the sea breeze tempered by the odor of the forest.

We are at the bridge at last. Let's tie up and take a rest. The bridge is over the Tamesi, the Panuco bending away to the southwest, while the Tamesi extends to the north to lose itself in the labyrinth of lakes. There are hundreds of miles of navigation for the canoeist on these waters, where hunting and fishing are to be found in their greatest perfection. The sun is down and the moon is up. The wind has dropped to a gentle breeze. We will drift down with the tide and call it a day's fishing.

That a cat will come back, no matter where taken, is an old saying, and that a dog will come back home from a distance of hundreds of miles is proved by the action of a Foxhound, owned by Michael Ryan of 1902 Union street, Oakland. Early last December, Ryan sold two hounds to a mining man, who took the animals far up into the hills of Montana. A few days ago one of the hounds, named Mooney, was found whining about the back door of the Ryan home on Union street. He was lean and lank and appeared to have had a rough journey. How he made his way home from the Montana hills is a question his former owner is unable to answer.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

LOS ANGELES SHOW AWARDS.

St. Bernards (Rough coats). Puppy dogs—1 T. F. Savage's Bounce II, 2 M. M. Woodbridge's Bruce. Novice dogs—1 Mrs. Monaghan's Montana, 2 Miss A. Aydelotte's Phelo, 3 Bounce II, v h c Bruce. Ch. Humberstone Hope, marked second open and reserve winners, in the catalogue, was absent.

DOINGS IN DOGDOM.

Bostons, Collies and Pointers in the order named were the largest representation of breeds at Los Angeles. There were 329 dogs benched (22 absent) and 485 entries, making a four-point show, according to the catalogue lists. The dogs and entries in each breed were as follows:

St. Bernards, 7 dogs, 14 entries (1 absent). Great Danes, 5-5. Russian Wolfhounds, 7-13. Greyhounds, 3-3. American Foxhounds, 5-5 (1 absent). English Foxhounds, 2-3. Pointers, 23-43. English Setters, 17-20 (1 absent). Gordon Setters, 1-1. Irish Setters, 13-22 (1 absent). Irish Water Spaniels, 1-1. Clumber Spaniels, 1-1. Field Spaniels, 5-9 (1 absent). Cocker Spaniels, 13-19 (1 absent). Dachshundes, 10-23. Collies, 36-71 (1 absent). Curly Poodles, 3-3. Dalmatians, 5-7. Bulldogs, 15-24. Airedales, 6-12. Bull Terriers, 17-20. French Bulldogs, 10-16 (2 absent). Bostons, 13-58 (2 absent). Smooth Fox Terriers, 18-22 (5 absent). Wire Fox Terriers, 6-6 (1 absent). Irish Terriers, 16-20 (1 absent). Scotch Terriers, 1-1 (1 absent). Black and Tan Toy Terriers, 3-3. English Toy Spaniels, 7-8 (2 absent). Japanese Spaniels, 6-7 (2 absent). Toy Poodles, 5-6. Yorkshire Terriers, 4-4. Chihuahuas, 11-11. Pekinese Spaniels, 1-1. Miscellaneous, 3-3.

Geo. Nieborger's black Cocker Uvas Cricket won her championship at Los Angeles.

Judge Shortall's Silkwood Ben Ali is also on the roll of champions, pretty good for a California bred one to make the trip in less than 18 months. Ben's first appearance was at the Bull Terrier specialty show in this city October, 1906.

C. B. Gill's Silkwood Brassie is another one entitled now to a champion medal from headquarters at 55 Liberty street, New York.

Wandee Knight, instead of Wandee Resist, is the good one recently purchased by Mr. Stettheimer from Hampshire Kennels.

Mr. Walter Hobart's Southboro Sissy was served by I. C. Ackerman's Ch. Humberstone Record last Thursday.

AT THE TRAPS.

The California Wing Club members and club guests will open the live bird season at Ingleside tomorrow.

The Golden Gate, Union, Empire and Sunset Gun Club schedules for 1908 will be announced in a week or two.

Recent scores at a shoot of the Colton Gun Club were: J. Telford 19 out of 25, H. Fox 18, C. Felton 17, F. Colyer 15, O. Bryson 9, H. Herrick 7, A. Leedorn, A. Vaughan and H. Fox 6 each.

The two-day tournament of the Trap Shooters' League at Ingleside on the 22nd and 23rd insts. attracted the attendance of a fair bunch of shooters, among them a number of sportsmen from interior points.

Ten events were on the card for Saturday, the first day. The Achilles Roos trophy event (No. 5) was won by Varien of Pacific Grove after shooting off three ties. In the trophy race Prior, Nauman and Varien each scored 20 straight. They tied with 19 out of 20 each in the next races. Nauman and Varien again tied on 19, then Varien won out in event No. 8, breaking 14 out of 15 to Nauman's 12.

The Hunter Arms trophy race was No. 6 on the programme. Holling and Sheard tied with 20 each in this contest. Holling broke 19 out of 20 in the next event. Sheard broke 17, Holling winning the trophy.

Event No. 7, the Peters' Cartridge trophy shoot at 20 targets, was won by Otto Feudner after shooting off a tie on straight scores with Ruhstaller of Sacramento. The tie was at 15 targets; the score was 14 to 10.

The five high scores for the day were: Varien, 155 out of 165, Holling 152, Feudner 151, Reed 150, Nauman 147, Webb and Sheard 145 each.

On Sunday the winners in the feature events were: Event No. 5, Dick Reed trophy race at 25 targets, Tony Prior on a straight score of 25 targets.

Event No. 6, Du Pont trophy at 25 targets. Feudner, Schultz, Holling, Varien and Reed each broke 24, Varien and Reed tied on 19 each in the next event. Varien won out by breaking 24 out of 25 to Reed's 21 in the following event.

Event No. 8, Sorenson medal race at 25 targets. Holling and Varien cracked out 24 apiece. Holling broke 24 out of 25 in the succeeding race. Varien scored 22, the former scoring a win for the medal.

Event No. 9, for the Ballistite trophy, 25 targets, was won by Schultz after shooting off a tie on 24 each with Holling and Nauman. The tie score at 20 targets was: Schultz 19, Holling and Nauman 18 each.

From the foregoing scores it will be readily seen that the trophy races were hard fought contests throughout—a shooter had to have his eye with him all the time.

Five high averages for the second day were the following: M. O. Feudner 186 out of 200, Tony Prior 185, Emil Holling 185, Ed. Schultz 183, W. F. Sheard 182.

The five high guns for the two days' shooting were: W. H. Varien 340 out of 365, M. O. Feudner

337, Emil Holling 337, Dick Reed 323, F. W. Sheard 327.

The Modesto Gun Club was represented at the blue-rock tourney at Ingleside last week by Messrs. Willet, Davidson, Garrison and Wood.

D. Ruhstaller of the Capitol City Blue Rock Club upheld the shooting reputation of the Sacramento trigger-pullers.

W. A. Hillis and F. W. Sheard were the Northwest powder-burning delegates.

The Capitol City Blue Rock Club will hold the first club clay pigeon shoot for this season tomorrow at Sacramento.

The Crescent Bay Gun Club of Ocean Park has elected the following officers: Charles E. Gillon, president; Robert H. Bungay, secretary-manager; C. B. Pettis, treasurer, and George D. Snyder, William Penny and C. W. Anderson, trustees. Additional accommodations are to be provided at the club grounds for the trap-shooters. A tournament will be held early in the spring.

At Azusa, Cal., Washington's Birthday was celebrated by a jolly crowd of sportsmen in that good old-fashioned way, a turkey shoot, at the Azusa rifle range. Shooters were present from Glendora, Covina, Irwindale, Monrovia and Duarte. In the clay pigeon shoot W. L. Gamson won two turkeys, M. Marshall two, E. A. MacDonald two. In the rifle contest H. P. Gamson won a turkey, Mr. Harris one, McIntyre two, J. N. Baker two, while E. A. MacDonald and D. Burns were awarded a duck each for their skill. There was a large attendance and coffee was served from booths by a committee of local ladies.

At Salt Lake City on January 31st trap shooters were much interested in a blue-rock shoot between two three-man teams. The match had been brewing for some days and a crowd of the faithfuls climbed the hill and watched the teams have it out. The targets were flying well, and, as Dorsey Burgess would say, "Came up like turkeys." The net result was some pretty good scoring. John Boa broke straight with 50 birds, which was the best individual work of the day. The scores were: Winning team—Boa 50, Burgess 46, Cowan 48—144 out of 150.

Open season for fishing in Nevada waters will begin on March 15th.

Salt water fishing at all of the Coast resorts is improving daily.

The first button fish of the season was captured February 16th by J. C. MacMillan of Reveille, Nev. It was a twenty-three-pound long-finned tuna and was brought to gaff in twenty minutes.

Agents and Correspondents Wanted Everywhere for The Breeder and Sportsman

THE FARM

KEEP PURE BRED HOGS ON THE FARM.

The farmer who is established in business and persists in keeping grade hogs about his place either does not know there is something better or has got the wrong idea about how to get the most profit from raising hogs. There is some excuse in considering the original expense in starting with any breed of pure bred cattle, as prices are high, but the expense of buying a pure bred boar and sow of any breed is about the same as the cost of a common grade cow. That is, for about \$40 you can buy the best pair of pure bred hogs on the market, and for young pigs, if you wish to take the chance of what they will develop into, for much less.

It is an easy matter to take hogs of some good strain and cross-breed them with pure bred until you may have a pretty good hog, but the question is, is it worth while to spend the time making this grading up when you can get the pure bred article already graded up to a type that reproduces itself with a certainty without much outlay of money? For an example, we will take the Berkshire. To describe the breed, it is black in color with white on the face, feet and tail. The face is short and dished; the ears short, pointed and erect; jaws full, back broad and straight, full over the shoulders, the loins thick and level and the hams especially full with short, strong, straight legs. Straightness in lines and trimness and smoothness over all parts are leading Berkshire characteristics. How long has it taken to build up such a breed of hogs that will come true to color and type whenever bred? The beginning of the breed dates back as far as 1750, with Lord Barrington of Berks county, England as one of the earliest breeders. Thus during the past 150 years this breed of hogs has been developing with the present result. It has been developed for early maturing, small but strong bone, parts where the most expensive cuts are well built up and, above all, a hog that when killed will dress with the least possible waste. Compare with this the loosely put together grade hog, with big head, narrow back, coarse bone—an animal with a big appetite to eat anything, as the most prominent feature. While a hog may be used merely as a scavenger, yet if he kills out better and produces more and better meat as a pure, is not that the animal to raise? Aside from the pure bred hog being better for killing and more economical as a feeder, there is the better price he will bring if sold as a breeder. Young pigs when just ready

to wean will bring more if sold for future breeders than most grade hogs when they are several months old.

There is no lack of variety of breeds to select from, as to color or general appearance and size. Breeds of hogs are usually classified as to size. The large breeds are the Berkshires, Yorkshires, Poland China, Chester Whites, Duroc Jerseys and Tamworths. The medium breeds are the Victories, Cheshires, Suffolks and Middle Yorkshires. The small breeds are the small Yorkshires and the Essex. Thus as to size you can select breeds that weigh from 150 pounds, as the small Yorkshire, to between 500 and 600 pounds as the large Yorkshire. With so many breeds of different colors, sizes and characteristics of appearance, the hardest farmer to please should be able to find some particular breed to his liking. Aside from the many good features of economy of feeding, etc., to recommend the pure bred hog, there is that satisfaction present in the knowledge that what you have even in the hog is the best, for it has "blood." Blood counts in a hog the same as it does in a horse, a cow or a sheep. With a grade you cannot feel sure in breeding that you will get anything you want as to color or make-up, but with the pure bred you have numberless generations back of it, where the same idea in selection and breeding has been carried out and you can feel sure that you will be able to breed and get the same hog in again general lines.

SULPHUR DRIVES AWAY RATS.

Here is a farmer's mode of ridding his premises of rats and mice: If you sprinkle sulphur on your barn floor and through your corn as you gather it there will not be a rat or mouse to bother. I have done this for years and have never been bothered with rats or mice. I have some old corn in my crib at present and not a rat or mouse can be found. In stacking hay or oats sprinkle on the ground and a little through each load, and, my word for it, rats or mice can't stay there. A pound of sulphur will be sufficient to preserve a large barn of corn, and is good for stock and will not hurt the corn or bread.—Forest Republican.

What do you think of a man who owns 35,000 sheep dogs? The man is Gustav Jovanovitch, the Russian mutton king. His sheep whiten the Siberian plains for hundreds of square miles. They number 1,750,000 and 35,000 dogs look after them. Talk of our mammoth ranching business enterprises! Have we anything comparing with one employing 35,000 dogs?

PILES CURED IN 6 TO 14 DAYS.
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50 cts.

Great Spring Sale of Trotters and Pacers

MARCH 12TH, AT 1 P. M., SHARP,
at

Agricultural Park, Los Angeles, Cal.

Mr. W. A. Clark Jr. will sell that good young trotter **Buck**, three-year-old record 2:20½, trial record in race 2:16½. **Bonah**, a four-year-old pacing mare, matinee record 2:24, trial 2:18. **Liberty Song**, four-year-old trotter, matinee record 2:27, trial 2:23½. **Chiquita**, three-year-old trotting filly, trial 2:34½. Three two-year-olds and two yearlings by Highland C. 2:19½, entered in all the Futurities on this Coast and in the East. Six broodmares in foal to Bon Voyage 2:12½ and Highland C. 2:19½.

Chas. Saddler will sell **Zoe**, a two-year-old by Zombro; also **Charlie Wilkes** by Nutwood Wilkes, with a matinee mark of 2:26, and a trial of 2:24½; can step a mile in 2:20 now, with less than three months' training; a four-year-old.

Mr. Christopher will offer his phenomenal trotter **Zombreta**, who trotted a mile in 2:13½ at the last matinee, and is predicted to be a 2:06 trotter this year. Also his fast pacer **Bancho del Paso**, with a trial of 2:11½; also **Direct Maid**, with a trial of 2:20, a four-year-old.

A fine pair of five-year-olds, fine drivers, mares; one of them by Zombro and the other by Warspite. They are both prize winners, black as a crow, 15.2 hands high.

Also one fine green trotter by McKinney.

There will be thirty-one head in all, and every one of them shows speed.

A class of horses of this kind has never before been offered for sale in California. There is lots of speed and lots of class.

There will also be sold our Speed Carts, Buggies, Harness, Boots and Blankets.

ED. SMITH, Auctioneer.

LET OLEO STAND ON ITS OWN FEET.

Oleomargarine is having a terrible struggle in learning to walk alone. It enjoyed for many years the privilege of being sold as butter and it deceived the purchaser by stamping itself butter and wearing clothes commonly used by butter and coloring itself to look like butter. Its manufacturers and promoters have been busy in claiming that it was superior to butter, and now they whine like whipped puppies when compelled to market the stuff upon its own merits and clothed in its own garb. If oleomargarine is as good or better than butter, why practice deception and fraud? It would be a deception to sell diamonds as coal or coal as diamonds. Oleomargarine and butter are made of fats and so are both coal and diamonds made of carbon.

But each one is entirely different in its physical properties and they require different names so that people in purchasing them will make no mistake. And so it is with butter and oleomargarine; both are made of fats but of different kinds of fats, and the resulting butter and oleomargarine are different kinds of substances and require different names in order to distinguish them one from the other. But manufacturers and promoters know that oleomargarine will sell better and at higher prices when called butter, and so they are willing to practice fraud and deception. They are struggling hard under the enforcement of the oleomargarine laws and doing their best to prevent their counterfeit being separated from the motherly wings of butter. In the attempt to sell oleomargarine as butter they are admitting that it is inferior to butter. Because both oleomargarine and butter are made of fats does not make them of equal quality or give the right to oleomargarine to sell as butter. It would be just as logical to want to sell coal as diamonds because both are composed of carbon. Let oleomargarine sell as oleomargarine and butter as butter, and there will be no struggle between them.

If you want to increase the size of your stock, quit breeding from young, immature sires and dams. Strong, healthy, vigorous stock that are past three years and fully matured are the ones that produce the calves that are thrifty growers of the born-to-live kind, and there is little difficulty in getting them to grow as large as one desires. We admit that there are so many influences having a bearing more or less direct on the laws of breeding, and of some of the laws so little known that he who would be successful must be a close student. But if the breeder would abide his time and permit his breeding stock to become fully developed before being bred, more than half of the laws of breeding will have been observed.

Speaking of the great demand for mutton and the rapid decrease of the sheep supply of this country from this source, the American Sheep Breeder says: The United States is consuming only about fifteen million muttons annually, but if the present demand continues and the taste of 85,000,000 people for mutton continues to grow it will not be long before 30,000,000 muttons per year will be required, and then where will our sheep stock be, as we now have only 53,240,820 head of sheep of all ages, a decrease of almost 10,000,000 head since 1903—and still we hear a howl about overdoing the lamb business?

The Handsome and Sound Stallion

CRESCO WILKES 2:10½.

Record Made as a Four-Year-Old in a Winning Race Against Aged Horses.

Having a three-year-old full brother to this stallion, I offer Cresco Wilkes for sale. He is a bay with black points, has fine conformation and is all right every way. He weighs 1,200 pounds. Last year he was started without proper preparation against Sir John S. 2:04½, Miss Georgie 2:08½ and others at Pleasanton, and was separately timed the first heat in 2:08½. In condition, he should pace a mile in 2:06. He is now seven years old, and in competent hands has a good earning capacity in the stud or on the track. Cresco Wilkes was sired by Nutwood Wilkes 2:16½, sire of John A. McKerron 2:04½, etc., and his dam is Allie Cresco 2:13½, by Cresco 4908, sire of five in the list. He can be seen at my place in Alameda. For price and further particulars apply to

I. L. BORDEN,

SAVE-THE-HORSE

Registered Trade Mark
SPAVIN CURE

THESE TELL THE STORY OF ITS POWER.

WM. H. COOPER, D. D. S.,
11 Sand Beach Avenue.

Bad Axe, Mich., January 15, 1908.

Gentlemen: If you ever want a recommendation for your "SAVE-THE-HORSE," use me. I sent for a bottle sometime ago for a valuable mare which had a very bad bog spavin. She was so lame on the right hind leg that she could hardly walk, and then only with urging. After I had applied "SAVE-THE-HORSE" as directed twice, I hitched her to my runabout, and have been driving her every day and no one could ever tell she had any such trouble. Everyone here said I would never be able to use her again, as she was so bad, but now is as frisky as a colt. My neighbor is using "SAVE-THE-HORSE" on my recommendation, and it is doing the business. Yours respectfully,
W. H. COOPER, D. D. S.

Winnipauk, Conn., Jan. 2, 1908.

Gentlemen: I enclose order for dollars, for which send me half-dozen boxes of Condition Powder, 50-cent size. "SAVE-THE-HORSE" cured a ringbone on a horse owned by a local blacksmith, to whom I sold a bottle some time ago. As both the horse and his owner are well known, it has proven a great advertisement. Yours respectfully,

W. J. ANDERSON,

Care of Anderson Stock Farm.

"SAVE-THE-HORSE" permanently cures Bone and Bog Spavin, Ringbone (except low Ringbone), Curb, Thoroughpin, Splint, Shoe Boil, Wind Puff, Injured Tendons and all lameness, without scar or loss of hair. Horse may work as usual.

\$5.00 Per Bottle, with a written guarantee as binding to protect you as the best legal talent could make it. Send for a copy and booklet.

At Druggists and Dealers or Express Paid.

FOR GUNS

"3 in One" Oil Has No Equal for oiling trigger, lock, every action part. Does not dry out quickly like heavier oils, gum, harden or collect dust no matter how long gun stands. "3 in One" cleans out the residue of burnt powder (black or smokeless) after shooting, leaving the barrel clean and shiny. It actually penetrates the pores of the metal, forming a delicate permanent protecting coat that is absolutely impervious to water or weather. No acid. A test will tell. Write for sample bottle. G. W. COLE COMPANY, 102 New Street, New York, N. Y.

MARE AND COLT FOR SALE.

A handsome bay colt, foaled May 1, 1907, by Ed McKinney (own brother to Adam G. 2:11 1/4), and out of Mattie B. 2:15. Entered in Breeders' Futurity and Canfield Stake. Dam is in foal again to same horse, and either or both are for sale at a reasonable price. Colt is pronounced a fine prospect. For particulars address WM. VAN KUREN, 412 Cole St., San Francisco.

S. B. WRIGHT,

Santa Rosa Cal.

TWO PACING STALLION COLTS WANTED.

A yearling or two-year-old by Star Pointer and one by Zombro. Must be good color, natural paces, standard bred and registered, or eligible to registration. Bay or brown, little or no white, of good size, neat heads, not too high on leg, standing and traveling square on their feet. Must have plenty of knee and hock action. Must be absolutely sound and out of good mares. Address giving price, pedigree and full particulars as to speed, if worked, etc., F. W. KELLEY, Breeder and Sportsman, 366 Pacific Building, San Francisco.

MARE FOR SALE.

Brown mare, five years old, absolutely sound, afraid of nothing, and can be driven by a child. This mare is but 14 hands high, but is elegantly formed and handsome in harness. She is a pacer, and can show better than a 2:20 gait at any time. Will be sold very reasonable. Apply to BREEDER and SPORTSMAN, Room 366, Pacific Building, corner Fourth and Market Streets.

FOR SALE.

Star Medium by Dictatus Medium, dam Diva (dam of Helen Keyes 2:05), by Piedmont. He is a fine looking colt and has great promise for speed. He is entered in Futurity Stake No. 5, to take place this fall. He will be three years old April 11th, is well broken; can show better than a three-minute gait. Price, \$500. Address E. P. LATHEOP, Hollister, Cal.

BEST FOR LEAST MONEY

JOHN MIDDLING'S

High Grade

Sulkies

and Carts

MIDDLING'S TWO-WHEELERS have been popular with the horsemen for the past 17 years. We do nothing but build Sulkies and Carts, both winter and summer, and our prices are always the same, and we can sell cheaper than any of our competitors, for the reason that we build our own wheels, bend our own shafts and all other parts, and can produce the highest grade sulky or cart for less money than any other manufacturer in the U. S. to-day, quality considered. If you need anything in Sulky or Cart line you cannot afford to overlook this.

Every Two-Wheeler guaranteed

Bonny McKinney 41383

Son of McKINNEY 2:11½.
World's Greatest Sire of Speed

Two-Year-Old Trial 2:20.

Dam Martha Frazier by Rustic; 2nd dam Emma by Whippleton; 3rd dam Gladys by Gladiator, etc. Bonnie McKinney, foaled 1905, is a grand individual, coal black, fast (2-year-old trial 2:20) and highly bred. He stands 15.3 hands high and weighs 1150 pounds. In conformation he is all that the most critical horseman could look for. His trotting action is perfect, and it is my intention to have him trained and raced this year. Four black colts by him on exhibition. Bonny McKinney is a trotter.

Season of 1908 at the Alameda Race Track, Alameda, Cal.

Fee: \$40 for the Season.

January 1st to July 1st.

H. BUSING, Race Track, Alameda, Cal.

CHESNUT TOM 43488

Race Record 2:17½. Trial 2:14.

Sired by Nutwood Wilkes 2:16½ (sire of John A. McKerron 2:04½, the fastest trotting stallion of the Wilkes family). Dam Zeta Carter by Director 2:17 (sire of dam of John A. McKerron 2:04½); granddam Lida W. 2:18½ by Nutwood 6:00. Chesnut Tom won the 2:24 trot at Salinas, 1906, in three straight heats.

Season of 1908 at

STOCKTON, Cal.

Terms: \$30

Address the owner.

GEO. T. ALGEO, 120 So. Center St., Stockton, Cal.

HART BOSWELL 13699

By Onward 2:25½ out of Nancy Hanks 2:04

Sired by Onward 2:25½ (sire of 198 in 2:30 list) out of Nancy Lee (dam of Nancy Hanks 2:04, Nancy Stam 2:30, Dictator Wilkes, sire of 11), Dictator Moore, a sire, and the producing dams Meta S. and Lady Boone, by Dictator 1:13; second dam Sohy (great broodmare) by Edwin Forrest; third dam Sophina by Parker's Brown Pilot. Hart Boswell's progeny are noted for their size, disposition, style and action.

He will make the Season of 1908 at Laurel Creek Farm, San Mateo, for the Low Fee of \$25, with usual return privilege. Address

DEL CORONADO 2:09 $\frac{3}{4}$

Del Coronado 2:09 $\frac{3}{4}$

Reg. No. 45122. By McKinney 2:11 $\frac{1}{4}$, dam Johanna Treat by Thos. Rysdyk 2:28. Winner of the fastest 3 heats ever trotted by a stallion in California. Winner first premium at the California State Fair 1907. Winner Blue Ribbons, Horse Shows at Los Angeles Fiesta, Horse Show 1904 and first prize at both the Pasadena and Los Angeles Horse Shows 1906. 15.3 hands, weighs 1150 lbs.

Unbeaten on the Track and in the Show Ring.

Carlokin 2:13 $\frac{1}{2}$

Reg. No. 36458. By McKinney 2:11 $\frac{1}{4}$, dam, the great brood mare, Carlotta Wilkes (dam of 4 standard performers); second dam, the great mare, Aspasia (dam of 3 standard performers); third dam Miss Buchanan (dam of 1). There are no better blood lines than those contained in Carlokin's pedigree. He is related to all the royal families of the Wilkes tribe, the greatest of all race-winning families.

Copa de Oro 2:07 $\frac{1}{4}$

By Nutwood Wilkes 2:16 $\frac{1}{4}$, dam Atherine 2:16 $\frac{3}{4}$ by Patron 2:16 $\frac{1}{4}$ (son of Pancoast 2:21 $\frac{3}{4}$ and Beatrice, dam of Prodigal 2:16 $\frac{1}{4}$); second dam Athene, etc. He is a beautiful light bay stallion, stands 15.3 $\frac{1}{2}$ hands, weighs 1100 pounds. He is one of the finest individuals ever seen on the California Circuit. He was one of the gamest and best horses out 1907. He is a typical show horse and paces without toe weights or hoppers. His breeding is ultra-fashionable. The combination of Wilkes-Nutwood-Patron-Pancoast-Harold and Pilot Jr. blood is unequaled by any other sire in the United States, and it is a foregone conclusion that next year this great horse will get a mark of 2:02 or better. He will be allowed to serve but 15 mares during this season.

Murray M. (3) 2:14

By Hambletonian Wilkes 1:57, dam Anna Belle 2:27 $\frac{1}{2}$ by Dawn 2:18 $\frac{3}{4}$. Winner Pacific Breeders Futurity, 1904, \$6000.

The above horses will make Season of 1908

—AT—

Agricultural Park, Los Angeles, Cal.

Fresno Fair Grounds.

J. DEPOISTER, Fresno, Cal.

Fee: \$25 the Season.

Usual return privilege.

For further particulars
call to or address

WANTED...

THE HORSE REVIEW of Chicago, Ill., wants every man owning a mare due to foal this spring to become a regular reader of that paper.

It makes, therefore, the greatest premium offer ever known.

For \$2.50 (\$3.50 in Canada)

THE HORSE REVIEW will be sent you each week for one year, and with it the entry of every mare now in foal owned by the subscriber will be accepted in its \$12,500 Subscription Purse No. 15, for foals of 1908, without additional cost.

In other words, for \$2.50 (\$3.50 in Canada), as high-class a turf publication as experience and money can produce will be sent you each week for one year, and a \$12,500 engagement will be provided for every one of your 1908 foals.

A colt with such an engagement sells more readily and at a better price than one without.

THE HORSE REVIEW CO. has distributed

\$130,575 to Breeders

By means of its Futurities. Its first one was raced for in 1894, since which time they have been annual features.

No surer way of increasing the value of every foal of 1908 exists. In the next three years the question: "What are the colt's engagements?" will almost invariably be asked by the buyer. If you can say: "THE HORSE REVIEW \$12,500 Futurity No. 15," you will be more certain to interest the buyer than if you were forced to admit that the colt had no engagements.

Send the subscription price and name, color, breeding and name of stallion bred to in 1907 of

EVERY Mare You Own

To THE HORSE REVIEW CO. on or before Tuesday, March 10, when entries close, and every one of your 1908 foals will have a \$12,500 engagement.

It is the only opportunity of its kind. After March 10 it will have passed. Sample copies of THE HORSE REVIEW and entry blanks promptly sent on application.

THE HORSE REVIEW CO., 910 Masonic Temple, Chicago, Ill.

Box 682.

Race Rec. 2:19 $\frac{3}{4}$, 4-y-o Tr'l 2:12

Sired by **Expresso 29199** (half brother to Expressive (3) 2:12 $\frac{3}{4}$) by Advertiser 2:15 $\frac{1}{4}$, dam **Alpha**, great brood mare, by Alcantara 2:23, next dam Jessie Pepper by Mamb. Chief 11'

Will make the Season of 1908 at

**Salinas and
Watsonville, Cal.**

Fee: \$25 for the Season. Return privilege. Excellent pasturage at \$1 per month. For further particulars address or apply to

HENRY STRUVE, Watsonville, Cal.

Athasham

Race Rec. 2:09 $\frac{1}{4}$.
Reg. No. 45026.

**A Game Race
Horse in the Stud**

Bay stallion, stands 15.3, weighs 1150. Sired by Athadon (1) 2:27 (sire of The Donna 2:07 $\frac{1}{4}$, Athasham 2:09 $\frac{1}{4}$, Sue 2:12, Listerine 2:12 $\frac{1}{4}$ and 8 others in 2:30), he by Matadon by Onward 2:25 $\frac{1}{4}$, out of Athalie (dam of Athanio 2:10, Ira 2:10 $\frac{1}{4}$ and 5 others in 2:30), by Harkaway 11808, etc. Athasham's dam was the great broodmare Cora Wickersham (also dam of Nogi (3) 2:17 $\frac{1}{4}$, winner of three-year-old trotting division Breeders' Futurity 1907 and Occident and Stanford Stakes of same year), by Junio 2:22 $\frac{1}{4}$ (sire of dams of Geo. G. 2:05 $\frac{1}{4}$, etc.); second dam Maud Whippleton (dam of one) by Whippleton (sire of 7); third dam Gladys by Gladiator 8336, son of Geo. M. Patchen Jr. 2:27. Athasham has a great future before him as a sire. He is bred right and made right, and has every qualification one can expect in a sire. He has been timed in 2:06 $\frac{1}{4}$ in a race, and his courage is unquestioned.

He will make the Season of 1908 at **Orchard Farm, Fresno, Cal.**, for a Fee of \$50, with usual return privilege. For further particulars address this place, care of

Dr. A. C. Daniels

MOORMONT 44996

By Azmoor 2:30 $\frac{1}{4}$ (sire of Betonica 2:09 $\frac{1}{4}$, Azmoor 2:13 $\frac{1}{4}$ and 8 others in 2:30 list), dam Rosemont (dam of Montrose, 3, 2:18, Sweet Rose, 1, 2:27 $\frac{1}{4}$, Mazatlan 2:26, one sire of four and two speed producing dams) by Piedmont 2:17 $\frac{1}{4}$ (sire of 25 in 2:30 list and the dams of Fanny Wilcox 2:10 $\frac{1}{4}$ and Alta Vela 2:15 $\frac{1}{4}$), second dam Beautiful Bells 2:29 $\frac{1}{2}$, the queen of broodmares, dam of 11 in the list.

Season of 1908 at **FASHION STABLES,
Chico, Cal.**

Fee: \$25. For particulars address

L. B. DANIELS, Chico, Cal.

Sadi Moor 39989

The intensely trotting
bred stallion.

Seal brown, foaled 1904. Sired by Guy McKinney (trial 2:20), he by McKinney 2:11 $\frac{1}{4}$ out of Flossie D. by Guy Wilkes 2:15 $\frac{1}{4}$; dam Sadie Moor 2:22 $\frac{1}{4}$ by Grand Moor 2:37 $\frac{1}{2}$ second dam Carmine (dam of Brice McNeil 2:19 $\frac{1}{4}$, Sadie Moor 2:22 $\frac{1}{4}$ and Robert Mac 2:30) by Poscora Hayward 2:23 $\frac{1}{4}$; third dam Jenny by Algerine by Hambletonian 725, etc.

Terms: \$40 for the Season. Usual return privilege.

Will make the Season or 1908 at

Brace Half Mile Track, Santa Clara, Cal.

For further particulars address

W. R. JOHNSON,

Box 161.

SANTA CLARA, Cal.

Red McK 43766

Son of the Great **McKINNEY 2:11 $\frac{1}{4}$** by the Great **RED WILKES 1:47 $\frac{1}{2}$** .

Dam **BONNIE RED** by Red Wilkes 1718 (sire of Ralph Wilkes 2:06 $\frac{1}{4}$ and 21 more in 2:15 list); next dam Bonnie Bell (dam of Rebel Medium 2:15 $\frac{1}{4}$ and 3 others in the list) by Almont 33; next dam Alice Drake (dam of 3 in the list) by Norman 25; next dam Viley by Pilot Jr. 12.

RED McK 43766 is a rich mahogany bay in color, 15.3 $\frac{1}{2}$ hands high, weighs 1150 pounds, has size, style and speed. He is a pure gaited trotter. His colts are good colors, bays and browns.

Season of 1908 at

**W. R. MURPHY'S STABLES,
752 Santee St., Los Angeles, Cal.**

(W. R. Murphy, Owner.)

Terms: \$30 the Season. Return privilege

Bonnie Searchlight 34899

Son of **SEARCHLIGHT 2:03 $\frac{1}{4}$.**

King of Race Horses.

Sire of Ray o'Light 2:13 $\frac{1}{4}$ (2-year-old champion of 1907), Aerolite (3-year-old record) 2:11 $\frac{1}{4}$, trial 2:05 $\frac{1}{4}$. Dam Rita B. by Boodle Jr.; 2nd dam Gabilan Girl by Gabilan; 3rd dam Clara by Elmo 891, etc. Bonnie Searchlight, closely resembles his sire, and is a magnificent brown colt, 3 years old, a fast natural trotter and will be trained to race this year. His blood lines are of the richest—Alycane 2:27, Geo. Wilkes 2:22 (twice), Furor, Pilot Jr., Stranger, Electioneer (twice), Carr's Mambrino (twice), Mambrino Patchen (four times), Williamson's Belmont (five times). Bonnie Searchlight is destined to make a great sire. He will be trained and raced this year after the stallion season ends. Bonnie Searchlight is a trotter.

Will make the Season of 1908 at **Alameda Race Track, Alameda, Cal.**

Fee: \$40 for the Season.

January 1st to July 1st.

Will be pleased to show this horse at any time. Excellent care taken of mares. Fee returned if mare fails to get with foal. Apply to or address

H. BUSING, Race Track, Alameda, Cal.

Four more in 2:15 have already been credited this season to

"McKINNEY" 2:11 $\frac{1}{4}$

Making his wonderful list still more remarkable.

The Greatest of
all Spring Sales.

The Great BLUE RIBBON SALE CLEVELAND, OHIO.

MAY
18
TO
22

MR. CHAS. L. De RYDER, Pleasanton,

Will prepare for the sale and ship any horses that may be consigned to the sale. Mr. De Ryder will assume entire charge, if desired, up to the time horses are sold. His wide acquaintance among Eastern horsemen will assist in selling to good advantage.

Write to him to-day.

CHAS. L. De RYDER, Pleasanton, Cal.

THE DEMAND IN THE EAST FAR SURPASSES THE SUPPLY.

Good horses are in great demand and the supply is scarce and prices rule high. If you have a horse able to win you can get big money for him at the BLUE RIBBON SALE, the greatest of spring sales and the only sale that attracts EASTERN BUYERS—THE MEN THAT PAY BIG MONEY. It will pay you to ship your best.

ABSOLUTELY CURES QUINNS OINTMENT REMOVES CURBS, SPRAINS, SPRAVING, WINDPUFFS, BUNCHES

Take It In Time

If you have the remedy on hand, and are ready to act promptly, you will find that there is nothing in the form of Sprains, Splints, Curbs, Windpuffs and Bunches which will not yield promptly and permanently to

Quinn's Ointment

It has saved thousands of good horses from the peddler's cart and the broken-down horse market. Mr. C. B. Dick, of Minneapolis, Minn., who conducts one of the largest livery stables in the Northwest, writes as follows: "I have been using Quinn's Ointment for some time and with the greatest success. I take pleasure in recommending it to my friends. No horseman should be without it in his stable. For curbs, splints, sprains, windpuffs and all bunches it has no equal."

Price \$1.00 per bottle. Sold by all druggists or sent by mail. Write us for circulars, testimonials, etc. Sent free for the asking.

W. B. Eddy & Co., Whitehall, N. Y.

CAMPBELL'S EMOLLIC IODOFORM GALL REMEDY

For GALL BACKS and SHOULDERS, CRUPPER SORES and SADDLE GALLS, there is none superior.

The horse CAN BE WORKED AS USUAL.

For BARBED WIRE CUTS, CALKS, SCRATCHES, Blood Poisoned SORES, ABRASIONS of the SKIN it has no equal.

Its use will absolutely prevent Blood Poisoning. We placed it on the market relying wholly on its merit for success. The sales of 1906 were 100 per cent greater than the aggregate sales of Gall Remedy preceding that year. This increase was entirely due to its MERITS, and it is THE GALL REMEDY OF THE 20th CENTURY.

It is quick and sure for those troublesome skin cracks under the fetlock which injure and often lay up race horses.

Guaranteed under the Food and Drugs Act, June 30, 1906. Serial Number 1219.

All Trainers Should Keep it in Their Stables.

PRICE—25c, 50c and \$1.00

(Read our ad. on Campbell's Horse Foot Remedy in next issue of this paper)

NEW WORLD'S RECORD 15,000 Targets Without a Miss

J. W. Akard's claim to the title, "The King of Rifle Shots," is well earned. His performance of breaking 15,000 regulation clay targets without a miss is the greatest exhibition of skill on record. He used one shot only for each target. He threw his targets with his right hand, holding his gun with his left. He used

U. M. C. .22 SHORT CARTRIDGES

whose perfect quality supported his perfect aim. A great per cent of the targets were broken edgewise, so that the diameter of the disc does not truly represent the size of the moving target in the air. Mr. Akard's earlier run of 1,659 small marbles without a miss is nearly twice as long as any previous record on similar objects. In this case, also, he did his own tossing. Remember that Mr. Akard's run of 15,000 targets was unfinished. Mr. Akard is now giving demonstrations on the Coast.

U. M. C. CARTRIDGES EXCEL IN CLEANLINESS AND ACCURACY

THE UNION METALLIC CARTRIDGE COMPANY

313-315 Broadway, NEW YORK CITY

A RECORD THAT IS A RECORD

Adolph Topperwein makes Straight runs of 14,540, 13,599, 13,292 and 13,219 on 2 1/4-inch wooden blocks at 20 foot rise, and misses only 4 out of 50,000 and 9 out of 72,500, shooting

WINCHESTER SMOKELESS POWDER CARTRIDGES AND .22 CALIBER RIFLES

Just to show that all things ARE POSSIBLE with Winchester .22 Caliber Cartridges and Rifles, and also to prove "Who's Who" in making rifle records IN PUBLIC, Mr. Topperwein recently shot for ten consecutive days at San Antonio, Texas, and made the above world's records for wing shooting with a rifle. He used only two rifles and loaded them himself. These record-breaking, history-making scores were made, without the aid of a notary public, before large crowds of people in a public park—not in a far-away back lot or down on the farm behind the barn.

Be Sure to Make Your Entries in Time!

Entrance fee two per cent, due April 1, 1908; one per cent additional if not declared out on or before May 1, 1908, and two per cent additional if not declared out on or before June 1, 1908; five per cent additional from winners.

Entries Close Monday, June 1st, 1908, in the following Races:

No. 2—2:12 Class, Pacing.....\$ 800	No. 7—2:15 Class, Pacing.....\$ 700
No. 4—2:10 Class, Trotting.....1,000	No. 8—2:24 Class, Trotting (3-year-old).....500
No. 6—2:17 Class, Trotting.....700	No. 10—2:14 Class, Trotting.....800

Nominators have the right of entering two horses from the same stable in any race by the payment of one per cent for that privilege, due when entry is made. Only one of the two horses so entered to be started in the race and the starter to be named by 5 o'clock P. M. the day before the first day of meeting at which the race is to take place.

Money divided 50, 25, 15 and 10 per cent. All races mile heats, best 3 in 5.

FROM the above list of forty-six standard bred trotting and pacing stallions owners of broodmares on the Pacific Coast have an opportunity of making a choice which cannot be equalled in any State in the Union. There is not a fashionable family in America that is not represented, and Easterners who are visiting this Coast marvel at such a grand collection, and are pleased to see stallion owners here awakening to the fact that a stallion worth advertising is worth patronizing, for the foal of a well-advertised stallion is benefited by the publicity of its sire. Printers' ink is the very best advertisement stallion owners' money was ever put to, and the buying public takes more kindly to the foals sired by a stallion that is given wide publicity than they do to one that is unknown. The two great essentials to success in breeding trotting bred colts are patronage of well-advertised stallions and patronage of futurity stakes. They are like the Siamese twins, inseparable except by death. Men who are looking for well bred "prospects" lose all interest in the search when they find an owner so shortsighted as to make a pretense of saving money by not presenting the merits of his horse before the public by means of the leading turf journals. Money spent in advertising, making futurity stake nominations and shipping well bred mares to thoroughly advertised stallions is money judiciously expended. Owners of good mares have never received any encouragement to breed to an unknown "cross roads stud boss," either after the foal comes or when it is offered for sale. No one knows this better than the intelligent horsemen of the present day, and owners of stallions who have not advertised are "standing in their own light" by not placing a good advertisement where it can be seen by every owner of a good mare on this Coast and in the East.

ENTRIES for the stakes in the State Fair, the big race meeting at Emeryville, the Fresno Fair Association and the P. C. T. H. B. Association all close on April 1st.

FOR THE PAST four weeks the horsemen on the Pacific Coast have been undecided as to whether they will send their horses on the Grand Circuit or race them here. The directors of the various Fair Associations in California, they claim, have been very lax about advertising their meetings and announcing the purses. Consequently whenever Eastern associations claim certain dates and advertise the place where they are to hold meetings in advance of the organizations on this coast it has been customary for some of our leading drivers to forward their entries East and when the finishing touches are being put on their horses, they charter a car or two and take the long transcontinental journey while realizing how much better it would be for them to stay here. Admitting that greater inducements are offered, that the purses are larger and the glory of driving on the Grand Circuit is not to be overlooked by any ambitious reinsman, nevertheless, judging from the financial returns made by the majority of these men, after they have paid fares and traveling expenses, it is doubtful if they are any richer (except in experience), than they would be if they had trotted for the purses offered in California. They will admit that it is an impossibility almost to pick up any "easy money" in the East, and to win races; why, they are "up against" the pick of the choicest and most promising of hundreds from farms of Canada and the United States. Besides, the drivers they have to meet are no amateurs. They have been fighting inch by inch, wheel to wheel, for supremacy with their equals for almost a score of years and know every angle of the game. All friendships cease when they mount their sulkies and "score for the word!" No one should undertake that Eastern trip unless he has a Lou Dillon, Sonoma Girl, or Directum, and every horseman knows that trotters of their calibre are not found munching hay in many stalls. The man with a green trotter that cannot trot five heats in 2:15 or better on the Grand Circuit had better stay at home and enter that "marvel of speed" on the California Circuit for 1908. He can start him at the first big race meeting in Emeryville and keep him hustling until the race meetings end in Phoenix, Arizona, sending his winnings to his home bank from every town. What a splendid series of meetings we are to have here this year! Starting with the one to be given during the second week of August, the Alameda County Fair Association is to give its initial meeting at the mile track at Emeryville. This course, under the able supervision of Superintendent Grant, will be placed in perfect order. A number of leading trotting horse men have agreed to offer suggestions to that end. Then the programme (a copy of it is in another column) contains a list of the following liberal stakes and conditions which will surely appeal to all; there are six stake races, one for each day: Greater Oakland Stake for trotters, 2:20 class, \$2,500; Alameda County Stake for pacers, 2:20 class, \$2,500; Mt. Diablo Stake for trotters, 2:15 class, \$900; Pleasanton stake for pacers, 2:14 class, \$900; Berkeley Stake for pacers, 2:08 class, \$900, and the Athenian Stake for three-year-olds, trotting, 2:25 class, \$900. Besides these events a number of fine races will be given for big purses every day. Nothing will be left undone to make it the banner opening meeting of the California Circuit. Then follows the Pacific Breeders' meeting, and as this is recognized all over the United States as one of the best held, and its worth as the champion for the promotion of the trotting horse interests of California is recognized everywhere (for its stakes and purses are always large), the meetings to be given this year bids fair to eclipse all heretofore held by this sterling organization. Then comes the State Agricultural Society races, the programme of which, for the various stake events and purse races, also appears in this issue. It has a list of stakes from \$2,000 to \$700 and four of them are for \$1000. The members of the Speed Committee of this society announce that they will offer a number of very beautiful and appropriate trophies or prizes for the Amateur Driving Clubs of California to compete for. It is proposed that prior to the closing of entries for these events each club, at its matinees or race meetings, tries out its horses and classifies them according to the alphabetical system now in vogue. Then the best ones of each class are to be entered against the best ones of the same class in the other clubs in their contest for the trophies.

In this way the public will witness some splendid exhibitions of skill between amateur drivers and watch with breathless anxiety the closest finishes ever seen in California. All secretaries of these

clubs will be duly instructed as to the methods to be pursued in bringing about these contests. This news will be hailed with enthusiasm by all the driving clubs in California and will awaken a friendly rivalry which will redound to their credit. The Fresno Fair Association has its advertisement in this issue, and will, undoubtedly, receive a heavy entry list. The sum of \$7,000 is guaranteed in stakes and added money. Besides, as in the case with the other meetings, a number of races will be given for slower classes. Then there is to be a big meeting at Woodland, another at Marysville, another at Chico, another at Salinas, another at Los Angeles, and one at Pasadena, together with several other meetings in various parts of California. The announcements will appear shortly and the probabilities are that the purses will be equally as large and terms as liberal as the four already advertised. The strongest magnet to be used by the promoters of Eastern race meetings will be powerless to draw any horses from California this year, and what a glorious season of rich sport is in store for every true lover of light harness racing! It infuses new life into the game, and we congratulate every owner of a promising trotter or pacer, or one with a record, upon the opportunities presented by our thoroughly awakened organizations, that have paved the way for them to have good racing, big purses, and make it easy for them to get long prices for all the horses they race.

EVERYBODY one meets seems interested in the big speed sale which is to take place at the Pleasanton racetrack April 16-17-18. Since the rumor that the best stakes and purses ever given in California are to be distributed among the horsemen this year has been confirmed everybody is "nosing" around to see what the youngsters are doing as well as those that have earned records and are listed for this sale. It promises to be a hummer! Every driver at the Pleasanton track and a number of visiting owners have signified their intention to put something in. We advise all who have good gaited horses to send at once for entry blanks and forward them to Secretary J. R. Fronefield. The catalogues will be compiled with great care.

THERE IS NOT an owner of a good brood mare on this Coast which is due to foal this year who can afford to let this splendid opportunity pass to give that prospective youngster a chance to win some of the \$12,500 purse offered by the Horse Review of Chicago. The very fact that he is entered in this Futurity Stake No. 15 enhances his value 1,000 per cent; and then, as perhaps of just as great importance, for the small sum of \$2.50 the one making the entry receives this standard and instructive trotting horse journal for a year. It makes no difference how many mares the sender of the \$2.50 has; if he forwards the names of them with the stallions to which they were stunted, they are all placed on the books and have an equal chance, at no extra cost. Remember, the names must be mailed on or before Tuesday, March 10th, according to the advertisement in this issue.

THE BLUE RIBBON SALE in Cleveland next May will attract buyers from all parts of the United States and Europe. Many of those consigned to this sale will be in training and almost fit to win races with, hence an exodus of trainers from the East, West and South will attend, seeking "prospects" that in their judgment will prove money winners on the Grand Circuit as well as on the Western and Southwestern Circuits. Messrs. Fasig-Tipton Co. have sent a corps of horsemen out to gather in the very choicest for this annual event.

It requires an expert judge of conformation, gait, character and blood lines to select from a bunch of green colts the ones that will make the fastest trotters and most successful race winners. A man who possesses this gift can soon make a fortune by attending the public sales of high-class trotting-bred youngsters. If report is correct, the superintendent of Walnut Hall Farm has stated that some of the best youngsters consigned to the late Fasig-Tipton Company's sale from that farm sold for the lowest prices. It is often the case that the best ones are.

Drink Jackson's Napa Soda.

NOTES AND NEWS

It was rumored around Pleasanton last week that Andy McDowell would soon return to California and open a public stable. He would be a valuable acquisition to the splendid coterie of drivers there at present.

The great campaigner Expressive 2:12½ never produced a 2:30 trotter.

Chas. A. Spencer has been busy all winter at the Woodland track handling the youngsters by Prince Ansel 2:20½ and Nushagak, and good judges claim he has several surprises to spring on the boys in a month or two. Mr. Spencer is a hard working, careful and capable trainer.

Martin Carter bred a number of his mares to Lord Kelvin (brother to John A. McKerron 2:05¼) and has every reason to be proud of the produce. He considers they are the most promising he has ever bred and is anxiously awaiting the time to develop them.

There were thirty-three to enter the 2:10 list of trotters in 1907 and only four that were in it the year previous lowered their records.

May Logan (sister to Sir Albert S. 2:03¾), will be bred to Aerolite 2:11½ this year.

E. D. Dudley of Dixon has a number of beautiful trotting colts and fillies on his farm which were sired by his stallion Palite, a son of Nutwood Wilkes 2:16½ and Paleta by Palo Alto 2:08¾; second dam Elsie (dam of four), by Gen. Benton, etc.

Wm. T. Sesson of this city has a two-year-old gelding by Lecco 2:09¾ that, although unbroken, shows such a marvelous flight of speed in the field that he has concluded to send him to Chas. Whitehead of Salinas and have him developed. It was a great loss to America to have Lecco shipped to Austria; all of his progeny in California being very speedy.

Santa Rosa will have at least a dozen splendidly bred stallions there this year. It has a great advantage over most of the cities near San Francisco. Mares can be shipped on the boat to Petaluma and led over a splendid road to it.

Mr. Frank J. Gilpatrick returned to San Francisco from New York city last week. He has applied for a patent on a device for holding toe weights on the hoofs of horses which looks feasible, is practical and very simple. It is put on and removed in a second, and, unless shown how to remove it, would test the skill and strength of any man to do it. Its cost is only trivial.

The good roan mare Spanish Maiden 2:29¾, foaled in 1886, that is known as the dam of Margrave 2:15½, Cuban 2:23, etc., was bred last year to Wm. MacFarland's royally bred stallion Owyho 2:07¾ and is due to foal this month.

Mr. C. A. Harrison, the well-known hotel man and horseman, has left Portland, Oregon, and is visiting San Francisco. It is hoped that he will locate here, as his presence and enthusiasm in all matters pertaining to the holding of trotting meetings will be highly appreciated.

The heavy rains during the past ten days, which have extended from Shasta to San Diego, have caused the farmers and stockmen to rejoice, but the trainers and their horses have not been able to go on the racetracks, hence news of wonderful trials continues scarce. A few days of warm, dry weather, however, will make everything on the racetracks brighten.

George H. Estabrook of Denver has just purchased from J. L. Tarlton of Indiana the bay filly Fanny Lawson by Tregantle, dam Miss Fanny Summers 2:26¼.

Few people realize how scarce horses are all over the country. In Chicago, for instance, where the horses on the streets are usually the best of any city in the land, the poorest horses even seen are now doing the work of the city. A large share of the teams look as if they need renewing, and we wonder where prices will go when people begin to stock up again.

The fashionable prejudice against horses with white feet is disappearing. One of New York's millionaires in ordering carriage horses expressly stipulates that they shall have white faces and white feet.

A. G. Vanderbilt has shipped fifty trotting bred horses to England, to be used for coaching. It is Mr. Vanderbilt's idea that the large American bred trotter can beat any coach horse in the world.

Only One "BROMO QUININE."

That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the world over to Cure a Cold in One Day. 25 Cents.

Sadie Fogg will no longer frighten the owners of fast horses. She died at Selma, Ala., recently. Her owner regarded her as one of the most promising prospects for the coming season in the country.

In the Australian bush two horses are always taken by the man who has a long journey extending over several days to perform. One is ridden and the other carries a light pack. "The object in taking two horses, which in New South Wales as at the Cape among the Boers is frequently done, was because such paddocks as existed at the stations on the road were quite destitute of grass, which obliges one to camp out; and in camping out few horses when fresh will stop alone. Two in company usually stop well, whereas one, however tired, will often wander ten or fifteen miles during the night, even in hobbles, and perhaps not be found for a week." Cattle men "on the trail" also take two horses each for a different reason. "The work is done at the slowest possible walk, the merest crawl, but the horse is under saddle at least twelve hours on the stretch." The slow work is very tiring, and each horse is ridden on alternate days.

It is of paramount importance to every owner of a good stallion worthy of being bred to a standard bred mare that he advertise him now. Price of one service fee will keep his horse's name before the public and the owner of the mares will feel better satisfied to see this publicity given the horse than they will by having the horse's merits praised by a few people who have "axes to grind."

J. W. Daly, proprietor of Mt. Kisco Farm, Mount Kisco, N. Y., has booked Consuella S. 2:07¾ by Directum 2:05¼, to Todd 2:14¾. A mare by McKinney 2:11¼, dam by Anteeo 2:16½, will be shipped all the way from Sacramento, Cal., by her owner, H. S. Lewis, to be mated with William Bradley's \$30,000 stallion, Todd 2:14¾.

Sweet Marie 2:02, now owned by William Bradley, proprietor of Ardmore Farm, Raritan, N. J., will be bred this spring to Todd 2:14¾, but will remain in the hands of W. J. Andrews to be raced and exhibited at least during the greater part of the season.

Yosemite, a fast green trotter by Monterey 2:09¾ is now in the stable of Charles De Ryder.

Farmer Bunch will get together a small stable along with Zella Mac 2:26¼ and race on "this side" the coming season. This mare Zella Mac looks to have a nice chance in her class, as a mile in 2:18 at the Washington's Birthday Matinee was easy enough.

Edward McLaughlin, always interested in Sonoma Girl 2:05¼, following her from place to place through the Grand Circuit last season, is at Pleasanton track, quietly watching the work of the best trotters.

F. H. Cummings reports considerable new interest in the trotting horse business at Los Banos. The track is being improved this spring and the building repaired. The driving club being organized will hold regular matinees. Mr. Cummings owns Albert E. 2:22, and thinks well enough of him to send him to the races, and also says that they have a green pacer in that neck of the woods called "Wild Bill" that will be heard from later on.

George Ramage has lately moved to Pleasanton track with five head. Two very impressive trotters are a gelding by Sidney Dillon out of a mare by Happy Russell and his full sister. The gelding was given a little breather the other day in a half in 1:12, and the mare a quarter in 36 seconds.

Mr. A. B. Spreckels has retired from the business of breeding trotters and is paying more attention to his select band of thoroughbreds on the Napa farm. One of the two-year-olds he bred called Carmisa, by Imported Solitaire II-Oratossa, recently won a race at Emeryville, three and a half furlongs, in 0:40 2-5, making her the fastest filly for her age that ever lived. The best judges at the track say she is one of the smoothest running fillies they have ever seen.

The Southwestern Agricultural Fair will be held in Centralia, Washington, from September 14th to 19th inclusive. The management and control of the Fair will be in the hands of Mr. H. H. Collier Tacoma, than whom there is not a more experienced man in that line in the State. Mr. Collier has been associated in the management of nearly all the large fair enterprises in the State. The Fair will be held on the grounds of the Centralia Driving Park. Besides the agricultural exhibits there will be horse racing and other attractions. The holding of a Fair in Centralia will be of great advantage to the city as well as to the surrounding country. In the hands of Mr. Collier the enterprise cannot fail to be a success.

The period of gestation in different mares varies from 10½ to 12½ months, and is liable to vary in different years in the same mare. The usual period for the average of mares is about 340 days, or 11 months and 10 days. It was thought years ago that in all cases when the period was protracted the produce would be a male, but in some of the longest periods that have come under the observation of the writer the foals have been fillies.

The Houghton Sulky Company of Marion, Ohio, are advertising in this issue special hard-time prices. Their new thirty-two-page catalog, which is certainly one of the finest books ever issued, is ready for distribution and will be mailed to any one asking for it. Among the new things shown in this catalog is a complete line of high-wheeled carts at very interesting prices. The very latest thing that Houghton is introducing is the style No. 99 Highball sulky, which is fully shown in the catalog. The price on this sulky is a revelation, and any one interested in the purchase of a sulky should by all means get their quotations on this style before ordering elsewhere. A copy of their catalog would be exceedingly interesting.

John Splan, the trotting horseman, arrived in Chicago last Monday for treatment for hydrophobia and is now at the Pasteur Institute. He was bitten by a mad dog on Friday while at Lexington, Ky. The head of the dog which bit him was taken to Dr. A. Lagorie, head of the institute, and, after an examination, the physician announced that the animal certainly had hydrophobia. Mr. Splan was put under treatment immediately. No bad symptoms have developed in this case and there is every reason to expect his recovery. Three other persons were bitten at the same time Mr. Splan suffered his injury.

Vancouver, B. C., is to have a big horse show, which is to take place March 19, 20 and 21. It is to be the first annual exhibition of the kind ever held in the Northwest. Many horsemen from Tacoma, Seattle, Portland and Victoria have made entries, and as there is to be \$5,000 worth of cups and prizes awarded great interest is being taken in it.

Thos. Bonner of this city, who remembers the horse Union that sired the dam of Alfred S. 2:16¼ (one of the gamest horses ever driven by the late Orrin A. Hickok), and the dams of Lord Byron 2:17 and Art Monagon II. This stallion was coal black in color, a very high-headed, bold moving trotter, extremely stylish in or out of harness. He was owned by Earl Marshall, a farmer who lived near the county road between Niles and Centerville, and sired a number of excellent roadsters. He was sired by Easton's Black Hawk out of a big brown blood-like mare said to be a thoroughbred. This horse was called American Union for years and finally the surname was dropped and before his death he was known as Union.

Ira Barker Dalzell, the leading veterinary dentist on the Pacific Coast, recently sold a beautiful chestnut gelding called Ishmaelite to Mr. P. H. Johnson of this city. This horse was sired by Owyhee 2:11 (now in Australia), out of Lottie Parks 2:16¼ by Cupid; second dam by Bismarck.

Have you noticed the splendid inducements offered by the Horse Review in their advertisement of Futurity No. 15? Read them over and send \$2.50 to the Horse Review Company, Chicago, with the names of every mare in foal that you possess and their foals will be eligible to the \$12,500 Subscription Purse. This sterling turf journal is worth twice the subscription price asked for it, and then you have this magnificent premium thrown in. The day is rapidly approaching when only those colts that are well entered in stakes will bring the highest prices at public and private sales.

Remember, entries for the big race meeting at Fresno close April 1st. The citizens of the Raisin City are going to make this the best fair and race meeting ever seen there.

Seekers after splendidly-bred broodmares in foal to some of the best bred trotting sires in California, or exceptionally good trotting and pacing "prospects," should attend the great spring sale to be held by Mr. Ed. Smith, the popular auctioneer, at Agricultural Park, Los Angeles, next Thursday, March 12th.

It is an old saying that "Studebaker" does not always keep the best vehicles made, he sells them for the lowest prices. And the stock on hand is the largest and best in California.

Mr. Chas. Durfee, the popular horseman and former owner of McKinney 2:11¼, has been engaged in conducting a large teaming business in San Francisco since the fire, but it is too strenuous a life for him and he is about selling his horses, trucks, wagons and carts, and it would not be surprising if he would "get back into the game" before long. He is acknowledged to be one of the best trainers and reinsmen in the United States, and he is not quite as old as Mike Bowerman, the driver of Gen. Watts 2:06¾, the wonderful three-year-old.

We ought to have the best series of race meetings in California in 1908 than we have had in years, and we will, if all who are interested will do everything in their power toward "boosting" these meetings. All it wants is concerted action on the part of the horsemen to make these meetings successful. Everybody loves to see trotters and pacers battle for supremacy on perfectly smooth racetracks, and, judging from the interest aroused last year, we can expect a larger attendance of enthusiastic friends of the trotter and pacer this year.

Ed. Geers has thirty-odd head of trotters and pacers in his stable at Memphis, the only ones remaining over from last year's campaign being John A. 2:03½, Baron Grattan 2:03½ and Highball 2:06¼. Among the star green trotters are The Huntsman by Onward Silver 2:05¼ and Trivial by Boreal 2:15¼. Among the pacers that are well thought of are Empire Hal 2:12½ and Prince Arundel by Ashland Wilkes, also three four-year-olds by Walter Direct 2:05¼.

A Crime—"Do you think horse racing a crime?" "Sure." "But you owned a string of horses last season." "That's just it. I was referring to the way in which my horses raced."

A correspondent writes as follows: "In studying the list of performers of the get of Hambletonian 10, I find that 140 of his sons and daughters were race winners; of course, there were only forty of these that got records of 2:30 or better, but they all showed they had the 'winning habit.'"

It is hoped that the secretaries who send in their reports of the races for publication this year will not forget to give the name of the sire, the dam's name and the name of her sire of every heat-winner. When the time comes for compiling statistics much labor will be saved and credit given where it is due.

There are many well bred stallions in the country of individual merit which are unknown outside of a small circle where they are not appreciated. Moral, advertise them.

Mike Bowerman has several promising youngsters at Lexington, Ky., the most notable being a two-year-old daughter of John A. McKerron 2:04½, and Nancy Hanks 2:04, which is owned by H. K. Devereux of Cleveland, Ohio. The filly will be prepared for the coming season.

W. L. Vance has booked Elisa S., dam of Sir John S. 2:04½, to J. W. Marshall's great young pacer, Aerolite.

Three years ago J. D. Kalar, formerly County Clerk of Monterey county, bought a filly one year old from the estate of the late Jesse D. Carr, paying \$100 for her. A couple of days ago he sold this filly to W. T. McBride, a millionaire of Aberdeen, Wash., for \$1,500, and shipped the animal to her new owner. The filly is by Boodle 2:12½, dam Lildine. She was developed by Mr. Kalar, and he considers her the biggest prospect in the world.

Among those already booked to Gen. Watts 2:06¾ are Sunol 2:08¼, the ex-champion; American Belle 2:12¼, Ida Gray 2:13¼, and Emma Offutt 2:11¼, the M. and M. winner of 1907.

Billy Welcome 2:24¼ by Welcome, son of Arthur Wilkes, will be raced this season by Samuel Liddle of Sharon, Pa.

It is said that a number of American horsemen, including W. E. D. Stokes, H. K. Devereux, F. S. Gorton, and others, are arranging to take a string of trotting horses to Russia late next fall to enter in the international race, which has been opened by the Imperial Trotting Club. The gentlemen who are behind this project will, it is said, invite all breeders and owners in this country to name such horses as they think they have capable of starting in the big race, and from those named a number of the best ones will be selected to take to Russia to start for the big purse.

The varied merits of the trotting bred horse have become so generally recognized that the "breed" occupies the place next to mankind in the animal kingdom, and the time is not likely to again come when trotting horse values will be as low as they were in 1893-5. As to real trotting and pacing race horses and great sires and great dams, there is nothing in sight to raise even a suspicion that other than prosperous times are in store for breeders. Prices realized at the Old Glory sale, where the market was put to the severest test, ought to settle this point in every thinking man's mind. Indeed, every outward manifestation in the present and future situation is such as to warrant increased earnestness and activity on the part of trotting horse breeders of every class.

Thursday 2:24¼, half sister to the great John A. McKerron 2:04½, was burned to death in a stable in Newark, New Jersey, last Wednesday.

Don't forget to make entries for the big sale of trotting stock in April at Pleasanton. Buyers will be there from all parts of California looking for "prospects" to start on the splendid California Circuit this year. A horse cannot win unless he gets an opportunity to do so. There will be no room for excuses this year. A prospect will bring a big price at this sale.

We are in receipt of two beautifully designed and comprehensive catalogues from the well-known firm of Magnus Flaws & Co., Chicago. They reflect credit upon compilers and printers. One of these catalogues is of the Maywood Farm (home of Sidney Dillon), the other is of the Dromore Farm (home of Barongale 2:11¼), Port Huron, Michigan.

DECADENCE OF OUR LARGE STOCK FARMS.

The announcement that J. B. Haggin has sold all his trotting stock at auction in Kentucky brings to mind most forcibly the fact that the day of the big stock farm for the breeding and development of light harness horses has passed and the era of small stock farms is firmly established. Rancho del Paso, that splendid 44,000-acre tract lying on the banks of the American River was first the home of Albert W. 2:20, Echo, Norwood and a number of choicely bred trotting mares. A demand for thoroughbreds arose and increased. Its proprietor engaged in this pursuit and spared neither time nor expense to get some of the best bred stallions and broodmares in America, Australasia, England, France and Hungary to stock this great domain, consequently the trotting department gradually decreased in size and influence. Years rolled on and the fastest horse in the world, Salvator, returned to take his place beside Sir Modred and a score of other stallions. Then a few years ago, Mr. Haggin having determined to stock up his magnificently appointed farm, known as Elmendorf, in Kentucky, had all his thoroughbreds (about 500) shipped there. Today, upon the rich alfalfa and alfileria, which grows along the "bottoms" are hundreds of beef cattle fattening for the market. The big barns are empty, the race-tracks are carpeted with grass, and all is as quiet as if there never were the shouts of the exercise boys and caretakers, the music of flying hoof beats, neighing of the stallions, nor the presence of scores of men, whose duties were to look out for these "children of the winds."

At Palo Alto, where in the days when its proud owner, Senator Leland Stanford, used to sit beneath the big oak tree on the homestretch of the training track and, with his guests, timed the efforts of the young Electioneers, Gen. Bentons and Piedmonts, all is as silent as the unpretentious little graveyard back of the first row of stalls where Mayflower, Elaine, Dame Winnie, Palo Alto and others of that galaxy of star repose. The magnificent barns, carriage houses, paddocks and fields are as devoid of life as if they were never used to shelter and sustain over 1,700 horses.

William Corbitt's San Mateo Stock Farm, near Burlingame, which was once a large wheat field, has been changed wonderfully by the march of progress since its enthusiastic owner passed away. On one side a village encroaches upon the paddocks wherein Guy Wilkes 2:15¼ and his sons and daughters used to romp and play. On the other, in plain view of the racetrack, are three of the largest nurseries and conservatories in California. Most of the farm has been divided and sold, but the empty barns, by their silence, testify as to the decadence of this charming place.

Valensin's Stock Farm, near Pleasanton, where the little gentlemanly Italian owner used to walk, cane in hand, among the Sidneys and Simmicolons and speak glowingly of their future and predict that he had the sire that would bring more credit to California than Electioneer. A model stock farm in the truest acceptance of the term, it has also changed. Its broad acres are devoted to the cultivation of sugar beets and, like some of the horses that once galloped over its level surface, they are the best in the world.

ToKalon Stock Farm, near Oakville, Napa county, the home of the late H. W. Crabb, fully justified its Greek appellation, signifying "The Beautiful," for a more picturesque spot cannot be found in California. One portion of it was devoted to the breeding and development of fast trotters and many sons and daughters of San Diego, Grandissimo and Nautuc received their first lessons on its pretty half-mile track. Today all traces of the oval and paddocks have disappeared under a network of grape vines, and its late owner lies in the cemetery near Haywards.

Vineland Stock Farm, a small place a few miles further up the valley, was started by the late F. W. Loeber, who met with a tragic death in Baltimore some time ago. Mr. Loeber stood Whippleton, Grandissimo and Alcona Jr. here, and in the little paddocks, through which a beautiful stream of mountain water rippled on its way to the Napa River, he had a very select band of broodmares. Hardy vines and some blossoming cherry trees have obliterated all traces of the rich Italian grasses, clover and alfileria which grew there.

Moorland Stock Farm, on the westerly side of historic Milpitas, is now used as a dairy farm. It was to this place that big-hearted, genial Dan Murphy brought Soudan 2:27, Carrie Malone, Myrtha Whips, Alien and about thirty other royally bred mares, built a half-mile track and then, one day in 1893, he was found in the dairy house in the rear of his mother's residence, dying from a pistol wound, regretted by all who knew him.

The Oakwood Park Stock Farm is not what it once was, "the pride of Contra Costa county." Its owner, Mr. John F. Boyd, disposed of it two years ago to some Eastern people who looked not upon its worth as a stock farm but considered the value of the trees upon it of greater commercial worth. Over 200 Japanese were employed for months in stripping the hills and mountains comprising 5,000 picturesque acres, of all valuable timber; then down in the valley could the sound of the woodman's axe and the ripping of the saw be heard, for the grove of majestic, wide-spreading live oaks which shaded the roadway to the beautiful residence were soon felled, and Nature's work of hundreds of years was in a few weeks ruined. The horses have been sold,

with the exception of a few mares and yearlings, and the changes that have been wrought here makes one feel sad to contemplate. This place is now in liquidation, but as a farm, whereon such horses and mares as Steinway 2:25¾ and Chas. Derby 2:20, Bertha, Katy G. and fifty others broodmares lived, it will never recover its former greatness.

L. A. Richard's Stock Farm, near Grayson, Stanislaus county, consisted of 9,000 acres of land, and, with his good stallion Elector and about 100 mares, he made a start in the business. Dry years followed. The horse died, he sold all the mares and their produce, and today it is an immense wheat field.

L. U. Shippee of Stockton was another progressive horse breeder; his different farms in the immediate vicinity of the Slough City were stocked with the choicest trotters and thoroughbreds money could buy. At his death big dispersal sales scattered his collection to the "four winds," and orchards, vineyards and grain fields are enclosed by the same fences which at one time kept the young Hawthornes and the Lamberts out of mischief.

The Souther Farm, at San Leandro. What a place that was! Who will ever forget its theoretical owner, Gilbert Tompkins, and the swimming tank he made there. His articles on balancing the trotter furnished delightful reading. He was earnest, enthusiastic and ambitious; but, alas, he tired of the sport when he found that actual experience was the best teacher. He sold out and is now in New York, where his talent in literary work is recognized, so he is on a fair way to achieve a fortune. The farm has been converted into one of the prettiest country seats in California and was, until a few months ago, owned by that sprightly and clever little actress, Edna Wallace Hopper.

H. W. Meeks' racetrack, near Haywards, has been ploughed up and hundreds of young fruits trees have been planted in the infield, on the stretches and around the turns.

Several of the racetracks which at one time figured in the California Circuit have disappeared, Chico, Napa and the one at San Jose being the most prominent. The same sad story can be told about the growth and development of the light harness-horse industry in every State in the Union where any interest was taken in it. The owners of these places were the pioneers, and the history of their successes and failures furnishes a lesson which the observant horsemen of to-day must profit by. Like the building of a model of something never attempted before, many are the failures in construction before success follows. What the 2:30, 2:20, 2:10 and 2:05 classes are today, due credit should be given these enthusiastic owners who sacrificed their money, labor and time to swell these lists. They builded better than they knew. Their names shall live as long as the history of trotting survives, and, upon the foundations which they laid in mating their best stallions and mares are we building a superstructure of still faster records as a memento of their glory and undying fame.

NEW ARIZONA RACETRACKS.

After ten days spent in Tucson and Bisbee, repairing political fences and building racetracks, J. C. Adams returned to Phoenix this morning confident that he has accomplished both the objects that took him south.

Adams not only asserts that Tucson and Bisbee will build racetracks, but he says that the Republicans in Pima and Cochise counties are almost a unit for an uninstructed delegation from Arizona to the National Convention at Chicago.

Speaking first about the racetracks, Adams had the following to say:

"Tucson and Bisbee business men have both held meetings and they have decided to raise between \$40,000 and \$50,000 in each city to build a first-class mile track.

"The plan is to organize a southwestern circuit to include El Paso, Bisbee, Tucson and Phoenix, and to have race meets in these places just before the Territorial Fair opens in Phoenix and just before the racing season opens each season in the East.

"I believe that each of the cities named will contribute enough to provide \$60,000 in purses, including \$20,000 that is given by the Territorial Fair. It will not only bring twice as many horses to the Fair in Phoenix, but will greatly increase the interest in the Fair races.

"As it is now, horse owners, many of them, will not come to Phoenix to race at the Fair because of the long trip they are forced to make. If they could start at Dallas, for instance, and attend race meets one after the other at El Paso, Bisbee, Tucson and Phoenix, it would bring all the best horses in the country to the southwest.

"I also believe that it would be the means of getting the most of them to winter in Phoenix between the time the Fair closes in the fall and the opening of a series of spring meets on the southwestern tracks just before the Eastern racing season begins. I found Tucson and Bisbee enthusiastic over the project."

The big Livermore Horse Show takes place today.

Dick Ables stepped the chestnut gelding Four Stockings by Kinney Lou, dam the dam of Lady Mowry, a half-mile in 1:14¼, quarter in 36 seconds at the Pleasanton track. He is coming two years old, and good judges say that he is the best prospect they ever saw.

PORTLAND'S GREATEST FEATURE.

Construction of the pavilions, barns and other buildings and the track of the Portland Country Club and Livestock Association is being pushed with all possible speed. It is determined to have the place in the best possible condition for the first big livestock show to be held during the coming fall. The board of directors will hold a meeting next Monday to transact important business.

A number of heavy business concerns and wealthy estates in Portland have not yet taken stock, and they will be allotted a block of appropriate size within the next few weeks, there being still about \$50,000 unsubscribed.

The word "success" is spelled from every side of the Portland livestock show. The movement is being given cordial welcome all over the Pacific Northwest, and as far away as Wyoming, and Utah stockmen are looking to Portland as the mecca for 1908. The great success of the western stock show at Denver has been an eyeopener to many of the conservative ones. With very much less of opportunity and encouragement than can be shown for the Portland movement, Denver has made of its livestock show one of the greatest events of the western country.

In a letter to the secretary of the Portland Country Club and Livestock Association, complete success for the Portland show is predicted by W. E. Skinner, vice-president and manager of the Western Stock Show. Of the Denver show he said:

"The people of Denver three years ago conceived the idea that in view of the land being taken up so rapidly by agriculturists in this section it behooved them to meet the changed conditions by encouraging improved breeds for livestock on the basis that successful agriculture is available only through mediums of livestock husbandry, so they started a little show in a tent. Last year we enlarged the scope of the show to take in some herds west of the 99th degree of longitude and met with considerable success.

"In preparing for the 1908 show we took the lid off and made it open to the world, with the result we had herds here from Ohio, Indiana, Wisconsin, Iowa, Illinois, Missouri, Nebraska and Kansas; flocks from Wisconsin, Iowa, Nebraska and Kansas; studs from Iowa, Kansas and Nebraska; and pigs from Pennsylvania, Illinois, Iowa, Nebraska and Kansas, together with exhibits of all these breeds from intermountain States.

"We had here in our barns when this show opened as good a quality show as had ever been held. We sold during the week about 300 head of breeding cattle, 30 or 40 horses and a quantity of pigs and sheep, so that results from that medium will roll on while we gave an object lesson to the people of this country that they have never had before on their own soil of what quality will do for them in their livestock. Judging from the Eastern man's standpoint as well as the Western man's, the show emphasized beyond any question the fact that range conditions have passed and the agriculturist is in the saddle.

"Our attendance was over 100,000 people, which taken from a population of a city of 200,000, must have given us a tremendous number of people from the country who, of course, are the people we are after.

"To my mind there is no reason to question but that the time has arrived when the Western country must follow this line of work to insure that the best blood of the country is brought into Western States. The people are ready for it, open to conviction and respond beautifully."

A LETTER FROM HIDALGO.

Los Angeles, March 4, 1908.

Permit me to congratulate you upon your "Stallion Number," your issue of February 15th. Apart from its elegant typography and generally neat make-up, it conveys to the intelligent readers a most impressive and salutary lesson. It is the quality of the modern light-harness horse. To a man who, in earlier life, has driven such coarse and unwieldy looking trotters as Jim Barton, Jack Waters, Rhode Island and Duane (also known as Bull Pup), the portraits in your "Stallion Number" are something of a revelation.

Nothing but breeding "onward, upward and true to the line" could have produced such results. Fifty years ago the trotting horse was "a poor 'un to look at but a good 'un to go." Now the thoroughly select horse, bred from trotting lineage on each side of the house, with a dash of thoroughbred back of it, say five generations, shows as much quality as can be demanded without losing sight of strength and perfect action. At Santa Anita Park, I will venture to say, you can find today at least three hundred horses, thoroughbred beyond any chance for doubt, that do not show as much quality as did Stamboul, Alcazar, Advertiser or Cupid. Mr. Lopez said to me one day at Mr. Hobart's place, "You and I could go to some farms in New South Wales and find scores of horses that do not look as much like thoroughbreds as this fellow," referring to Stamboul.

We should not, however, in our anxiety to reach quality, overlook the great desideratum of masculinity in a stallion. Major Walmesley told me that he selected Musket more from his masculine appearance than from his pedigree. "Go and look at Apremont," he said, "and then tell me if ever you knew a successful stallion to have a head on him like that. His head looks like that of a three-year-

old filly." And the Major was right. For my own part, I plead guilty to a great love for the Roman nose, which is so strongly marked in the portraits of Glencoe and his even more famous grandson, Stockwell."

And so you folks don't believe in Mr. Thomas H. Williams' California Breeding Bureau because they have taken for it a horse that could not run six furlongs better than 1:19. Why, bless your dear hearts, the best stallion we ever had in this State up to 1865, when he died, was Belmont, by American Boy, out of imported Prunella by Comus. That horse ran two races in this State and could not win either of them.

His first start was at half a mile in a race run over two marked paths in a field on the banks of Chico Creek, just back of Ira Wetherbee's old Chico Hotel. The match was for \$500 a side and Billy Williamson rode him at 155 pounds. Coon Garner rode "the Sam Neal mare," which beat him over thirty yards, in 57 seconds. That did not speak very well for him as a performer, did it? However, Billy Williamson thought he could train horses, so he took Belmont down to Marysville about a month later, where a meeting was in progress. He started him in a mile dash against Maid of the Hills, owned by James R. Robbin of Auburn; and a little sorrel gelding named Colusa Sam, owned and ridden by John S. Dunn, who afterwards trained Ashland and Billy Cheatham for the elder Nathan Combs of Napa.

The betting was in favor of Colusa Sam, chiefly from the fact that John Dunn was to ride him. There were no pools in those days, but it was even money that he won, 2 to 1 that he beat the gray mare and 3 to 1 that he beat Belmont. At the tap of the drum Billy Kelly took the mare out in front and led a trifle past the half-mile pole, when John Dunn came up with a rush and won by two lengths from the mare, Belmont being beaten over seventy yards in the slow time of 1:56.

Such is the true history of the greatest stallion of our pioneer days. In 1892 William G. Layng, then editor of your paper, wrote an article upon what Belmont did for the trotting stock of this State. It was a very elaborate piece of work and true in every particular. I had seen all the older horses referred to in Mr. Layng's article.

HIDALGO.

STATE FAIR PROGRAM.

There will be some great light harness sport at the next California State Fair, which is to be held at Sacramento the latter part of August. The list includes two purses calling for \$2,000 each, and four \$1,000 purses. This kind of money should secure the best horses in training.

The program, as arranged by the speed committee for the seven racing days, is as follows:

Saturday, August 29th—Occident Stake (closed), pacing, 2:12 class, purse \$800.

Monday, August 31st—Amateur roadster contest, trotting, 2:10 class, purse \$1,000.

Tuesday, September 1st—Pacing, 2:08 class, purse \$1,000, trotting, 2:17 class, purse \$700.

Wednesday, September 2d—Pacing, 2:15 class, purse \$500; pacing, 2:24 class, three-year-olds, \$700.

Thursday, September 3d—Stanford Stake (closed), trotting, 2:14 class, purse \$800.

Friday, September 4th—Pacing, 2:20 class, purse \$2,000; free-for-all trot, purse \$1,000.

Saturday, September 5th—Pacing, 2:05 class, purse \$1,000; trotting, 2:20 class, purse \$2,000.

Nominations for the free-for-all and 2:20 trot and the 2:05, 2:08 and 2:20 pace close on April 1st. Entries for all the other events are to close on June 1st.

In addition to the above stakes, it is the intention of the State Fair Association to offer trophies for the representatives in each class of every driving club in the State to contest for the championship of the State. The manner of conducting these contests has not yet been decided, and secretaries of driving clubs are invited to correspond with Director Frank H. Burke of this city, or Secretary Filcher at Sacramento.

UNIMAK GOES TO SUISUN.

Arrangements were completed last week by which Capt. C. H. Williams sends his beautifully bred McKinney stallion Unimak 40956 (brother to Sterling McKinney 2:09 1/4) to Benj. F. Rush's Suisun Stock Farm. This grand looking individual will make the season of 1908 there at a fee of \$30, and only approved mares will be booked to him. As there are many royally bred ones in Solano county, owners should avail themselves of getting colts by this horse. He is just what is needed there, as he has size, color, a perfect trotting action, a good disposition, combined with a heritage of the most fashionable blood lines. Everybody who has ever been on this stock farm knows that the best of feed, and plenty of it grows there. Mr. Haile will attend to the care of all mares sent, and this fact alone is quite an item, for a more careful man cannot be found. Unimak 40956 was only bred to six mares and all proved with foal; two of them are at the Pleasanton track and their exhibitions of speed are strong testimonials as to their sire's worth.

Your Stomach is O. K. if you drink Jackson's Napa Soda.

THE LESSONS OF THE PAST.

In concluding a very able article upon the Peculiar Value of the American Trotting Horse and Means for Protecting and Advancing His Condition, which was presented at the annual meeting of the American Breeders' Association, Washington, D. C., last month, Mr. H. K. Devereaux said:

"It is perfectly practicable while breeding to produce speed in the trotter, to also produce a type of horse that is readily marketable at remunerative prices should the produce not develop the looked-for speed. Our trotting pedigrees are becoming so pure, and our trotters so prepotent that where a few years ago one foal in thirty might be expected to develop speed enough to trot in 2:30, nowadays our breeders expect almost every foal to show that much ability. The increase of speed in our trotters and the general ability of most all of them to show some, has made common what but a few years ago was rare. Up to 1893 the 2:30 list was called the 'charmed circle,' and breeders were trying to produce horses that could go that fast. By 1900, 2:30 speed had grown very common, and soon only horses that could trot as well as 2:15 were considered as of no more than ordinary value. Today we talk of the 2:10 list, and a trotter is becoming a rather common commodity. In what is generally known as the 'boom days' of the trotter, or prior to 1903, values were excessive, while pedigrees sold worthless stock at extraordinary prices, and stallion fees were exorbitant. Today we are on a stable basis; individual excellence must accompany pedigree and extreme speed; values are reasonable and stallion fees low. The country is well supplied with desirable stallions, highly bred, of good quality and much speed, that stand at as low or lower fees than equally as well bred and desirable males of all our domestic animals.

"The future looks bright; we have weathered the dangerous points, and from now on it looks like plain sailing. We have had predictions of a horseless age for some years, but so long as the earth is inhabited by mankind we will have our horses, and so long as horses go, the trotter is bound to stay at the front. It has been the dream of many of our breeders that our government might in time lend its attention and aid to the upbuilding of our trotting horse interests, and were this dream to become a reality, great as these interests are now as to value, they would in a few years become much greater. Foreign governments have very largely taken part in the upbuilding of their horse breeding interests, even in some countries to the extent of fostering and officially conducting their racing or track contests. Where this has been done more particular attention has been given to the harness horse where speed at a trot is a desideratum. Should our government promulgate and stand behind a large yearly exposition of live stock, with generous premiums and fixed conditions for merit, the benefit to our breeding interests would soon make itself apparent. Education is what we need and in no way could it be obtained more thoroughly or universally."

LIVERMORE HORSE SHOW.

Preparations for the horse show to-day (Saturday) are all completed, and Secretary Theo. Gerner reports that entries are coming in fast, among them being seven from Haywards, and "Star Pointer" from Pleasanton, said to be the fastest horse on the turf, will be among the high bred horses in the parade. In all 200 horses are expected to be in line, making the finest horse show ever held in Livermore, as the largest amount of money was invested in recent years in high bred imported horses and has done much to improve the stock in the Livermore valley.

Several local horsemen have offered substantial prizes for the best foal in line sired by their horses.

John Meyn offers six prizes for the best colts by his imported Belgian stallion, Bijon Berni, as follows: Three-year-olds, first prize \$5; second prize, \$2.50. Two-year-olds, first prize \$5, second prize \$2.50. Yearlings, first prize \$5, second prize \$2.50.

Max Berlin will give prizes as follows for colts from Barnum de Limelette, his Belgian stallion: First prize \$10, second prize \$7.50, third prize \$5; also three similar prizes for the best colts exhibited from his German coach horse, Odin.

N. D. Dutcher also comes forward with three large prizes—\$30, \$10 and \$5—for the best colts his stallions British Oaks, Bay Oaks and King Clyde.

WHAT YOU WANT AND WHERE TO GET IT.

Especially as the matinee season is opening up, and every one is looking out for a good, first-class cart to jog, road or speed to, we think it opportune to call attention to an illustration appearing elsewhere in this issue of the speed, road and jog carts, as well as matinee carts, made by the McMurray Sulky Company of Marion, Ohio.

If you are really wanting an easy riding cart, one that will not give you the backache, as so many carts do, there is nothing that will compare in any way with the McMurray. You can see in the illustration the exceedingly long spring, and how it is hung. This spring, you also will notice, extends entirely across the cart from shaft to shaft, carrying the weight where it ought to be, right over the wheels, instead of on the axle, thus there is no chance for either the cart to ever spread or to allow any horse motion whatever. This is only one of the many superior points of this cart. Others are superb finish, finest quality of material, combining both strength and durability.

If any of our readers find themselves about ready to order a cart, we would suggest that they get in communication with the above firm. It will pay you.

TO PREVENT LOSS AT FOALING.

There are two active causes of death on young animals, foals and calves, a better understanding of which might materially reduce the fatalities ordinarily reported at the breeding season, writes Prof. C. W. Gay. One, perhaps the more common, is due to an impaction in the bowels of the excrement accumulated during development prior to birth. This foecal material is called meconium, and its removal is essential to the well-being of the young animals. Nature has provided for the accomplishment of this by giving to the foremilk, or colostrum, as it is called, purgative properties. Thus, if nature's plans are not interfered with and the first milk is taken there is usually no trouble in clearing the bowels after birth. But the dam may have some trouble with her milk at first, or the young, through weakness, may not get a good draught of the foremilk. In some cases care is taken to draw off the thick, yellowish colostrum before the young thing suckles, in the belief that it is unfit to be taken.

In order to avoid the difficulties arising from this cause the first care should be to insure a goodly portion of the foremilk for the young creature. Then, if from any cause the digestive tract has not been cleared of its contents within twenty-four hours the bowels must be stimulated to action by a tablespoonful of castor oil and warm water injection.

Another cause of many deaths in young foals and calves is infection with pus and disease germs through the navel. At the moment the umbilical cord is ruptured there is direct communication from without to some of the vital internal organs, and blood. This opening is later closed naturally by the swelling and final drying of the end of the cord which follows breaking. There is thus a brief opportunity for the entrance of germs which may later affect the system generally or locally and produce serious results.

It has been satisfactorily demonstrated that the so-called navel or joint ill in foals, white scours, etc., in calves, are due to organisms entering through this channel.

If either of these affections has prevailed in a stable it would be well to remove pregnant animals to fresh, clean, uninfected quarters and allow them to produce their young there. The new born foal or calf should be dropped only on fresh, clean, uninfected litter, and it would be safer to wash the stump of the cord with a saturated solution of boric acid, then dry carefully and dust with boric acid powder. Some even go as far as to prevent the new-born from coming in contact with the floor at all until the cord has been dressed. They catch the foal or calf in a disinfected sheet, apply a special preparation of iodine, then seal the cord with a coating of collodion.

It is not advisable to cut or ligate the cord, but allow it to break naturally, as it will do if let alone. A torn or broken blood vessel will not bleed, whereas one cut directly across will, and it takes a skilled hand and sterilized materials to make a ligature that will not do more harm than good.

If it were generally known that the newly broken umbilical cord offers a channel of infection which may admit the most dangerous bacteria, more care would be taken to prevent such infection and many losses be avoided thereby.

BETTER THAN ANTI-FAT.

Army officers, fat and lean, young, middle-aged and venerable, are to indulge this year in military riding matinees. A new order granting the warriors behind the desk the further opportunity to become acquainted with the saddle is to be issued. They will have ample time to prepare for the severe 90-mile test to which they will be subjected next fall. In consequence, there is a decided boom in the Washington horse market, and tailors are stitching overtime on riding breeches.

Out of the 100 revolving chair military heroes who took the recent 15-mile riding test a half dozen lost their commissions when it was found they had forgotten how properly to bestride a horse. Survivors of that experience are not to be caught napping when the more severe ordeal is sprung. So General Bell brought pressure to bear, with the result that the Secretary of War has given permission to department officers to take an hour each afternoon for practice, or one or two afternoons a week, if they prefer.

Among the young officers the order is acclaimed with joy, for it means recreation at government expense. Major Eugene T. Wilson, who is stationed at the War College, and confesses to nearly 300 pounds, is not hilarious. Neither are some of the 250-pounders. They are wondering where they can find mounts that will carry them nine miles, let alone 90, without caving in.

DISEASES AMONG STALLIONS

Are of frequent occurrence, and the wonder is that there are not more. There is no doubt at all that many stallions lose form and vigor, and become so devitalized that they do not remain in the stud service to close of regular season. This is due to the fact that they absorb through the procreative organs disease germs or bacteria transmitted to them from the mares bred to them. Germicidal and tonic elements must be the remedy. Spohn's Liquid Distemper Cure is really the only safe germicide for internal use, and it has so thoroughly stood the test on nearly all the stock farms that it is now regarded as the true and highest standard in this class of remedies. If you will treat your stallions with a small dose of Spohn's Cure, every two or three days, you will have no trouble or any weakness in your stallions, and be absolutely free from all distempers. Give it also to the mares and colts.

THE RIVERSIDE RACE MEETING.

Keen, friendly rivalry, well matched thoroughbreds and an excellent program marked the matinee races held Saturday afternoon at the Riverside Driving Park as one of the most successful meets ever given under the auspices of the local driving club.

It was only a fair sized audience that filled the grandstand and lined the runway when the first race was called, but what was lacking in numbers was made up many times in the interest and enthusiasm shown.

The day was ideal for racing and the hard track made possible the uniformly creditable records. The half-mile oval turf, hedged in by green-covered foothills and further distant mountains, crowned with a balmy blue sky, dotted with flake-white clouds, made an enchanting picture that was given life and vigor by the racing ponies. It was a gala day—a California day.

2:40 Pace—The program was started promptly at 1:30 o'clock with the first heat of the 2:40 pace. Five horses faced the starter—Coupond, owned and driven by J. T. Garner; Buena B., owned and driven by J. F. Backstrand; Mammy, owned by A. B. Miller and driven by Axel Nelson; Redlands, owned by R. T. Curtis and driven by J. H. Kelly, and Wampo, owned by Al. Mettler and driven by H. Rutherford. The last two horses named are from San Bernardino. Cupond took the pole and was never headed, winning handily. Mammy took second place, with Buena B. third. Time, 1:17½.

In the second heat, Buena B. got away in poor form and broke badly in the back stretch. Mammy got away well and passed Cupond, who broke. Mammy won with ease, with Cupond second and Buena B. third. Time, 1:18.

The final heat and race went to Mammy. Wampo was the real contender in this heat, but broke on the turn into the stretch and had to be contented with second place, Buena B. taking third, Copond fourth and Redlands fifth. Time, 1:15.

2:35 Trot—In the second event, the 2:25 trot, the honors lay between Pete, owned by S. R. McDougall, and F. A. Ramsey's Tom McKinney. The other contenders in the race were McPatchen, owned by S. W. Lockett, and Ben Z., a San Bernardino horse, owned by Rutherford & Young.

There was a beautiful get-away in the first heat and it was anybody's race at the start. McKinney went up in the air. Pete drew away steadily and was lengths ahead at the quarter. Judd nursed McPatchen admirably, but the lead was too great to overcome. McKinney finished third and Ben Z. fourth. Time, 1:18½.

The second heat saw one of the best finishes of the day. It was battle royal between Tom McKinney and Pete from start to finish. McDougall had hard luck in the last turn, allowing Pete to break, and McKinney won by a bare length. Time, 1:15.

The third heat also went to Ramsey's gelding, McKinney winning all the way, although pressed in the stretch by Judd. McPatchen, however, was not equal to the strain and finished second best, Pete getting third. Time, 1:15.

Special Trot—The third event of the day was a matched race between two old turf rivals—Marigold, owned by R. F. Garner of San Bernardino, and W. A. Hayt's Lauretta. In the first heat they started on even terms, Marigold having the pole, and traveled the route into the final stretch without a break. It was a magnificent finish, Marigold winning by a nose in the excellent time of 1:12.

The second heat was a farce. Lauretta broke badly and Marigold was lengths ahead in the back stretch. Lauretta was clearly beaten, but in order to make it a contest, Garner waited for Judd to come up and they entered the stretch side by side. The unexpected happened—Marigold went up in the air and Lauretta won. The time was slow, 1:25.

In the third heat Judd had a chance to reciprocate, for Marigold broke and it was Lauretta's turn to lead in the back stretch. Marigold closed up the gap and it was a pretty driving finish, Lauretta winning by inches. Time, 1:16.

Free-for-All Pace—V. E. Reynolds' Harry H., driven by F. A. Ramsey, won the next event, the free-for-all pace, in straight heats. G. H. Judd's Maidie contended for the first honors, but lost her chances of winning in the back stretch. She closed up a large gap, but the distance was too much and Harry H. had no trouble in passing the judges' stand a winner. Hal finished third, with Adalantha fourth. Time, 1:14.

There was some trouble in getting the horses away in the second heat. Maidie was up in the air and didn't figure. Harry H. walked away from the field, winning handily, with Adalantha second and Maidie third. Hal was outdistanced. This was the fastest heat of the day, the half being run in 1:10½.

Three-Minute Mixed—The fifth event had four entries, Judge being scratched. The horses were slow in getting away in the first heat, but it was a perfect start. Eugene B. and Orin A. fought it out in the back stretch with honors about even. Prince Valentine rapidly closed up, after having broken, and the three horses could have been covered with a blanket as they rounded into the final lane. Prince Valentine broke again and lost his chance to score. As it was, Orin A. won easily, with Eugene B. second and Prince Valentine third. Queen brought up the rear. Time, 1:24.

The second heat was won by Prince Valentine after an exciting brush with Orin A. Poor driving in the last seconds of the race nearly lost the

event to the fine little black gelding, Orin A. led in the last strides but broke, and Prince Valentine passed under the wire as winner. Queen overtook Eugene B. and won third place. Time, 1:22½.

Prince Valentine got the worst of a bad start in the final heat and was unable to overcome the handicap, although he made a noble effort. Eugene B. captured second and Queen finished third, Orin A. winning the heat and race. Time, 1:23.

2:40 Trot—Baby, owned by Maurice Griffin; Emma Z., owned by L. Fother, and Ed. Simmon's Staton McGerg were the three entries to face the barrier in the last of the harness races. Emma Z., after running badly, closed up on Staton in the final strides and it was a driving finish to the wire. Staton McGerg nosed out the brown mare and Baby finished third. Time, 1:22.

In the second heat Baby ran a pretty race to the back stretch, outdistancing her competitors, who ran in poor form, but Baby in turn broke and was passed by Staton McGerg at the finish. Time, 1:23.

Quarter-Mile Dash—The next race was a quarter-mile dash, in which were entered Mignonette, ridden by J. P. Norton; The Kid, owned by T. B. Jenkinson and ridden by Bob Carr, and The Ace, owned and ridden by A. Ingold. It was a pretty race all the way and was won by Norton's mount, who nosed out The Kid at the wire. The time was 26 seconds.

Half-Mile Dash—This race was the event of the day. Much interest was displayed in the San Jacinto entry, Julia P., owned by Albert Pico. This fine little pony was heavily backed by the San Jacinto contingent, who placed great confidence in its ability to bring home the money. T. B. Jenkinson had two entries—The Kid and Anna Burke—who were also heavily played to win.

Mignonette, with Norton up, however, again proved her mettle and won in a driving finish from Anna Burke. Julia P. finished third, with The Kid and The Ace following in the order named. The time, 53 seconds, was fast.

The following were the prizes awarded the winners in each race: First race, cooling blanket; second prize, pair of gloves; third prize, buggy whip.

The Riverside Driving Club is to be congratulated for the manner in which the meet was conducted. The events were run off in good order, with but few delays.

Following are the officials who had charge of the program: Starter, H. G. Stanley; judges, Dr. T. I. Fletcher, E. F. Binder, Thomas Holmes; timers, R. F. Garner, Robert Curtis, R. L. Bettner, F. S. Pond; clerk of course, W. L. Scott.

Between the heats the Sherman Institute Band, under the direction of Charles Weyland, rendered a number of selections, which added greatly to the afternoon's pleasure. The boys, under Professor Weyland's able instruction, have advanced remarkably and deserve great credit for the showing they always make when called upon.—Enterprise.

AN OREGON FUTURITY.

The benefits derived from holding Futurity Stakes for two and three-year-olds are being recognized everywhere and the good work is in a fair way to continue. The Oregon State Board of Agriculture at its last meeting authorized M. D. Wisdom, editor of the North Pacific Rural Press, who is also one of the most progressive horsemen in the Northwest, to advertise a \$5,000 Futurity Stake, which they fully guarantee, for foals of 1908 to be raced for in their two and three-year-old forms. This stake is open to the world and will provide two races for trotters and two for pacers, as follows: \$2,000 for three-year-old trotters, \$1,500 for three-year-old pacers, \$900 for two-year-old trotters and \$600 for two-year-olds pacers. Stakes of this kind are very popular elsewhere and there is no good reason why they should not be made so in the Northwest. These stakes do more to encourage breeding than any other events, and stallion owners should patronize them freely. This stake will be made an annual event if breeders will give it their support. Entries close July 1, 1908, when sire and dam must be named. Second payment January 1, 1909, when color, sex and name of foal must be given. In case of death of a nomination prior to January 1, 1909, a substitute will be allowed.

The horseless age which the motor was to have produced does not appear to be in sight. The statistics of the Agricultural Department show that there were 297,725 more horses and mules in the United States in 1907 than in 1906, and that there are 8,237,449 more harness-using animals in the country now than there were eight years ago. Not only has the number of horses increased, but their selling value has advanced considerably since 1902.

Many good consignments are coming in from different parts of the country to the big sale at Pleasanton race track April 16th, 17th and 18th. There is no better time in the year for both seller and buyer than April, and at no other sale in the country is such chance given buyers to see just what they are buying. The public is invited to spend the week at Pleasanton and carefully look over what they want to bid on. April 15th will be Horse Show day in particular, when speed and manners will be in evidence from morning until night. One special feature of the sale will be Draft Horse day on the 16th. It is safe to say that no other such lot of native draft stock ranging from two years up was ever before offered at auction.

∴ ROD, GUN AND KENNEL ∴

CONDUCTED BY J. X. DeWITT

PHILOSOPHY OF "NOEGRUS."

We were nearly as much encouraged upon hearing that these quickly written and erratic articles were "interesting"—as we would have been in our youth—to hear the girl of our choice say that we were good looking, writes a contributor to the Santa Cruz Sentinel. So until the days of blessed sunshine come again to permit the hieing away of ourself to favorite haunts for angling and meditation—we from time to time may add a few words to those already penned.

To revert now to the subject of variety of species in the trout of our streams, it may be said that there has been nearly as much absolute certainty as in the forecasts of the very expensive establishments of the Weather Bureau. Not long ago it seemed to be conceded that the rainbow was the indigenous, or native trout, in all our neighboring coastwise streams. Then when attention was called to the steelhead we were told that it was substantially the same variety. It was a rainbow, which having become dissatisfied with its up-stream environment, moved down into saline waters, changed its manners, became fat upon its new varieties of food, increased far, beyond its old companions left behind, in size and importance, and perhaps indolence. Even shape and color were modified and still—on authority—it continued a rainbow.

This, from several observations—we could accept—even while uninformed as to scientific fish lore. Fortunately for our peace of mind, it was later given out that the "acknowledged American authority" had changed in opinion and believed the rainbow and steelhead as always distinguishable, that the latter existed where the former was unknown, that the scales of the steelhead were smaller and the size of the head also much smaller—not to mention here several minor peculiarities. In a special report he admits he has "at different times held different opinions," but in a recent letter he says: "It is generally possible to distinguish between one species and the other, for which reason I believe that they are valid species." We appear certain now that there is no evolution from the rainbow to the steelhead. Even as is the case of bobolink, sweet singer of the fields of New York State, which in its southern flight becomes the reed-bird of the Virginias, and finally the lucious and much sought rice-bird of Louisiana. But of late has there been the opinion on the part of many fishers, if not scientists, that all the trout hereabouts are steelheads.

This we personally dissent from, for we feel we have landed many from several streams which have none of the steelhead characteristics. These, also, from two pounds downward being more delicate in taste and much lighter in color of flesh. To illustrate the strenuousness of opinion, it is almost impossible to remove the impression on the part of many that the large fish rising in the San Lorenzo at this time of the year are salmon. They know they are salmon regardless of all "book men" or other authority. We wonder how they reconcile the fact that no one on the bay is taking any salmon with hook or net, and that not a score, perhaps, have been taken during the past several months. How remarkable, then, that such a large number are running in the river. Again, this is not the time for salmon spawning. Then why should they now be in the streams when not at other times?

This is, however, the spawning time for the big steelheads, and why not believe that these they are. Finally we propose to note, for the benefit of the honest investigators—not experts—with whom we have threshed this subject, some impressions which come to us at this time. We do not concern in the words that all

The fishermen who tell the truth

Will find the sport is tame

And not all play, which shows that they
Don't understand the game.

First, then, we believe that most of the trout in the lower portion of our streams are steelheads, making their home in the salt water but coming into fresh waters to feed at various times and to deposit spawn in their season. We also think there are many rainbows higher up, and that they at times seek the sea, when out of condition or when infested with the scale-like parasites, with which we often see them partly covered. Possibly they "outgrow the climate," or require a "change," as many other Californians are prone to express it. Further than this, we have a notion that there are habits which make distinctions on the part of these trout. These notions may need confirmation. It appears to us that, from experience, the rainbows take a lure much quicker and more vigorously under ordinary conditions, but do not "put up" any better fight than the other variety when once upon the hook. Then again, they are apt to favor the fisher just before a rain and upon cloudy days, but not during a rain, all of which is just contrary to the habit of the steelhead, which strike well when rain is falling and like to feed with the sun brightly shining and not so very early in the day. Once more we have found the rainbow when not ignoring a bait entirely to strike smartly, while it is the common habit of

the steelhead to mouth the lure, suck it, taste it, then finally swallow or reject it, according to his notion or his wise decision. Here it is that delicacy of rod and sensitiveness in the handling of it tell the story of success or failure. We know there are men whose delicacy of perception is so keen that by manipulation of the slim bamboo and the permitting of nervous attention to, as it were, follow up and down the line, determine the instant when a trout has hold enough upon the lure to permit of a capturing strike, when really there had been no real bite, in the ordinary meaning of the word. This reminds me of some who, like a gentleman we met a few days since, said: "I have been here all summer and have fished and fished, but never caught a trout." Most of us have learned that simply to sit or stand at the fishing places, with a line and hook in the water does not furnish the table. There is not only skill with the rod and excellence of tackle and lure to consider, but the depth of the water; condition of the tide; certainty of location and a thousand other points to be studied before one can have a real satisfaction in his angling; but after all, angling is but the spice in the loaf. The outdoor life, the contemplation of things natural, the health-giving and life extending influence of sun and air and sky are the factors which really count.

There are many who feel this inspiration and who, although in rough garments, are at heart fishers of character and who are ever earnest in the petition for a pure heart and mind, that we may be able to read Thy wisdom and love, and feel Thee present in the beauty and order of Thy visible creation; we beseech Thee to hear us, Good Lord.

FISH LINES.

The Ocean Shore road, now operating along the coast line about eighteen miles south of San Francisco, has made easy of access to local salt-water fishermen a number of fishing resorts where quite a variety of ocean fish can be caught.

Much interest is felt in future development of striped bass fishing in this newly opened territory. The claim is made, and not without reason, that striped bass are in the waters along shore, and should afford, in consequence, much sport. Taken in comparison with eastern striped bass grounds along the Atlantic coast, the rocky south shore fishing territory seems to be ideal for the sport.

The run of salmon usually in evidence at this time of the year has not yet materialized in the waters of San Francisco Bay.

Recent reports from Monterey Bay state that numbers of salmon have been taken, as well as other varieties, particularly sea bass.

Sportsmen who count on a fishing vacation at a favorite resort on the Truckee River will be pleased to know that work is now progressing on the fish ladder at Derby.

This will enable the trout to get up to the spawning grounds. The importance of this fish ladder has been vigorously discussed by Reno anglers for some time, involving as it does the propagation of trout fishing, which is a sport that has made Nevada a haven of delight for anglers.

Bitter complaint is being made by local sportsmen, states the Reno Journal, of the manner in which the game law is being violated and the fish streams of the State abused by certain individuals residing in that city, who are catching fish out of season, and catching them by the wholesale.

The Truckee River, both east and west of Reno, but particularly in the vicinity of the Derby dam, is the scene of operations of these marauders, and their depredations are doing great harm to the trout supply.

Many of those thus guilty of such violation of the laws provided for the preservation of fish are well-known citizens of Reno, and if any one in authority would take interest to see that the practice were stopped, he would find no difficulty about securing a conviction. The majority of those who fish out of season are not satisfied with taking trout for their own personal use, but are selling large quantities of fish to whosoever wishes to buy.

A United States hatchery will be established on the Gallinas River near Las Vegas, New Mexico.

The Baird hatchery will have a stock of 2,500,000 fry for the waters of the McCloud this season.

Salt-water fishermen at Avalon are hailing with pleasure the early advent of several varieties of fishes which are usually caught there at a later date. Yellowtail, mackerel and barracuda are running freely, and sand dabs and groupers are being shipped in large quantities. It is reported that 2,800 pounds of long-fin tuna had been taken during the past week. Four bronze buttons and one gold button have been disposed of by the secretary of the Light Tackle Club.

Unusually long and heavy rods are employed in sea fishing at Biarritz, France. A salmon rod twenty feet long, or a roach pole of the same length is generally used, but the Biarritz anglers use rods over forty feet long. In fishing from the walk at the lighthouse the rods are balanced on the railing by means of a wood rest fitting the iron bars. A line about the length of the rod is used, along with three or four hooks and a sinker. Reels are known to these sea anglers, but are seldom used.

A fish hatchery will soon be established near Bonneville, Or., land having been recently leased for that purpose by Master Fish Warden H. G. Van Dusen.

Among the chief attractions of angling in Southern California are the great variety of fish to be caught, the large number of good fishing resorts adjacent to Los Angeles, and the fact that they are easy of access. The Los Angeles rod and reel men fish from Newport on the south to Port Los Angeles on the north, with an occasional excursion into Catalina waters. These resorts are from forty minutes to seventy minutes' ride from Los Angeles, so that there is little or no inconvenience in taking a day off for fishing. In some places there are two or three piers to fish from, while Alamitos, Anaheim, San Pedro and Newport bays afford fifteen much-frequented resorts for fishing in addition to the sport "outside" in blue water.

While summer is the best season, there is no month without its fishing, and hundreds among the "regulars" go fishing every week in the year. The money paid by the fishermen for fares forms a desirable addition to the revenues of the electric railroads. The first cars out to the water-front towns in the morning on Saturday and Sunday carry anglers chiefly. There are in Southern California several thousand men and boys, and a large number of women, who go fishing as often as opportunity offers, besides the casual anglers.

The fascination of fishing is not altogether in the catching of fish. The bracing air, the companionship of good fellows, the merry quip and jest, the amusing incidents, to say nothing of "great expectations," combine to make the Waltonian art pursued and beloved of men.

The sportsmen of Roswell, N. M., are determined that the fish and game laws must be rigorously enforced in the valley of the Pecos, and that shyster fishermen and hunters shall be abolished.

The Roswell Rod and Gun Club offers a standing reward of \$20 for information convicting or leading to the conviction of any one violating these laws. A special reward of \$50 is advertised where dynamite or other explosives are used on fish.

It is unlawful to shoot quail except between November 1 and January 1, or to take bass at any time except with hook and line, and they shall not be taken under any circumstances at any time between October 15 and May 15.

A recent letter to the Sacramento Bee gives an account of illegal fishing near Rio Vista. The "gang" that operates in that district is a hard one to keep in check. Despite the efforts of the State and Sacramento county authorities, the violators of the fish laws seem determined to keep up their depredations.

"Illegal fishing has not been stopped in this section. For the past two weeks a fleet of boats and launches have been at work in the waters of the sloughs north of here and also at the several breaks in the Egbert levees.

"On Monday last it was reported that the catch for the day was seventy boxes. This means about 14,000 pounds, or seven tons of fish taken out of the waters in one day. Most of these fish are bass and many are under the limit allowed by law and the nets used are also of smaller mesh than the law allows. Most of the outfit now at work are boats from Black Diamond, and the catch is daily taken to that point, where it is disposed of.

"The fishermen also use what is termed 'diver' nets. These nets are arranged so that the bottom weights or leads more than balance the weight of the floats, and thus keeps the net stretched, but completely under the water, and a patrol boat would have to have a sharp lookout to discover one. Small meshed nets are also stretched from bank to bank and allowed to sink below the surface, so they cannot be detected.

About two weeks have now elapsed since the work began, and this means at least fifty to seventy-five tons of fish taken from the river in this section."

George Reynolds of Los Angeles is preaching in season and out of season the gospel of protection of sardines, declaring that if the present rate of seining continues it will not be five years before the game fish, yellowtail, bonita, salmon, etc., which feed on the small fish will practically have disappeared. He says that a few years ago it was a dull day off the coast of Newport when from one to twenty schools of sardines could not be seen. Now, days and often weeks go by without the appearance of a school, and the large game fish are correspondingly scarce.

The San Pedro cannery fishing boats are held chiefly responsible. Reynolds declares that if the cannery is to be removed to San Diego, as rumored, it is because the waters from Newport to Santa Monica and to Catalina have practically been "seined out," so far as the sardines are concerned, and that

it will not be long ere conditions are equally as bad in San Diego waters.

Professor Charles F. Holder and other prominent authorities take the same ground and have for years lifted up their voices in solemn warning, but nothing has been done.

The more intelligent and reasoning among the market fishermen recognize the truth of these statements and are beginning to see that the wholesale slaughter, with no protection whatever, is fast cutting them off from their means of livelihood. The campaign of education is all right, but something must be done.

The foregoing can be applied to other waters also, Monterey Bay, for instance. If the food of the fish is cleaned out it will be a case of no sardines, no salmon.

C. E. Hemstreet, a Newport fisherman, has preserved a strange type of fish caught near Newport Bay. For want of a better name he has classified it as a grass fish. It is over five feet in length, and about twice the thickness of a stalk of wheat. The resemblance to a blade of grass is made more pronounced by a series of short circular fins surrounding the body at intervals.

Summerland, as the southern coast is designated, seems destined to become as widely known because of its pompano fishing as for its submarine wells. For several weeks past the market for this salt-water fish has been wholly supplied from the kelp fields opposite Ventura. It was for years believed that this species of fish visited these waters at certain seasons and for short periods, but by a fortunate catch by Fred Olds while angling for bass, it has been practically demonstrated that the pompano is a constant habitue of the kelp fields, and the catching of this beautiful and tasteful denison of the deep promises to develop into a more or less profitable industry as well as sport.

AMERICAN KENNEL CLUB NOTES.

The annual meeting of the American Kennel Club was held at the offices of the club, No. 55 Liberty street, New York city, on Thursday, February 13, 1908, Vice-President H. H. Hunnewell presiding.

Present: Associate delegates, W. G. Rockefeller, Dwight Moore, B. S. Smith, W. J. Berg; American Dachshund Club, G. Müss-Arnolt; American Fox Terrier Club, H. H. Hunnewell; Bay State Co-operative Bench Show Association, Horace A. Belcher; Cedarhurst Kennel Club, John G. Bates; Champlain Kennel Club, Abram D. Gillette; Chester Kennel Club, S. Crozer Robinson; Irish Setter Club, Lawrence M. D. McGuire; Keystone Beagle Club, Thomas Cadwalader, Lynn Kennel Club, E. L. Jones; New England Beagle Club, Chetwood Smith; New England Collie Club, Tom B. Middlebrooke; Rochester Kennel Club, C. H. Malleson; Rockland County Industrial Association, Monson Morris; Russian Wolfhound Club, Dr. J. E. De Mund; San Francisco Kennel Club, R. P. Keasbey; San Mateo Kennel Club, Howard Willets; Scottish Terrier Club of America, George Lauder Jr.; Seattle Dog Fanciers' Association, Clarence Sackett; Spaniel Breeders' Society, Marcel A. Viti; Welsh Terrier Club of America, Franklin B. Lord Jr.; Westchester Kennel Club, George Greer.

On motion of Mr. Rockefeller, seconded by Mr. McGuire, the following motion was carried: "In view of the fact that the committee of thirty is unable to make any report at present, I think it would be well that present conditions should not be changed. The directors are going to have a meeting to take care of certain routine business, and I would therefore like to move that this meeting adjourn subject to the call of the chair."

The directors' meeting of the American Kennel Club, Incorporated, was held at the offices of the club, No. 55 Liberty street, New York city, on Thursday, February 13, 1908, Vice-President H. H. Hunnewell presiding.

Present: Hollis H. Hunnewell, Marcel A. Viti, Hildreth K. Bloodgood, James W. Appleton, William G. Rockefeller, G. Müss-Arnolt, Monson Morris, Dwight Moore, Rowland P. Keasbey, Abram D. Gillette, Joseph M. Dale, Winthrop Rutherford, Singleton Van Schaick, B. S. Smith, Chetwood Smith, William C. Codman, Howard Willets, John G. Bates.

The Toledo Kennel Club has been dropped from A. K. C. membership at the club's own request, although in good standing.

The Rockland County Industrial Association, also in good standing, has resigned from the A. K. C. Mr. J. B. Thomas is no longer a delegate of the Dalmatian Club of America.

The Treasurer's report shows a balance on hand of \$20,106.49.

The Chesapeake Kennel Club, Farmingham District Kennel Club, Massachusetts Kennel Club, Taunton Kennel Club, Methuen Kennel Club, Southern Ohio Kennel Club and Valley Fair Kennel Club were reported in arrears.

The Western Beagle Club, Fairfield County Kennel Club, Simsbury Kennel Club and Bloodhound Club of America were reported admitted to membership.

Proceedings of the Pacific Advisory Committee were submitted as follows:

Regular meeting, 1296 McAllister street, San Francisco, February 1, 1908.

Present: H. H. Carlton, Dr. W. P. Burnham, W. W. Stettheimer, J. P. Norman.

On motion Dr. Burnham took the chair.

It was moved and seconded that the regular order of business be suspended and that the case of Nieborger vs. the California Cocker Club be taken up. Carried.

Nieborger vs. California Cocker Club: The appellant, George A. Nieborger, protests against the action of the California Cocker Club in expelling him from membership in said club without giving him an opportunity to be heard in his own defense.

The respondent filed the defense that said action did not affect appellant's status with the American Kennel Club, inasmuch as appellant had been dropped from membership for the reason that the members of the club found him inharmonious and uncongential.

The defendant further pleaded that, inasmuch as said action did not affect appellant's good standing with the American Kennel Club and was taken in the interest of the California Cocker Club and was a purely domestic affair, the expulsion of appellant was a matter over which the A. K. C. had no jurisdiction.

It was moved and seconded that defendant's demurrer be sustained on the ground of lack of jurisdiction and that appellant's deposit be returned to him. Carried.

The minutes of the last meeting were read and approved. The secretary read the following report, as per copy hereto attached and made part of these minutes. It was moved and seconded that the committee do now go into executive session and that the attendance of the secretary be dispensed with during the consideration of his report, Mr. Stettheimer acting as secretary during said session. Carried.

It was moved and seconded that the findings of the executive session be transmitted direct to the Executive Committee without the intervention of the secretary of the committee. Carried.

It was moved and seconded that the report of the secretary be accepted, made part of the minutes of this meeting and filed. Carried.

The Menlo Park Kennel Club filed application for membership in the American Kennel Club. It was moved and seconded that the applicant club be and hereby is elected to membership. Carried.

The Pacific Boston Terrier Club filed application for membership in the American Kennel Club. It was moved and seconded that the applicant club be and hereby is elected to membership. Carried.

Hansing vs. Laurin: Charges of fraud and misconduct.

The appellant, F. L. Hansing of Salt Lake City, charges that Joseph A. Laurin of Montreal sold to Mr. Harkness et al. an Airedale bitch said to be in whelp, and that said bitch when due to whelp came in season. By authority of the defendant the bitch was returned to him and another sent out. This bitch was represented to have been bred to her grandsire, but it is claimed did not whelp.

Appellant charges fraud and misconduct by reason of first bitch not having been in whelp and not conforming to specifications in advertisement. The same charges are preferred in connection with the second bitch, which had been bred to her grandsire, and claim was made that said breeding was unsuitable.

Defendant filed the defense that neither bitch was guaranteed to be in whelp, that he had used all diligence to be sure of the breeding of both bitches, that he had been unable to secure the exact date of birth of the second bitch, but was sure she was not more than three years old, that he had paid out of his own pocket the express charges on the return of the first bitch, and that he was not guilty of fraud, misconduct or misrepresentation. It was moved and seconded that, whereas the vendor had not guaranteed either bitch sold to appellant or partners to be in whelp, and that the allegation of said bitches having been bred had not been disproved, and whereas it appeared that defendant had made a required effort to satisfy the purchasers of the bitches in question: Therefore, be it Resolved, That the charges preferred against Joseph A. Laurin be and hereby are dismissed. Carried.

The secretary presented the resignation of the Spokane Kennel Club from membership in the American Kennel Club. On the affirmation by the secretary of the good standing of said club at the time of resigning it was moved and seconded that the resignation be accepted. Carried.

In the matter of the article appearing in Field and Fancy of November 2, 1907, the secretary read a letter dated January 2, File 2, addressed to Charles R. Thornburn, secretary of the Western Bull Terrier Breeders' Association, requesting Mr. Thornburn to furnish a written statement that would assist the committee in the investigation of said article, Mr. Thornburn having volunteered to furnish such statement in his letter of November 30. The secretary reported that he had received no reply from Mr. Thornburn.

It was moved and seconded that the Secretary of this committee be and hereby is instructed to mail to Mr. C. R. Thornburn, under registered cover, a copy of his letter of January 2, with request for immediate reply.

There being no further business, the meeting adjourned.

Attest: J. P. NORMAN, Secretary.

Secretary of Advisory Committee's Report.

San Francisco, Cal., Feb. 1, 1908.

Members of the Pacific Advisory Committee, A. K. C.

Gentlemen: I beg herewith to submit my report of the business transacted during the past year and my recommendation in connection therewith:

Paid registrations passing through office...	\$662.00
Unpaid registrations passing through office,	—
14	—
Fines collected and bills made in duplicate,	—
12	32.00
Associate dues, 8	40.00
Subscriptions to Gazette, 10	20.00
Single orders to Gazette, 6	1.20
Kennel names, 20	60.00
Kennel names transferred (4 paid), 6	4.00
Certified pedigrees and lists of winnings, 218	109.00
Listings (15 shows), 1,842	460.50
Club dues (2 delinquent), 26	280.00
Licenses issued, 4	40.00
Purchases of stud books	57.00

Income transmitted to A. K. C.	\$1,765.70
Deposits transmitted to A. K. C., 18	430.00

Total amounts transmitted	\$2,215.70
Deposits returned to A. K. C. and paid to clubs, 15	375.00

Net amount paid to A. K. C.	\$1,840.70
----------------------------------	------------

Clubs in good standing in the jurisdiction of the committee	22
Letters written by the secretary	896
Letters received by the secretary	1,273

In addition to the foregoing many calls by telephone were answered and requests for information complied with.

Quite a number of callers were received at the residence of your secretary, such calls being made mainly for the purpose of inspecting the Stud Books or in reference to protests or registrations.

The above is exclusive of requests for blanks and forms.

It is obvious that the amount of work barely outlined above and the inconvenience of having to transact kennel business at his private residence, and sometimes even at his place of business, must work hardship on your secretary, whose time, labor and entire leisure time are given over to the prosecution of the work of the American Kennel Club without compensation. But your secretary must absolutely decline to allow the business of the American Kennel Club to encroach on the time claimed by his daily avocations.

I recommend, therefore, that another secretary be elected who can give the necessary time, labor and location to the A. K. C. business without injury to his other claims, or that an office be provided for the transaction of such business, with provision also for a competent assistant to take care thereof.

Respectfully submitted,

J. P. NORMAN, Secretary,
Pacific Advisory Committee, A. K. C.

The special minutes of the Pacific Advisory Committee were then read, as follows:

San Francisco, Cal., Feb. 1, 1908.

A. P. Vredenburg, Secretary Executive Board, American Kennel Club, No. 55 Liberty street, New York city—

Dear Sir: At the regular meeting of the Pacific Advisory Committee, held on February 1, 1908, our secretary, Mr. J. P. Norman, submitted the attached report, which after being read was ordered spread upon the minutes. On motion duly made and seconded the advisory board excused Mr. Norman from entering into a deliberation on his recommendation and retired into executive session.

After careful investigation of the report the undersigned members of the Pacific advisory committee respectfully submit the following recommendation for your approval and early action:

Whereas, Mr. J. P. Norman has acted as Secretary of the Pacific Advisory Committee without compensation for the past nine years and has faithfully performed all duties connected therewith; and

Whereas, Owing to the enormous growth of interest in matters connected with American Kennel Club affairs in the territory of the Pacific Advisory Committee, the Secretary's duties, originally few, have become so manifold and arduous that it is no longer within the province of Mr. J. P. Norman to devote the requisite amount of time to the execution of same without compensation, Be it

Resolved, That the Pacific Advisory Committee recommend to the Executive Board of the American Kennel Club to make the following appropriation for the proper maintenance of a secretary and an office of the American Kennel Club in the city of San Francisco under the jurisdiction of the Pacific Advisory Committee, to wit:

Secretary's annual compensation	\$1,500
Office rent, annually, including heat, light, water	300
Stationery, postage, typewriter service extra; and be it further	—

Resolved, That the Pacific Advisory Committee recommend to the Executive Board of the American Kennel Club to tender this position of secretary to Mr. J. N. Norman, whose tireless efforts in the past have been almost entirely responsible for the successful growth of affairs of the American Kennel Club on the Pacific Coast. Respectfully submitted,

WM. P. BURNHAM,
H. H. CARLTON,
WALTER W. STETTMEIER.

meeting. This recommendation meets with my hearty approval. CHAS. K. HARLEY.

Mr. Gillette: I move that they be referred to the Finance Committee. Motion seconded.

Mr. Rockefeller: I think rather than referring them to the Finance Committee it would be better to refer them to the Special Committee of Thirty. There are a number of questions that have got to be taken up. The club last year practically made what money it did show as a surplus from the interest it received from savings banks. The Stud Books are a direct loss to the club.

They cost in the neighborhood of \$6 apiece and we give them away with a subscription. My own opinion is that we should not refer this to the Finance Committee, but send it to the Committee of Thirty. I offer that as an amendment to the motion. Mr. Gillette: I accept the amendment. Mr. Moore: I second the amendment. Motion as amended carried.

DOINGS IN DOGDOM.

The premium lists for Oakland show will be out early. Among the specials will be two cups from the Collie Club of America and several trophies from other eastern fanciers and business firms.

The recent visit of the Messrs. Ellery at several eastern shows will materially help coast fanciers and shows.

E. M. Oldham and T. P. McConnell (Setters) as judges will draw a large entry at Idora Park. Arrangements will possibly be made for local exhibitors to take their dogs over the Key route, which will take them within two blocks of the park. Accommodations at the park for master and dog will be complete in every particular.

It is reliably reported that Mr. P. H. Bryson will judge Setters at the 'Frisco show, Charles Lyndon all other breeds, this being a slight change in the original program. It is needless here to extol Mr. Bryson nor repeat the oft told influence he has exerted for his particular fancy. Suffice it to say that as judge of the Setter he is the equal of any and possibly the peer of all experts in the breed.

The Pacific Collie Club was recently organized at Los Angeles with the following fanciers as organizers: B. McDonald of Glendale, W. J. Morris, G. Nicoll and M. Stewart of Los Angeles, E. Varian of Pasadena.

Santa Rosa, so it is reported, will swing into line at last for a one-day show in June.

Fresno Kennel Club has been re-organized and will endeavor to have dates between Oakland and San Francisco shows. Fred P. Butler for Pointers and Setters, Ed Attridge for Bull Terriers and Yorkshires, and Irving C. Ackerman for all other breeds, will probably be the judges.

The officers of the club are: Homer C. Katze, president; E. J. Boust, vice-president; O. F. Lundelius, secretary; W. N. Thorpe, treasurer; C. Lusk Paddock, A. B. Long, J. W. Evans, C. Saxe, W. P. Lyon, L. L. Gray, C. S. Hill, directors; J. Zapp, O. J. Woodward, C. R. Puckhaber, Mrs. W. L. Parkhurst Fowler, J. Suglian, W. H. Ryan, W. E. Dunn, bench show committee; Dr. O. A. Longley, veterinarian.

Napa is spoken of for a May date with George Cranfield in charge of a one-day show.

Valverde Kennels made a grand showing in the East.

At New York the wins were: Valverde Faultless, first winners open and limit and the Van Schaick \$300 cup for best Collie shown. V. Faultless and Southport Student won the cup for the best brace. Southport Blue Sky (now owned by V. Kennels) won the cup for best blue merle shown. Ch. Southport Student third in open and limit. V. Royal Guard vhc in open. Ch. Anfield Model and Ch. Wishaw Leader won first and second (in order given) for the best Collie stud dogs. Two Collies were picked from Mr. Pierpont Morgan's and two from Mr. Samuel Untermyer's kennels—first going to the Morgan brace.

At the Collie show in Johnstown, Pa., Ch. Southport Student won first winners and open dogs. V. Faultless, first winners and open and a \$300 trophy. S. Sky Blue won winners and cup for best blue merle. Valverde Kennels had the proud distinction of making nine cup wins at this show, the premier annual exhibit of Collies in the United States.

John Sparrow sold the Bull Terrier bitch Silkwood Mona (in whelp to Silkwood Chader Wild) to John Kelly of Honolulu. Mona is a sister of S. Ben Ali. His Ch. Edgewood Jean whelped on February 5th five puppies to S. Chader Wild.

"Dogcraft" is a new book that covers doggy subjects in an interesting style and concise form. Sporting breeds are treated most intelligently and exhaustively. The chapters on training and care of bird dogs are an important addition to literature on these themes. The matters pertaining to breeding, diseases of dogs and their treatment, will commend this book highly not only to breeders and fanciers but to all lovers of the dog. In fact, the work as a whole, taking comprehensively all doggy subjects, we heartily recommend to our readers as being a

most desirable and useful addition to doggy book lore and a compilation that no "dog man" can do without. The whole work comprises 308 pages, 12mo., is handsomely illustrated and bound either in cloth or paper, at \$1.50 and \$1.00 per copy, and can be had by addressing Mr. A. F. Hochwalt, the author and well-known writer on kennel and field trial matters, at 15-27 W. Sixth Street, Cincinnati, Ohio.

AT THE TRAPS.

From now on until the end of September the blue rock and live bird schedule for the Ingleside grounds calls for a seance at the traps every Sunday, with several contemplated holiday shoots and an affair or two of more pretentious dimensions to fill up odd times.

This means that the local sportsmen will have plenty of trap shooting this year. In the club and League shoots there are a number of valuable trophies, prizes and medals to be shot for, as well as substantial club purses. The programs are arranged on liberal lines for the amateur, novice and ordinary skilled shooters. The experts are pitted against each other. We look, consequently, for some great scores during 1908 at the famous old Ingleside grounds.

The California Wing Club shoot at Ingleside on the 1st inst. was a most conspicuous opening of the live bird season. Twenty-six guns, among them several new shooters, were in the going. The birds furnished were of a desirable kind and weather conditions were pleasant in the forenoon; the afternoon was of rather an Arctic temperature.

Five straights in the forenoon match were shot by Iverson, Webb, Murphy, McRae and Walsh. Feudner and Nauman each dropped a bird outside the fence.

In the afternoon race eight guns accounted for straights. Feudner and Schultz used both barrels on every bird. Pete McRae and Tony Prior did some excellent one-barrel work. Frank Turner had hard luck, his second bird dropping, well loaded with shot, outside the boundary. Turner killed ten birds with one barrel.

Pete McRae and Arty Webb scored straight in both events. They were the only straights in the first match that grassed clean in the second. Iverson missed his last bird. Pete Walsh lost two and "One Barrel Pete" Murphy connected with nine only. This was "O. B. P.'s" first appearance at the Ingleside traps in several years. He is now a prosperous business man in the "chicken metropolis," having made his headquarters in Petaluma for some time back.

Medal shoot, 12 pigeons, distance handicap, \$50 added, high guns, 4 moneyers—

The Union Gun Club will hold the initial club shoot at Ingleside on the 8th inst. The club shoots will come off on the second Sunday of each month, closing September 13th.

The season's schedule calls for four events each shoot—Du Pont trophy, 25 targets, distance handicaps, 14 to 23 yards. High score for the season to win. Club race, members only, 25 targets, 4 classes, Rose system 5-3-2. Medal match, members only, 25 targets, four classes, medal for each class. Most individual wins in season to count. Winners handicapped 2 yards up to 20 yards. Club added money race, 20 targets (5 pairs, 10 singles), class shooting, three moneyers.

All shooters are invited to participate, targets 2 cents. Gold bars for 25 straight and silver bars for 15 straight will be awarded any shooter taking part in club shoots.

The Union Gun Club officers for 1908 are: Dan Daniels, president; T. L. Lewis, secretary-treasurer. A \$35 purse will be divided among the members who attend every club shoot this season. Scores will not count in the division; personal participation is the winning item.

The Golden Gate Gun Club will hold regular club shoots at Ingleside on the third Sunday of each month, commencing March 15th and ending October 11th. The club program for each shoot is arranged for a 100-bird race (in sections of 25), \$100 added, four classes—champion, first, second and third. A 25-target trophy event and a trophy shoot at doubles, 10 pairs, distance handicaps 14 to 20 yards.

The club officers for 1908 are: Tony Prior, president; C. C. Nauman vice-president; Edgar Foster, secretary-treasurer.

The Blue Rock Club of Alameda held the opening club shoot at the High Street grounds last Sunday. Regular monthly shoots will take place for a season of six months. The attendance on the 1st instant was extra good. The club members are exceedingly sensitive to the publication of names and scores of shooters who are so morally dormant as to break blue rocks and the Sabbath day at the same time.

The Empire Gun Club officers for the current year are: W. W. Van Arsdale, president; Floyd S. Judah, vice-president; J. B. Hauer, secretary-treasurer; W. O. Cullen, captain; Dr. A. J. Sylvester, lieutenant; C. A. Bennett, sergeant-at-arms.

Regular club shoots will be held at the Alameda Point grounds the second Sunday of each month from March 8th to July 12th, inclusive. Cash and prizes to the value of \$150 will be put up by the club. The regular program calls for four events each shoot, viz.: Club championship race, 25 targets—\$50 purse for four high scores of the season. Gold prizes to the two highest averages during the five club shoots. Money match, 25 targets (15 singles, 5 doubles), monthly purse of \$15 and gold trophies to two high scores. Special handicap race, open to all, 20 targets (10 singles, 5 doubles), distance handicaps, gun held below the elbow at command of "pull;" \$20 purse, divided between three high guns for the season. Third high gun receives 40 per cent and fourth high gun 60 per cent of pool. Sweeney record medal, distance handicap, continuous break, starting from 16 yards, back each 5 breaks two yards up to 20-yard peg, then doubles, backed two yards for each 5 doubles until a miss. Second and third high guns 60 and 40 per cent of the pool. This race is a corking good trial for any one, experts not excepted.

The morning shoots are for members only, the two afternoon races open to all. All shooters are invited to participate in every event, however, side pools open and targets 2 cents each.

At the recent shoot of the Folsom Gun Club the high score in the club race was made by O. E. Ferguson, 24 out of 25. This being his third high gun performance he won a club medal for his good shooting.

The National City Gun Club held a shoot February 22d. A merchandise shoot and six money matches was the card. The club has a membership of twenty-five shooters. A number of the San Diego experts were present at the smokeless convention.

Under the auspices of the Coronado Country Club a three-day blue rock tournament will take place on the club trap grounds March 26, 27 and 28.

The program will embrace ten events each day. Special trophy events will be inducing enough to guarantee a large attendance—one event will be the Country Club championship shoot for a valuable trophy.

Conditions at Coronado—weather, light and grounds are most favorable for a thorough realization of all the enjoyment there is in the sport.

This tourney will probably invite the presence of some of the Eastern cracks.

The Mt. Pleasant Gun Club has filed a certified copy of its articles of incorporation in the office of the Secretary of State of Utah. The club is organized at Mt. Pleasant, and is an assessment affair. The officers are as follows: J. C. Barton, president; Henry McKenna, vice-president; Thomas Braby, secretary; S. P. Sorenson, treasurer.

The Capital City Blue Book Rock Club will open the Sacramento trap season with a big shoot at which Marysville, Chico, Grass Valley, Gridly and other valley points will be represented by powder burning enthusiasts.

THE FARM

THE PURE BRED DAIRY COW AND THE GRADE.

[M. B. Stevens.]

Is the pure bred cow, for whatever purpose desired—milk production, butter fact production or a combination of these and the ability to produce a good calf—better than a grade cow, all things considered? Is there a pure bred cow for every purpose the farmer or dairyman may wish?

"A dairyman can hardly be advised to buy at once a full stock of pure bred cattle if his sole object and dependence for profit is to be the dairy product of the herd. For," continues the U. S. bulletin in The Dairy Herd, "such a venture would necessitate large investment and should include the breeding of registered animals for sale at remunerative prices as a part of the business." Here in California we have a class of dairies about cities where there is no effort made to raise stock of their own breeding, but as soon as a cow wears out they buy another for her place and never breed only in order to bring about an other lactation period in the cow, and the calf goes to the butcher. These dairies are the exception, as there are only a few about each large city, and it would hardly be advisable for them to pay big prices for pure bred cows; but the thousands of dairies throughout our State where the cows are raised and bred by the owner, they can afford to raise nothing but the pure bred.

There is today a pure bred cow for whatever production the dairyman may desire. If it be for butter, then there are the Jersey, the Guernsey and the Holstein breeds. For generation after generation they have been selected for that purpose and a record kept of each animal. When a man buys a registered animal of any breed he can trace back its ancestors and find out what kind of producers they were, and if the individual and its ancestors are all right he can expect, with certainty, to get more good animals by breeding. The Jersey or Guernsey that does not give milk testing from 4.5 to 6 per cent is an exception, so highly is this trait of fat producing bred into them. If a man cannot afford to buy pure bred cows he can buy a pure bred bull from a good family and then breed his best grade cows to him and gradually produce cows that are practically pure bred. But this stock could not be registered and sold as pure breeds, and therefore one source of profits would be cut off, viz., the selling of the best bulls at good prices for breeders. After stock is graded up to a certain point it is then better to buy in a pure bred heifer or cow and build up a pure bred herd gradually. A comparison might be given between the Jersey cow and a common grade cow to show cost of keeping each for a year and the production of each in butter fat. At the Connecticut Experiment Station, in which such an experiment was tried, it was found that it cost \$54.82 on the average apiece to keep several Jerseys and on the same feed \$53.25 apiece to keep common cows. The Jerseys produced 306.5 pounds of butter apiece on the average, while the grades produced 269.2 pounds. It cost \$1.57 more to keep the Jersey, but she gave 37.3 pounds more of butter fat. This is not particularly a good comparison, as it is not uncommon for Jerseys to produce over 400 pounds of butter fat in one period of milking, while the grades that produce 269 pounds of butter fat in one stretch are scarce.

For the class of dairymen who want quantity of milk, not very rich, as for a retail milk trade the breeds of Holsteins, Dutch Belted or Ayrshires are to be recommended. A Holstein cow at the Michigan Agricultural College—Homotje D.—gave 16,753 pounds of milk in twelve successive months, an average of 46 pounds per day. And there are cows with even greater records. At one of the largest grade dairies in the State, where 360 cows are milked, the average production of

milk per day, per cow, is about 13 pounds. The cows have a mixture of blood in them but are considered good grades. They are fed a liberal ration of grain and hay and green stuff in season. There are occasionally good milking grades that are very profitable cows, but they are not in the same class with breeds that have been selected and bred especially for milk production.

There are farmers that do not want a cow like the Jersey, that produces lots of butter fat, but whose calf is of little value for veal or a future beef animal. Nor do they want the milk producing type, with a little better veal calf than the Jersey, but still one that does not make a beef animal. For these farmers there are still other pure breeds that answer the purpose exactly. He wants a cow that will eat lots of cheap, rough feed, produce a good calf that will bring the best price for veal or will develop into a good beef animal. He also wants milk and butter. He wants a so-called dual purpose animal, one that combines milk and butter with beef qualities. In this class of cattle may be mentioned the Shorthorn Polled Durham, Devon, Red Polled and the Brown Swiss. The largest of these breeds are the Shorthorn and the Polled Durham. "A Shorthorn cow at the Wisconsin Experiment Station made 215 pounds of butter, second year 364.5 pounds, and the third year 423 pounds. This is one side of the story. Her calf, twenty-seven months old, was slaughtered at the International Stock Show last fall and weighed 1,540 pounds. He was sold for \$108.20. This is not an isolated case. It is easily possible to develop in time a dairy herd of Shorthorns that will produce over 300 pounds of butter per year. These cows will produce calves raised by hand and fed on a well-balanced ration which at two and a half years old will weigh 1,400 pounds and bring pretty close to the top market price."

In answer to the two questions at the head of this article, we think there is a pure bred dairy cow that is better than any grade for whatever purpose desired—milk or butter production or the combination, and a good beef producing animal. There are times when it is not best to stock up with an expensive pure bred herd, but in the majority of cases it is unwise for a farmer or dairyman to continue the use of grades when there is more money in a pure bred for whatever purpose he may want.

STUDYING THE DIVINING ROD.

Louis Probst, a French scientist, stationed at Oloron Ste. Marie, in the Pyrenees, thinks there is something in the divining rod. His theory is that it does not point to water or a precious metal, but that its action is controlled by any change in the density of the earth's crust over which the rod is carried.

Thus he believes it would make the usual response if it were carried across the line of a subterranean watercourse which had run dry just the same as if water were flowing in it, and it would respond to deposits of oil or natural gas just as readily as to water, ore or precious metal or coal. He thinks that an important change in the earth's density such as is caused by a subterranean river may be detected in passing over it in a carriage or even a railway train. If a subterranean watercourse crosses the line of the hidden one it may be traced with the rod by a person operating it in a boat on the surface stream.

The fact that divining rod experts can operate successfully when the ground is covered with snow effectually disposes of the theory that they are guided by surface indications. It would be possible for them, he thinks, to find a package of bank bills buried in a plowed field just as easily as if their value in gold were there. For, in reality it would be neither the paper bills nor the gold that would attract the rod, but the place where they were hidden, the place where the homogeneity of the soil was disturbed. He further holds that it is not during the time when it is over a spring or a vein of ore that the rod is disturbed, but at the moment when it passes from ordinary ground to the site of

the hidden pocket or from that site back to ordinary ground.

He considers that the phenomenon is one of magnetism. The earth attracts the rod differently according to the hidden features of its structure. If the operator wears rubber shoes or if he grasps the rod with rubber or silk or other nonconducting gloves nothing will happen. A magnetized rod, on the other hand, will give far more positive results than a plain rod. He has, he says, authenticated this by giving the two alternately to a blindfolded operator. Though he never knew which rod he had, the magnetized one always showed far greater activity.

Really, however, it is indifferent what material is used. Operators

usually prefer a hazel twig, but M. Probst thinks whalebone or malacca better; but best of all is a thin rod of steel about an eighth of an inch in thickness with the ends wrapped in fine copper wire.—New York Sun.

When well cared for, ewes can raise twin lambs without losing any more flesh than when nursing a single lamb, and under such conditions twin lambs nursing one mother gain as rapidly as when there is but one lamb nursing.

FILES CURED IN 6 TO 14 DAYS.

Write for testimonials showing what the most prominent horsemen say of it. Price, \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use.

The Accepted Standard VETERINARY REMEDY

Always Reliable. Sure in Results.

None genuine without the signature of The Lawrence-Williams Co. Sole Importers & Proprietors for the U.S. & CANADA, CLEVELAND, O.

NOTHING BUT GOOD RESULTS.

Have used GOMBALT'S CAUSTIC BALSAM for more than 20 years. It is the best blister I have ever tried. I have used it in hundreds of cases with best results. It is perfectly safe for the most inexperienced person to use. This is the largest breeding establishment of trotting horses in the world, and use your blister often.—W. H. RAYBOND, Prop., Belmont Park Stock Farm, Belmont Park, N.Y.

USED 10 YEARS SUCCESSFULLY.

I have used GOMBALT'S CAUSTIC BALSAM for ten years; have been very successful in curing curb, ringbone, capped hock and knee, bad ankles, rheumatism, and almost every cause of lameness in horses. Have a stable of forty head, mostly track and speedway horses, and certainly can recommend it.—C. C. CRABER, Training Stable, 390 Jennings Street, New York City.

Steel Safe Deposit Boxes for Rent

In vaults that successfully withstood the fire of April, 1906. Trunks, Silverware and Packages Containing Valuables taken on storage in fire and burglar proof steel vaults.

The breeds of dairy stock are growing more nearly alike in their products instead of wider apart. The breeders of the cows giving high per cent milk are now working to increase the quantity while the breeders of the thinner milk type are breeding to build up the butter fat content. How well this has been done in late years we see in the record of a cow like Colantha 4th's Johanna. In ten months this cow produced 23,981.4 pounds of milk, containing 875.7 pounds of butter fat. She is now after ten months giving sixty-five pounds of milk testing four per cent or over of butter fat. How is it made possible for one animal to exceed all others around her? Constitution in the cow and brain in the owner.

STALLION FOR SALE.

Black Hawk and Morgan stock. Good roadster, not afraid of automobiles, cars, etc., Address

R. C. AUSTIN,
Monterey, Cal.

FUTURITY NOMINATIONS WANTED.

Several nominations wanted in Pacific Breeders' Futurity Stake No. 7 for foals of 1907. Any one whose entry has made last payment and whose mare failed to have a foal or the foal or mare is dead, can sell his nomination or substitute another colt. The amount paid for entrance will be returned to the nominator whose nomination is sold. Apply to F. W. KELLEY, 363 Pacific Building, San Francisco, Cal.

SPEED WAGON FOR SALE.

A very fine new McMurray speed wagon; regulation weight, 71 pounds; one of the finest made; has never been used to exceed 25 miles. Will be sold for one-third of what it cost. A rare chance for a great bargain. Apply to or address BREEDER and SPORTSMAN, 363 Pacific Building, San Francisco, Cal.

ELECTIONEER STALLION FOR SALE.

Nazon 2:28½ by Nazote 33527 (own brother to Azote 2:04½) by Whips 13407 by Electioneer 125, dam Aria (3) 2:16½ (dam of Adaria 2:17½ and Admiral Togo (2) 2:29½) by Bernal 13468, by Electioneer. Aria's dam is Ashby (dam of two in the list), by Gen. Benton, etc.

Nazon is a handsome seal brown stallion, stands 16 hands high and weighs 1,200 pounds; foaled in 1901, and is a fine individual and exceptionally well bred. For further particulars or to see the horse apply to SYDNEY LEWIS, 425 Shotwell St., San Francisco, Cal.

TWO PACING STALLION COLTS
WANTED.

A yearling or two-year-old by Star Pointer and one by Zombro. Must be good color, natural paces, standard bred and registered, or eligible to registration. Bay or brown, little or no white, of good size, neat heads, not too high on leg, standing and traveling square on their feet. Must have plenty of knee and hock action. Must be absolutely sound and out of good mares. Address giving price, pedigree and full particulars as to speed, if worked, etc., F. W. KELLEY, Breeder and Sportsman, 366 Pacific Building, San Francisco.

MARE FOR SALE.

Brown mare, five years old, absolutely sound, afraid of nothing, and can be driven by a child. This mare is but 14 hands high, but is elegantly formed and handsome in harness. She is a pacer and can show better than a 2:20 gait at any time. Will be sold very reasonable. Apply to BREEDER and SPORTSMAN, Room 366, Pacific Building, corner Fourth and Market Streets.

FOR SALE.

Star Medium by Dictatus Medium, dam Diva (dam of Helen Keyes 2:05), by Piedmont. He is a fine looking colt and has great promise for speed. He is entered in Futurity Stake No. 5, to take place this fall. He will be three years old April 11th, is well broken; can show better than a three-minute gait. Price, \$500. Address E. P. LATROFF, Hollister, Cal.

The Handsome and Sound Stallion

CRESCO WILKES 2:10¾.

Record Made as a Four-Year-Old in a
Winning Race Against Aged Horses.

Having a three-year-old full brother to this stallion, I offer Cresco Wilkes for sale. He is a bay with black points, has fine conformation and is all right every way. He weighs 1,200 pounds. Last year he was started without proper preparation against Sir John S. 2:04½, Miss Georgie 2:08½ and others at Pleasanton, and was separately timed the first heat in 2:08½. In condition, he should pace a mile in 2:06. He is now seven years old, and in competent hands has a good earning capacity in the stud or on the track. Cresco Wilkes was sired by Nutwood Wilkes 2:16½, sire of John A. McKerron 2:04½, etc., and his dam is Allie Cresco 2:13½, by Cresco 4908, sire of five in the list. He can be seen at my place in Alameda. For price and further particulars apply to

I. L. BORDEN,

DEL CORONADO 2:09³/₄

CARLOKIN 2:13¹/₂

COPA DE ORO 2:07¹/₄

Del Coronado 2:09³/₄

Reg. No. 45122. By McKinney 2:11¹/₄, dam Johanna Trust by Thos. Rysdyk 2:28. Winner of the fastest 3 heats ever trotted by a stallion in California. Winner first premium at the California State Fair 1907. Winner Blue Ribbons, Horse Shows at Los Angeles Fiesta, Horse Show 1904 and first prize at both the Pasadena and Los Angeles Horse Shows 1906. 15.3 hands, weighs 1150 lbs.

Unbeaten on the Track and in the Show Ring.

Carlokín 2:13¹/₂

Reg. No. 36458. By McKinney 2:11¹/₄, dam, the great brood mare, Carlotta Wilkes (dam of 4 standard performers); second dam, the great mare, Aspasia (dam of 3 standard performers); third dam Miss Buchanan (dam of 1). There are no better blood lines than those contained in Carlokín's pedigree. He is related to all the royal families of the Wilkes tribe, the greatest of all race-winning families.

Copa de Oro 2:07¹/₄

By Nutwood Wilkes 2:16¹/₄, dam Atherine 2:16¹/₄ by Patron 2:16¹/₄ (son of Pancoast 2:21¹/₄ and Beatrice, dam of Prodigal 2:16¹/₄); second dam Athene, etc. He is a beautiful light bay stallion, stands 15.3¹/₂ hands, weighs 1100 pounds. He is one of the finest individuals ever seen on the California Circuit. He was one of the gamiest and best horses out 1907. He is a typical show horse and paces without toe weights or hopples. His breeding is ultra-fashionable. The combination of Wilkes-Nutwood-Patron-Pancoast-Harold and Pilot Jr. blood is unequalled by any other sire in the United States, and it is a foregone conclusion that next year this great horse will get a mark of 2:02 or better. He will be allowed to serve but 15 mares during this season.

Murray M. (3) 2:14

By Hambletonian Wilkes 1679, dam Anna Belle 2:27¹/₄ by Dawn 2:18³/₄. Winner Pacific Breeders Futurity, 1904, \$6000.

The above horses will make Season of 1908

Great Spring Sale

of

Trotters and Pacers

MARCH 12TH, AT 1 P. M., SHARP,

at

Agricultural Park, Los Angeles, Cal.

Mr. W. A. Clark Jr. will sell that good young trotter **Buck**, three-year-old record 2:20¹/₄, trial record in race 2:16¹/₄. **Beniah**, a four-year-old pacing mare, matinee record 2:24, trial 2:16. **Liberty Song**, four-year-old trotter, matinee record 2:27, trial 2:23¹/₄. **Chiquita**, three-year-old trotting filly, trial 2:34¹/₂. Three two-year-olds and two yearlings by Highland C. 2:19¹/₄, entered in all the Futurities on this Coast and in the East. Six broodmares in foal to Bon Voyage 2:12¹/₄ and Highland C. 2:19¹/₄.

Chas. Saddler will sell **Zoe**, a two-year-old by Zombro; also **Charlie Wilkes** by Nutwood Wilkes, with a matinee mark of 2:26, and a trial of 2:24¹/₄; can step a mile in 2:20 now, with less than three months' training; a four-year-old.

Mr. Christopher will offer his phenomenal trotter **Zombroeta**, who trotted a mile in 2:13¹/₄ at the last matinee, and is predicted to be a 2:06 trotter this year. Also his fast pacer **Bancho del Paso**, with a trial of 2:11¹/₄; also **Direct Maid**, with a trial of 2:20, a four-year-old.

A fine pair of five-year-olds, fine drivers, mares; one of them by Zombro and the other by Warspite. They are both prize winners, black as a crow, 15.2 hands high.

Also one fine green trotter by McKinney.

There will be thirty-one head in all, and every one of them shows speed.

A class of horses of this kind has never before been offered for sale in California. There is lots of speed and lots of class.

There will also be sold our Speed Carts, Buggies, Harness, Boots and Blankets.

ED. SMITH, Auctioneer.

\$7000 Guaranteed Stakes and Added Money \$7000
